SESSIONAL PAPERS.

ARRANGED NUMERICALLY.

CONTENTS OF PART I.

- No. 1 ... Public Accounts of the Province of Ontario for the year ending 31st December, 1875 ; also Statement of Receipts and Expenditure for 1876.
- No. 2 ... Report of the Inspector of Asylums, Prisons and Public Charities, for 1876.
- No. 3 ... Report of the Normal, Model, High and Public Schools of Ontario, for 1875.

CONTENTS OF PART II.

- No. 4 ... Report of the Commissioner of Agriculture, for 1876.
- No. 5 ... Report of the Commissioner of Public Works, for 1876.
- No. 6 ... Report from the Librarian of the Legislative Assembly on the state of the Library of Parliament.
- No. 7 ... Return, showing in detail, all property come to the hands of the Ontario Government, or any officer thereof representing the Crown, belonging to the late Andrew Mercer, of Toronto, showing amount of the personal estate, specifying of what the same consists ; amount of real property, stating value and where situated ; amount realized for the sale or transfer of said property ; amounts in detail paid out for law costs or other expenses, showing to whom paid and on what authority ; a statement showing where money and securities of said estate are now deposited, and in whose custody.
- No. 8 ... Estimates for the services of the Province for the year ending 31st December, 1877, and for balance to complete the services of 1875.
- No. 9 ... Tabular statement of Railways of Ontario, showing in detail—
- (1.) The number of miles authorized by Charter, the number of miles constructed, the number of miles under contract, the number of miles for which aid has been granted by Order in Council.
 - (2.) The Capital authorized by Charter, the amount of stock actually and *bona fide* subscribed, the amount paid on such stock.
 - (3.) The amount of Municipal Bonuses.
 - (4.) The average cost per mile of such Railway ; the total cost of such Railway, including rolling stock.
 - (5.) The amount per mile authorized to be paid from the " Railway Aid Fund," or " Railway Subsidy Fund ;" the amount actually paid ; also, any special conditions in the Order in Council.

No. 10 ... Municipal Loan Fund Surplus Distribution Schedules, showing the objects to which the Fund has been appropriated by By-laws, and the payments made upon the same, to the 1st November, 1876.

No. 11 .. Report of the Commissioner of Crown Lands for 1876.

No. 12 ... Report of the School of Agriculture, and Experimental Farm.

CONTENTS OF PART III.

No. 13 ... Report of the School of Practical Science.

No. 14 ... Return of the number of civil and criminal cases entered for trial at the several Assizes since January, 1874 ; the number of cases tried or otherwise disposed of ; and the number of remanets and criminal cases kept over at each Assize. The number of rules for new trials argued or otherwise disposed of and enlarged, and the number of other rules, special cases, demurrers argued, or otherwise disposed of during each term of the Court of Queen's Bench and Common Pleas, since Hilary Term, 1873, and the number of rules, demurrers, and other cases argued and disposed of in the said Courts by a single Judge, under section 19 of the Administration of Justice Act, 1874. The number of Bills filed, and decrees and orders issued in the Court of Chancery since 1870 ; the number of cases heard or otherwise disposed of on Circuit at each Chancery Sitting and in Court at Toronto, and the number of cases reheard during the same period.

No. 15 ... Return, showing the number of cases tried by Jury in the several Counties and Cities in this Province, in the years 1874 and 1875, and the number tried by Judges without the intervention of a Jury, distinguishing Criminal from Civil. The amount of expenditure for Jury purposes in the several Counties and Cities for the same years, giving separately the amounts paid to the Clerks of the Peace, amounts paid to electors, amounts paid to Sheriffs for summoning, and amounts paid to Grand and Petit Jurors respectively for attendance. Also the amounts received by Treasurers from Deputy Clerks of the Crown for Jury fees.

No. 16 ... Report of the Registrar-General of the Province of Ontario, for the first half-year of 1876

No. 17 ... Abstract of Election Expenses incurred by or in behalf of any candidate at the last general and subsequent elections, giving the name of the agent or agents of each such candidate as published by the Returning Officer in the several constituencies of the Province. (*Not Printed.*)

No. 18 ... Report from the Queen's Printer as to the disposal of the Ontario Statutes for 1876. (*Not Printed.*)

No. 19 .. Detailed Statement of all Bonds and Securities recorded in the Provincial Registrar's Office since the last Return, submitted to the Legislative Assembly upon the 10th December, 1875. (*Not Printed.*)

No. 20 ... The draft of the Revised Statutes of Ontario, together with the Third Report of the Commissioners for Consolidating the Statutes.

No. 21 .. Statement of business transacted by the London Life Insurance Company, for 1875. (*Not Printed.*)

No. 22 ... Return of Correspondence between the Government of the Dominion of Canada and that of the Province of Ontario, on the subjects of Escheats and Forfeitures.

- No. 23 ... Papers and Correspondence with respect to the Depository Branch of the Education Department ; also Special Report.
- No. 24 .. Return from each of the Division Courts of the Counties of York, Oxford, and the United Counties of Northumberland and Durham, from the first day of October, 1875, to the thirty-first day of March, 1876, inclusive ; setting forth the total number of suits entered, exclusive of the interpleader suits ; garnishee causes and transcripts of judgments received from other Courts ; total amount of claims thus entered, total amount of transcripts of judgments received from other Courts ; number of interpleader Suits entered ; number of judgment Summonses issued ; number of garnishee causes entered (before judgment) ; number of garnishee causes entered (after judgment) ; total amount of garnishee causes entered (before judgment) ; number of instances in which the Clerk has entered judgment under the second Section of the Division Courts Act of 1869 ; number of causes in which the Judge has given judgment ; number of transcripts of judgments from other Courts ; number of summonses received from other Courts for service ; the names, residence and occupation of the Clerks' sureties in the bond to Her Majesty, under the twenty-fourth section of the Division Courts Act ; amounts yet due on stamps if any there be ; total amounts of moneys paid into Court, and which remained unclaimed for six years on the 30th day of September last, amount of fines or forfeitures ; how many sittings of the Court ? How many returns have the Bailiffs of the Courts made under Rule 93, Form 126 ? total amount of suitors' money paid into Court ; total amount of suitors' money paid out of Court ; total aggregate of Clerk's and Bailiff's fees in the above suits.
- No. 25 ... Report of *L'Institut Canadien Français de la Cité d'Ottawa.* (Not Printed.)
- No. 26 ... Return, showing the number of High Schools in operation during the year 1876 ; number and location of such schools as have been ordered to be closed during the present year, and the reason of such closing.
- No. 27 .. Return, exhibiting the amount expended by the Government of Ontario during and since the summer of 1868 up to the present time on Colonization Roads in the District of Algoma (other than in that part of the District known as the Grand Manitoulin Island), showing the different roads made or undertaken, and the sums expended thereon each year.
- No. 28 ... Report of the Inspector of Division Courts for the Province of Ontario, for the year 1876.
- No. 29 ... Copy of Contract under which the Printing of the House and of the Public Departments is being performed ; also copies of all correspondence, Orders in Council, or other documents relating to an alteration in the said Contract.
- No. 30 ... Report of the Ontario School of Art. (Not Printed.)
- No. 31 ... Statement of all property belonging to the Endowment of the University of Toronto, University College, and Upper Canada College ; Statement of the income derived from said property from 1867 to 1876 inclusive, showing separately the income of each year ; also, the annual expenditure in detail of said funds respectively during the same period.
- No. 32 ... Copies of the Minutes of all meetings of the Senate of the University of Toronto, held during the year 1874, 1875 and 1876, relating to the affiliation of Medical Schools in the University of Toronto.

- No. 33 ... Report of Commissioner of Agriculture on the Products, Manufactures, &c., of Ontario exhibited at the International Exhibition, Philadelphia, 1876.
- No. 34 ... Annual Return of the Ontario Mutual Life Assurance Company, for the year ending January 20th, 1877. (*Not Printed.*)
- No. 35 ... Correspondence between the Government of the Dominion and the Government of Ontario relating to the transfer of the River Trent Works to this Province by the Dominion Government.
- No. 36 ... Papers relating to the Rockwood Asylum.
- No. 37 ... Correspondence relating to appointments to the Magistracy of Essex. (*Not Printed.*)
- No. 38 ... Correspondence respecting claims made to the reward offered for the apprehension of the Murderers of Thomas Scott.

CONTENTS OF PART IV.

- No. 39 .. Correspondence regarding money received by the late Judge Wilson.
- No. 40 ... Copies of the Reports made by the Provincial Secretary and the Inspector of Prisons, regarding the internal management of the Central Prison, as the result of any investigation by them, together with a copy of the evidence taken upon the investigation.
- No. 41 ... Return of Correspondence and Papers relating to the following Railways :— Hamilton and North Western; Belleville and North Hastings; Credit Valley; Erie and Huron; Huron and Quebec; Kingston and Pembroke; Lake Simcoe Junction; London, Huron and Bruce; L'Orignal and Caledonia; Midland; Montreal and City of Ottawa; Norfolk; North Simcoe; Prince Arthur's Landing and Kaministiquia; Prince Edward County; South Western; Stratford and Huron; Toronto, Grey and Bruce; Victoria; Wellington, Grey and Bruce; Whitby and Port Perry.
- No. 42 ... Return of all Licenses granted for the manufacture or sale of Spirituous Liquors for 1875 and 1876. (*Not Printed.*) Also, Report of the Provincial Secretary, on the working of the Tavern and Shop License Act, for the year 1876.

NINTH
ANNUAL REPORT

OF THE

Inspector of Asylums, Prisons, &c.,

FOR THE

PROVINCE OF ONTARIO.

OFFICE OF THE INSPECTOR OF ASYLUMS, PRISONS, &c.

Toronto, November, 1876.

To His Excellency, the Honourable DONALD ALEXANDER MACDONALD, Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR EXCELLENCY:

As required by the Statutes under which I hold my appointment as Inspector of Prisons and Public Charities, &c., for the Province of Ontario, I have now the honour to lay before you my Ninth Annual Report respecting Asylums for the Insane, and the various Prisons, Reformatories, Hospitals, and Charitable Institutions subject to my inspection, being for the official year ending 30th September, 1876.

In my Reports of preceding years, I have had occasion to draw attention to the increasing demand for Asylum accommodation for insane and idiotic persons, and in my last year's Report I made recommendations for such provision as would meet the immediate requirements of the Province in this respect. That part of my recommendations relating to the conversion of the Inebriate Asylum at Hamilton into an Asylum for Insane, and the buildings at Orillia into an Asylum for Idiots, has been carried into effect. This has relieved the immediate pressure upon the Asylums, and has enabled me to remove many of the more urgent cases from Gaols, where they have hitherto been of necessity confined, owing to the lack of Asylum accommodation.

The Asylum at Hamilton has been utilized entirely for the reception of chronic cases of a mild character, the structure not being calculated for violent patients. Transfers have therefore been made of such patients from Toronto, Kingston, and London Asylums,

who have been long under surveillance, and are known to possess no dangerous proclivities. For the present, therefore, Hamilton Asylum cannot be classed as a receiving Asylum, and can only be used to relieve the overflowing population of the other Asylums. This is in some degree to be regretted, as the cost of transfer is a considerable addition to the annual charge for maintenance, which, owing to the small size of the Institution, is already too large. I have, therefore, recommended such additions as will enable this Asylum to be placed upon the same footing as other Asylums, for the reception of patients, and for economical administration.

The Asylum at Orillia has opened with a capacity for receiving 150 idiots. There have been removed to it the patients from the Idiot Branch of London Asylum, and all the cases from the Common Gaols, thus relieving the latter Institutions, for the present, from all insane or idiotic inmates. For the first time since I have occupied my position as Inspector of Asylums, I am able to report that the Asylum accommodation is equal to the current demand made upon it. I wish that I were able to believe that this relief is more than temporary, but careful consideration of all statistics upon the subject that I have been able to procure, has convinced me that it will not be safe to consider that sufficient accommodation has been provided until at least 2,800 beds are at the disposal of the Province for persons of unsound mind.

In my Report of last year, I had the honour to draw your attention to the expressed opinion of some of the greatest specialists in insanity to the effect that the disease in its earlier stages was, in most cases, curable, but that neglect, or lack of proper treatment, rendered it in many instances chronic and incurable, basing upon this argument my recommendation that the Asylum accommodation should be rather in advance of, than behind the possible demand that would be made upon it. I also pointed out that although, according to the census returns of 1871, there is one person of unsound mind to every 397 of the population, the Asylum accommodation provided was only equal to one in every 909 of the population. This state of things has been so far improved by the opening of Hamilton and Orillia Asylums as to render the ratio of accommodation in proportion to the population equal to one in every 810. But comparison with other countries shows that in England the public accommodation is as one in every 423; in Scotland, one in every 543; and in Ireland, one in every 482. Taking the basis of England as a guide, we should, therefore, require 3,831 beds; of Scotland, we should require 3,000; or of Ireland, 3,583 beds, or 1,000 beds in addition to our present number, if the minimum is taken as an example. This consideration has led me to urge upon the Government the necessity for augmenting our Asylum accommodation at the earliest possible date, that speedy admission may be awarded to every case of insanity as soon as it develops itself, and that the accumulation of chronic cases from a lack of proper treatment may, in future, be reduced to a minimum. When it is considered that out of the present Asylum population, only 350 are considered as curable cases, and that the remainder, 1,462, are a life-charge upon the Province, the importance of this recommendation is sufficiently manifest.

The practice that obtains in some countries of lodging the chronic insane in work-houses and other local municipal establishments, is now almost universally condemned, and steps are being taken to provide accommodation more suited to the wants of that un-

fortunate and ever increasing class of the population. In some portions of the United States, Asylums for their lodgement exclusively, are maintained, or are being erected; and in Great Britain, in order to overcome the evil effects of keeping the pauper insane in workhouses, Parliament has authorized the payment to the various unions of four shillings sterling per week for every insane patient that is removed from a workhouse to a properly organized Asylum.

My experience and observation have led me to the conclusion that the erection of inexpensive but comfortable cottages upon the land attached to our main Asylums, is by far the best method that can be devised of providing accommodation for the chronic insane. Not only are increased domestic comforts and more home-like surroundings secured to the patients by the adoption of this plan, but the uncertainty and risk of determining when the mental disease of a patient has developed into the incurable stage, are obviated by the continued observation of a skilled psychologist. I have, therefore, recommended the extension of the cottage system, for the provision of Asylum accommodation for the Chronic Insane, at all Asylums where there is a sufficient quantity of land to permit of it without endangering that quietness and seclusion which are the prime requisites of all organizations for the care of the insane.

There still remains to be carried into effect the recommendation for the establishment of a Training School for Idiots. It has been found improper, as well as difficult, to combine an Asylum for adult Idiots and a Training School for juvenile Idiots under one roof; the example of, and association with, untrained adult Idiots being detrimental to the education of those who are still capable of receiving instruction. It is respectfully recommended, therefore, that a separate building shall be erected, if the area of land will admit upon the same grounds, and under the same general management as the Drillia Asylum, where children of tender years can be received and taught such habits as to render possible for them, life in the domestic relation. Such an institution would be an inestimable boon to many afflicted families, and would diminish the number of those who will otherwise require to be provided for by the Province.

The same argument that proves the necessity for extended accommodation in Asylums for Insane, applies also to the Institutions for the Education of the Deaf and Dumb and the Blind. Without education many of these unfortunate persons are to a great extent irresponsible beings, and must remain for the term of their lives a charge upon the Province; with education their resources are developed, and they are in most cases rendered capable of self support. Apart from the great moral ends to be achieved by their education, there is, therefore, the argument of economy to recommend the enlargement of the buildings to such an extent as to meet the requirements of the Province. To this end I have made certain recommendations which I trust will receive favourable consideration at the hands of the Government and the Legislature.

As indicated in my last Report, I have still to record the increasing number of the criminal population of Ontario. Lack of employment in this country and the United States has led to the usual consequences of idleness, drunkenness, and crime. But apart from this natural sequence upon want of work, there is no doubt but that the lapse of the Extradition Treaty, and other circumstances, have caused a large influx of criminal population from the United States, and most of these are of the expert or professional class.

Many of those who have drifted into our Gaols during the year have a recognised history in the annals of crime, and are well known to the police. It is to be regretted that some provision cannot be made for the stoppage of this influx, and for a more thorough police supervision of all suspected criminals who find their way into the country. Reference to the tables of statistics will show that crimes of violence are alarmingly on the increase, and that the number of habitual criminals, who have been committed for more than the third time, has also increased in undue proportion. The large accession to the numbers of committals of vagrants leads me to renew my recommendation of last year that this class should be utilized on county or corporation works, or employed on farms attached to County Gaols. Such employment would be, both morally and physically, a benefit to the prisoners themselves, and would largely decrease the cost of their maintenance. There is no reason, in my opinion, why every prisoner, who is physically capable, should not earn his livelihood during his incarceration, and thus utilize that time which, under the present system, is a burden to himself and a direct loss to the community.

The large and increasing number of female criminals leads me again to urge upon the Government the advisability of establishing an Industrial Prison for Females. Expiating their sentences in Common Gaols, in most cases, in complete idleness, the Gaol is too often looked upon as a convenient refuge rather than as a place of punishment; and the lack of classification too frequently confirms in crime and disgrace an unfortunate girl who under stricter discipline and moral influences would be reclaimed from crime and vice. Such an Industrial Reformatory need not be costly in construction, and if located in a proper position should be almost if not entirely self-sustaining.

I have to draw attention to the fact that the Provincial Reformatory is now full, and that an extension of space will be required in that Institution.

The numerous escapes that have taken place from Common Gaols during the past year point to the necessity for the assumption of more direct control over these Institutions by the Government. At present there is a divided authority. Appointments are vested in Sheriffs, and salaries are fixed by County Councils, too often at so low a rate that it is impossible for the Sheriff to procure suitable officers. The escapes of the past year are, in most instances, due to want of knowledge or culpable neglect of duty on the part of subordinate gaol officials, and in others to structural defects and deficiencies that I have sought in vain to have remedied or supplied by County Councils. The evil results of these defects and anomalies can only be remedied by the adoption of a uniform system of government in the Common Gaols, and the strict enforcement of wholesome regulations by one controlling authority.

While the operations of the "Charities Aid Act" has removed many anomalies in the distribution of aid to the local charities of the Province, it has to some extent increased the amount of the appropriation that it is necessary to ask from Parliament on that account. It cannot, however, be urged that a small additional sum expended in the relief of the sick or destitute, or in the reclamation of vagrant children, who would doubtless otherwise add to the criminal population of the country, is either ill-bestowed or extravagant. Were complete statistics published of the good work annually accomplished by the local charitable institutions of Ontario, the history would surprise the friends and confound the enemies of those institutions.

I beg to append a summary of the Institutions placed under my supervision as Inspector, and to draw your attention to the increasing duties and responsibilities of my office, requiring for its effective management an increase in the staff of the Department, which consists at the present time of myself and two clerks only.

The Asylums, Prisons, and Public Charities of Ontario may be divided into three classes as follows:—

Firstly. Institutions founded, supported, and entirely controlled by the Government.

Secondly. Institutions founded by Corporate bodies and private individuals, and only partially supported by the Province, but whose affairs are under the inspectorial supervision of Government.

Thirdly. Institutions founded and supported jointly by the Government and the various counties of the Province, over which the Government, in certain relations, exercises direct, and in others, supervisory control.

The Institutions comprised in the *first* class are as follow:—

Four Asylums for the Insane,

One Asylum for Idiots,

One Institution for the education of the Deaf and Dumb,

One Institution for the education of the Blind,

One Central or intermediate Prison,

One Reformatory for Juvenile Offenders.

The Institutions of the *second* class comprise the following, viz:—

Twelve General Hospitals,

Seven Houses of Refuge for Indigent Persons,

Three Magdalen Asylums,

Seventeen Orphan Asylums.

The Institutions of the *third* class are as follows, viz:—

Thirty-six County Gaols,

Two District Gaols.

These eighty-six Public Institutions are, by law, placed under my supervision and inspection as *Inspector of Prisons and Public Charities*.

With the exception of the establishments named in the second class, there are no local Boards or Directors associated with the Government or the Inspector in the management of these Public Institutions.

In respect to the nine establishments embraced in the first class, I not only exercise supervision and inspection, but have also direct administrative control over every branch of their affairs.

My duties as Inspector in regard to the Institutions named in the second class, are chiefly of a supervisory and inspectorial character.

The management of the County Gaols is, in some respects, under County Councils; but, nominally, all matters pertaining to their construction and structural arrangement, in the first instance, and their discipline and internal economy after occupation, devolve upon the Inspector.

The cost for the year ending 30th September, 1876, of maintaining such of these In-

stitutions as are owned by the Province and controlled by the Government, and of aiding in the maintenance of the remainder, is shown in the following summary, viz. :—

Asylums for the Insane at Toronto, London, Kingston and Hamilton, (Orillia not having been opened until the 20th September)	\$241,380 57
Institution for the Deaf and Dumb, Belleville.....	33,517 37
Institution for the Blind, Brantford	24,033 54
The Central Prison, Toronto.....	43,117 00
The Provincial Reformatory, Penetanguishene.....	23,324 43
<i>Total cost of Government Institutions.....</i>	<u>365,372 91</u>
Aid to 39 Hospitals and Charitable Institutions.....	65,495 07
* Cost of maintaining Common Gaols	130,461 80
	<u>\$561,329 78</u>

The revenue derived, for the same period, from the Institutions directly under the control of the Government was as follows :—

Asylums for the Insane..	\$22,556 06
Institution for the Deaf and Dumb, Belleville.....	1,912 00
Institution for the Blind, Brantford	551 48
*The Central Prison, Toronto, cash receipts.....	8,599 60
+The Provincial Reformatory, Penetanguishene	3,934 10
	<u>\$37,253 24</u>

* This sum includes the amounts paid by the municipalities for Gaol maintenance, as well as what was paid by Government out of the appropriation for the Administration of Justice; but as the books of the Treasury Department do not show these respective amounts in the aggregate, the information cannot at present be separately given.

• In addition to this amount the Canada Car Company owes \$6,730.50 for the labour of prisoners from the 1st July to the 1st October, which, under the terms of the new contract, has to be paid on the 1st January. Also the sum of \$14,690 24 for arrears incurred prior to entering upon the new contract, one-half of which is payable on the 27th January, 1877, and the other half on the 27th January, 1880.

† In addition to this sum the contractors owe the sum of \$1,127.87 for labour of boys, which amount has since been paid into the Treasury Department.

ASYLUMS FOR THE INSANE.

The following summary shows the number of persons of unsound mind that was under public accommodation, in the Province of Ontario, on the 30th September, 1876, and the manner in which they were distributed in the various Asylums on that day, viz:—

	Males.	Females.	Total.
Asylum for the Insane, Toronto	321	310	631
Asylum for the Insane, London.....	289	294	583
Asylum for the Insane, Kingston.....	174	163	337
Asylum for the Insane, Hamilton.....	82	120	202
Asylum for Idiots, Orillia.....	33	26	59
<hr/>			
Total number of Insane in Asylums.....	899	913	1812
Confined in Common Gaols.....	18	17	35
Insane Convicts in Kingston Asylum	27	2	29
<hr/>			
Total number under accommodation.....	944	932	1876

From the above summary it will be seen that there were 1812 persons of unsound mind in the Asylums of the Province at the close of this official year, as compared with 1650 on the corresponding day of the preceding year, and that the number of Insane persons confined in the Common Gaols had been reduced from 106 to 34, while the Insane convicts in the Kingston Asylum had increased from 23 to 29. The total number of Insane in Asylums and Prisons had been increased from 1779 to 1876.

That the rapid increase in the number of insane committed to Asylums may be clearly shown, I submit the following summary, giving the number that was under Asylum lodgement at the period of Confederation and at the close of each official year since that time, as follows:—

	Males.	Females.	Total.
Number remaining in Asylums 1st July, 1867	470	481	951
“ “ “ 1st Oct., 1868.....	481	511	992
“ “ “ 1st Oct., 1869.....	571	577	1148
“ “ “ 1st Oct., 1870.....	568	614	1200
“ “ “ 1st Oct. 1871.....	656	710	1366
“ “ “ 1st Oct., 1872.....	734	755	1489
“ “ “ 1st Oct., 1873.....	760	745	1505
“ “ “ 1st Oct., 1874.....	801	798	1599
“ “ “ 1st Oct., 1875.....	839	811	1650
“ “ “ 1st Oct., 1876.....	899	913	1812

The increase, as above indicated, in the number of insane remaining under accommodation at the close of each official year, depended not so much upon the development of mental disease, as upon the amount of accommodation that was provided from time to time for its treatment. For at no period since Confederation, nor for six years prior to that event, until the present year, was the extent of accommodation equal to the demand made upon it. For this reason the number of insane confined in Asylums only indicated, approximately, the proportion the entire number that that class bore to the population.

The increased number of insane persons that is shown to be under Asylum accommodation at the close of the present official year, as compared with the last, was provided for by the opening of the Asylums at Hamilton and Orillia, the former having capacity for 200 patients, and the latter for 150. The transfer of certain inmates from the old to these

new Asylums caused considerable changes in the distribution of patients, and for a short time temporarily reduced the populations of the Asylums at Toronto, London, and Kingston. These changes and transfers may be briefly summarized in their relation to each Asylum, and to the entire Asylum population, in the following way :—

The Asylum at Hamilton was opened in March last, and from that time to the close of the official year there were transferred to it from the Toronto Asylum 136 patients, from the London Asylum 45, from the Kingston Asylum 29, and one patient was admitted from a private house. The insanity of all these patients was reported by the transferring medical superintendents to be of a chronic and incurable character; besides, they were specially selected for transfer as being quite harmless and generally free from excitement.

The Asylum for Idiots at Orillia, was only opened on the 25th September; but in the five days that elapsed before the close of the official year, fifty-nine patients had been received into it. Of these, forty-two were transferred from the Idiot branch of the London Asylum, fifteen were transferred from gaols, and two were admitted from private houses.

At the Toronto Asylum the number of patients in residence, at the close of the year, was 631, as compared with 659 in 1875. This reduction was caused by the large number of transfers to the Hamilton Asylum, and a very considerable increase in the number of discharges as well as deaths. The admissions to this Asylum have been greater than in any former year of its history; and, from the number of applications that are being received, it is to be feared that every bed will be occupied before the close of the year.

At the London Asylum the population was reduced from 629 to 583, owing to the removal to the Orillia Asylum of the forty-two idiots that had been lodged in the detached house, and the transfer of forty-six incurable patients to Hamilton Asylum.

During the months of July and September, twenty-eight quiet and incurable patients were removed from the Kingston Asylum to Hamilton, which reduced the number of Ontario patients in residence at the close of the year to 337, as compared with 362 in 1875.

It is most gratifying to be able to report a very great diminution in the number of lunatics and idiots confined in the Common Gaols of the Province at the close of this year. On the 30th September, 1875, there were 106 of this class of persons confined in Gaols, while on the corresponding day of this year there were only thirty-five, or a decrease of seventy-one; and at the time of writing this Report, all proper cases of lunacy and idiocy have either been transferred to Asylums or steps are being taken under the provisions of the law for the accomplishment of that object. There are still, however, a few persons in custody whose unsoundness of mind is of such a character as to render Asylum lodgement unnecessary, some of whom will, doubtless, be discharged by the first courts having competent jurisdiction.

It will be noticed that the number of insane convicts in Kingston Asylum has increased from twenty-three to twenty-nine. This class of insane persons had originally been sentenced by the Courts of Ontario to the Kingston Penitentiary, but having become insane while serving out their sentences as criminals, they were transferred to this Asylum. If not restored to sanity at the expiration of their sentence they, of course, will remain in Asylum custody as Ontario patients. The indiscriminate association of these lunatic criminals with the ordinary patients sent by Ontario to this Asylum is most injurious to the latter, as well as unfair and unjust to their relatives and friends, and it is to be hoped that the negotiations which are now in progress for the acquirement of this Asylum by the Province will be successfully terminated at a very early day in order that the wrong may be remedied.

In addition to the insane thus reported to be under accommodation at the close of the official year, admission to Asylums had been awarded in twenty-three instances, but the patients had not been brought in up to the evening of the 30th September. There were also, on that day, seventy-eight applications registered, chiefly for the admission of idiots to Orillia Asylum, the largest proportion of whom will be admitted during the month of October.

To sum up, it is thus shown that there were 1977 lunatics, idiots, and persons of unsound mind under public accommodation, or of whom I had official cognizance in the Province on the 30th September, 1876, as follows :—

In Public Asylums	1841
In Common Gaols	35
Admission awarded	23
Applications registered, but awards not then made	78
	1977

It should be observed that the seventy-eight applications, above noted, are all of a recent date, and with few exceptions, are for proper subjects for admission. There are, in addition, a large number of old applications, made at a time when Asylum vacancies could not be obtained, and which have not been renewed. No doubt many of the persons named in these applications are now dead; some were committed to Gaols and afterwards transferred to Asylums under the warrant of the Lieutenant-Governor, and some have been restored to a sound mind, but the largest proportion, it is to be feared, have passed into a state of chronic and incurable lunacy, owing to the want of prompt and proper Asylum treatment. Many of the last-named class, after their friends had exhausted every effort to obtain Asylum lodgement for them and failed, as Asylum Superintendents must give priority to acute cases, are now, from time to time, being committed to Gaols, whence public opinion, expressed through the medium of Grand Juries and other sources, and ignoring all discriminating tests, very often compels their transfer to an Asylum.

While numerous applications for the admission of the chronic insane must be looked for as the natural result of the short-sighted policy of providing Asylum accommodation only when the pressure for it becomes so great that it cannot be withstood, still the fact must be recorded, that there is no sensible diminution in the number of ordinary applications although the commitment of lunatics to Gaols has been somewhat reduced. In fact, if the census returns of 1871 are to be relied upon, a falling-off in the demand for Asylum accommodation cannot be looked for at present.

The only corroboration that I can offer of the approximate correctness of the census return that 4079 persons of unsound mind were in the Province in 1871 is the relative proportion that these figures bear to the entire population, as compared with that of other countries. Taken, that the causes which produce insanity are about alike in the countries included in the comparison, it must be conceded that the Ontario returns in that relation are substantially correct. For in Ireland, statistical figures appear to prove that there is one person of unsound mind in every 298 of the population; in England one in every 372; in Scotland one in every 543; while in the Province of Ontario there would be one in every 397 of the population, which is somewhat below the average of these countries combined.

Whatever may be the causes of insanity, and how these causes operate in different countries is a phase of the subject that does not necessarily come within the scope of a report of this kind, for at best the conclusions arrived at must be more or less speculative according to the completeness of the statistics upon which such conclusions are based, and the depth of the scientific knowledge brought to bear in such research. It is more my duty and the aim of this Report to deal with the facts and figures embodied in the official returns made to me, and to present them together with my recommendations in relation to the subject, for the information and action of the Government and the Legislature.

Having therefore shown the extent of insanity in Ontario, we have now to examine into the extent and nature of the provision made for its cure or alleviation, in order that it may be ascertained whether the one is proportionate to the other. Before doing so, however, it is obviously important that we should know something respecting the nature of the unsoundness of mind in the cases of the 4079 so reported, and that its various forms should at any rate be approximately classified. In commenting upon this branch of the subject in my last Annual Report I pointed out the barrenness of the census returns in this respect. As all affected are returned under the one heading of "people of unsound mind," the classification is sufficiently broad to embrace every known feature of mental defectiveness, Lunacy, acute, chronic, and senile; Idiocy, congenital, and what may have been developed by disease, together with every shape and form of mental imbecility and weakness. It is much to be regretted that at least distinct columns were not made in the enumeration papers for lunatics and idiots. If, however, the United States return, in which these two classes are separately given, is accepted as a basis for such a classification of the

insane in this Province, the result would show that of the 4,079 persons of unsound mind 2,473 were lunatics, and 1,606 idiots.

The strict correctness of this classification is for our present purpose, only important in determining the extent of Asylum accommodation that should be provided for each class, for I take it for granted that all who have had experience in the care and treatment of these classes, agree that distinct and separate accommodation should be provided for each. The returns that have been made to this office would seem to prove, if the number of idiotic persons thus arrived at is even approximately correct, that a large proportion of them are harmless imbeciles, who may remain in the family relation without causing any very great degree of hardship or trouble to individuals. The care of this class of defectives by the Province would involve an enormous expenditure for suitable buildings, in the first instance, and for the maintenance of such idiots for all time to come. What proportion these harmless and inoffensive idiots bear to the entire number of that class, I am unable to determine, but as a matter of fact, nearly every municipality in the Province provides for the support of some of them, and a large number are being cared for by their relatives in private houses.

It is, however, clearly the duty of the State to undertake the care of such idiots as are in any way dangerous to life and property, or who are possessed of propensities of such an offensive character, as to injuriously affect the morals of the community. This, as I have endeavoured to prove in previous Reports, can be best accomplished by the establishment of a training school for idiots under fourteen years of age. By adopting this method, I am fully convinced, and the experience of some countries that have given the system a trial strengthens that conviction, that a very considerable proportion of this class, can, after a few years' instruction and training, be returned to the family relation, cured of the vices and propensities that otherwise would render them obnoxious and dangerous to families and the public. It will be apparent to all who are prepared to give this question the consideration it deserves, that the plan proposed is as commendable from the standpoint of public economy, as it undoubtedly is from a humane and philanthropic view of the subject. For it is an incontrovertible fact that if these idiots do not receive some such training and instruction in their youth, a large proportion of them will ultimately become a burden on the community for the remainder of their lives.

From the information I am possessed of, there are from 150 to 200 idiotic youths now in the Province, who are proper subjects for such an establishment. I would therefore, most urgently recommend that a training school for young idiots be founded and maintained as one of the public Institutions of the Province, and as a necessary adjunct to the existing organizations for the care and treatment of persons of unsound mind. None of all the institutions that have come into existence since Confederation, were more urgently required than the one now proposed, and, if not established, increased accommodation must necessarily be provided for adult idiots. This training school may be on the same grounds, but should be entirely isolated from the Asylum for adult idiots, as their objects are quite distinct and have nothing in common. The former should be eminently an educational institution, while the latter should be exclusively for the custody of such idiots as are unsafe and dangerous to be at large. For the last named purpose, the Orillia Asylum would, in all probability be sufficient for many years to come, provided proper discrimination is exercised in committing to it only the class of idiots mentioned, leaving the harmless and inoffensive ones to be provided for in private houses by their relatives, or if they are unable to do so, by the municipalities in which they reside.

Such being the scheme that I would recommend for the care and treatment of the idiotic portion of the community, I will now pass to the consideration of the question in its relation to lunacy. And at the outset, I would observe, that whatever doubts may exist as to whether the estimated number of idiotic persons is in excess of the actual number or not, there can be no doubt that the estimate of the number of lunatics in the Province—2,473—is, if anything, understated.

For many years preceding Confederation, and ever since that event up to the present time, with the exception of two short periods, the demand for Asylum accommodation has been greatly in excess of the supply. A short history of Asylum progress in the Province will prove the correctness of this statement, and may not be uninteresting.

Prior to 1850, there was no Asylum structure in this Province, especially

designed for the purposes of such an Institution, and temporary lodgement was provided for the insane by the occupation of the old gaol in the City of Toronto, and other houses of an equally undesirable character. On the 26th January, 1850, the Toronto Asylum was sufficiently far advanced to admit of occupation, when all the patients in the temporary lodgements referred to, were transferred to it. In a few years after the opening of the Toronto Asylum, the pressure for increased accommodation became so great, that, what is known as the Branch system was introduced, under which the quiet patients were transferred from the parent Asylum to Branches. The first building that was thus opened, was the University Branch, which was a detached building belonging to the Toronto University, and which furnished accommodation for about 75 patients. In 1859, another Branch was opened by the occupation of the Fort Malden buildings, which gave lodgement for over 200 patients, and in 1861, the Orillia Branch was opened, affording space for 120 more. From the year last-named up to the Confederation of the Provinces in 1867, no additional Asylum accommodation was provided, if we except Rockwood Asylum, a portion of which was completed and occupied by criminal lunatics, and transfers from the Gaols.

It would thus appear that the Province of Ontario, with a population of about 1,500,000 at the date of Confederation, had only Asylum accommodation for 1,000 patients, or one bed for every 1,500 of the population; whereas, the proportion of insane to the population, taking the census returns of 1871 as a basis, could not have been less than one in every 500. With this utterly inadequate amount of Asylum accommodation to start with, it is not to be wondered at, notwithstanding it has been nearly doubled since Confederation, that only within the present year could it be truthfully said that we had liquidated the arrearage of dethroned reason that was bequeathed to the Province of Ontario by Canada.

In 1868 there were upwards of 400 applications for admission registered, and close upon 100 lunatics were confined in the Common Gaols at the close of that year. This condition of things rendered it imperative that immediate steps should be taken to provide additional Asylum accommodation, and to this end an arrangement was effected, whereby the Dominion Government allowed the Province to occupy 150 beds in the Kingston Asylum, charging \$143 per annum for the support of each patient thus sent. In this manner the most urgent cases were provided for by the transfer of 161 lunatics from the Gaols to the Kingston Asylum in one year. The east and west wings of the Toronto Asylum, which had been much delayed in the work of construction, were pushed forward with energy, and the former was ready for occupation in October, 1869, and the latter in September, 1870. These two wings afforded space for about 200 patients, but as the University authorities had been pressing the Government to obtain the re-occupation of the building that was then being used for a Branch Asylum, it had to be abandoned for Asylum purposes, and patients were removed to the east wing, which reduced the additional accommodation thus furnished, from 200 to 125 beds. In 1869 the Legislature voted an appropriation to commence the London Asylum, and the structure was pushed forward, much to the disadvantage of the building, with such energy that it was ready for patients in November, 1870, with space for 500 beds. Owing, however, to the dilapidated condition of Malden Asylum, and the expensiveness of the organization at Orillia, these two Asylums were abandoned, and the patients transferred to London. As these transfers numbered 363, the additional accommodation provided by the opening of the London Asylum was really only 140 beds. During 1870, another wing was completed at the Kingston Asylum, and the additional accommodation—100 beds—thus provided, was placed by the Dominion Government at the disposal of the Province on the same terms as before referred to.

It is thus shown that in three years from the date of Confederation the Asylum accommodation of the Province was augmented by 500 beds, yet the demand was still unsatisfied. During these three years no less than 756 insane persons had been committed to the Gaols, and the most urgent cases were removed to Asylums; notwithstanding this, no sensible diminution took place in the number of applications for admission under the ordinary process. It was clear, therefore, that the provision of more space should be proceeded with without delay, and in consequence of this, two detached buildings were erected during the next two years on the grounds of the London Asylum, with accommodation for 100 patients. During the years 1874 and 1875 no additional buildings were

erected, in consequence of which no less than 326 insane persons were committed to the Gaols during 1875, and 106 were reported to be in Gaol custody on the 30th September of that year. In view of this, and in order to obtain increased accommodation at once, it was recommended in my last Annual Report that the buildings which were in course of erection at Hamilton, for an Inebriate Asylum, should be taken for an Asylum for the Insane; and that the Orillia Asylum, which had been abandoned on the opening of the London establishment, should be fitted up and re-occupied for the custody of idiots. This recommendation was acted upon, and both institutions have been opened during the past year, whereby the Asylum accommodation of the Province has been increased by 350 beds. And for the first time during the past ten years can it be said that the demand for Asylum accommodation has been satisfied by the provision of the requisite amount of space.

This short history of the progress of Asylum construction in this Province, and which covers the period from which the first Asylum was erected up to the present time, may be briefly summarized in the following chronological form, viz.:-

1850. Toronto Asylum, established. Capacity	455
1856. University Branch " "	75
1859. Malden Branch " "	235
1861. Orillia Branch " "	120
1867. Kingston Asylum occupied by 118 patients, whose maintenance after Confederation became a charge upon Ontario	118
<i>Total accommodation at Confederation</i>	<u>1003</u>
1868. Arrangement with Dominion Government for 150 additional beds in Kingston Asylum	150
1869. East wing of the Toronto Asylum opened. Capacity	100
1870. West wing " " "	100
1870. Additional space arranged for in Kingston Asylum.....	100
1870. London Asylum established. Capacity ..	540
1871. Branch Asylum for idiots at London Asylum opened.....	36
1873. Cottages for chronic insane " "	60
1876. Hamilton Asylum opened. Capacity	200
1876. Orillia Asylum for idiots re-opened. Capacity.....	150
	<u>2439</u>
Deduct University Branch abandoned in 1869.....	75
Orillia Asylum abandoned in 1870, but afterwards re-opened	120
Malden Asylum abandoned in 1870	235
	<u>430</u>
<i>Total Asylum accommodation 30th Sept., 1876</i>	<u>2009</u>

If we deduct the Orillia Asylum accommodation from the above aggregate, it will be seen that there is at the present time lodgement for 1859 lunatics, and if we deduct the idiots now in Orillia from the entire number of persons of unsound mind that were under accommodation, excluding those that had been awarded beds, but had not been sent to the Asylum, it will be found that at the close of this official year there were only 77 vacant beds to supply the demand, and at the time of writing this report that number of vacancies has been reduced to 38. In all probability then, this accommodation will be entirely exhausted within the next two months; and under the most favourable circumstances, additional space cannot be provided in less than eighteen months. Notwithstanding the progress that has been made during the past six years in bringing the Asylum accommodation up to the wants of the Province, it must be borne in mind that we are still far below the amount furnished in other countries, in proportion of the number of persons of unsound mind, to the entire population. In Ireland, one person to every 482 of the population is provided with lodgement; in England, one to every 423, and in Scotland, one to every 543, while in Ontario, there is at the present time only one in

of the population, as returned in 1871. These figures warn us that we cannot remain stationary in this work; but must provide for the *immediate* future.

In my last Annual Report, in drawing attention to the great necessity that then existed for providing increased accommodation, I pointed out, and quoted eminent authorities, to show, that the lack of immediate treatment frequently rendered curable cases of insanity incurable and chronic; and that in consequence, the burden of the Province was being continually added to in the number of life residents of the Asylums. In commending, on this occasion, that Parliament be asked at the coming session to make provision for additional lodgement, I cannot too strongly press this view of the subject, fully believing that even upon the ground of public economy, it will be found to be judicious.

The recommendations I made then for increased accommodation were as follows:—

1st. The conversion of the Inebriate Asylum in Hamilton into an Asylum for the sane, in order that the immediate demand might be supplied.

2nd. The erection of two additional groups of cottages, and the enlargement of what known as the idiot branch at the London Asylum.

3rd. The extension of the Toronto Asylum, and the conversion of its present detached hospitals into wards for paying patients.

4th. The acquisition of Rockwood Asylum and extension of its present capacity, with view to giving accommodation to 500 patients.

5th. The re-construction and conversion of the Orillia buildings into an Asylum for 50 idiots.

I shall take up in consecutive order these recommendations, adding thereto the suggestions which a year's experience dictates as necessary, in order to complete the proposed system.

1st. The conversion of Hamilton Asylum has been accomplished, but owing to the structure not having been originally intended for the reception of the Insane, many difficulties have been met with. In the first place, the lath and plaster partitions prohibit the confinement of any but the mildest type of chronic patients; secondly, the space is not suitably arranged or distributed for insane patients; and thirdly, the number that can be lodged is too small for the staff required for such an Asylum. I have therefore to recommend that two additional wings for patients, and an extension in the rear for domestic purposes be added to the present building, increasing the accommodation to 460 beds. A considerable portion of the space thus obtained must be single rooms, with brick partitions throughout, in order that the Asylum may be constituted a receiving Asylum for all classes, instead of a branch, as it now is, for the reception of chronic patients from the other Asylums. In pursuance of this recommendation I have submitted sketch plans showing the proposed additions, the details of which are referred to in the separate Report upon this Asylum. Under any circumstances it will be necessary that coal-sheds, stabling for cows, and various other out-buildings, together with fences to enclose the grounds and garden plot, should be provided for in the estimates of the ensuing year. It is also urgently necessary that houses should be built upon the premises for the Medical Superintendent and Bursar, and cottages for the Engineer and Farmer.

2nd. No steps have been taken during the present year for the extension of London Asylum, which owing to its situation and the extensive grounds surrounding it, offers better conditions for extension than any other in the Province. In my Report of last year I recommended the erection of two additional groups of cottages for the chronic insane, and the extension of the Idiot branch so as to accommodate 75 patients. I have now to renew my recommendation as far as the cottages are concerned, and to advise that the branch building be enlarged so as to accommodate 140 violent and epileptic patients, instead of 75. Owing to the difficulties of classification and the crowded state of the main building, it has hitherto been very difficult to prevent the noisy and violent patients from annoying and thus retarding the recovery of the less troublesome class. The extension of this branch, and the increase of separate rooms afforded thereby, would enable the Superintendent to remove all refractory and dangerous patients from the main building to a situation where they could be isolated, and where the structural arrangements and administrative details could be framed for their special requirements.

Three years' experience of the working of the cottage system for the chronic insane, at

the London Asylum, has fully convinced me that no better method can be devised for the lodgement of this class of our insane population. Sketch plans of these additions have also been submitted to Government. The buildings proposed are all of the very plainest description, and can be constructed at a cost not exceeding \$450 per head of the population they are designed to accommodate. In addition to the extension of space, there are also many other matters which urgently require attention at this Asylum, viz.: repairs to roof of the main building; new brick buildings for coal sheds; raising height of furnace chimneys; alteration of window sashes, &c., all of which are more minutely detailed in the separate Report upon this Asylum, in another part of this volume.

3rd. In my Report of last year, I recommended extensive changes and additions in the Asylum for the Insane, Toronto, but the rapid growth of the city in the direction of the Asylum, and the consequently confined space available for extensions, leads me to doubt the advisability of doing more than is absolutely necessary to keep the Asylum in repair, and for the comfort and security of the patients; I have, therefore, only to recommend that an appropriation be asked for the purpose of renewing paint and flooring, and the conversion of two of the ordinary wards into intermediate wards for the lower class of paying patients. The furniture of the Asylum has, in part, been in use for nearly a quarter of a century, and has become so worn out that nothing short of renewal will bring the Asylum, in this respect, to the standard of American Asylums. The limited space available for the residence of the Medical Superintendent within the Asylum, and the necessity which exists for the occupation of all space for the reception of patients, and for providing increased room for the staff of the Asylum, leads me to recommend that a house be erected for the Medical Superintendent upon the grounds.

4th. It is again recommended that Rockwood Asylum, Kingston, be acquired from the Dominion Government, in order to supply the demand for Asylum accommodation from the Eastern section of the Province; and that when that Asylum becomes the property of the Province, another wing shall be added to it, in accordance with the original design, which will provide space for an additional 125 patients; this, with the removal of the criminal lunatics now in this Asylum, would give accommodation for 500 patients, or an increase of 150 beds. The necessity for the disassociation of this class from the ordinary patients has been so fully commented upon in previous reports, that nothing more need be said respecting it.

5th. The Asylum for Idiots at Orillia being opened with a capacity for 150 inmates, I would recommend that it be used exclusively as a custodial Asylum for adult idiots of the class that is unsafe or dangerous to be at large, and that a training school for juvenile idiots be erected in close proximity to the present structure, but entirely isolated from it, so that the same superintendent and official staff may answer for both establishments.

When the additions thus proposed are made, the receiving capacity of all the Asylums of the Province will be as follows:—

Asylum for the Insane, Toronto.....	688
Asylum for the Insane, London.....	880
Asylum for the Insane, Kingston	500
Asylum for the Insane, Hamilton	482
Asylum for Idiots, Orillia.....	150
Training School for Idiots, Orillia (proposed)	150
	2,850

Under the most favourable circumstances these extensions and additions cannot be completed and ready for occupation in less than four years. By which time, it is to be presumed that the population of the Province will have nearly reached 2,000,000. It cannot, I fear, be expected that the proportion of persons of unsound mind to the entire population will be diminished during that period in the future, and it is much to be hoped that it will not sensibly increase. Taking it for granted, however, that when the census is taken in 1881 the ratio of insanity will not materially differ from that of 1871, viz.:—one insane person to every 397 of the population—the 2,000,000 inhabitants of Ontario would then have no less than 5,037 insane and idiotic persons.

As the 2,850 Asylum beds that it is proposed to provide under the scheme recommended in this Report, will only afford Asylum accommodation for one in every 701 of the estimated population, it cannot be said that the amount of space asked for will be in excess of the actual requirements of the Province. The scheme for Asylum extension as indicated is, therefore, confidently recommended to the earnest consideration of the Government and the Legislature.

ASYLUM MOVEMENTS.

The following summary shows, in a classified form, the entire Asylum movements respect to admissions, discharges, deaths and transfers, as well as the total number of patients in each Asylum at the beginning and close of this official year:—

TABLE No. 1.

	TORONTO ASYLUM.		LONDON ASYLUM.		KINGSTON ASYLUM.		HAMILTON ASYLUM.		ORILLIA ASYLUM.		Total.		Grand Total.
	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	
Number of Patients in Asylums, 1st October, 1875.....	337	322	314	315	188	174	839	811	1650
Admitted during the year ending 30th September, 1876, including 253 transfers to Hamilton and Orillia.....	149	148	63	52	15	24	86	125	33	26	346	375	721
Total number under treatment during the year, including 253 transfer patients.....	486	470	377	367	203	198	86	125	33	26	1185	1186	2371
Discharged cured.....	48	31	18	8	4	10	0	0	0	0	70	49	119
Discharged improved.....	11	16	4	5	0	5	0	0	0	0	15	26	41
Discharged unimproved.....	4	2	2	2	0	2	0	0	0	0	6	9	15
Died.....	5	1	0	1	0	0	0	0	0	0	5	2	7
Total number discharged during the year.....	68	50	24	16	4	17	96	83	179
Transferred from one Asylum to another.....	56	80	38	47	17	12	3	111	142	253
Deaths during the year.....	41	30	26	19	8	6	4	2	79	48	127
Total discharges, elopements, transfers and deaths during the year.....	165	160	88	73	29	35	4	5	286	273	559
Number of Patients remaining in Asylum on 30th Sept., 1876.....	321	310	289	294	147	163	82	120	33	26	899	913	1812

An examination of the preceding table shows that the number of patients remaining in Asylum residence at the close of this official year was 1,812, as compared with 1,650 at the close of the last, or an increase of 162 in the aggregate insane population of the Province. It will also be observed that the total number of patients under treatment was actually in excess of the previous year. For, if we deduct the 253 patients, that were transferred from one Asylum to another from the numbers that were admitted and passed through the Asylums, the result will show that 2,118 patients received lodgment and treatment during this year as compared with 1,925 last year, or an increase of no less than 193 patients. This number of patients that was under treatment is the largest recorded for any one year in the Asylum history of the Province. The

ADMISSIONS

in the past twelve months have been more numerous than in any year since Confederation, as the following summary will show :—

Admissions for the fifteen months ending 30th September, 1868	210
Admissions for the year ending 30th September, 1869	292
“ “ “ 30th September, 1870	280
“ “ “ 30th September, 1871	353
“ “ “ 30th September, 1872	351
“ “ “ 30th September, 1873	319
“ “ “ 30th September, 1874	323
“ “ “ 20th September, 1875	326
“ “ “ 30th September, 1876	468
Total admissions since 1st July, 1867.....	2,922

The figures in the above summary show that the admissions of the past twelve months were over fifty per cent. greater than the annual average of the eight preceding years, proving very conclusively that a considerable arrearage from the years 1874 and 1875—during which time no additions were made to Asylum accommodation—had to be liquidated as soon as the Asylums at Hamilton and Orillia were opened. For the same reason the commitments of insane persons to Gaols were in excess of any corresponding period during the past ten years. Of the 468 admissions, no less than 253 were transfers from Gaols under the warrant of the Lieutenant-Governor; the remaining 215 were admitted by medical certificates under the provisions of 36 Victoria, cap. 31.

In former years I had frequently to call the attention of Sheriffs to the disgraceful condition in which lunatics were sometimes sent forward to Asylums. In some instances women were taken on long journeys without a female attendant accompanying them; and in others both the persons and clothing of the lunatics gave evidence of sad neglect. I am glad to say that a very marked improvement has taken place in these respects, as during this year only three instances have been reported of such negligence. These cases were all examined into, and the dismissal of two gaol officials was ordered in consequence of neglect and cruelty having been proven.

The Counties of the Province from which these 469 insane persons were received, and the respective Asylums to which they were awarded admission, are shown in the following table:—

TABLE No. 2.

Name of County or Place from which insane persons were sent to Asylums.	Number transferred from Gaols under Warrant of Lieutenant-Governor.	Number admitted by Medical Certificate.	Total number sent from each County or Place, either by Warrants or Medical Certificates, to Asylums.	Admitted to Toronto Asylum.	Admitted to London Asylum.	Admitted to Kingston Asylum.	Admitted to Hamilton Asylum.	Admitted to Orillia Asylum.

The following summaries exhibit the entire Asylum operations of the Province from the time that temporary accommodation was first provided, by the occupation of various houses in Toronto for a few years prior to the year 1850, when the Toronto Asylum was opened, and from that time up to the 30th September, 1876, covering altogether a period of thirty-five years. The information furnished by these figures comprises the total Asylum admissions, discharges, deaths, and escapes, together with the counties from which the entire number of patients were received into the Asylums, and the nationalities, religions, and civil condition of the same, as follows:—

Total admissions.....						6,564,
Discharged from Asylums					3,079	
Died in do					1,581	
Escaped from do					92	
					<u> </u>	<u>4,752</u>

Remaining in Asylums on the 30th September, 1876..... 1,812

The Counties in the Province from which these 6,564 patients were received were :

Algoma	8	Brought forward.....	3,217
Brant	129	Peel	157
Bruce	60	Perth	139
Carleton and City of Ottawa.....	169	Peterboro'	106

DISCHARGES.

The following summary shows the number of discharges that have taken place from Asylums during the year, and the mental condition of the patients at the time of discharge, classified under the headings of cured, improved and unimproved:—

	Cured.	Improved.	Unimproved.	Total.
Asylum for the Insane, Toronto.....	79	27	6	112
Asylum for the Insane, London	26	9	4	39
Asylum for the Insane, Kingston.....	14	5	2	21
Asylum for the Insane, Hamilton.....	0	0	0	0
Asylum for Idiots, Orillia	0	0	0	0
Eloped from Asylums.....	1	3	3	7
	<hr/>	<hr/>	<hr/>	<hr/>
	120	44	15	179

It will be observed that seven elopements are included in the above summary; but, as at least four of the patients were perfectly able to take care of themselves when they ran away, they are classified in the discharges. A comparison with last year's Asylum operations in this respect shows an increase of thirteen in the number of patients discharged cured, an equality in the number sent away in an improved condition, and an increase of seven in the unimproved discharges.

The percentage of patients discharged cured and improved to the total number under treatment in all the Asylums is somewhat below that of last year, but in the Toronto Asylum, owing to the large number of acute cases that were recently admitted, the percentage of recoveries was largely increased. The recoveries on the twelve months' operations were in the proportion of 25.52 per cent. to the admissions, and 5.64 per cent. of the entire number of patients under treatment; and if the patients who were discharged improved are added to the recoveries, these percentages would be increased to 33.50 and 7.73 respectively. The periods of Asylum residence of the 179 patients that were discharged were as follows:—

Patients discharged	Toronto Asylum.	London Asylum.	Kingston Asylum.	Hamilton Asylum.	Total.
under 1 month	8	0	2	0	10
“ “ over 1 and under 2 months	5	2	0	0	7
“ “ “ 2 “ 3 “	15	2	0	0	17
“ “ “ 3 “ 4 “	12	2	0	0	14
“ “ “ 4 “ 5 “	11	3	3	0	17
“ “ “ 5 “ 6 “	12	3	0	0	15
“ “ “ 6 “ 7 “	8	5	0	0	13
“ “ “ 7 “ 8 “	4	2	0	0	6
“ “ “ 8 “ 9 “	2	1	2	0	5
“ “ “ 9 “ 10 “	4	1	1	0	6
“ “ “ 10 “ 11 “	3	3	2	0	8
“ “ “ 11 “ 1 year	0	0	0	0	0
“ “ From 1 year up to 18 months	7	6	3	0	16
“ “ 18 months to 2 years	7	2	4	0	13
“ “ “ 2 to 3 years	5	5	3	0	13
“ “ “ 3 “ 4 “	1	1	0	0	2
“ “ “ 4 “ 5 “	1	1	0	0	2
“ “ “ 5 “ 10 “	5	0	1	0	6
“ “ “ 10 “ 15 “	2	0	0	0	2
Eloped	6	1	0	0	7
	118	40	21	0	179

It will be noticed from an examination of the foregoing summary, that 48 per cent. of the discharges, were of patients who had been less than six months in Asylum residence; and altogether 70 per cent. of the cases discharged had been under treatment for periods under one year. The unimproved discharges were chiefly drawn from among patients who had been residents for periods over three years. These figures prove very conclusively the importance of promptly placing all cases of insanity under Asylum treatment at the earliest moment the disease exhibits itself. For every week's delay the probabilities of recovery are proportionately lessened, until the chronic stage is entered upon, from which recoveries rarely occur, and this class now comprises 80 per cent. of our entire Asylum population.

During the past year 55 patients have been discharged on probation: viz., from Toronto Asylum, 25; from London Asylum, 29; and from Kingston Asylum, 1. Of these 55 patients, thirty are reported to have recovered, four were re-admitted on account of their having become unmanageable, two died, from three no reports were received, and sixteen were still out on probation at the close of the official year. From the reports of medical superintendents, it would appear that the granting of probationary leave of absence to certain patients is working satisfactorily. When a patient has so far advanced into convalescence as to feel the restraints of Asylum life very acutely, there is no doubt that complete restoration will often be promoted by a return to the home relations, provided they are happy and cheerful. To some patients, however, it would be most imprudent to extend leave of absence, even if in a state of apparent convalescence. For these and other reasons it is clear that the medical superintendent must exercise great discretion in the selection of the patients for this privilege; and that constant communication must be kept up with the friends of the patient during his absence on probationary leave.

TRANSFERS.

During the year, it will be observed from the summary now under comment, that 25 patients were transferred from one Asylum to another, as follows:—

From Toronto Asylum to Hamilton Asylum.....	136
From London Asylum to Hamilton Asylum.....	43
From Kingston Asylum to Hamilton Asylum.....	29
From London Asylum to Orillia Asylum.....	42
From Hamilton Asylum to London Asylum.....	3

DEATHS.

The mortality in the Asylums during the past year is exhibited in the following summary, viz :

	Men.	Women.	Total
Asylum for the Insane, Toronto.....	41	30	71
Asylum for the Insane, London.....	26	16	36
Asylum for the Insane, Kingston.....	8	6	14
Asylum for the Insane, Hamilton.....	4	2	6
Asylum for Idiots, Orillia.....	0	0	0
	79	48	127

As compared with the preceding year, the most noticeable feature in the above summary is the diminution in the number of deaths at the London, and the very marked increase at the Toronto Asylum. The latter circumstance the medical superintendent attributes to the fact, that the year has proved unusually severe to the aged, not only in Toronto Asylum, but also among the general population, and the great number of deaths, among the old patients, partially corroborates this statement. Doubtless, the increased mortality at Toronto, is also, in a measure, due to the fact, that among the admissions of this year from the Gaols, were some patients who were received into the Asylum, in a very low bodily condition, and died in a short time after they were admitted.

One patient committed suicide during the year, at the Toronto Asylum, by drowning himself in the bay. From the facts elicited at an enquiry made into the circumstances connected with the suicide, it would appear that the patient had been a resident of the Asylum for over four years, and that during that period he had exhibited a quiet, cheerful, and contented disposition, and no suicidal tendencies whatever. Such being the case, he had been allowed liberties that are not accorded to patients of an opposite disposition and tendency, and while out with a working party on the 1st of March last, he made his escape, and no clue could be obtained of him until his body was discovered in the bay about a week afterwards. There must have been some carelessness on the part of the attendants in charge of the working party, induced no doubt to some extent, in the case of the suicide, by his past quiet and contented demeanour. Considering however, how important it is in the successful treatment of the insane, to grant as much personal freedom as is possible; and being rather in the direction of increased freedom than a restriction of it, I only directed the medical superintendent to instruct the attendants to exercise a closer supervision over the working parties. It may become necessary to increase the number of attendants, but I am not prepared to recommend that that step should be taken yet.

The rate of mortality to the total population under treatment during the year was 10 per cent. as compared with 6 per cent. the preceding year. The annexed summary gives the length of Asylum residence of the patients that died during the year.

PAYING PATIENTS AND LUNATICS' PROPERTY.

During the year, the sum of \$21,175.93 was received for the maintenance of patients, as compared with \$21,875.92 in the preceding year. The amount received from each Asylum, and the number of patients that contributed towards their support, were as follows:—

Asylum for the Insane, Toronto,	183 patients	\$17,189 48
" " " " London,	56 "	2,887 75
" " " " Kingston,	14 "	1,025 95
" " " " Hamilton,	3 "	72 75
Asylum for Idiots, Orillia,	0 "	0 00
	256	\$21,175 93

As compared with the previous year, the aggregate revenue derived from this source in all the Asylums, shows a slight falling off, but in the Toronto Asylum a considerable increase is reported. In the number of patients who contributed towards their support, the increase is very considerable, being 256 as compared with 231 the previous year. From these figures it would appear that 12 per cent. of the entire number of patients who were under treatment during the year paid, in part, for their maintenance. In some instances the amount received was small, but under any circumstances it is satisfactory to report an increase in the number of the friends of insane who were not willing that their insane relatives should become an entire charge upon the Province; and therefore, to the extent of their ability, contributed towards their support. I observe from the last report of the Commissioners in Lunacy for England, that of the entire number of persons of unsound mind that was under accommodation on the 1st January last, 11.58 per cent. were paying patients, the remaining 88.42 being paupers. In this respect, therefore, the Province of Ontario compares favourably with England.

Since the passage of the Act (34 Vic. cap. 18), constituting me *ex officio* Committee of all lunatics committed to Public Asylums, who have no other committee duly appointed by the Court of Chancery, and the subsequent Acts (36 Vic. cap. 31; and 37 Vic. cap. 14), more fully defining the duties of such position, upwards of 100 cases have been adjudicated upon. In some of them the facts elicited revealed deliberate attempts to defraud the lunatic of his property, and saddle the Government with his support for life. In others, relatives have used and occupied the property of lunatics without contributing to their maintenance in the Asylum; and in some instances duly constituted committees have applied the money received from the estate over which they had official control, to their own use and benefit, while the lunatic was allowed to remain as a pauper in the Asylum. In all such cases prompt steps have been instituted to redress the wrong inflicted upon the insane person and the Province; and a large amount of money has been collected for the Asylum maintenance of these patients, and paid into the Treasury Department. The following summary shows the gradual but very marked increase that has taken place in the revenues from paying patients:—

Collected for the year ending 30th September, 1869	\$ 5,866 75
" " " " " " 1870	8,764 32
" " " " " " 1871	14,045 30
" " " " " " 1872	19,255 80
" " " " " " 1873	16,660 61
" " " " " " 1874	20,035 77
" " " " " " 1875	21,875 92
" " " " " " 1876	21,175 93

A considerable arrearage has accumulated for the maintenance of patients, part of which in course of being collected, but a portion will have to be written off the books, as lost. In no case is payment enforced where it would involve hardship to the relatives or bondsmen.

In addition to the amounts received for the maintenance of patients, the further sum \$1080.13 was received for articles sold, increasing the entire Asylum revenue for the year, to \$22,256.06.

ASYLUM EXPENDITURE.

The amount expended for Asylum maintenance for the year ending 30th September, 1876, was \$241,380.57, as follows :

Asylum for the Insane, Toronto.....	\$82,382 24
Asylum for the Insane, London.....	85,854 77
Asylum for the Insane, Kingston.....	52,195 00
Asylum for the Insane, Hamilton.....	20,948 56
Asylum for Idiots, Orillia.....	600 00
	\$241,380 57

The amount stated as being the cost of maintaining the Kingston Asylum, is the sum that was placed in the estimates to enable payment to be made to the Dominion Government for the support of the patients sent to that establishment by the Province of Ontario. The accounts for the last quarter have not been received, but it is not likely that the exact amount will vary much from the estimated expenditure. As the Orillia Asylum was lately opened for the reception of patients five days before the close of the official year, the appropriation remained intact up to that date.

The following statement exhibits the expenditure in a classified form, and shows the cost per patient under the headings of the Estimates.

RETURN shewing cost per Patient for maintenance, for the year commencing October 1st, 1875, to September 30th, 1876.

	\$82,382 24	133 45 ³ / ₄	83,854 77	135 93	20,948 56	251 61 ³ / ₄

If a comparison of the cost of maintenance, as exhibited in the foregoing statement, is made with that of the previous years, it will be found that there is an increase per patient for the year, of \$4.09 at the Toronto Asylum, and, \$5.17 at London. At the former place the increase is attributable to the fact, that for a considerable portion of the year, owing to the transfer of so many patients to Hamilton, the daily average of patients in residence was lower than usual, while the expenditure, except for food, remained about the same. This, of course, increased the cost per head, to an appreciable extent, but there will at all times be differences in the prices of supplies, and changes in the wants that will affect the annual cost per patient to a greater or less extent. These changes and differences are more particularly referred to in the separate reports upon each Asylum. The cost of each patient at the Hamilton Asylum for the *six and a half months* that the Asylum was in operation, up to the 30th September, was \$136.49, which would be equal to \$251.61 per annum. There is always, however, a large abnormal expenditure, that has to be incurred on the first opening of an Institution, which in all probability, will not require to be repeated at the Hamilton Asylum. It is evident, however, that this Asylum, until it is enlarged, will be a very expensive one, as the same staff that is now required to take care of 200 patients, would, with the exception of a few additional attendants and servants, be sufficient for an Asylum for 400 patients.

The cost per patient in Rockwood Asylum is \$143 per annum, according to an arrangement entered into with the Dominion Government in 1868.

Detailed statements of the expenditures in each Asylum, will be found annexed to the separate reports on Asylums, as well as the estimated expenditure for the year 1877.

SUPPLIES.

All supplies of a perishable character that are required for Asylums are submitted, under the sealed tender system, to public competition in the latter part of December in each year. These are, butchers meat, flour and meal, butter, coal and wood. General groceries and dry goods continue to be purchased in the open market from wholesale dealers, and at the lowest market rates.

The following schedule gives the prices at which the perishable supplies were contracted for, delivered at the various Asylums for the year 1876.

TORONTO ASYLUM—GENERAL OPERATIONS AND INSPECTION
MINUTES.

The operations of this Asylum for the past year, in respect to the movements of patients, have been more varied and extensive than in any previous year of its history.

At the close of last year there were 659 patients remaining in the Asylum, and during the past twelve months, 297 were admitted, making a total of no less than 956 patients who were under lodgement and treatment, as compared with 790 the preceding year. The admissions comprised 159 patients who were removed from Common Gaols to the Asylum, under the Lieutenant-Governor's Warrant, and 138 who were admitted by medical certificate under the provisions of 36 Victoria, cap. 31. The number of each sex thus admitted was singularly even, being 149 men and 148 women.

The greatest number of patients in residence at any one given time was 658, on the 7th October, 1875, and the lowest number was 568, on the 3rd May, 1876. The daily average population was 617. The aggregate Asylum stay of the 956 patients in residence during the year, amounted to 225,842 days, or an average period of about 256 days to each patient.

The discharges for the year were 112, of whom 63 were men and 49 women, and the condition of mind at the time these patients were discharged was reported by the Medical Superintendent, to be as follows: Discharged cured, 79; improved, 27; unimproved, 6. In addition to these discharges, 136 patients were transferred during the year to the Hamilton Asylum, as follows: On the 17th March, 19 men and 20 women; on the 23rd March, 16 men and 15 women; on the 8th April, 20 men and 20 women; and on the 3rd May, 10 men and 25 women. Six inmates who are certified to be idiotic, have been selected for removal to the Asylum for that class at Orillia, but their transference has not yet been effected.

The deaths during the twelve months have been unusually numerous, comprising 41 men and 30 women, or a total of 71, as compared with 48 during the preceding year. This mortality is equal to 7.47 per cent. of the entire number of patients under treatment. The ages of the patients who died, and the proximate cause of death will be found in Table No. 6, attached to the Medical Superintendent's Report. It will be observed that many of the deaths occurred at very short periods after admission, in some cases only a few days elapsed. The unusually large number for admissions, most of which were acute cases, and many of them having been brought to the Asylum in a very weak bodily condition, accounts in a great measure for the increased mortality.

Full and detailed information in respect to the movements of patients, will be found in the Report of the Medical Superintendent, and the statistical tables attached thereto.

The changes that have taken place in the Asylum, during the past year, have necessitated frequent visits. On the 28th December, I inducted Dr. Clark, as Medical Superintendent, and accompanied by him made a minute investigation into matters pertaining to the Asylum management, making those suggestions which have been carried out during the year, as to the repairs, alterations and additions to the Asylum, and as to the interior economy and discipline of the Institution.

At the time of this visit, I found 651 patients in residence, 331 men and 320 women. The movements of patients during the quarter then ending had been:

Admissions for 3 months ending December 31st.....	32
Applications for admission for 3 months ending December 31st.....	52
Deaths for 3 months ending December 31st.....	14
Discharges for 3 months ending December 31st.....	28

The general health of the Asylum, up to this time, was reported as good, and its condition as to cleanliness and order was most satisfactory. Owing to the mildness of the weather, many of the windows were open at the time of my visit, and the atmosphere was sweet and pure, except in the vicinity of the west basement closet, where there was a bad odour, indicating defects in the drains, or improper trapping of the sewage pipes. The Medical Superintendent was directed to have this examined into.

The question of providing amusement and recreation for the patients, was brought to the notice of the Medical Superintendent, and the purchase of a piano was authorized for the

amusement hall. Means were suggested to enlarge the capacity of this room, and owing to the kindness of volunteer choirs from the city, a system of amusement for the patients was initiated that has been productive of the best results.

The Library having been found to be much reduced, the Medical Superintendent was authorized to make a requisition for the supply of 400 books of a suitable character for the amusement of the patients.

In view of the opening of the Asylum at Hamilton, the roll of patients was carefully gone over, and a personal inspection made of them, in order to determine which of the chronic cases it would be best to transfer to that Institution. In making the selection the following conditions were taken into account:—

1st. None were to be transferred of homicidal or suicidal tendencies 2nd. None were to be transferred of violent or rough character. 3rd. None were to be transferred who were subject to recurrent mania.

In addition, selection was confined to non-paying patients, and, as far as possible, to those who were received into the Toronto Asylum from the City of Hamilton, the County of Wentworth, or the adjacent counties.

At my visit in July, 1876, when the muster-roll was called, there were only 601 patients in residence, 302 men and 299 women. This decrease in numbers was owing to the then recent transfer of the patients to Hamilton Asylum. The admissions, owing to the same reason, for the six months ending the 30th June, had been unusually numerous, amounting to 168. The discharges had been 45, and the deaths 43. This large proportion was owing, the Medical Superintendent informed me, to the severity of the winter and the backward spring, which increased the death-rate all over the Province. The transfers to Hamilton Asylum enabled me to transfer all fit cases of insanity from the Gaols within the district allotted to Toronto Asylum, and enabled the reception of many cases who awaited admission from private houses.

The patients were generally very quiet, and boisterous excitement was confined to the female refractory ward. Considering that 168 new patients had been received during the past few months, and that many of them were rough cases from Gaols, this state of things was most creditable to the Medical Superintendent, his assistants, and the attendants of the Asylum, as indicating great care and systematic observation of individual cases. The physical health of the patients was also particularly good at the time of my visit.

The interior condition of the Asylum in its various wards, dormitories, &c., was, in point of cleanliness, order and tidiness, most satisfactory, but it was very clear that considerable expenditures were required in order to bring up the standard of the Asylum in respect to furniture, furnishing, decorations and comforts, it comparing in these respects most unfavourably with the majority of Asylums in the United States. Considering the importance of such adjuncts in the treatment of the insane, I trust that an appropriation will be made at the next session of Parliament to thoroughly equip the Asylum in these respects. The immediate requirements are estimated as follows:—

	\$	cts.
250 Bedsteads, Palliasses, Hair Mattresses and Pillows, at \$17 50.....	4,375	00
500 White Counterpanes, at \$2 00.....	1,000	00
50 Carpet-covered Settees, at \$8 00	400	00
50 Wooden " " at \$5 00	250	00
Furniture for Superior Wards	1,500	00
300 Common Chromo-Lithographs and Frames.....	750	00
Painting, papering and extra labour.....	1,500	00
	\$9,775	00

Pending these more extensive alterations, the Medical Superintendent was directed to proceed with the following work in the superior wards, viz:—

1st. Painting in three-coat work, a pearl gray colour, the walls of two corridors; the wood work in white.

2nd. Whitewashing the ceilings throughout.

3rd. Papering walls in both sitting-rooms.

4th. Re-laying and painting in three-coat work the water-closets and bath-room floors.

Means were also taken for the repairs of the roofs, and slating the out-building roofs.

The farm and gardens, at the time of this visit, promised a large yield of both roots and cereals. The subsequent drought, however, damaged all the crops to some extent, and reduced the potato crop to so small an average that a considerable quantity will have to be purchased in order to meet the requirements of the Institution until next year's crop is harvested.

In my report of last year, I made suggestions for additions to the present buildings, and alterations in the heating apparatus, that would have involved a considerable expenditure. The rapid extension of the city to the westward, and the opening out of King Street through the Asylum farm, has, however, convinced me that the day is not far distant, when it will be advantageous to relinquish the use of the present building for Asylum purposes, and to seek a more secluded situation for its inmates. The desiderata in the choice of a site for an Asylum are, quietness and seclusion; to avoid exposure and publicity. Apart from the unpleasant character which a city Asylum must always possess, as one of the 'sights' to be seen by visitors whom curiosity alone impels to examine it, is the consideration that diseases of the brain require absolute quietude and peace as curative agents. To the healthy, the bustle of the city, or the shriek of a locomotive, may possess little disturbing influence; but to the patient whose nerves are racked with disease, and whose brain is distraught, these sights and noises may be productive of the worst effects. In view, therefore, of a change, which however distant is I think inevitable, I shall refrain from any recommendation to incur expense which is not absolutely necessary for the health and comfort of the inmates, or the economical administration of the Asylum.

It is, however, most necessary that some changes should be made in the kitchen department of the Asylum. The present kitchens must be consolidated, and modern appliances for cookery procured, before it will be possible to manage the matter as economically as it should be done. At present, each separate kitchen requires a separate staff, costing in wages alone, \$948.00 per annum, and separate cooking apparatus; and there are seven kitchens. I have therefore to recommend that a sum be placed in the estimates to consolidate the kitchens, which will involve some changes in internal arrangement, and to purchase cooking apparatus of modern construction.

No provision has been made in the laundry department for other than hand labour. This, although utilizing the labour of a number of patients, is a most expensive and laborious method of carrying on the laundry work of so large an institution. At present it necessitates the employ of seven laundresses at a cost, for wages alone, of \$696.00 per annum. This Asylum now stands alone in this respect, every other public institution under the direct control of Government, being provided with the most improved laundry machinery. I have recommended an appropriation therefore, for the purpose of purchasing laundry machinery and a small engine and boiler for a motive power.

Another defect is in the position and character of the frame coal sheds. Situated as they are, in the quadrangle formed by the buildings, they are at once unsightly and dangerous. I have therefore to recommend that they be removed to a more fitting position, and that their capacity be increased to fulfil the requirements of the Asylum.

It will be apparent to anyone cognizant of the requirements of an Asylum or Hospital that the surroundings of the patients should be cheerful and bright. The bare walls of the Asylum are not up to modern requirements in that respect, which has led me to ask for an appropriation to paint and decorate the wards, so as to remove the dinginess that twenty-two years of occupation have given to the entire building. An appropriation is also recommended to renew the floors, many of which are so worn as to be dangerous, and to lay hardwood instead of pine, as the more durable and cleanly of the two.

Having in view the desirability of utilizing the entire space afforded by the Asylum for Asylum purposes, I have again recommended that a house be built for the Medical Superintendent. This is a most desirable addition, as it not only releases the space at present occupied by him in the Asylum, but places him in a more fitting position. It may fairly be laid down as a rule, that no person should occupy a part of an Asylum, who is not directly an employé of that Institution, and subject to its discipline and management; I have, therefore, uniformly recommended that the heads of our Public Institutions having families, should have a separate residence. This is particularly desirable in the case of the Medical Superintendent of Toronto Asylum, who is compelled to occupy apartments in the main building, which are absolutely required for Asylum purposes. It is a matter of economy, therefore, that a house should be

built for his occupation, in order to utilize to the utmost the accommodation for patients that the Asylum affords. I have therefore recommended that a house be built for him, of such a description, and in such a position as to enhance the value of the Asylum property.

Many of the suggestions that I have made in my previous reports have been carried out by the Medical Superintendent, and have improved the appearance of the building, and increased the comforts of the inmates in a very great degree. The walls of the entrance halls and stairways, and two of the superior wards, have been painted, and the rooms occupied by the officers of the Institution have been painted or papered. This is a vast improvement upon the bare discoloured walls that have hitherto given the Asylum such a prison-like character. The worn-out floors have in some cases been replaced with hardwood flooring, and the halls and some of the wards have been covered with carpet or oil cloth. Drains have been renewed, the construction of the water-closets improved, the stables, driving-house and granary have been re-roofed with slate, and many minor works of improvement have been carried out. Much however remains to be done before the Asylum will approach, in appearance or comfort, the representative Asylums of the United States.

Detailed statements of the cost of maintaining the Asylum for the past year, as well as the estimated expenditure for the year 1877, will be found attached to the Report upon Asylums. It will be observed that the total expenditure for the year amounted to \$82,382.24, and as the average population was 617, it is shown that the cost of each patient for the year was \$133.51. The cost per head would have been less, had not the daily average population been slightly reduced by the transfers to the Hamilton Asylum.

The receipts from paying patients exceed those of any previous year, amounting to \$17,189.48, in addition to which, the sum of \$1,067.10, was realized from articles sold; making the entire revenue of the Asylum, \$18,256.58. If this amount is deducted from the entire cost of maintenance, it will be shown that the net cost of maintaining this Asylum to the Province for the official year ending 30th September, 1876, was \$64,125.66.

An investigation was made into the financial affairs of the Asylum, while under the control of Mr. Mooney, the late Bursar, the result of which was duly reported upon.

LONDON ASYLUM--RECORD OF OPERATIONS AND INSPECTION MINUTES.

During the twelve months ending 30th September, 115 patients were admitted to this Asylum, and the total number under treatment was 744, as compared with 735 during the previous year. The maximum number of patients in residence was attained on the 2nd February, on which day the population of the Asylum stood at 641, and the minimum number, on the 25th September, when it was reduced to 579. The daily average population of the year was 626.

The aggregate period of Asylum residence of the 744 patients who were lodged and treated during the year was 229,372 days, or an average stay of 308 $\frac{1}{2}$ days to each patient. This average, it must be observed, was largely increased, owing to the fact that not less than 500 of the patients may be looked upon as life residents of the Asylum. Of the 115 patients who were admitted, 50 were transferred from the Common Gaols in the western portion of the Province, by the warrant of the Lieutenant-Governor, and 65 were awarded admission under the ordinary process of medical certificates.

The patients discharged during the year numbered 39, of whom 26 were cured, 9 improved, and 4 were sent home in an unimproved mental condition. In addition to the discharges, 43 of the quiet and incurable cases were transferred to the Hamilton Asylum on the opening of that establishment, and one man, who was arraigned before the courts for the murder of his wife, and subsequently was placed in the Asylum for the observation of the Medical Superintendent, was transferred, for a similar purpose, to the Toronto Asylum. On the 25th September, 44 Idiots that had been lodged in the Branch were transferred to the Orillia Asylum. The discharges and the transfers from the Asylum, it is thus shown, numbered 124 for the year.

The deaths for the same period were 37, as compared with 53 for the preceding year, and one patient eloped, and has not yet been recaptured.

A more detailed record of the movements of patients, together with the usual statistical information in respect to them, will be found in the Report of the Medical Superintendent, and the tables attached thereto.

Four statutory inspections were made of this Asylum during the year, besides other visits on business connected with the institution. At my inspection on the 13th and 14th April, there were 626 patients in residence in the main Asylum and the various houses in the grounds, as follows:—

	Men.	Women.	Total.
In the main building	262	267	529
In the cottage for chronics	30	30	60
In the Idiot Branch..... ..	22	15	37
	314	312	626

In addition to this number of patients, the names of nine still remained on the Asylum register, although then absent on probationary leave, the most of whom were subsequently reported to be cured, and were formally discharged. This number of patients exhausts every bed in the Asylum, and overcrows some of the associated dormitories and corridors. In fact, if strict compliance was yielded to cubic space regulations, the population of the Asylum should not exceed 600. Considering, however, the great pressure for Asylum accommodation, and the never-ceasing importunities of the friends of the insane to obtain awards, the evils of overcrowding can hardly be avoided; and having regard to the fact that eighty per cent. of the residents are incurable subjects, it is not likely that the mental condition of the patients will be injured by temporary overcrowding to a slight extent. The same, however, cannot be said of the general health of the Asylum. The defective ventilation of the wards, particularly in winter when the displacement of foul air cannot be obtained without great loss of heat, is undoubtedly very much aggravated by overcrowding. An effective means of ventilation will have to be devised and introduced as soon as possible, and when the proposed additions are made to the Asylum, advantage will have to be taken to reduce its population to the proper cubic space standard.

Excepting where repairs were in progress, the condition of the Asylum in respect to order and cleanliness was all that could be desired. The dormitories were admirably kept, the bedding was very neat and tidy looking, and every department of the Asylum was as it should be.

A good deal of excitement and noise prevailed in the refractory wards, particularly on the female side of the house; and, what is a rare thing in this Asylum, a few patients had on the hand muffs, and a considerable number, owing to destructive and offensive habits, were clothed in canvas dresses. This state of things was caused by the unusually large number of acute cases that had recently been admitted to the Asylum, and the overcrowding of the refractory wards. In the other corridors the patients were quiet and orderly. With a few exceptions, the patients were all very decently clothed, and their appearance denoted that their personal cleanliness and other comforts received proper attention.

I was present in the dining-room when the dinner was served. It consisted of boiled beef, stew and fish, with potatoes and carrots, and a dessert of boiled rice. The food was good and sufficient, and the meal was well and decently served. The decorum of the patients during the meal was remarkable, and at all times is one of the many commendable features of this Asylum.

The percentage of patients engaged in outdoor and domestic work is perhaps as high as any Asylum on the continent.

For the past three years, the supply of gas has been most unsatisfactory, and, on many occasions, could not be depended upon at all. It would appear that old gas pipes had been laid from the main road to the Asylum, which leaked so much as to injure the trees in the avenue along which the pipes are laid, in addition to which the dimensions of the pipes had been much reduced as they approached the Asylum. The Company, having been notified of their breach of contract, offered to lay down new pipes of a larger calibre, provided the Asylum authorities did the digging. The Medical Superintendent was authorized to accept this offer upon the distinct understanding that in the event of a second failure, it would in no way relieve the Company from the proper fulfilment of their contract.

As the *débris* of the buildings, at the time of erection, had never been removed from the basement, a bad effluvium had arisen from this cause, to remedy which, the Medical Superintendent was authorized to engage labourers to assist such patients as could be trusted to go under the building to remove the rubbish. Apart from the foul air generated from the decaying matter, the presence of such a mass of flammable material endangered the safety of the Asylum and the patients.

On visiting the Asylum, on the 1st and 2nd June, its population, which had been temporarily reduced by the transfer of 45 quiet incurable patients to the Hamilton Asylum, was as follows :

In the Main Building.....	493
In the Cottages.....	60
In the Idiot Branch.....	37

590

The Asylum, on this occasion, was found in its usual excellent state of cleanliness, with the utmost neatness and good order everywhere apparent. In order that the work of repairing the floors and ceilings might be pushed forward with greater vigour, the Superintendent was authorized to add another carpenter to the staff.

On the 6th and 7th September, the Asylum was again inspected, when the muster-roll of the patients was checked. In the performance of this duty I saw every patient in the Asylum, and made inquiry into all cases requiring special consideration. There were then registered 613 patients, of whom 308 were men, and 305 women; but, of these numbers, 5 men and 6 women were away on probationary leave of absence; one man had eloped, but whose name still remained on the register, and one had died that morning. Deducting these absentees, the number of patients actually in the Asylum was 601, which left 33 beds vacant. The transfers to Hamilton Asylum had enabled the Medical Superintendent to admit every proper case for whom application was made during the three months preceding my visit, so that the admissions for the quarter ending 31st August had been unusually large, numbering 45.

A patient was reported to have died of softening of the brain, on the 3rd July, but who, a few days previous to the occurrence and while being bathed, had a pail of very hot water thrown over him by a patient who was assisting the attendant. From the evidence elicited at the Coroner's inquest held upon the body, it was clear that the patient was in the last stage of lung and brain disease, although his death may have been hastened by the accident. Blame undoubtedly attached to the attendant for having allowed the patient to draw hot water from the tap with his key, and the Medical Superintendent was instructed to dismiss, on the recurrence of such carelessness on the part of an attendant.

With a few exceptions, the patients at the time of this visit were very quiet and free from undue excitement; only one patient had on the hand-muffs, all the rest, both men and women, were entirely free from mechanical restraint, and not a single patient was secluded. Seven men and five women were confined to bed, but some of them had only slight ailments. The condition of the Asylum, in respect to cleanliness, was highly satisfactory, and every department of it was found in a well-kept state. The works connected with the renewals of carpentering and plastering in the Asylum were nearly completed, through which the most glaring interior defects will be remedied. The atmosphere in the vicinity of the water-closets had been much improved by the adoption of the sluice and plug principle, instead of the ordinary closet-pans. The Medical Superintendent, after an experience of six months, reports that the change has given great satisfaction.

There are other defects and deficiencies in this structure still remaining unremedied, which have been brought to notice in previous reports, but which I consider to be none the less my duty to urge again, with a view to receiving attention.

1st. The roof of the main buildings leaks to such an extent that at every rain-storm the ceilings and Asylum property are injured, and during the past winter very frequently as much as three inches of snow was taken out at one time after a storm. Although in the original contract for the erection of the Asylum, it was provided that felt was to be placed under the slating, yet not one-tenth portion of the roof's surface was covered in that manner.

not only is the slating in bad condition, but most of the turrets and ventilators are so much out of order as to allow the water to come in freely. Nothing can be done towards repairing the ceiling of the main building until the roof is made thoroughly tight. I have recommended that an examination be made of it by an experienced person, in order that an appropriation may be asked to make good the work.

2nd. The windows of the Main Asylum, the sashes of which are made of cast iron and the frames of wood, continue to give a great deal of trouble, and over one-half of them cannot be opened by the female attendants without the assistance of the carpenter. A plan of alteration has been decided upon which will effectually overcome the trouble, at a cost not exceeding \$1,000.

3rd. The introduction of some effective means of ventilation.

4th. The three main chimneys of the Asylum should be raised not less than 25 feet, in order that the draught may be increased.

5th. The frame coal sheds, which are only under-pinned, require to be propped up to keep them from falling. It is recommended that brick sheds be erected closer to the Asylum, with a tramway to the furnaces. The old sheds can be repaired and used for other purposes.

In addition to the above works there are others of less importance, but equally necessary to the structural completeness of the Asylum.

During the past year the sinking of the artesian well has been continued by the Public Works Department and, at a depth of 2,250 feet, an abundant and what would seem to be a never-failing supply has been obtained. Samples of the water have been submitted for analysis, the result of which has not yet been communicated to me.

Works are now in progress, under the superintendence of the Public Works Department, with a view to overcoming the sewerage difficulties that have had to be contended against since the opening of the Asylum. It is proposed to collect all the solid matter that passes through the sewer, into a tank, which is a section of the main sewer, which is constructed about 500 yards from the Asylum, out of which it will be taken and spread upon the land. The liquid portion of the sewage will undergo a process of filtration and then flow into the creek. Should the proposed plan prove successful, the alleged nuisance will not only be remedied but will at the same time be turned into a source of profit.

I have recommended that additional accommodation be provided at this Asylum by the erection of two additional groups of cottages for the chronic insane, and the extension of what is known as the Idiot Branch, to a capacity for 100 rooms for the refractory patients. In previous reports I have spoken most favourably of the excellent accommodation that the cottage system furnishes for the chronic insane, and another year's experience and observation confirms this opinion. If the Province must take care of her chronic insane instead of returning them when the incurable stage of mental disease develops, to be cared for by municipalities or by families; and which all experience and the dictates of humanity are opposed to, then no better and certainly no more economical kind of accommodation can be provided than cottages erected upon the grounds of main Asylums. Of course, the number and population of these cottages must be limited so as not to render the management of the establishment unwieldy and uneffective, which will not be the case with two additional cottages on the grounds of this Asylum. It is recommended that these structures shall be placed in a line with the present cottage, and that in the centre cottage provision shall be made for bathing all the patients residing in the three groups, instead of taking them to the main building for that purpose. In the same building a considerable quantity of water should be tanked to supply the cottages, as well as to make provision against fire. Each group is to have capacity for 60 inmates, the whole affording accommodation for 180 chronic insane.

The necessity for extending the Idiot Branch, in order that accommodation may be obtained for the very noisy and dirty patients, was dealt with in my last report. The peace and quietness of the main Asylum now render it imperative that this work should be proceeded with without delay. The main structure of the Asylum, owing to the limited number of single rooms, and for various other reasons, is not suited for such patients; and the occupation of the Branch, with room for only 26 of that class, requiring five or six attendants and a cook, would be a most expensive arrangement, and should be avoided if possible. I have, therefore, recommended, as the most urgent requirement of this Asylum, that the proposed extension be proceeded with next spring, and have had prepared sketch plans of the

addition. The building is of the very plainest description, of two stories, with a mansard roof. In order to assimilate the present building, it would be necessary to put a mansard roof on it also, or to give it a similar character. The extension is in the shape of a cross, one arm being in continuation of the present building; the cross corridors being wing dormitories and dining-rooms, and the rear arm being for kitchen and domestic offices. All the sleeping accommodation thus provided, to be single rooms, numbering 140 rooms altogether. The adoption of this plan would enable the Medical Superintendent to remove all violent and dangerous patients, as well as the very dirty ones, from the main structure to a situation where they would be isolated, and where the structural arrangements and administrative details would be framed for their special requirements.

Some additions to and renewals of the furniture and furnishing of the Asylum would require to be made this ensuing year, and as no appropriation has been voted for internal decoration since the main structure was first occupied, it is recommended that a sum be asked for that purpose. Cheerfulness and contentment on the part of the patients cannot be expected in a poorly furnished Asylum with bare walls, and, unless these conditions of mind are promoted in every possible way, Asylum treatment will often fail in its object.

The farm and garden operations of the year, as will be seen from the statement attached to the Medical Superintendent's Report, have been very satisfactory, notwithstanding the drawbacks of the season. The total value of the produce, calculated at current market rates, amounted to \$12,087 08, and the cost of carrying on the farming and gardening operations, including interest on capital, was \$6,208 86, showing a net profit of \$5,878 22 for the year. This, it must be admitted, is a very satisfactory exhibit, and if the sewage utilization works now being constructed by the Public Works Department, prove successful, and an economical method for putting the sewage upon the land can be devised and carried out, still greater results may be looked for. The farm is now in a high state of cultivation, and the garden is perhaps the best in the Province. The ornamental portions of the land are worthy of as much admiration as is bestowed upon them, and are increasing in beauty every year.

The industrial employment of the patients continues to receive great attention from Dr. Landor. During the year, 81 male patients were kept employed on the farm and grounds; 21 were engaged in mechanical employments; and 64 are kept constantly at work in the various domestic departments and the corridors. On the female side of the house, 30 are always engaged in the serving room, 27 at domestic work, and 140 in the corridors and dormitories. In the manner named, 363 patients were kept employed during the year. The physical and mental health of the patients is not only promoted by these employments, but the very low cost of maintaining patients in the Asylums of this Province as compared with those in the United States, is largely attributable to this cause. The entire cost of maintaining the Asylum for the year was \$85,854.77, and as the average number of patients in residence was 626, the cost per capita is shown to have been \$136.93 for the year. During the year payments for maintenance were received from 34 patients, in sums varying from \$2.75 to \$1.00 per week. From this source the sum of \$2,887.75 was received, and from articles sold, \$13,03, or a total revenue of \$2,900 78, which has been paid into the Treasury Department. If this amount is deducted from the gross cost of maintenance it will be shown that the net charge upon the Province for the entire maintenance of the Asylum for the year amounted to \$82,953.99. Detailed statements of the expenditure, and an estimate of the amount required to carry on the Asylum for 1877, will be found attached to the report upon Asylums.

During the year, Dr. Burgess, who formerly occupied a position on the staff of the Toronto Asylum, was appointed to the position of Second Medical Assistant. The Medical Superintendent reports most favourably on the manner in which all the officers and employes under him perform their duties, and my own observation corroborates his report.

Mr. Mathison, the Bursar, continues to discharge his duties as financial agent of the Government, to my entire satisfaction.

KINGSTON (ROCKWOOD) ASYLUM.

RECORD OF OPERATIONS IN RESPECT TO ONTARIO PATIENTS.

The number of patients who remained in this Asylum, and were being supported by the Province of Ontario, on the 1st of October, 1875, was 362, and during the past year thirty-nine additional were admitted, making a total of 401 patients, who were under accommodation during the year ending 30th September, 1876. Of the thirty-nine patients admitted, twenty-nine were brought in from Gaols under the Lieutenant-Governor's warrant, and ten were admitted by medical certificates. One of the latter was a convict sentenced by one of the Courts of Ontario to the Kingston Penitentiary, who, while undergoing sentence became insane, and was transferred to this Asylum. The sentence of this insane convict having expired, he now becomes a charge upon the Province instead of the Dominion.

The discharges and transfers of the year numbering forty-nine, were as follows:—discharged cured, fourteen; improved, five; unimproved, two; and transferred to Hamilton Asylum, twenty-eight. The last-named class were selected as being, beyond all doubt, curable, and who were quiet and easily managed. The removal of these patients to Hamilton, and the vacancies thereby caused, enabled me to transfer the lunatics that were in the Common Gaols east of Kingston to this Asylum. For the same reason the population of the Asylum was temporarily reduced at the close of the year to 337, but at the time of writing this report, the vacancies are all filled up. In addition to the 337 Ontario patients in residence, on the 30th of September, there were also 29 convict lunatics, whose sentence in the Penitentiary had not then expired, or who belonged to, and were supported by, the Province of Quebec, making a total of 366 patients in the Asylum on that day. Fourteen patients died during the year, viz.: 8 men and 6 women.

I visited the Asylum on the 27th of September, for the purpose of checking the muster roll, so far as it related to Ontario patients. There were then in residence, 347 patients of both sexes—177 men and 170 women—but on the day of my visit 4 men and 8 women were transferred to Hamilton, which reduced the number to 335.

In checking the roll I necessarily saw every patient that was being supported by the Province. They were generally tidy in their appearance, and, with a few exceptions; chiefly confined to the violent and refractory, they were very decently and comfortably clad. There were some very troublesome cases in the women's side of the house, and in one of the wards there was a great deal of noise and excitement. On the male side, quietness and order generally prevailed. The number of cases of restraint among the women was unusually large; six on the hand muffs, 7 were tied to fixed benches, some of whom had on the muffs as well, one was secluded in a single room. Two men also were hand-muffed. As nearly all the patients in this Asylum had been received from Gaols, or from the Penitentiary, as convict lunatics, it is reasonable to expect that there will be a larger number of refractory patients than in Asylums where the largest population are admitted from private families, under the ordinary process of medical certificates. But it is very clear that the association of convict lunatics with the ordinary insane is very detrimental to the peace and quietness and good discipline of the Asylum.

In this connection I consider it to be my duty to again bring under the notice of the Government the urgent necessity that exists for terminating an arrangement through which indiscriminate association of these classes of insane persons is permitted. The evil effects of this association are most marked, and cannot but have a most injurious result upon the operations of the Asylum as a curative institution. The custodial restraint of the 29 criminals affects the entire community, restricts the liberty of those committed in the ordinary Asylum, and creates a suspicion in their minds that they also are detained as criminals. Under such circumstances it will be readily seen that the means used to restore that class to a state of sanity must, very often, prove abortive, and, as a natural sequence, the number of chronic insane is abnormally increased. And while the patients themselves are both mentally and morally injured by this association, for the fact that they are confined in a criminal Asylum cannot be successfully hidden from them, the feelings of their relatives and friends are grievously wounded in having to submit to such a state of things. The continuance of the

existing arrangement is, therefore, not only disastrous to the ordinary insane and unfair to their friends, but it is unjust to the Medical Superintendent. For, in addition to discharging the sufficiently arduous duties of his office in respect to the care and treatment of 350 ordinary insane, the responsibilities of his position are seriously increased and disadvantageously affected by having to act in the capacity of gaoler over the criminal portion of the population under his charge. I would, therefore, again respectfully urge upon the Government the acquirement of this Asylum, to be used exclusively for the confinement and treatment of the ordinary insane in the eastern section of the Province. And in the event of the negotiations for the accomplishment of this object being unduly protracted, I would recommend that the Dominion Government be requested to provide accommodation for the criminal lunatics away from the building and grounds of this Asylum. In view of the fact that the Province supports 95 per cent. of the entire population, it appears to me that the request would not be an unreasonable one.

The opinion of the Medical Superintendent as to the mental condition of the inmates under his charge is, that out of the entire population, 39 are susceptible of being restored to a sound mind, and the probable result of treatment in the cases of 75 is doubtful (in a majority of the cases extremely doubtful), while 222 are hopelessly incurable.

The corridors, bed-rooms and other portions of the Asylum were scrupulously clean, and in most a admirable order, and the beds and bedding were comfortable and tidily kept.

The atmosphere of the Asylum was generally good, but at some points there was evidence of defective ventilation.

The cost of maintenance is fixed, under an arrangement with the Dominion Government, at the rate of \$143 per annum.

During the year the maintenance of 13 patients was found in part, from whom the sum of \$1,025 95 was received and transmitted to the Treasury Department.

Owing to the anomalous position in which I am placed in respect to this Asylum, I find it very difficult to supervise the collection of maintenance indebtedness, in consequence of which the revenue from this source is proportionately less than in any other Asylum in the Province.

HAMILTON ASYLUM.

ORGANIZATION OF THE ASYLUM, AND RECORD OF OPERATIONS AND INSPECTION MINUTES.

The very pressing demand for Asylum accommodation, particularly for the insane confined in the Common Gaols, and the more urgent cases in private houses, led me in my last Annual Report, to recommend that the buildings designed for an Hospital for Inebriates, and which were then in course of construction at Hamilton, should be diverted from their original purpose, and utilized for the immediate wants of the insane. The recommendation received the approval of Government, and an Act was passed at the last session of the Legislature, authorizing the Lieutenant-Governor in Council to use the building for that purpose, and to that end, constituting it a public Asylum, for the custody and treatment of insane persons.

As the structure was only intended for the treatment of inebriates, it has neither the strength nor general solidity requisite for the lodgement of acute and violent cases of insanity. For this reason I recommended that it should only be used for quiet chronic cases, selected from the populations of the other Asylums of the Province, leaving the beds thus vacated for acute cases. This course not only rendered the transfer of the insane confined in the Gaols, easier and less costly, as they were removed to the nearest Asylum, but it obviated the necessity for altering and strengthening the Hamilton building, and thus rendered it available for occupation at a much earlier period than it otherwise would.

Tenders were solicited by public advertisement for the supply of the staple articles of furniture and furnishings, to be manufactured according to samples exhibited at the time, and the lowest offer was accepted, and awarded to the Oshawa Cabinet Company. The blankets were purchased at public auction from the Cornwall Manufacturing Company, and the remainder of the furnishings were obtained from the local dealers at the lowest wholesale

rates. The total amount expended in furnishing the Asylum was \$17,522.32, but included in this, is the sum of \$2,950 paid for structural fixtures, which properly should have been provided for out of the construction appropriation. As the furnishing is not yet complete, an appropriation will have to be asked to make good the sum thus diverted from its original purpose.

The Asylum was opened for the reception of patients on the 17th March, 1876, a short time previous to which date, Dr. R. M. Bucke was appointed to the position of Medical Superintendent, and Dr. Coverton, formerly Clinical Assistant at the Toronto Asylum, was appointed Assistant Superintendent. The position of Bursar was conferred on Mr. Bidwell Way.

In selecting patients for this Asylum, the following instructions were given to transferring Medical Superintendents.

1st. Only such patients were to be selected who were beyond doubt incurable, and who were at the same time quiet and well conducted.

2nd. No patients were to be selected who were possessed of homicidal or suicidal tendencies, or were even subject to recurrent mania of a violent type.

3rd. Patients of the class referred to, whose friends resided in the vicinity of Hamilton, were first to be taken.

In conformity with these instructions, the following transfers were effected at the dates named, viz :

		Men.	Women.	Total.
March 17th	Toronto Asylum.....	10	20	30
" 23rd	"	16	15	31
April 8th	"	20	20	40
May 3rd	"	10	25	35
June 1st	London Asylum.....	13	32	45
" 30th	"	—	1	1
July 13th	Kingston Asylum	12	4	16
Sept. 29th	"	4	8	12
		<hr/>	<hr/>	<hr/>
		85	125	210

In addition to these 210 patients transferred from the Toronto, London, and Kingston Asylums, one man was received from a private house in the City of Hamilton, but who had formerly been a resident of the Toronto Asylum, making a total of 211 patients who had been admitted since the opening, on the 17th March, up to the 30th September.

Of the 211 patients received, 60 had formerly been transferred from Gaols, and 151 had been admitted under medical certificates.

Since the opening of the Asylum, six patients have died—three from phthisis, and one from senile decay.

Two statutory inspections were made of the Asylum, besides frequent visits on special business. At my first visit, on the 22nd May, the wards and dormitories were found in good order and thoroughly clean, and the beds, except in a few instances, were very tidily made up. The air in the dormitories at the time of the inspection was sweet and wholesome. The domestic departments in the basement were well ordered, and, considering the very confined space allotted to them, they were found in a thoroughly well-kept state. A great deal of work had been done by the patients in putting in order and beautifying the airing yards, which, when completed, will be the finest attached to any Asylum in the Province. Considering the very recent period at which the Asylum was opened, and the difficulties that attend all new organizations, the order and system that generally prevailed, reflected credit upon the Medical Superintendent and his staff. I saw all the patients, four of whom were confined to bed. With these exceptions, the health of the Asylum and the condition of the patients were satisfactory. They were all very neatly and comfortably dressed, and proper attention appeared to be paid to their personal cleanliness. Except in two instances, the patients were very quiet and generally free from excitement.

The Medical Superintendent was instructed to proceed with the construction of the roads, according to plans furnished by the Public Works Department, and the purchase of stock and stable furnishings, together with carriages, &c., was authorized.

It was noticed at this visit that a good deal of the furniture supplied by the Oshawa Cabinet Co. was not standing the test provided for in the bond given by the Company, and the Medical Superintendent was instructed to closely observe the defects, and report upon them before the expiration of the time that the furniture was to be under such test.

At my visit on the 11th July, the population of the Asylum had increased from 135 at my previous inspection, to 177. No less than five deaths had taken place since the opening, in the circumstances connected with which there was nothing unusual to report.

The mental condition and habits of some of the patients that had been transferred from the London Asylum, were examined into; and as it was clear that at least three of them were unfitted for such accommodation as this Asylum afforded, they were re-transferred to London. With these three exceptions, all the patients received proved to be proper subjects.

The cutting off from the original plans of the rear projection of the building, which was intended to provide space for an associated dining-room for the patients and rooms for the domestics, as well as kitchen, laundry, etc., in the basement, necessitated the using of rooms in the centre building for these purposes; and although the allotment of space for these services, and for the lodgement of the Asylum staff and for official purposes, was reduced to the smallest compass, still the dormitory capacity for patients was thereby reduced from 240 to 200 beds. The primary object of utilizing the building has, however, been accomplished in the immediate provision that was thus made for the insane confined in the Common Gaols; and which, under any other circumstances, could not have been obtained in less than eighteen months.

It now remains to decide in respect to the future of the Institution: whether it shall remain what practically it now is—a branch of the chief Asylums,—or take its place in our system as one of the receiving and curative Asylums of the Province. Branch Asylums for the lodgement of the chronic insane exclusively, are expected to be maintained at a lesser cost than those having an equal number of patients, but in which acute cases of insanity predominate. Chronic patients, as a general thing, only require ordinary care and ordinary comforts; and the costly style of structure, and the well-trained and expensive staff of officials that are required for a curative institution, are not necessary in a lodging-house for incurables.

There are, however, many objections to the establishment of a separate Asylum to be exclusively used for the case of the chronic insane: chief among which is the necessary determination at the time of transfer to such an Asylum, that the insanity of the patient has developed into incurability. This, it must be admitted, is frequently attended with considerable uncertainty, in which case the patient should always get the benefit of the doubt.

Then again, if the cost of maintaining of the chronic insane in a separate establishment is to be reduced to a minimum, the Asylum must necessarily have a large capacity—certainly not less than 500,—and to my mind there is something abhorrent in collecting under one roof such a large number of the incurable insane, in order that they may be supported at the lowest possible rate, and without giving them the comforts, recreations, and amusements that necessarily would be extended to curable and incurable alike, if lodged in the same Asylum. Beyond all doubt, the best provision that can be made for the chronic insane is cottages erected upon the grounds of the chief Asylums. In this way the number of organizations for the care of the insane is not multiplied, and the maximum of comfort can be given to that class at a minimum cost.

I have, therefore, recommended that this Asylum be made a receiving asylum, and that a district of the Province be allotted to it from which insane will be taken, both under the warrant and ordinary process.

To this end I have recommended that two additional wings for patients, and an extension in the rear be added to the present building, increasing the accommodation to 460 beds. The additional dormitory space thus obtained, to be chiefly single rooms for acute cases, and for the more troublesome class of lunatics that cannot at present be safely confined in the Asylum. The ground floor of the rear extension to be used for a kitchen, scullery, and cook's pantry, on the east, and a bakery and store-rooms on the west side. In rear of these a boiler-house and wash-house. The flats over the rear extension to be used for matron's and attendants' rooms, ironing and drying rooms, and an

amusement hall and chapel. Sketch plans embodying the foregoing suggestions have been prepared and submitted to Government. No fences have yet been constructed around the Asylum property, so that farming and gardening operations are at a stand still, and, I fear, must remain so for another year. In consequence of this, a larger appropriation for vegetables, milk, and feed and fodder, has had to be asked for than otherwise would have been necessary.

For the same reasons advanced in my report upon the Toronto Asylum, I have recommended that a dwelling-house be erected for the Medical Superintendent in close proximity to the Asylum. The erection of houses for the bursar (who also acts as store-keeper), farmer, and engineer are also absolutely necessary, as these officers should always be near their work. It has also been recommended that an appropriation be asked for to erect frame coal-sheds, cow-stables, and all the outhouses that are necessary to an Asylum. These works of construction may be summed up as follows:—

1st. Extension of the Asylum, by the addition of two wings and a rear extension.

2nd. Houses for Medical Superintendent, bursar, engineer and farmer.

3rd. Fences around the farm, and division fences for fields and garden.

4th. Brick coal sheds, cow stables, piggery, hennery, and other out-houses.

The cost of maintaining the Asylum from the time of its opening up to the close of the official year—a period of 198 days—amounted to \$20,948 56. It would be unfair to the Asylum at this stage of its existence to institute a comparison of the cost of the various services with that of the old-established Asylums, particularly as there are abnormal expenditures to the extent of about \$3,000 included in the accounts, which will not require to be repeated. It is very clear, however, that so long as the capacity of the Asylum is confined to 200 patients, it will be a very expensive one, as the same staff, with a few additional attendants and servants, is all that would be required for an institution double its size.

ASYLUM FOR IDIOTS, ORILLIA.

ORGANIZATION OF THE ASYLUM.

The buildings that have now been re-constructed and fitted up for the purposes of an Idiot Asylum at Orillia, had previously been occupied as a branch of the Toronto Asylum for a period of ten years; but on the opening of the London Asylum, in the fall of 1870, they were abandoned by the transfer of the patients to the last-named place. A question affecting the ownership of the property subsequently arose between the Governments of the Dominion and the Province, which, in 1873, was settled in favour of Ontario, when the buildings were again taken possession of. In consequence of the accumulation of idiotic persons in the Gaols, who were reported as dangerous to be at large, and the large number of the same class for whom custodial lodgement had been asked for from private families, I considered it my duty to bring the matter under the consideration of the Government, recommending that the Orillia buildings be placed in order, and utilized for the purposes of an Asylum for Idiots. This recommendation met with the approval of Government, and at the last Session of the Legislature the sum of \$20,000 was voted for the purpose of adding to and re-constructing the building, and \$9,000 for providing the requisite furniture and furnishings.

With a view to the adaptation of the building for the purposes assigned, certain structural changes became necessary, which were reported upon and recommended as follows:—The dormitory accommodation of the building, as originally arranged, was all of an associated character, and was only suited for the quieter class of patients. To provide for the more violent cases, a percentage of single rooms had to be obtained, which necessarily reduced the capacity of the Asylum to a small extent. It was recommended that the west side of the main building and the upper flat of the north extension be fitted up for males, giving space for eighty-five beds, and that the east end of the main building, with the rear extension, be used for females, affording accommodation for sixty-five, being a total capacity of 150 beds, twenty-six of which would be in single rooms.

Having regard to the destructive propensities of idiots, it was recommended that all the partitions and walls of the building should be ceiled at least six feet from the floor, with tongued and grooved sheeting. Two dining rooms on the male side and two on the female, on the ground and first flats respectively, were required, each communicating with the kitchen by dumb waiters, and with hot and cold water laid on in all of them. It was recommended that the Asylum should be heated with steam, radiators being used instead of steam coils, and that all exposed steam pipes and radiators be covered with wire guards. In order to obtain as pure an atmosphere as possible, it was recommended that the water closets and bathing rooms be built in extension from the main building, and that a system of ventilation to each chimney shaft from dormitories and sitting-rooms be introduced. There being no gas supply in the Town of Orillia, I recommend that gas works should be constructed to manufacture what would be required to light the buildings, as the use of coal oil would be dangerous in such an institution.

These and other works were proceeded with in the early part of the year; but owing to their nature and extent they were not completed until the middle of September.

Recommendations for various other additions and alterations have been made, which have not yet been acted upon.

Tenders for the staple articles of furniture, such as bedsteads, mattresses, pillows, bureaux, chairs, tables, &c., were solicited by public advertisement, and the lowest tender was accepted and awarded to Messrs. Prierly & Graham, of Hamilton, subject to the usual wear and tear and heat test of two years. Other articles of furniture and furnishings were purchased at manufacturer's lowest rates.

Dr. J. McLaren Wallace was appointed Medical Superintendent of the Asylums on the 1st August, and prior to entering upon the discharge of his duties he visited several Institutions of a similar kind in the United States, in order that he might become informed of their system of management and working. Mr. Bernard Mullen was appointed Bursar and Store-keeper at the same time.

The building was ready for patients on the 25th September, when the idiots confined in the Branch of the London Asylum, numbering thirty-five, were at once transferred to it, and immediately following, all that were in custody in the Common Gaols, together with the most urgent cases that had been reported from private houses. At the date of writing this report, there are one hundred and three inmates in the Asylum, which only leaves forty vacancies.

In addition to the inmates in residence, admission has been awarded to 17 idiots, who had not then been brought forward, but when admitted would increase the population to 120, leaving only 20 vacant beds in the Asylum.

Of this number of inmates, no less than 26 are under the age of fifteen, a large proportion of whom are susceptible of training and instruction. It is for this class of idiotic persons that better and more suitable provision should be made.²

In connection with this subject, I made the following remarks in my Fifth Annual Report, the truth and force of which have been confirmed by the observation and experience of subsequent years:

"The class of idiots for whom it is most desirable that something should be done in this Province, are the youths between the ages of 5 and 14. These idiotic and imbecile children, of whom there cannot be less than from 200 to 300 in Ontario, are now growing up without any training or instruction, and are constantly contracting vicious habits, and in many cases dangerous propensities. In every family where they are, their care is attended with the greatest anxiety, but among the poorer classes it is to be feared they are often utterly neglected. So long as this state of things is allowed to exist, Asylums for adult idiots must continue to be enlarged, and their number increased in order to provide quarters for this unfortunate class. Under these circumstances it becomes a question for the serious consideration of the Government and the Legislature, if a well devised effort should not be made to reduce the number of adult idiots who require to be supported by the public and confined in asylums, owing to dangerous habits or indecent behaviour. This can only be accomplished by the establishment of a training school for idiotic and imbecile children. The reports received from such institutions now in operation in Great Britain, and other countries in Europe, as well as in the United States, are most satisfactory. A large number of the children trained and instructed in them are fitted to be placed in families, where they become useful and earn

their own living, instead of becoming, as they otherwise would, vicious and degraded, and a constant charge upon the public.

“When we consider that every adult idiot placed in an Asylum at the age of 22 (which is the average age of the present residents), will have to be supported for twenty or thirty years in an Asylum, at a cost of \$140 a year, even public economy suggests the adoption of the only remedy that can be provided—viz., the establishment of a training school. At the present time, about a fourth of the inmates of the Asylum are of a teachable age; but if they remain much longer in the same wards with grown up idiots, bad habits will be formed, and instruction rendered impossible.

“The training school should be wholly for educational purposes, and as soon as an idiot is found to be incapable of receiving instruction or benefit, he should be removed to the Asylum.

“Fully believing that the proposed establishment will supply a want that is felt by many a family in the Province to an extent that is but little realized, and that through its means, the necessity for adding to Asylums for adult idiots will be much decreased, I have presumed to bring the matter under the notice of the Government and the Legislature.”

To accomplish the objects aimed at in the foregoing recommendation, a Bill was introduced to the Legislature, in the session of 1870-71, but which was subsequently withdrawn. Now, however, that the Orillia Asylum is again re-established, its organization and staff could, in great measure, be able to conduct the affairs both of the Asylum and the Training School, and all that is wanted is a building in close proximity to, but entirely isolated from, the Asylum, I would again most respectfully urge the establishment of this school, leaving the present building for the custody of such adult idiots as are dangerous or unfit to be at large.

This will necessitate the acquirement of more land, as at the present time there are only nine acres attached to the Asylum.

In order to obtain as much space as possible for patients, it was found necessary to lease a house in the town for the Medical Superintendent. It is most desirable that a house should be erected for him at once, in order that he may constantly exercise supervision over the affairs of the Asylum.

As the Asylum was only opened a few days before the official year, no maintenance accounts have been incurred.

ONTARIO INSTITUTION

FOR THE

Education of the Deaf and Dumb,

BELLEVILLE.

The continually increasing number of admissions to the Institution for the Education of the Deaf and Dumb point to the fact of its increasing popularity, and also to the necessity for enlarging its capacity for the reception of deaf-mute pupils. Opening in October, 1870, with 70 pupils, there have been in residence during the past year no less than 256 pupils; and during its six years' existence 335 deaf mutes have in some measure reaped the advantages offered by the Institution. Of 118 pupils who have received only the partial benefit to be derived from a short stay in the Institution, at least 55 have been prematurely removed by their parents, most of them without any sufficient cause. As indicated in my last Report, I can see no reason why compulsory attendance should not be enforced in these cases, as in the cases of children who fail to attend the common schools of the Province; especially as education is, if possible, more essential in the case of deaf-mutes, than in that of hearing and speaking persons.

As, however, the number now in attendance overtakes the capacity of the present buildings, which are only calculated for 200 pupils, any such measure as I have indicated must be postponed until the buildings are so enlarged as to meet the requirements of the Province. There are in addition many structural defects and inefficient arrangements, which must be overcome before the Institution can be considered complete in all its departments. Chief among these requirements are,—

- 1st, Increased dormitory accommodation.
- 2nd, Additional class-rooms.
- 3rd, Additional sitting-room and study rooms for the male pupils.
- 4th, An isolated room for an hospital.
- 5th, Store rooms for Institution supplies.
- 6th, Improved water-closet arrangements.

In order to provide space for the additional class-room and dormitory accommodation required, it is most advisable that the rooms now occupied by the Principal and his family should be made available for school purposes. It is also most desirable for other reasons, that the Principal, in his family relations, should be separated from the Institution. In order to attain these ends, I have recommended that an appropriation be made to build a house for the Principal, to be connected with the main building by a covered way, but entirely isolated from the Institution in its domestic arrangements. This will render available for class-rooms the space in the main building now occupied by him. The change

as indicated need not in any way interfere with the supervision which the Principal must exercise over every department of the Institution, and will be the least expensive method of providing the accommodation required.

The extension of the dining-room addition to the west, in like manner as it is now extended to the east, will provide a play-room for the girls, a store-room for trunks, etc., and an hospital-room for females.

In addition, I have recommended that a brick building be erected on the site of the wood-shed, making provision on the ground floor for a store room for supplies, and a large sitting or play-room for boys. This will remove them, in bad weather, outside the main building, and prevent much noise and destruction that is now unavoidable. On the first floor there would be an hospital for boys, having a separate entrance from below, and a large dormitory. In the mansard roof of the second floor would be another dormitory, a store-room for trunks and clothes, and a tank for the water supply. In this manner will be provided space for the accommodation of 250, and possibly 270, pupils, without so crowding them as to interfere with hygienic requirements.

In making these alterations it is most necessary that there should also be taken into consideration the adoption of an improved plan for heating the buildings. Under the present system the heat is very unequally distributed, the rooms in the main building, near the boilers, being overheated before it is possible to sufficiently heat those not so near; and, as there is no separate communication between each room or flat, it is necessary to heat the whole building if any part requires to be warmed.

The boilers at present in use for heating the buildings are old, ill-constructed, and too small for the work they are called upon to perform, so that in cold weather the fires require to be forced, thereby causing waste of fuel. Owing to faulty construction and position, they cannot be properly inspected internally or externally, and they are, therefore, unsafe in their present place—the basement of the building.

Much difficulty has been experienced owing to the defective manner in which the drains were originally constructed, the rock which underlies the thin stratum of soil which lies between the Institution and the water not having been sufficiently blasted to admit of a gradual fall to the main sewer. In view of the proposed addition at the east end of the buildings, I have, therefore, to recommend that a new main sewer be constructed, to carry off the drainage from that side of the Institution, and to receive the discharge of these drains which are at too low a level to be properly emptied by the present sewer. Into the man-holes of these sewers, lateral tile drains can be led, which will drain the surface of the land in front of the buildings, the compact and cold clay of which it is composed preventing all efforts at proper planting and ornamentation.

Several visits of inspection were made during the past year. At a visit made on the 17th of April, I was accompanied by the Hon. the Provincial Secretary, upon which occasion inspection was made of every department of the Institution, as well as examination into the general management of its affairs. The result proved very satisfactory, as everything was in most excellent order. The dormitories on both sides of the house were in a most commendable state of order and cleanliness. The knotty and uneven floor of these rooms is, however, a great drawback to their appearance, and I have to recommend that an appropriation be made for the purpose of purchasing hard-wood flooring, to be laid by the Institution carpenter and the boys who work at that trade, and which, when properly polished, may be kept clean without the constant use of water, which is at present required, and which is injurious to the health of the pupils. The bedsteads obtained from the Provincial Reformatory, which are ungainly in appearance, and in many cases so broken as scarcely to be worth mending, should be replaced by others of more suitable character. I have, therefore, recommended that an appropriation be asked for the purchase of 100 bedsteads of the Asylum pattern.

At the time of this visit there were 218 pupils in the school, of whom 137 were males and 81 females. The total number of entries during the session had been 222, one of whom had died, and two of whom had been removed by their parents. The number remaining exhausted the entire dormitory and class room accommodation, which in fact is only calculated for 200. In order to prevent the very perceptible overcrowding, and to provide proper means for the classification of the pupils and for other reasons, I recommended that the teachers who lived in the Institution, should, with a single exception, receive an allowance in lieu of

board and lodging, and remove from the Institution. This recommendation was approved by the Government and carried out.

Of the 222 pupils who had entered during the session, 43 were supported by their parents, 14 orphans were supported by the Government, and one hundred and sixty-five were entered as free pupils upon the certificates of municipal authorities. The number of over-ages had been somewhat reduced, there being at the time of my visit only 15—males, 11; females, 4. With a view to overcoming certain defects in the management, orders were framed for the future guidance of the Principal and officers of the Institution, which were, after being approved of by an Order in Council, carried into effect as By-laws. Owing to a great pressure of work, I was unable to make a personal examination of the literary classes, but upon my recommendation, Dr. James Carlyle, mathematical master, Normal School, Toronto, was detailed by the Minister of Education to perform that duty, respecting which he reported as follows:

"I arrived at the Institution on Saturday morning, June 24th, and was very cordially received by the Principal, Dr. Palmer, who expressed much satisfaction at the prospect of having the pupils examined by one connected with the Educational Institutions of Ontario.

"During the day I was conducted through the buildings, and over the farm. I witnessed the pupils at work, at their play, and also at their meals. It afforded me much pleasure to witness their kindly deportment to each other, and to their teachers. Their general appearance indicated health, happiness, and contentment. Quietness, regularity and order pervaded the whole Institution.

"On Sunday I attended all their religious exercises. In the morning Dr. Palmer gave an explanation of the general Sunday School lesson for the day, to the whole class, and in the afternoon, Mr. Watson, the teacher in charge for that week, explained a portion of Scripture. During both of these exercises the pupils seemed to enjoy and enter into the spirit and meaning of them. In the evening the Principal had a Bible Class, when a portion of Scripture was read by the pupils, and they were examined by the Principal and myself on the meaning of it. I found that many of them had an accurate knowledge of what was read, and some of them answered difficult historical questions connected with the lesson.

"During the succeeding four days I made a careful examination of all the classes, from the lowest to the highest. Believing the object in educating deaf mutes is, to give them such a knowledge as will enable them to communicate freely their thoughts and ideas with the world around them; in a word, to give them a knowledge of the ordinary language and transactions of every-day life, I endeavoured in my examination to find out to what extent the teaching in the different classes was accomplishing this object. In doing this, the Principal and every teacher afforded me, readily and willingly, all the assistance in their power.

"In arriving at conclusions I constantly kept in mind the obstacles and difficulties in the way of imparting instruction to deaf mutes.

"I am of opinion, that now a more thorough system of classification can be adopted, than was perhaps practicable, during the early history of the Institution. A regular system of promotion from lower to higher classes, so that each teacher would have pupils of nearly the same attainments, would, I am convinced, very materially economise the work of the teachers. That this could be done, and would have a beneficial result, seemed to be the opinion of all concerned, and each one expressed a willingness to have the plan adopted, although it will remove pupils from certain classes where they have been for two, three, or four years, and to whom the teachers have become much attached.

"The examination on the whole, was more than satisfactory. It pleased me very much not having examined the pupils before, I am not prepared to indicate the progress that has been made during the last year; but I have much pleasure in stating that the advancement made by the great majority of the pupils during the time they have been under instruction, is all that could reasonably be expected. In very many cases it is equal to what is accomplished by ordinary pupils in our best schools. In the higher classes the pupils generally have a fair command of language, so that they can express their thought clearly and correctly. Their knowledge of arithmetic enables them to solve problems in ordinary transactions as far as interest. They are well acquainted with the history and geography of Canada.

"I visited the drawing class, where I found many had made considerable progress in

the art of copying pictures; and a few were trying mechanical drawing, with the object of making it useful in after life.

"I also listened to Mr. Watson drilling his class in articulation. It seems to be a difficult work, and little has been accomplished except with those who had learned to talk before they had lost the sense of hearing.

"There are in the Institution a number of pupils, who, from various causes are hopelessly dull, who seem to have accomplished scarcely anything after three or four years of patient energetic effort on the part of the teachers. What is to be done with them? If the system of promotion referred to, be adopted, they will soon all be in one class. Would it be well to allow this, and then place them under the care of a teacher specially fitted for dealing with such cases, or would it be better to allow them to spend more time in the workshop, where they would learn their trade more quickly and more perfectly? Such cases are worthy of serious consideration.

"In conclusion, I desire to say that I believe Dr. Palmer and his staff of excellent teachers are doing a good work in Belleville, and that their Institution may justly be classed among the successful Educational Institutions of Ontario."

Another visit of Inspection was made, commencing on the 28th October, after the beginning of the seventh session, now in progress. I found 215 pupils had already entered, although 22 days of the session only had elapsed. Usually the pupils are very dilatory in returning to the Institution, and although the session commences in September, it is frequently January before the whole number is assembled. This irregularity is very annoying, as it disarranges the classes, and is a positive drawback to the pupils. The change that has occurred this year is, I trust, indicative of the growing appreciation of the advantages afforded by the Institution to deaf mutes, and of the necessity for prompt and continuous attendance, in order that the places in class might be retained. It is, however, much to be regretted, that of the number who have not returned, at least 25 would have been greatly benefited by further instruction. The Principal has advised that 13 of this number would return before the commencement of the new year, but considering the large number who had entered, and the possibility of fresh applications being received, it is very doubtful if there will be room for their reception if their return is so far postponed. The Principal was requested to communicate immediately with the parents, pointing out this, and requesting to be informed of the reasons for their detention. At the date of my inspection, 27 new pupils had been admitted, and admission had been awarded to 16 more. This number will most likely be increased, and will tax the capacity of the Institution beyond its limits, rendering an extension of space imperative.

The number of over-age pupils admitted this session was only 17, of whom four are 21 years, 3 are 22 years, 1 is 23 years, 4 are 24 years, 1 is 26 years, 1 is 29, and 2 are 30 years of age. Only one of the number was admitted for the first time, this Session. A large number of this class were found to be incapable of receiving benefit in the literary department and were not readmitted in consequence. The proportion of over-age pupils is, therefore, by no means excessive, especially considering the pressure that is frequently used for their admission, not so much that they may be educated, as to obtain an Asylum for them. Of the 215 pupils in residence at the time of my visit, there were:

Admitted upon certificate of municipal authorities.....	166
" as paying pupils.....	34
" as orphans.....	15

—
215

Considering that the revenue from paying pupils is only about \$1,500 per annum, I have again to submit for consideration, whether it would not be best to declare the Institution free to all deaf-mutes, *bona fide* residents in the Province, who are of the proper age and mental capacity, under the following conditions:—

1st. That attendance shall be compulsory upon all who have entered, for such a period as may be necessary in order to complete their education.

2nd. The counties of the Province to defray travelling expenses to and from the Institution, and to provide for the proper clothing of all pupils whose parents are unable to pay for the same; payment to be made from a fund to be created by a grant per head by the counties for all deaf-mutes residing in the county being under 21 years of age.

3rd. An industrial outfit for each trades-pupil to be provided for out of the same fund.

Under such a scheme the education and training of deaf-mutes would be more in accordance with the educational system of the Province, becoming absolutely free to all. The system of requiring poor but, in many cases, too sensitive parents to apply to the municipal authorities for a certificate of indigency, is objectionable, and would thus be overcome. For such persons who preferred to pay for the board and lodging of their children, the present rate could be continued.

In accordance with suggestions made at my previous visits, steps have been taken by the Principal to secure a better classification of the pupils than has heretofore existed, and with the most satisfactory results. I conversed with the teachers, and all expressed satisfaction with the change, and gave their opinion that increased efficiency on the part of the teachers, and proficiency on the part of the pupils, might be confidently looked for.

I strongly impressed upon the Principal the desirability of utilizing the labour of such pupils as were fitted for the work, in the domestic and out door operations of the establishment. I cannot but think that nearly all the female pupils should receive instruction in cooking, and training in housework, not that I desire to subordinate the literary to the industrial in the education of the pupils; but that, in my opinion, too little attention is given to practical training in Institutions of this class.

The question of organizing a special class in articulation has received much thought and consideration on my part, but I do not think that the practical results of such an organization would be sufficient to warrant the expenditure of time and money that would be necessary for its establishment. The present system of teaching the articulation class will, therefore, be continued for the present. In view of the importance and necessity that exists for keeping informed of the progress in the branch of deaf-mute instruction, I instructed the teacher of the articulation class to visit New York, Boston, and Northampton in order that he might obtain a practical knowledge of the most advanced methods of articulation instruction, and its results.

The various departments of the Institution were visited. In the shoe shop and carpenter shop, I found a considerable number of boys employed, and that they had both turned out a good deal of work during the year. Much difficulty exists, however, in providing suitable industrial employment for boys who are too young to work at a trade.

The buildings were inspected, and found to be in good order and exceedingly well kept throughout. The dormitories were clean and neat, particularly those on the girls' side of the house.

I was present when the meals were served. The discipline and order was most excellent, and the food wholesome and sufficient. Breakfast consisted of corn bread, fried potatoes, bread, molasses, and tea; dinner, of roast mutton, beef soup, potatoes, and bread; tea, of bread and butter and tea.

The health of the inmates was good, only one boy being confined to bed from a sprain. The pupils were all clean and neatly clothed, and appeared comfortable and happy. No complaints whatever were received.

The laundry arrangements are defective. At present washing and ironing seems to be going on every day in the week. The introduction of proper laundry machinery would do away with this difficulty, and I have, therefore, to recommend that an appropriation be made for the purpose of purchasing a small engine and boiler for motive power, and the most improved laundry machinery suitable to the requirements of the Institution. At my visits, orders were given for the renewal of furnishings to the extent that the appropriation would admit of.

A detailed statement of the expenditure incurred in the maintenance of the Institution for the year, will be found at the end of this Report, showing the total cost to have been \$33,517.35.

The sum of \$1,912.00 has been received and paid into the Treasury Department, for the board of paying pupils, which, if deducted from the total cost of maintenance, would show the net cost to the Province of maintaining the Institution to have been \$31,605.35.

A statement of the estimated expenditure for 1877 is also submitted, which has been prepared with a view to carrying on the affairs of the Institution in as economical a manner as the efficient conduct of its various services will admit of.

The expenditure of the Institution for the year, and the cost of each pupil under the various headings of the estimates, are exhibited in the following statements.

INSTITUTION

FOR THE

EDUCATION OF THE BLIND,

BRANTFORD.

As in the case of the Institution for the Deaf and Dumb, the past year has witnessed a large accession to the number of those who have taken advantage of the facilities afforded by the Institution for the Education of the Blind, for the instruction of their blind children. Commencing its first session in 1872, with only an attendance of eleven, there were, on the 30th September of this year, no less than 120 pupils in the Institution, with every probability of an increase of that number. The rapid progress of the School cannot be better shown than by giving the number of pupils in attendance during each session since its opening, as follows:—

	Males.	Females.	Total.
First Session	7	4	11
Second "	45	10	55
Third "	49	33	82
Fourth "	68	44	112
Fifth "	72	54	126
Sixth " (Up to 30th Sept., 1876.).....	62	58	120

During these sessions a total number of 181 have in some measure derived benefit from the course of instruction imparted in the Institution, many of whom are now established in life, earning their own livelihood by the trades and callings acquired during their residence.

The following summary shows the counties and cities from which the 120 pupils admitted this session, and the entire number that have been in attendance since the Institution was opened, were received from:—

The large and increasing number of inmates argues the necessity for extending the accommodation provided in the present building. From returns received, it is beyond a doubt that there are some 280 blind persons of school age resident in the Province. The present buildings are calculated for a maximum number of 100 pupils, and more room is urgently required to secure the health and well-being of the present number of inmates, as well as in the interests of those who will otherwise grow up in ignorance and dependence. The original plan of the present building contemplated the erection of two wings in extension, for dormitories, class-rooms, etc. The erection of at least one of these has become a necessity, and I have, therefore, recommended that an appropriation be made for the purpose, and for the extension of the rear addition, to provide increased domestic accommodation.

When this addition has been made, and the Institution rendered free to all, without requiring certificates of indigence, I trust that the compulsory clauses of the School Act will be enforced in the case of blind as well as in the case of deaf and dumb children. The result of domiciliary visits paid to the homes of these classes of physical defectives, proves the very urgent necessity of such a law, by means of which the unfortunate classes referred to might, while young, reap the advantages of such education and trades-instruction as would enable them to fight the battle of life to the best advantage.

The fact that only \$150 was collected during the year for the board of pupils, leads me to the conclusion that the following principles should be adopted in respect to admissions, and, if statutory power is needed, I would recommend that a Bill be submitted to the Legislature embodying the following regulations, viz. :—

1st. Compulsory attendance of all blind youths between the ages of seven and twenty-one, for such time as may be necessary in order to give them literary and industrial instruction.

2nd. Board, tuition and instruction to be free to all pupils.

3rd. Counties to pay for travelling expenses to and from the School, and for the proper clothing of all pupils whose parents are unable to defray such expenses. A fund for this purpose to be created, by the payment of a sum in proportion to the number of blind persons under twenty-one years of age residing within its limits, by the several counties of the Province.

4th. An industrial outfit to be purchased out of above-named fund, for any indigent pupil.

The increase in the number of pupils has already taxed the resources of the Institution to the utmost, and provision will require to be made for the purchase of bedsteads, mattresses, bedding, etc., for which an appropriation is asked. The laundry appliances also lack completion without the purchase of a mangle. An appropriation is also asked for the purpose of purchasing the increased number of books, maps, and appliances for the literary department; tools, machinery, and stock required for the industrial department, and for the musical instruments and music required for the musical department, all of which are rendered necessary by the increased number of pupils.

In addition to these sums, an appropriation is recommended for the purpose of continuing the ornamentation of the grounds, and for renewing the ornamental and fruit trees that were killed during the last severe winter, and for building a root-house, ice-house, etc., in order to complete the outbuildings.

In order to provide sufficient means for the extinguishing of fire, an appropriation is recommended to replace the steam boiler now in use at the pumping-house by one more improved and economical construction, which can generate steam in a short time and for a circulating boiler to supply the kitchen and pantries with hot water.

Several visits of inspection were made during the year, the first of which was during the month of April, upon receiving information that scarlet fever had broken out in the Institution. Although the cases reported appeared ten days before the day of my visit, no additional cases had developed; and, judging from appearances, it was likely that the disease would be confined within its then limits. But, as fresh cases appeared, it was deemed advisable to disperse the pupils, which was accordingly done on the

The outbreak of this epidemic points to the necessity for the establishment of an isolate hospital, for the treatment of diseases of an infectious character in connection with this an

all other public institutions where there are a large number of inmates. Fortunately in this case none of the cases proved fatal, as the type of disease was mild in its character.

Every department of the Institution was inspected at the time of my visit, and all were found to be in very good order, and giving evidence of good management. The want of play-rooms for the pupils, and the consequent use of the dormitories during the day time, caused them to be less tidy than was desirable, but instructions were given in my minutes that a better system of keeping the dormitories must be introduced, and means taken to exclude the pupils during the day time. 125 pupils had entered during the session, but ten had left for various reasons, and there were only 115 in residence at the time of my visit, of whom only five were paying pupils. The remainder were entered as orphans or free pupils. Fifty-three pupils were receiving mechanical instruction, viz. :—In willow work, 21; and in cane seating, 14 boys and 18 girls.

In the middle of June, I again paid a visit to the Institution to determine what repairs should be done during the recess, to prepare it for the ensuing session.

A third visit was made in September, shortly after the commencement of the sixth session. I found 103 pupils in attendance, or an increase of 14 over the number in residence at a corresponding date last year. A new feature in the admissions of the session is the preponderance of females over males, the number of girls admitted being 54, and the number of boys 49. This is not likely to continue, however, as the census returns show the blind male population to be twenty per cent. in excess of the blind of the other sex. Every part of the building was again inspected, and found to be in a clean, orderly, and well-kept state. The plastering, whitewashing, oiling and repairs ordered at my visit in June, had been done during the vacation, and much improved the general appearance of the Institution. The various class rooms were visited while instructions in reading, grammar, history, and music were in progress. The willow-ware workshops were also visited. The discipline in both literary and industrial departments was very good, and the pupils appeared to give interest as well as attention to their studies and work. The general appearance of the pupils was most satisfactory, all seeming to be healthy and happy.

Particular attention is invited to the very able and exhaustive Report of Mr. Principal Hunter, which will be found in the Appendix.

Annexed to the report will be found a detailed statement of the expenditure incurred for the maintenance of the Institution for the year ending 30th September, by which it will be seen that the entire cost amounted to \$24,033 54.

An estimate of the amount required to carry on the Institution for the year 1877 is also appended, which has been prepared with as much regard to economy as the efficient management of the establishment will admit of.

The following statements exhibit the expenditure of the Institution in detail, and the cost per pupil under each heading of the Estimates.

Sub-division of Estimates for 1876.	Amounts voted.	Amounts actually expended.	Cost per pupil on the daily average attendance.

PRISONS, Common Gaols and Reformatories OF ONTARIO.

COMMON GAOLS.

I have again to report a very large accession to the criminal and vicious classes of the Province, as indicated by the greatly increased number of commitments to the Common Gaols, for the year ending 30th September, 1876. That the rapidity with which these classes have increased within the past few years, and the extent of that increase, may be fully realized, I submit the following summary, showing the number of persons who were committed to the Common Gaols each year, since the 1st October, 1868, as follows:

Number of persons committed for the year ending (Males.	Females.	Total.
" " " 1st Oct., 1869)	3,893	1,762	5,655
" " " 1st Oct., 1870	4,334	1,845	6,379
" " " 1st Oct., 1871	4,915	1,700	6,615
" " " 1st Oct., 1872	5,287	1,671	6,958
" " " 1st Oct., 1873	6,068	1,809	7,877
" " " 1st Oct., 1874	7,675	1,813	9,488
" " " 1st Oct., 1875	8,437	1,636	10,073
" " " 1st Oct., 1876	9,439	1,797	11,236

These figures show that the annual rate of increase in the number of persons committed to Gaols, within the periods named, varied from 3.75 per cent. in 1871, which was the lowest, to 21.22 per cent. in 1874, which was the highest yearly increase, and that the increase of the present over the preceding year, was 11.55 per cent.; the average annual increase for the seven years being 14.25 per cent.

The figures referred to further prove that the gaol population of Ontario has doubled since 1869, a period of seven years, while, if we take the period between 1861 and 1871 as a basis, the natural increase in the population was only about 16 per cent. in ten years. Further, assuming that the population of the Province is now 1,750,000, it would appear that one out of every 155 of the inhabitants of the Province was committed to Gaol, for some offence or another during the past twelve months, and that on the evening of the 30th September—the close of the official year—the prison population of the Province numbered 1866. It is only necessary to make a simple statement of these facts in order that the extreme gravity of all matters connected with crime and criminals in their relations to the affairs of this Province, may be fully appreciated. Before commenting further, however, upon this phase of the subject, which is suggested by an examination of the criminal statistics hereunto appended, it is important that as much information as possible should be given respecting the 11,236 persons who were com-

mitted to Gaols during the year. That this information may be presented in the most condensed shape, I have departed from my usual custom, and have annexed the statistical tables to, instead of interspersing them in, the report. These tables are numbered respectively from one to nine, and will, when occasion requires, be referred to according to their numbers. The 11,236 committals comprised the following:—

Males over 16 years of age.....	9,005	
Males under 16 years of age	434	9,439
<hr/>		
Females over 16 years of age.....	1,727	
Females under 16 years of age	70	1,797
<hr/>		
		11,236

As compared with the previous year's commitments, these figures show an increase of 957 males over 16 years of age, 45 boys under sixteen, 161 females over sixteen, and an equality in respect to girls under that age. The ratio of increase in respect to the entire gaol population, is about the same when applied to each of the above classes, except in relation to females under 16 years of age, who, it is satisfactory to observe, have not increased in numbers. In 1875, the number of women committed, showed a considerable falling off as compared with the two preceding years, during which time no appreciable increase took place, and which led me to hope that the commitment of women to Gaols had received a check. The returns of this year, it is to be regretted, prove that the check was only of a temporary character, and point to the necessity for establishing, at the earliest day, an Industrial Prison for women, where the evil effects of indiscriminate association and idleness will, in some measure, be mitigated.

From an examination of Table No. 1 it would appear that the increase in the number of commitments, extends to the whole Province, as only seven out of the thirty-nine Gaols returned a diminished number as compared with the previous year. The most marked increases, in the rural districts, took place at Barrie, Brampton, Lindsay, Sarnia, St. Thomas, and Woodstock, while in all the city Gaols, with the exception of Kingston, there is an increase of from five to thirty per cent.

An analysis of the figures showing the distribution of our gaol population furnishes very conclusive evidence, that the criminal and vicious classes seek the cities and more densely populated places as a base of operations. The commitments from the cities of Toronto, Hamilton, London, Kingston, Ottawa and St. Catharines, together with the counties of which these cities are the capitals, numbered no less than 5,985 or 53.25 per cent. of the entire gaol population of the Province for the year, while the population of these counties and cities, according to the census enumeration of 1871, only represented 21.52 per cent. of the entire population of the Province.

One of the worst features brought to light through the criminal statistics of the present year is the alarming increase in the number of recommitments, amounting to no less than 283 persons, or 29.24 per cent. of all prisoners committed. Of these, 1,630 had been sent to Gaols for the second time, 706 for the third, and 947 from four up to, in some instances, thirty times, during their lives, while some notorious cases had been committed over fifty times. For this class of prisoners, in a large majority of cases, it is idle to talk of applying reforming influences with a view of reclaiming them from a life of crime and degradation. Only the severest prison discipline, accompanied with continuous hard labour, while they are in custody, can affect their incorrigible natures and deter them from criminal courses.

Such of this class of prisoners as are sentenced for periods varying from six months up to two years can, of course, be transferred to the Central Prison, where strict discipline and hard labour can be enforced. A large proportion of them, however, chiefly vagrants and disorderly characters, are sentenced for periods too short to render their labour available in an Industrial Prison.

Respecting this class I used the following language in my last Annual Report: "Now that the establishment of the Central Prison has enabled a better classification—removing from County Gaols the more hardened and habitual offenders—I consider that it is safe to recommend that this class (the habitually vagrant and disorderly) should be used on

“county and corporation works, or employed on farms attached to County Gaols. Many vagrants seek admission to Gaol to obtain immunity from labour, and are fed and clothed at the public expense, passing their time in absolute idleness, while the municipalities to which they belong are paying other men to do the work that might well be performed by this class of prisoners. Moreover, the shame and disgrace attached to the public use of these offenders would act as a deterrent, and in many cases, the ridiculous farce of Police Court sentences would prove morally and physically a punishment.” I would again repeat this recommendation, trusting that statutory authority will be given at the ensuing session of the Legislature to carry it into effect.

A classification of the crimes and offences for which the 11,236 persons were committed to the various Gaols during the year, and a comparison of the same with the year 1869, and last year, is given in the following summary:—

1.—*Crimes against the Person.*

	Year 1869.	Year 1875.	Year 1876.
Murder	38	37	30
Manslaughter	25	12	12
Rapes, assault with intent, and indecent assaults.....	27	93	93
Felonious assaults.....	46	68	124
Assaults	485	666	743
Cutting, wounding, stabbing and shooting with intent.	31	66	123
Miscellaneous.....	28	61	94
	680	1003	1219

2.—*Crimes against Property.*

Arson.....	34	51	38
Burglary	26	54	68
Larceny	1019	1602	1764
Horse, cattle, and sheep-stealing	44	85	75
Forgery	22	33	46
Destroying and injuring property.....	29	96	104
Embezzlement, fraud, obtaining money on false pretences, and counterfeiting.....	78	119	182
Housebreaking and robbery	68	36	62
Trespass	25	72	49
Miscellaneous.....	36	114	141
	1381	2262	2524

3.—*Crimes against Public Morals and Decency.*

Bigamy	9	9	12
Perjury	6	19	12
Keeping, and frequenting houses of ill-fame and prostitution	85	172	210
Miscellaneous.....	20	72	74
	120	272	308

4.—*Offences against Public Order and Peace.*

Abusive and obscene language	34	76	71
Breach of peace and by-laws.....	168	210	99
Deserting employments.....	74	82	45
Drunk and disorderly	1793	3663	3868
Threatening	75	36	83
Vagrancy	783	1641	2128
Carrying unlawful weapons	4	8	13
Miscellaneous.....	69	232	270
	3000	5948	6577

5.—*Detained as Prisoners.*

	Year 1869.	Year 1875.	Year 1876.
For contempt of court	50	77	90
For Debt	78	66	72
Witnesses	22	17	29
Lunatics, and persons dangerous to be at large	271	323	348
For non-payment of fines	30	41	42
Miscellaneous	23	64	27
	474	588	608
Total number of persons committed for the respective years.	5655	10073	11236

It must be borne in mind that the offences enumerated in the foregoing summary are those with which the 11,236 persons were *charged with* in the first instance, and committed to Gaols for; how these charges were disposed of by the various Courts of the Province, before which the prisoners were arraigned, is shown by the following statement:—

Total number of persons committed to Gaols during the year. 11,236

Disposition of the same.

Acquitted on being brought to trial, and discharged	3,355	
Found guilty and sentenced	7,011	
Committed for want of sureties to keep the peace, but afterwards discharged by the Courts.....	176	
Committed as Debtors.....	81	
Detained as Witnesses.....	32	
Committed for contempt of Court	81	
Committed as Lunatics, Idiots, or as being unsafe to be at large	348	
Waiting trial or otherwise detained at close of year.....	152	
	11,236	

From the above figures it would appear, and previous Gaol statistics corroborate the statement, that, speaking approximately, for every four persons who are charged with offences, and committed to Gaol therefor, only three are, upon trial, found guilty and sentenced. Of the 11,236 who were committed this year, it is shown that 3,355, or close upon 30 per cent. of the number were acquitted. I regret that I have not the necessary returns to show the offences that this number of prisoners were acquitted of; but in the alteration of the Gaol registers to meet the requirement of the Dominion statute, passed last session, for the collection of criminal statistics, provision will be made to obtain this information in the future. I apprehend, however, that it will be found that by far the largest proportion of the acquittals was of persons tried by police magistrates for the offences of vagrancy, drunkenness, and disorderly conduct, which, as the preceding summary shows, constituted 53 per cent. of all the charges for which commitments were made to Gaols during the year.

No less than 176 persons were committed for want of sureties to keep the peace, and the offence for which the largest proportion of this class of offenders was placed in custody, was wife beating. It appears to me that the laws in relation to this matter require amendment, the more so when it is known that many of these persons have been sent to Gaol as often as five and six times for the same offence. Why a ruffian who is constantly beating his wife should not be sentenced to Gaol for a certain period with hard labour, instead of his electing to be detained there, in utter idleness, in default of finding sureties to keep the peace, is beyond my comprehension. I have little doubt, however, that if such persons were compelled to break a piece of stone a week, it would materially assist them in restraining their vicious propensities.

It will be seen that 162 persons were committed during the year as debtors and for contempt of Court, chiefly under the provisions of the Division Court Act in respect to fraudulent transactions.

The number of lunatics, idiots and persons dangerous to be at large that were committed during the past twelve months, was 348, as compared with 323 the preceding year. Only 34 of

this number, however, remained in custody on the 30th September, and at the time of writing this Report they had been still farther diminished by transfers to Asylums.

To sum up, it is thus shown that of the 11,236 persons who were sent to gaols, 3,355 were acquitted upon trial, 350 were detained for certain periods for want of sureties, etc., 348 as being insane, 152 were awaiting trial, and the remainder, 7,011 were found guilty of the offences with which they were charged, and received sentence therefor as follows:—

Sentenced to the Kingston Penitentiary.....	199
Sentenced to the Central Prison.....	237
Sentenced to Common Gaols but subsequently transferred to the Central Prison	408
Sentenced to the Provincial Reformatory, Penetanguishene.....	45
Sentenced to Common Gaols and those detained until expiration of sentence or payment of fine.....	6,122

7,011

As compared with the statistics of the preceding year, the above figures show an increase of 750 in the total number of sentenced prisoners: of 44 in the number sentenced to the Penitentiary; of 92 in the number sentenced direct to the Central Prison, and of 137 in those sentenced to Gaols, but subsequently transferred to the Central Prison; and of 509 in those who expiated their sentences in the Common Gaols. In the number of juvenile offenders sentenced to the Penetanguishene Reformatory, there is a falling off of 22, notwithstanding the fact that the commitments of that class to the Common Gaols exceeded the preceding year by over eleven per cent.

The periods of imprisonment that were given to the 7,011 prisoners who were sentenced were as follows:—

For periods under thirty days	3032
For thirty days and up to sixty days, or two months, not including the last term	1699
For sixty days, or two months.....	748
Over two months to three months	459
Over three months to four months	204
Over four months to five months	33
Over five months to six months	382
Over six months to nine months	46
Over nine months and up to one year, inclusive.....	88
Over one year and up to two years	71
Over two years and up to three years in the Penitentiary	118
Over three years	76
For periods of any length in Reformatory	45
Sentenced to death and executed.....	3
Sentenced to death and commuted to imprisonment in Penitentiary ..	5
Sentenced to Gaol imprisonment, with corporal punishment	2

7011

The only thing calling for remark in respect to the foregoing summary, is the enormous proportion of short date sentences. Of the 7,011 sentences that were passed upon prisoners during the year, no less than 5,479—or over 75 per cent.—were for periods under sixty days, 3,032 being under thirty days. Only 454 of the entire number of prisoners were sentenced for for periods over six months; although, as has already been shown, there were no less than 3,283 recommissions during the year, nearly 1,000 of which were persons who had been sent to gaols from four up to twenty times. Fully three-fourths of these 3,283 prisoners may be classed as habitual offenders, to whom sixty days' incarceration in a Common Gaol is no punishment, but in many instances something to be desired.

Table No. 4 exhibits the number of prisoners that were in Gaol custody on the evening of the 30th September—the close of the official year—of which the following is a condensed summary:—

Males over 16 years of age.....	185
Males under 16 years of age.....	18
Females over 16 years of age.....	230
Females under 16 years of age.....	7
	<hr/>
	740

The nature of the imprisonment of these 740 persons was as follows :—

Waiting trial.....	144
Under sentence for periods under two months.....	268
Under sentence for periods over two months.....	269
For default of sureties to keep the peace.....	24
Insane, idiotic, and imbecile persons.....	35
	<hr/>
	740

The entire prison population of the Province, on the evening of the 30th September, was as follows :—

In Common Gaols, as above summarized.....	740
Central Prison, Toronto.....	342
Provincial Reformatory, Penetanguishene.....	182
Provincial Penitentiary, Kingston.....	602
	<hr/>
	1,866

These figures, when compared with those of the previous year, show an increase in the populations of the prisons of Ontario, as follows :—Common Gaols, 37 ; Central Prison, 136 ; Provincial Reformatory, 3, and the Provincial Penitentiary, 509.

From the returns made to me, it would appear that the greatest number of prisoners who were confined in the Common Gaols, on any one day of the year, was 1,308, and the lowest number was 390.

Table No. 5 shows the nationalities, religious denominations, and social state of the prisoners committed during the year, from which the following information is summarized, viz :—

NATIONALITIES.

Born in Canada.....	4,598
“ England.....	1,985
“ Ireland.....	2,844
“ Scotland.....	753
“ United States.....	799
“ Other Countries.....	257
	<hr/>
	11,236

RELIGIOUS DENOMINATIONS.

Roman Catholics.....	4,167
Church of England.....	3,537
Presbyterians.....	1,495
Methodists.....	1,414
Other denominations.....	623
	<hr/>
	11,236

SOCIAL CONDITION.

Married.....	3,448
Unmarried.....	7,788
	<hr/>
	11,236

HABITS.

Temperate	4,712
Intemperate	6,524
	11,236

EDUCATIONAL STATUS.

Could read and write.....	8,691
Could neither read nor write	2,545
	11,236

It is worthy of note, in connection with the figures in the foregoing summary relating to the habits of prisoners, that, as compared with last year, there is a reduction of five per cent. in the prisoners that were reported to be of intemperate habits, and close upon ten per cent. less than the year preceding that.

Table No. 6 gives the offences, in detail, for which prisoners were committed.

Table No. 7 gives the occupations and callings of the prisoners. from which it will be seen that 844 were mechanical workers in iron, steel, brass, &c. ; 532 were carpenters, coopers, and workers in wood ; 266 in leather, and 278 were building mechanics ; besides a considerable number of other mechanics. Among the number there were also 4,693 labourers, and 496 yeomen.

ESCAPES.

During the past year, 34 prisoners escaped from the Common Gaols of the Province, of whom 17 were re-captured and 17 have, so far, evaded re-capture. In order that a comparison of these occurrences may be made with previous years, I may state that during 1875, 19 prisoners escaped and 8 were re-captured ; in 1874, 21 escaped and 7 were re-captured ; and in 1873, 26 prisoners escaped, of whom 11 were re-captured.

The exceptionally large number of escapes this year, and the extraordinary circumstances connected with many of them, call for the fullest explanation in this Report. Before dealing with the subject, however, in its general aspect, I propose, as briefly as possible, to take up each case, showing the manner in which the escapes were accomplished, and whether, in my opinion, they were attributable to the carelessness or neglect of officials ; the structural defects of the Gaols, or to other causes. In obtaining this information I held twelve investigations during the year, some of which were very protracted ; in some instances investigations were unnecessary, and in two cases they have yet to be made.

The evidence elicited at these investigations, and from other sources, placed me in possession of the following particulars :—

At *Pembroke Gaol* three prisoners escaped on the night of the 30th April, or the morning of the 1st May. One of the prisoners was waiting trial on a charge of bigamy, one for uttering forged paper, and one was under sentence to four months' imprisonment for larceny, about half of which period had expired. The *Pembroke Gaol*, I may remark, is a good substantial structure, having nearly all the necessary external and internal requisites for the safe keeping of prisoners. On three occasions, it is true, defects had been brought to the notice of the the County Council, which, in two instances, were remedied ; and although the locks were in some respects defective, still the *Pembroke Gaol* must be ranked amongst the safest in the Province, structurally, and one from which, with the exercise of proper vigilance and care on the part of the officials, escapes should not have taken place.

The Gaol itself had always been found in good order, and scrupulously clean and well kept. The evidence taken at the investigation, however, revealed such an amount of *carelessness in the supervision of prisoners, and general laxity of discipline*, as to render the most substantial walls and strongest bars of little avail in the safe-keeping of prisoners. So ineffectively performed was the important duty of searching prisoners when they were committed, that pistols, knives, lead, and other material that could be used to assist escapes, were always at the control of the prisoners who escaped. Prisoners

ere allowed to remain in the yard for hours, without any supervision on the part of the officials, and while there, keys were manufactured by the men who escaped, that could open several of the prison doors. The greatest carelessness existed in taking care of the prison keys, and on the very night of the escape, strangers were allowed to remain overnight in one of the gaol corridors in charge of a lunatic friend, having in their possession, though unknown to them, keys that could unlock the rear door of the corridor in which the escaped prisoners were confined. In order to provide an extra room for the gaoler's family, the turnkey was turned out of his bedroom, where the regulations required him to remain over night. Under such circumstances it is not to be wondered at that the prisoners, who it was proven were clever, ingenious men, selected their own time to leave the gaol, which they did. In view of these facts, I reported that the escapes were attributable to gross neglect of duty, and careless supervision over prisoners, on the part of the gaoler and turnkey, if not worse in respect to the last-named official; recommending their dismissal from office, which immediately took place. I also reported that the Sheriff was in default in the discharge of his duty as chief executive officer of the Gaol, in not exercising that supervision over Gaol affairs which his office required. More detailed information in respect to this and all the escapes will be found in the separate reports upon the respective Gaols.

At the *Brampton Gaol* a prisoner escaped on the 3rd August. This Gaol, like the one at *Pembroke*, is one of the safest, in point of the general security of the structure and its surroundings in the Province. Notwithstanding this, owing to the laxity of discipline and violation of regulations, an escape takes place from it nearly every year. The circumstances connected with the one now being commented upon, were as follows:—A prisoner was sentenced for burglary, on the 2nd August, to the *Kingston Penitentiary*, for a period of three years, and it was the intention of the Sheriff to have removed him on the 4th. On the intervening day he was let out of his cell in the morning by the Turnkey, and placed at carrying in wood from the yard to the corridor in which he was confined. From the morning until the evening he had the free run of his corridor and the three yards, and for at least half of the time without either guard or turnkey being present. In the middle of the working yard there was a large quantity of cut wood piled up, and a pole about ten feet long had been allowed to remain in the yard for several days. This pole the prisoner spliced with strips of his under clothing to a board taken from the well cover, by which means he made his escape over the wall, which is of the regulation height—19 feet. After a full examination into all the circumstances, I reported that the escape was due, 1st,—To neglect of duty on the part of the Gaoler and Turnkey, in not locking the prisoner up when they absented themselves from guard over him; instead of which he was allowed not only the use of his corridor, but also of the yards. 2nd,—To gross carelessness on the part of the guard in allowing a plank and pole to remain in a yard to which prisoners had access. 3rd,—To an infraction of the regulations on the part of the Gaoler in allowing the Turnkey to assist him in doing his private work, when he should have been guarding the prisoners. The evidence showed that the Sheriff was not to blame. For this neglect of duty, carelessness, and violation of the rules, I recommended the dismissal of both the Gaoler and Turnkey.

At the *Barrie Gaol*, two prisoners escaped under the following circumstances. On the 15th August the prisoners in the lower corridor were turned out into the airing yard, where they were allowed to remain without any guard. When there, the two prisoners who escaped broke the padlock which secured the door leading into another yard, and having wrenched the door from a water-closet, placed it upon the yard door which they had opened, by which means they sealed the wall and made their escape in broad daylight. Although the Gaoler was away from home at the time, still he must be held responsible for the loose way in which prisoners were supervised, for at the very time that I visited the Gaol for the purpose of examining into the escape, and when he alone was in charge, having allowed the Turnkey leave his absence for a week; I found 10 prisoners in the yard referred to, without any guard whatever. The responsibility was still more binding upon him, inasmuch as two prisoners had escaped in the same way, at a former time when his attention was called to the carelessness of the Gaol is strong and substantial, and although there are two weak points in the yard to which the attention of the Council has been called, still their very existence should have made the Gaoler more careful.

I had been compelled on two previous occasions to report the Gaoler for carelessness and

neglect of duty, on one of which I recommended his discharge (which took place, but he was afterwards re-instated); the repetition of such conduct could not be overlooked, particularly as the discipline and order that prevailed in the Gaol was very bad. His dismissal was therefore recommended and took place.

At *Belleville Gaol* a prisoner escaped on the 22nd Oct.; but as he was almost immediately recaptured and no blame attached to the officials, no recommendation was made.

From the *Guolph Gaol*, which in the main is a secure one, a prisoner escaped on the 10th of July. It would appear from the evidence that the Turnkey had a gang of 11 prisoners cutting and splitting wood in the yard, when he was called away for about three minutes to let a visitor out, during which time the prisoner smashed the lock on the yard gate, and having got it open, succeeded in getting off. If any one was to blame it was the Gaoler, who should have been present, either to let out the visitor or take the Turnkey's place while he was absent. Considering, however, the expeditious manner in which the escape was effected, the officials were only cautioned. I instructed that Chubb's padlock should be used for the gates in the future.

From *Sault Ste. Marie Gaol*, four escapes took place during the year, three of the prisoners having so far evaded recapture, and one was brought back. The circumstances connected with the escape of the three prisoners were as follows: Two of them had been sentenced to two years' imprisonment each in the Penitentiary, one for larceny, the other for criminal assault, and the third to six months in the Gaol, for larceny. It would appear that the Gaol chimney caught fire and was burning out, when the Gaoler and the Sheriff's son entered the ward where the three prisoners were confined, and in which there was a good deal of smoke. On examination it was found that the fire was confined to the chimney, and it was subsequently put out. When this was done, the Gaoler retired from the ward without locking the door. The prisoners very naturally, and perhaps designedly, took advantage of this neglect of duty on the part of the Gaoler, and having got into the yard, climbed over the wall and successfully made their escape across the river into United States territory. The existence of some little confusion, owing to the chimney being on fire, cannot exonerate the Gaoler from such neglect of duty, for, when such an occurrence took place it was his first duty to look to the safe custody of the prisoners, particularly if they are sentenced to long periods as they were, and if necessary to remove them hand-cuffed and shackled. This the Gaoler not only did not do, but offered the prisoners every opportunity to escape by leaving the corridor door unlocked. For this reason I recommended his discharge, which took place.

From the *Welland Gaol*, three prisoners escaped during the year; two of whom were recaptured, and one has so far evaded recapture. The facts elicited in connection with all of these escapes, which occurred at different times, showed that in two instances they were due to carelessness and want of supervision over prisoners while at work. One prisoner walked away through the front door of the Gaol while carrying in gaol supplies, and another while unattended in the yard, got over the wall by using a plank and a clothes line. The remaining prisoner, who was also in the working yard unwatched, broke the padlock off the gate and successfully made his escape. At my visit to the Gaol I have frequently observed, on arriving, prisoners in the Gaol and Court House yards unattended, which neglect I warned the officials would result in escapes. For this carelessness, and for neglecting to report the escapes and other irregularities in gaol management, the services of the Gaoler and Matron were dispensed with.

From the *Cornwall Gaol* a prisoner escaped on the 28th June, but was immediately recaptured. It would seem that the prisoners had been taken into the yard to empty their buckets, the Gaoler being on guard in the yard and the Turnkey in the Gaol. All the prisoners returned except one, who had hid himself; and when the Gaoler had gone into the Gaol, this prisoner, by the aid of a plank placed against a buttress, sealed the wall. The Gaoler was to blame for not seeing that all the prisoners returned to Gaol with him, and for allowing a plank to remain in the yard, particularly as he was warned by me at my previous visit against such a practice. It is clear, however, that the buttresses *inside* the yard walls are unsafe, to which the attention of the authorities has frequently been directed. For this reason, and the fact that the prisoner was immediately recaptured, the Gaoler was only censured and warned to be on his guard in the future.

From the *Cayuga Gaol* two prisoners, under sentence of death for murder, escaped on the 28th May. The evidence taken at the investigation very clearly indicated the method the

prisoners adopted, and the means they used to effect their escape; and at the same time pointed out beyond the possibility of a doubt, who were to blame for what would have been, but for the recapture of the prisoners, one of the most signal defeats of the ends of justice that ever took place in the Province. First as to the method and means of escape. It was clearly proved that the Gaoler entered the cells of these condemned murderers *alone* on the afternoon of the 28th May, with the keys of every door in the prison in his hands, and that he had done the same thing on many previous occasions. While in the act of locking the shutters of the cell window in which one of the prisoners was confined, he was felled to the floor by a blow, and was subsequently knocked into complete insensibility. The prisoners then got possession of the keys, opened the doors, and passed into the yard, which is only surrounded by a board fence, over which they easily climbed, and so got away. Such being the method of escape, it becomes necessary to refer to the circumstances that rendered the means used so successful; and at the outset it is almost unnecessary to state that if the Gaoler had not entered the corridors and cells of his Gaol contrary to the regulations, alone, the escape in all probability would never have occurred. Such an act on the part of a Gaoler is, at any time, attended with danger, not only to himself but to the safe-keeping of the prisoners committed to his care; but when he had in charge two murderers under sentence of death, the coolhardiness of the act is as inexplicable as it is unpardonable. And to go in with all the prison keys in his hand, notwithstanding the prisoners were both leg-ironed, and one was chained to the floor, was quite sufficient to create the desire and incite ingenuity on the part of the condemned murderers to effect their escape. Further, the Gaoler could not plead ignorance of the intentions of the prisoners, as he had been informed that they purposed knocking him down in order to effect their escape, which intention they exactly carried into effect. The official conduct and action of the Deputy-Sheriff, who was *de facto* Sheriff, and consequently the chief executive officer of the Gaol, is so clearly shown in his sworn evidence, that any extended comment is unnecessary. Such gross ignorance of well-defined duty, and culpable indifference to and neglect of the most ordinary precautions for the safe keeping of prisoners under sentence of death, never before came under my notice. Assuming to be unaware that he was the chief executive officer of the Gaol, which is the first provision in the printed Gaol Regulations, he left its management entirely and absolutely in the hands of the Gaoler. He never appointed the Turnkeys, and did not seem to know that it was compulsory to have one. He did not know when the post of Turnkey was vacant, or who filled it for the time being; and although the County Council voted a salary every year to pay for the services of such an official, he allowed the Gaoler to draw it whether there was a Turnkey on duty or not. Although the Gaol externally is notoriously insecure, and badly arranged and unsafe internally, and although he knew that the prisoners had previously attempted to make their escape, and— from the evidence of the Government detective—that they intended to try again, still not only did he not appoint an extra guard, but he actually left the position of Turnkey vacant at such a precarious time, leaving the Gaol and prisoners practically in the care of one man, and one whose resignation he had accepted a few months previous for drunkenness and insubordination. Having regard to all these facts, I recommended the discharge of the Deputy-Sheriff and the Gaoler, which was acted upon.

That the gaol was externally and internally unsafe and deficient in many requisites, which condition of things I had very frequently brought to the notice of the Council, was no excuse for the escapes, but should rather have led to increased vigilance and care on the part of the Gaol officials.

At the *St. Thomas Gaol* a short-date prisoner escaped while cleaning up in the court-house yard, but who immediately returned and gave himself up.

At the *L'Original Gaol* a prisoner was allowed to go into the yard water-closet, and not returning, search was made for him in about ten minutes, but in vain. It would appear that the prisoner availed himself of the mortar having loosened in the wall at one of the corners, and by sticking his fingers and toes into the crevices, he succeeded in scaling the wall.

From *Sandwich Gaol* two women who were committed for prostitution, and who were employed at the time in the gaol kitchen, escaped, but were both recaptured. As they had only been committed for a short period, and were old *habitués* of the gaol, the Matron did not exercise that vigilance that she should have done, for which she was reprimanded.

From the *Ottawa Gaol*, on the 18th September, a prisoner escaped who was waiting trial on a charge of larceny. The Sheriff reports that the escape was entirely due to carelessness

and direct disobedience of the prison rules by the Chief Turnkey, who evaded the penalty of dismissal by resigning.

The escapes from the *Simcoe Gaol* and the *Hamilton Gaol* have not yet, owing to press of work, been examined into, but from the circumstances reported by the Sheriff, there is little doubt that at the *Simcoe Gaol* they were due on this, as on two former occasions, to the incompetency of the Gaol officials.

The result of my investigations, as indicated in the foregoing particulars, may be summed up as follows:—

1st. That the escape of 18 prisoners from the Gaols at Barrie, Brampton, Cayuga, Ottawa, Pembroke, Simcoe, Sault Ste. Marie, and Welland, were attributable to carelessness, and in some instances to gross neglect of duty on the part of gaol officials, in all of which cases I recommended the dismissal of the persons who were to blame.

2nd. With respect to the escape of 8 prisoners from the Gaols at Belleville, Cornwall, Guelph, Hamilton, L'Orignal, Sandwich, and St. Thomas, I found that, in some instances, there were indications of negligent watching on the part of officials, but not of such a flagrant character as to warrant dismissal, and in others, to accidents either of a structural or administrative character that were beyond the control of the gaol officials.

3rd. With respect to the escape of prisoners from the Lock-up at Thunder Bay, I have not been able to investigate into the circumstances connected with each, but as the lock-up itself is utterly unsafe, and the work in which prisoners are employed beyond its precincts is that of ordinary farming and gardening, the wonder is that any prisoners are retained at all. As a new Gaol is in course of construction, it is to be hoped when it is completed that I will be enabled to enforce prison rules and discipline.

The same remarks as regards the unsafeness of this structure, apply to Parry Sound Lock-up, from which one prisoner escaped.

It is thus shown that more than one-half of the escapes were due to the negligence, carelessness, and general inefficiency of the gaol officials, for while it is quite true that the Gaol at Cayuga was externally unsafe, the escapes from it, which are placed in the first category, were in no respect due to that cause, but entirely to the fool-hardiness of the Gaoler, and disregard of the most ordinary precautions.

In the Gaols included in the second category, there were, and still are, a good many structural defects, generally of a very trifling character, notwithstanding which, County Councils in many instances cannot be prevailed upon to remedy them.

The most serious difficulty that has to be contended with, however, in the administration of Gaol affairs, is the general unfitness of not a few of the Gaolers and Turnkeys for the effective discharge of the duties devolving upon them. With hardly an exception, they are honest and faithful men, but many of them are wholly wanting in the qualities required for efficient Gaol officials. In order to cope with the determination and ingenuity of prisoners to obtain their liberty, habitual caution and vigilance must be exercised by Gaol officials, instead of which many of them are confiding and unsuspecting to the verge of simplicity. Another class of Gaol officials, and there are not a few comprised in it who count themselves efficient officers, place the most implicit confidence in stone walls, iron bars and locks, to the neglect of close personal supervision, and perhaps this, more than anything else, is the most fertile source of escapes. Then again there are some Gaolers who entered the service fully believing that the position was a sinecure, and although they have discovered their mistake, still they do all in their power to keep up the original delusion, simply by doing as little as possible, leaving the work of the Prison and the supervision of the prisoners to the Turnkeys. By this shifting of responsibility, Turnkeys are frequently held to blame for escapes that should rest upon Gaolers.

Apart, however, from these unfavourable personal characteristics in certain of the officers in the Gaol service, it is very clear that the method of obtaining and paying such officials, is open to the most serious objection.

Men having the charge of prisoners should be honest, intelligent, and brave, and should possess, in a very considerable degree, physical activity, combined with an inherent aptitude to acquire a knowledge of discipline, and the requisite amount of firmness and tact to enforce it; and as far as Gaolers are concerned, they should have fair executive ability.

Under our present system, even if Sheriffs were ever so desirous of appointing to the prison service only men possessing such qualities, they are very often defeated in that desire

by the low rate at which the salaries are placed by County Councils. For, in respect to Turnkeys, it is out of the question to suppose that the services of such men can be obtained or retained for less than the wages paid to ordinary labourers; and we find that the salaries of Turnkeys at such important Gaols as Kingston, Barrie, Brockville, Cornwall, Simcoe, and Whitby, only range from \$200 to \$300, per annum while at other Gaols where fewer prisoners are committed, they exceed these sums from fifty to seventy-five per cent. This condition of things and others of a like character, is not only anomalous but unjust. Since the passage of 36th Victoria, Cap. 48; clause 358 of which provides that the Sheriff shall have the appointment of the Gaol officials, but that their salaries should be fixed by the County Councils, *subject to the revision or requirement of the Inspector of Prisons*, I have endeavoured to adjust the most flagrant of the complaints referred to me in respect to insufficient salaries.

I have also in many instances endeavoured to have structural defects and deficiencies remedied and supplied, in order to render Gaols more secure, and the administration of their affairs more effective. While in some cases my suggestions have been promptly acted upon, I must confess to very indifferent success in my endeavours to get County Councils to correct incongruities in the salaries paid to officials, and to remedy structural defects, while in a few instances, the authority vested in me has been practically set at defiance.

For these reasons, I am convinced that the divided authority that exists in the administration of gaol affairs is most prejudicial to effective management and discipline, and that the assumption of more direct control on the part of the Government is urgently required. In stating this conclusion, I do not desire to reflect upon County Councils and their functions, in a general way, for I am fully aware that our Municipal management and legislation is generally creditable to the Province. But I am doing Municipal Bodies no injustice when I state that the management of prisons and prisoners is a specialty with which they should have nothing to do. In England it would appear that the Government has arrived at the same conclusion, and is about to take over to itself the management of all the prisons in the country.

In the event of the Government not desiring, at the present time, to assume the absolute control of the Gaols of this Province, which I am of the opinion is the proper system, and which sooner or later must be done in order to obtain the greatest amount of efficiency and uniformity, I would respectfully submit, as a step in the right direction, the following recommendations:

1st. That when the Inspector reports structural defects and deficiencies in a Gaol, and having notified the County Council of their existence and called upon it to remedy or supply them, it shall fail to do so within three months after such notification, upon the Inspector's report to the Government in relation thereto being approved by Order in Council, he shall be authorized to proceed with the work; provided, that the outlay shall not exceed the sum of three hundred dollars, and that the sum thus expended shall be deducted from the amount to be paid to such County for the next ensuing quarter's proportion of Administration of Justice funds.

2nd. That the dieting of prisoners, and the supply of the food necessary for that purpose shall be entirely under the control of the Sheriff, subject to the instructions of the Inspector of Prisons.

3rd. That the minimum salary to be paid to a Gaoler shall be \$500, with house, fuel, light, and water, and the maximum \$1,600 with the same perquisites, and that the minimum salary to be paid to a Turnkey shall be \$350, with lodgings, fire and light in the Gaol structure, and the maximum \$500 with the same perquisites, or their equivalent. That the minimum salary to be paid to Gaol Surgeon, for a daily visit to a Common Gaol shall be \$100 per annum, and the maximum salary \$1,000 per annum, all medicines and medical comforts to be furnished to such officer. The sums so to be paid to Gaol officials between the maximum and minimum amounts thus named, to be decided by Order in Council upon the report of the Inspector of Prisons.

4th. That upon vacancies occurring in the staffs of Gaols, the Sheriff shall only nominate and temporarily instal the official, such appointment to be confirmed by the Government upon the report of the Inspector within one year after the official shall have entered upon the discharge of his duties.

5th. That all the Gaolers and Turnkeys in the Prison Service of Ontario shall be sub-

ject to transfer from one Gaol to another, upon the report of the Inspector of Prisons duly approved by Government.

DEATHS.

During the past twelve months 55 deaths occurred in the Common Gaols, as compared with 36 in the preceding year. The practice obtains in many counties of committing sick destitute persons to Gaol, instead of making provision for them in private houses or Houses of Refuge. In this way the mortality of the Gaols has largely increased, and will continue to increase until a more humane method of providing for sick paupers is devised in the rural constituencies. The finding of the coroner's inquest held on the occasion of these deaths, was in all cases transmitted to the Provincial Secretary; and, if the circumstances required, other facts were elicited in relation thereto.

PRISON LABOUR.

The only prison labour that is provided in the Common Gaols, with two or three exceptions, is that of cutting wood for the Gaols, and sometimes for the County buildings; together with keeping the building and the yards in a clean and orderly condition. The exception, which is confined to four Gaols, is that of breaking stone.

I have again to recommend that statutory authority be granted to enable the labour of vagrants, drunkards, and disorderly characters, to be used on the public streets, and in working the land attached to Gaols and public buildings. In order that this disgrace may not be placed upon other than habitual offenders of the kind referred to, it could be made a provision of the law that such punishment would only form part of the sentence after a third commitment.

DIETARIES.

The regulations in respect to the prison-dietaries are reported to be observed in the Gaols, as far as the fare is concerned; but in three instances, notwithstanding the remonstrances I have addressed to County Councils, Gaolers are still allowed to retain a pecuniary interest in that branch of the service. These infractions of the regulations exist at Cayuga, Pembroke, and Perth, where the daily cost of rations is 25 cents per day for each prisoner at the two former places, and 15 cents at the latter. At the other Gaols the daily cost varies from $14\frac{3}{4}$ cents to $6\frac{1}{2}$ cents for each prisoner, according to the number of inmates in the Gaol during the year.

GAOL EXPENDITURES.

The figures given in Table No. 9 show that the entire sum expended in maintaining all the Common Gaols of the Province for the year, was \$130,461.80 as compared with \$126,265.48 in the preceding year. This expenditure is comprised of the following:—

Food, clothing, fuel and general maintenance accounts.....	\$61,254 15
Structural repairs	9,307 09
Officials' salaries	59,900 56
	\$130,461 80

Deducting the cost of repairs from both years' expenditures, we find that the net cost of Gaol maintenance this year was \$121,154.71 as compared with \$119,818.90 last year. As 11,236 prisoners were committed to all the Gaols during the twelve months, it would appear that the average cost of maintaining each prisoner while in custody was \$10.79, and including repairs \$11.61 per prisoner. It further appears from Table No. 9, that of the 11,236 prisoners who were committed, the maintenance of 8,773 was defrayed by the various counties, and that of 2,463 by the Government, the latter being criminal prisoners.

The number of days that these two classes remained in custody was as follows:—

8,773 Municipal prisoners	209,416 Days
2,463 Criminal prisoners	82,109 "
11,236 Prisoners were in custody.....	291,525 Days

These figures prove that the average period of Gaol custody of the criminal prisoners was $\frac{1}{3}$ days, while that of the municipal prisoners was only $24\frac{3}{4}$ days. The average period of both classes combined, was within a fraction of 26 days, as compared with $23\frac{4}{10}$ during the preceding year. It has already been shown that the cost of each prisoner for the entire period averaged \$11.61, as compared with \$12.53 (but which through an error was placed at \$24.41) last year, and if an average is struck from the collective custody of all the prisoners committed, and the aggregate cost of Gaol maintenance, it will be found that the daily cost of maintaining each prisoner during the past year was $44\frac{3}{4}$ cents as compared with $53\frac{1}{2}$ cents the preceding year. This result is not altogether due, although it is to some extent, to the increased number of prisoners who were committed, but also to the more strict compliance with the dietary and other regulations, and to the operations of the Central Prison which have very sensibly reduced the cost of Gaol maintenance.

CENTRAL PRISON OF ONTARIO.

The operations of the Central Prison in respect to the movement of prisoners during the year ending 30th September are shown in the following summary, viz. :—

Number of prisoners remaining in custody on the 30th September, 1875	206
Number committed during the year.....	637
Re-transferred from Asylum (recovered).....	1
Re-captured—escaped in 1875.....	1
Re-transferred from Gaols.....	4
	--- 643
Total number in custody during the year	849

DISPOSALS.

Number discharged on expiration of sentence	450
Number whose sentences were remitted by the Dominion Government	9
Number discharged on payment of fines	33
Number re-transferred to Gaols, owing to physical and mental unfitness, and upon the order of Judges	9
Transferred to Lunatic Asylum.....	1
Died in Prison	4
Escaped from Prison.....	1
	--- 507
Number remaining in custody on 30th September, 1876.....	342

If a comparison of the above figures is made with those exhibiting the Prison movements of the preceding year, it will be seen that there was an increase of 211 in the number of prisoners committed, and 148 in the total number that were in custody during the year; the number remaining in custody having been increased from 206 on the 30th September, 1875, to 342 on the corresponding day of this year. Of the 637 prisoners who were committed, 266 were sentenced direct to the Central Prison by the various courts of the Province; the remaining 371 having been sentenced to the Common Gaol, were subsequently transferred to the Central Prison, under the provisions of 34th Victoria, cap. 7, section 16. In addition to 637 commitments, one prisoner was returned to the Central Prison from an Asylum where he had been sent for treatment. Another, who had escaped in 1875, was recaptured, and four who had been sent out as witnesses, by order of courts, were returned to custody.

The number of persons who were sentenced direct to the Prison, increased to such an extent that the Sheriffs were instructed, in the early part of the year, not to report for transfer any prisoners who had not been committed to the Common Gaols for periods of four months and over, and for the past three months transfers have been restricted to six months' prisoners.

The periods of imprisonment to which the 637 prisoners who were committed direct or transferred to the Prison, were sentenced, are shown in the following summary:—

Prisoners were who	sentenced to periods under 1 month	15
“	“	from 1 to 3 months	83
“	“	from 3 to 6 “	181
“	“	from 6 to 9 “	192
“	“	from 9 to 10 “	29
“	“	from 12 to 15 “	95
“	“	from 15 to 18 “	7
“	“	from 18 months to 2 years	35
			—
			637

When it is considered that a very large proportion of these prisoners are habitual offenders of the petty order, who have for many years been oscillating between one Gaol and another in the Province, and not a few of whom have been committed to the Central Prison two or three times already, I cannot but think that the periods of sentence, as indicated in the above summary, are much too short for the accomplishment of the objects aimed at in the establishment of this Prison. There is a class of offenders, the frequency of whose offences against law and order renders them pests to society, and whom, after their third commitment to a Gaol, it would be much better to send to the Central Prison for the full term that the law allows, than for two or three short periods every two years or less. The civil condition of this class of prisoners—three-fourths of whom are unmarried—point to the fact that protracted incarceration would involve little or no hardship to families dependent upon them for a living. On the contrary, but for the humiliation thereby caused to relatives, their enforced absence from the family relation would, in most instances, be a relief not only to their friends but to the community.

The fact that 441 of the 637 prisoners who were committed during the past year, were, from their own admissions, of intemperate habits, affords additional evidence of the correctness of this conclusion.

The mistaken leniency of awarding short periods of imprisonment to this class, is not only demonstrated by the very serious charge that their repeated trials cost the Province, but also by the persistency with which they return to their evil courses. No sooner is the dilapidated physical condition of these habitual offenders rehabilitated by the healthy regimen of a prison, and the enforced suspension of dissolute habits, than they are set free only to return in a short time for a repetition of the same kind of treatment. Apart from the mistaken leniency of short sentences in such cases, both from a moral and social standpoint, it is not fair to the Province which, at a great cost, has established an industrial Prison, that just as soon as this class of prisoners are restored to such a bodily condition as to perform hard labour in the prison, their sentences expire and they are discharged. For this class of offenders, constituting about one-third of the commitments to the Central Prison, it is most desirable that cumulative sentences be given, until they reach the period of two years.

Although this Prison was largely designed for the class of prisoners I have been speaking of, still, an examination of the table of offences will show that if this intermediate establishment had not been in existence, the crimes of many of the prisoners who were committed to it were of sufficient enormity to have consigned them to the Penitentiary. It would appear that 23 were convicted of burglary, robbery, and kindred offences; 14 of assault with intent to rape; 34 of aggravated assault; 12 of cattle stealing; 11 of forgery, embezzlement, &c., while no less than 258 were convicted of larceny in its various degrees. Many of these prisoners were hardened criminals who had expiated sentences, for previous crimes, in the Penitentiaries of Canada and the United States. These two classes of prisoners—the petty, but chronic, offender against law and order, and the old *habitué* of many penitentiaries, are, of all others, the most difficult to deal with. In this connection I may now refer to the system of

DISCIPLINE

that prevails in the Central Prison. In recommending the establishment of the Prison, I pointed out in my Annual Reports of that period the many serious defects and deficiencies of our Common Gaol system, chief among which was the indiscriminate association of old and young, tried and untried, innocent and guilty. Not only were these classes of prisoners indiscriminately associated, but they were so kept in utter idleness, which, above all conditions is the most fruitful source of vice and crime, and in addition, discipline and order were the rare exception, instead of being the rule, in the government of these Gaols. It was to remedy these defects, and to supply the deficiencies in our Gaol system, that the Central Prison was founded. And in the administration of its affairs, keeping in view its object, I have no hesitation in saying that it is better to err on the side of rigid discipline than in a laxity of it, and with respect to the two classes of prisoners referred to that have to be dealt with, it will be apparent to all, that, so far as these criminals are concerned, the strictest kind of discipline becomes necessary.

Admitting, as I do, that for the proper protection of society, the punishment of crime and the reformation of the criminal must be the ground-work of all effective systems of prison discipline, the very first step in the accomplishment of these objects is the entire subordination of the will of every prisoner to constituted authority. The lives of habitual offenders having been one continued revolt against law and order, with little or no subjugation of the will, or exercise of moral restraint, the very first lesson that these men have to learn on entering the prison is implicit submission. Failing that, the application of reformatory measures to those of this class who are not beyond such influences must prove abortive—whilst deprivation of liberty only, to those who are, is no punishment whatever, unless it be accompanied by strict prison discipline and enforced hard labour.

The labour that has to be performed by the prisoners in the Central Prison is no harder than what honest mechanics or labourers outside of the Prison have to do, and the hours are the same as in ordinary shops and in labouring employments; the dietary being infinitely better than what a large majority of mechanics and labourers can supply themselves with by their honest exertions. Cleanliness, both in the persons of the prisoners and in every department of the Prison, together with the greatest promptness, punctuality and order in the performance of duty are strictly enforced.

The rules and regulations in respect to these matters, and for regulating the general conduct of the prisoners, constitute the discipline of the Prison, and its enforcement neither involves harshness nor severity, unless a prisoner renders that treatment necessary through disobedience or insubordination. The discipline of the Prison, however, must be maintained, and the rules and regulations obeyed, otherwise

DISCIPLINARY PUNISHMENT

must be resorted to. This consists, firstly, of deprivation of a meal or certain privileges; secondly, confinement in the dark cell on bread and water diet; and thirdly, confinement in the dark cell in irons. The latter punishment is administered by causing the refractory prisoner to be handcuffed to a ring in the wall about even with his eyes, the anklets being used to secure the legs to another ring in the floor. Physical pain is, of course, caused by the elevation of the hands and arms and the general fixity of the body, which, however, does not prevent the prisoner from shifting his position and resting the head and shoulders against the wall. When it is found necessary to administer this kind of punishment for the first time, the prisoner is given to understand that its duration, after an hour or two, will depend upon himself. If he expresses contrition for the offence committed, he is at once taken out of irons. If a prisoner, however has to be punished in this way more than once, he has to remain in irons for a fixed time, but if for a longer period than 24 hours he is taken down in the night and to his meals. This placing of a prisoner in irons is not resorted to except in cases of gross insubordination, or of continued disobedience of the rules.

And here I may refer to certain charges, or rather insinuations, that were made, and which subsequently were formulated into charges against the Warden and the acting Chief Warder of the Prison, involving cruel treatment of the prisoners on the part of these officers.

Although the examination into these charges of alleged cruelty took place after the close of the official year, it is but proper that the matter should be alluded to in this report.

It would seem that every instance of what was looked upon as cruelty was carefully noted by persons who had been dismissed from the prison service, and by certain others who were disaffected towards the rule of one or both of the officers alluded to. The acts of alleged cruelty extended from the opening of the Prison in June 1874, up to the time of the investigation, but not in a single instance were they made known to me as Inspector, either verbally or in writing, or as the evidence shows, to the Warden. Whatever spirit may have animated the persons from whom the information was obtained, and however disengenuous its sources, it will, under the circumstances, be readily understood that due prominence would be given to every case of the kind that might come under the notice of the witnesses.

The instances of alleged cruelty, as stated by all the witnesses in their evidence, numbered twenty-three, and a careful analysis of each case shows that they may be here divided into seven distinct categories, to each of which I will refer as briefly as possible.

1st. In six instances, prisoners while at drill or in marching order, and in three cases while at work, were tapped on the feet, legs, hands, or some other part of the body, with a cane used by the Acting Chief Guard, in order to get them to keep step or for other slight causes. The evidence, however, pointed to the fact that this tapping—for it was nothing more—was very frequent for the first year after the opening of the Prison, and that it was not confined to the Acting Chief Guard, but was done more or less by nearly all the Guards. The practice having been noticed by the Warden, an order was issued prohibiting it, which, from the evidence, it would seem had the desired effect.

2nd. In six cases, prisoners attempted to escape from the Prison by secreting themselves until the Guards should be withdrawn, which rendered it necessary to keep the Guards on duty and without sleep for sixty hours. When these prisoners were discovered, the Warden ordered that five of them should receive six stripes with a small cane and the sixth a rope's-ending. Three of these prisoners had been transferred from the Reformatory to the Central Prison, as being utterly incorrigible and beyond the reach of reformatory influences.

3rd. In five instances, prisoners upon reporting themselves sick, were ordered by the Acting Chief Guard to return to their work, as he believed that they were malingering—a practice which is of frequent occurrence, and that requires guarding against. In some of these cases the prisoners refused to go to work and were, in consequence, placed in the dark cell, and upon being examined by the Gaol Surgeon, the decision of the Chief Guard, in every instance except one, was sustained by the Surgeon, who pronounced the prisoners to be well and fit for work. The exception was a case of temporary faintness.

4th. One night, at the close of 1875 or the beginning of 1876, a prisoner named Lewis became so noisy that he disturbed the entire dormitory, causing other prisoners to join in the noise. Upon reporting the case to the Warden, the Acting Chief Guard was instructed to place a wooden gag in the prisoner's mouth to keep him from shouting, and to handcuff his hands behind his back to keep him from breaking up the furniture in his cell. On going into the cell to carry out this instruction, the Chief Guard alleges that the prisoner attacked him with a piece of iron broken from his bedstead, upon which he clenched the prisoner and beat him several times across the shoulders and hips with a key he had in his hand, after which the order of the Warden was carried out. The Turnkey, who was present, states that he did not see Lewis attack the Chief Guard. It is possible that the attack may have been made without the Turnkey seeing it, but in corroboration of the Chief Guard's statement it was clearly proven that the iron bedstead and cell furniture were broken, and that the prisoner had broken off a large piece of the stone jamb of the cell door. It was stated by several witnesses that the prisoner had given evidence of insanity prior to this occurrence, and subsequent events proved that the surmise was correct; but on the other hand, the Prison Surgeon did not certify to insanity for a considerable time after it took place. Under any circumstances, there is no proper place or means for the care of lunatics in the Prison: the alleged cruelty therefore, considering this fact, did not consist in the means taken to prevent the other prisoners from being disturbed, but in the charge, if true, that the prisoner was struck other than in self-defence.

5th. One prisoner was kept in irons for 72 hours without being taken down, except to his meals and other purposes of necessity, but it was clearly proven that he had been guilty of gross insubordination, threatening, and insolence on that, as well as on many other occasions, and that he was a violent and dangerous man. From the statements of the Warden and Chief Guard, it just became a question whether the officers or the prisoner should be masters. From the date of that punishment, the prisoner became one of the best behaved men in the Prison.

6th. The Acting Chief Guard was said to have knocked a prisoner's head against the wall until the blood came from his ears. This the Acting Chief Guard denies, and the Surgeon states that it is impossible that this could have been done without causing a fracture, which neither the Surgeon nor anyone else saw.

7th. Three prisoners were placed in irons for insubordination, and while in that position were exceedingly noisy and violent. Upon being visited by the Acting Chief Guard with a view to stopping the noise, and while the irons were being removed from them in order to take them to another cell, it was clearly proven that two of them used the vilest language to the officer mentioned, and one of them kicked him. Under this provocation the Acting Chief Guard struck them with his clenched fist. All of these prisoners were proven to be violent men, requiring frequent punishment.

In the foregoing categories are comprised all the acts of cruelty that were brought to light, after a most patient investigation extending over two weeks; during which time every officer of the Prison was placed under oath and examined.

To sum up in respect to these various charges, it would be absurd to designate what is referred to in the first and second categories as acts of cruelty, inasmuch as the same practices are being carried on every day in our Common Schools. They had, however, been stopped in the Central Prison a year prior to the investigation.

With respect to what is comprised in the third category, it is clear that so long as prisoners will feign sickness, prison officers will now and then make a mistake in their decisions in that relation. In order, however that such mistakes of judgment may be reduced to the minimum, the Prison Surgeon has been directed to visit the Prison every morning at nine o'clock, so that every case of sickness reported may be pronounced upon by the proper medical officer of the Prison.

It is much to be regretted that such harsh measures had to be adopted in the case of Lewis, in order to prevent him from disturbing the dormitories at night and breaking the cell furniture: the more so as subsequent events proved that the prisoner must have been insane at the time. A short time previous to the occurrence, a prisoner had been transferred from the Prison to Rockwood Asylum under certificates of insanity, but after a very short observation on the part of the Medical Superintendent of that Asylum, he certified that the man was not and never had been insane, although afflicted with an ungovernable temper. I have recommended that some better provision be made for the custody of violent and refractory prisoners, and it is most desirable that when the Hospital is erected, a room should be provided for insane prisoners, pending their transfer to an asylum.

That part of the charge in respect to the Acting Chief Guard striking the prisoner Lewis, other than in self-defence, is reduced, as the statement shows, to a question of veracity between that officer and a witness.

The class of prisoners referred to in the fifth category are found in all prisons; and although few in number, their stubborn and unyielding temper, and the pertinacity with which that spirit is maintained, even when they clearly know that they are in the wrong, constitute one of the most difficult problems that prison officers have to deal with. The punishment awarded in this particular case, severe as it had to be, had the desired effect, although in many prisons some of this class are almost constantly under punishment.

It was in dealing with the prisoners alluded to in the seventh category that the Acting Chief Guard committed serious indiscretions as a prison officer, but which, in the light of the facts elicited, cannot possibly be characterized as acts of cruelty. Under no circumstances, except in a clear and well-defined case of self-defence, should a prison official strike a prisoner. That the prisoners were abusive beyond endurance, only showed the necessity and importance of the Guard controlling his own temper, and of using lawful means of punishment, which are always at his command.

Before closing my remarks in connection with this subject, I desire to say that I wish

it were possible for the discipline of the Prison to be maintained without inflicting physical pain, and that moral suasion and kindly admonishment alone could accomplish that object; but as far as I can ascertain, both agencies are necessary in all well-regulated prisons. To well-behaved prisoners, however, and they comprise the large majority, there is no terror in the fact that dark cells and irons have to be resorted to, in order to keep the unruly and insubordinate under control.

The severe check that the industrial operations of the Prison received through the failure of the Canada Car Company to carry out its original contract with the Government for the employment of the prisoners, has prevented me from inaugurating such a scheme of rewards and remissions of sentences as will tend to encourage and promote good conduct, and stimulate industrious habits on the part of the prisoners. Now, however, that the industrial success of the prison bids fair to be permanently established, I trust that I will be warranted in submitting a scheme for the approval of the Government at an early day.

INSPECTIONS.

My inspections of and official visits to the Prison have been frequent during the year. On all occasions every department of it was found in the most admirable order, with the most scrupulous cleanliness and neatness everywhere apparent. In these respects the Central Prison may safely challenge comparison with any establishment of the kind in existence.

At these inspections I minutely examined into all matters pertaining to the Prison and the prisoners, and dealt with every case requiring special consideration.

CANADA CAR AND MANUFACTURING COMPANY.

The difficulties that had arisen, in connection with the working of the contract between the Government and the Canada Car Company for the employment of the Prison labour, and which were in a large measure due to the general stagnation in railway operations—resulting not only in a great falling off in the demand for railway cars and appliances but also in the depreciated value of these manufactures—were very fully detailed in my last Annual Report. These difficulties were further complicated by various disputes that had arisen between the Company and the Government in respect to certain works of construction which the former claimed to have performed for the latter, and by other circumstances involving breaches in the contract on the part of the Company.

These troubles and complications culminated in June 1875, by the Company notifying the Government that they were unable any longer to employ the prisoners as provided for under the terms of the then existing contract. Under these circumstances, formal proceedings were about to be taken by the Government to cancel the contract, and submit the prison labour to public competition, when it was represented by the Company that they were negotiating for the establishment of other branches of industry, whereby they would be enabled to utilize the prison labour. After protracted negotiations, an understanding was arrived at between the Government and the Company which was substantially as follows:

1st. The abandonment, for the time being, of car building operations and the substitution thereof of the manufacture of pails, tubs, washboards, and every description of wooden-ware, and brooms, brushes and such like articles.

2nd. The extension of the existing contract, in its amended form, from the 30th June, 1881, at which time it expired, to the 30th June, 1883, and of the period in which the Company is to employ the full number of prisoners required under the contract, and for making further provision as to the class of prisoners that are to be sent to the Central Prison.

3rd. The settlement of all disputes as to the construction work performed by the Company for the Government, having in view the final acceptance by the former of the Central Prison buildings and fixtures as in all respects complete, and the adjustment of all accounts due by the Government for such work, and by the Company for prison labour.

4th. The appointment by the Government of a Commission to enquire into the value

of the prison labour, and the buildings, machinery and plant, so that the Government might decide the price that is to be hereafter paid for such labour, subject to ratification by the Legislature.

This understanding was embodied in an agreement entered into between the Government and the Canada Car Company, on the 27th January, 1876, which was submitted to and ratified by the Legislative Assembly, during the last occasion. With respect to the change of industries, it may be stated that in the original contract great latitude was allowed as to the nature of the industries that the Company was to be allowed to carry on. They were to employ the prisoners "in the preparing of wood-work of any description for railway cars and equipments, and in the construction of sailing and steam vessels, and building purposes generally, and in the manufacture of articles from steel, iron, brass and other metals, for the said construction of railway cars, and for the other purposes above described. Should the Company desire to manufacture articles from other materials than those above named, then, in that case, the same must be submitted to the Inspector, and approved by him in writing." It will thus be seen that the concession to the Company, in this respect, is one that might have been asked for and granted even if circumstances had not arisen which rendered the change of vital importance to the Company.

Having regard to the losses and misfortunes of the Company during its first two years' career in connection with the prison industries, I apprehend that but little fault will be found with the extension of the period during which the contract is to subsist, or with the extended time given to the Company to take on the full number of prisoners it is required, under the terms of the contract, to employ and pay for.

After a very long and most careful examination into all matters in dispute between the Government and the Company, and which were referred to me for adjustment, I made certain recommendations which met with the approval of Government, and were subsequently embodied in the new agreement which received the ratification of Parliament.

The Commission to enquire into the value of the prison labour, buildings, plant, etc., has not yet been named, but it is most desirable that effect should be given to that provision of the new agreement at the earliest day possible.

The following summary shows the average number of prisoners employed each month since the new industries were entered upon:—

February	19 prisoners.
March	27 "
April	47 "
May	83 "
June	109 "
July	113 "
August	116 "
September	127 "

At the time of writing this Report (15th December) the number of prisoners that the Company is employing has increased to 164. I am assured by the manager that as soon as the frame sheds are fitted up and the machinery placed in them, which works are now in progress, the full number of prisoners—260—will be placed at work.

DEATHS.

Three deaths occurred during the year, one, after a long sickness from lung disease; another from pleuro pneumonia; and the third from typhoid fever. Inquests were held into the circumstances connected with all these deaths, and the finding of the juries was transmitted to the Provincial Secretary.

PARDONS.

During the year the unexpired portion of the sentences of nine prisoners was remitted by His Excellency the Governor-General, as compared with five remissions the preceding year.

DIETARY.

The dietary furnished to the prisoners is of the most liberal kind, as the following scale will show:—

BREAKFAST.—9oz. bread and 1 pint coffee every morning, and on four mornings of the week, 8 oz. of meat and 8 oz. of vegetables, made into hash; on two mornings, 4 oz. oatmeal made into porridge, with molasses, and one morning 4 oz. rice with molasses.

DINNER.—9 oz of bread every day, and on 3 days of the week 12 oz. meat and 12 oz. vegetables, on other 3 days one quart of soup, made from 9 oz. of bones, 1 oz. barley, and 12 oz. vegetables, and on one day a quart of pea soup made from 9 oz. bones and 8 oz. of peas.

SUPPER.—12 oz. bread every night, and one pint of tea sweetened with brown sugar.

A comparison of this dietary with what is allowed in English Industrial prisons, shows that 206 oz. of bread is given at the Central Prison per week, as compared with 148 oz. in England; 68 oz. of meat, as compared with 24 oz.; the same quantity of vegetables weekly, and about the same quantity of soup. Counting the weight of vegetables placed in the soup, the daily average weight of solids given to each prisoner is about 60 ounces, as compared with 45 ounces given in the Industrial Prisons in England. In fact it may be said, and an examination of the foregoing dietary list will confirm the statement, that prisoners who are kept at hard labour get all they can eat. On ten or twelve occasions that I have examined and tasted the food during the year, the supply was in accordance with the dietary list, except on two occasions during a scarcity of vegetables, when other things were substituted, the quality being always sound and wholesome.

ESCAPES.

Only one escape has taken place from the prison during the past year, although very frequent attempts have been discovered and frustrated. The one that proved successful was due to the unsafe condition of the room used for hospital purposes, the prisoner, who was to have been discharged in a few days subsequent to the date of his escape, being charged with the duties of hospital orderly.

Now that the discipline of the prison is thoroughly organized, and the weak structural points well known and guarded against, attempts at escape, it is to be hoped, will very seldom prove successful.

ADDITIONS AND ALTERATIONS.

I have again to recommend that an appropriation be asked to erect a suitable hospital, entirely isolated from the main structure. The experience of the past year, in respect to typhoid fever in an epidemic form, warns us that we must prepare for such occurrences, as well as for contagious outbreaks. I have, therefore, recommended, that an isolated hospital of the dimensions of 40 by 35 feet, of two stories and Mansard roof, with barred windows, iron gates, and the other requisites of a prison hospital, be constructed. Owing to the distance of the prison from the front gate, and for the greater security of the prison premises, I have recommended that a lodge house be erected for a gate keeper, whose duty it shall be to take charge of the entrance gate and front grounds.

It is absolutely necessary that macadamized roads should be constructed within the Prison walls, as shown upon the original plans. In order that material may be obtained to do this, I have recommended that the sum of \$830 be placed in the estimates.

The capacity of the Drying Kiln was entirely insufficient for the requirements of the trades, and a new one had to be constructed, the material for which cost \$1,325, the work being done by prisoners. An appropriation to cover this expenditure is required.

In previous reports I have referred to the improper construction of the wall towers, rendering a proper guard over the yard most difficult. It is recommended that a small appropriation be voted to purchase material for these alterations, the work to be done by prisoners, also for the construction of proper dark cells.

I have also recommended that the sum of \$1,750 be placed in the estimates to purchase

building material for a structure to provide additional store room, and coal shed space, also for a stable, piggery and other much needed structures.

EXPENDITURES.

The following statement exhibits in a detailed form the expenditures incurred in maintaining the prison for the year ending 30th September, also the cost per prisoner under the various headings of the Estimates for the same period:—

Heading as given in the Estimates.	Total Outlay.	Average per Prisoner.
Medicines, medical comforts etc.....	\$ 311 97	\$ 0 3 $\frac{2}{10}$
Butchers' meat and fish	6,354 41	6 4 $\frac{9}{10}$
Flour, bread and meal.....	3,572 53	3 6 $\frac{5}{10}$
Groceries and other provisions	2,992 64	3 0 $\frac{6}{10}$
Bedding, clothing and shoes.....	5,448 64	5 5 $\frac{6}{10}$
Fuel	1,849 71	1 8 $\frac{9}{10}$
Gas, oil, etc.....	1,492 50	1 5 $\frac{2}{10}$
Laundry, soap and cleaning apparatus	745 43	7 $\frac{6}{10}$
Stationery, advertising, printing etc.	276 91	2 $\frac{8}{10}$
Library, schools and lectures.....	161 78	1 $\frac{6}{10}$
Furniture and furnishings.....	1,003 62	1 0 $\frac{2}{10}$
Stable, forage, etc.	32 00	0 $\frac{2}{10}$
Repairs	1,213 49	1 2 $\frac{4}{10}$
Unenumerated.....	987 72	1 0 $\frac{1}{10}$
Farm and gardens.....	838 98	8 $\frac{6}{10}$
Salaries and wages	15,834 67	16 1 $\frac{6}{10}$
Total.....	\$43,117 00	\$44 0 $\frac{1}{10}$

From this statement it will be seen that the entire maintenance expenditures for the year amounted to \$43,117 00, and as the daily average number of prisoners in custody was 267.67, the cost for each prisoner for food, clothing, salaries of officials, etc., was 44 $\frac{1}{10}$ cents per day. From a further analysis of these figures, it would appear that if the food supplied to the guards' mess is deducted, the daily cost of each prisoner's rations was 11 $\frac{3}{10}$ cents. There is included in the maintenance expenditures, however, the sum of \$1,386 85, which properly should have been charged to capital account, as the payments were made for works of construction and extraordinary repairs. If this amount is deducted, the net cost of maintenance would be reduced to \$41,730 15, and the daily cost of each prisoner to 42 cents.

REVENUE.

The cash receipts from the labour of prisoners for the year, were as follows:—

Breaking stone.....	\$4,274 05
Making shoes for public institutions	201 71
Making mats for	50 14
Shoemaking and tailoring for prison officers.....	64 49
Canada Car Company for the labour of prisoners, under new contract, up to 1st July, 1876.....	3,855 54
Total cash receipts.....	\$8,445 93

In addition to the above cash receipts, the Canada Car Company owes \$6,730 50 for the labour of prisoners furnished to them, from the 1st July to the close of the official year—30th September—which sum, under the terms of the new contract, has to be paid, together with the amount accruing due for labour, up to the close of the year, on the 1st January.

The following work of a labouring and mechanical character (excluding all domestic labour) was also performed by the prisoners, which effected a direct saving in maintenance expenditures and in capital outlay, viz:

Labouring Work.

Constructing sewers, drains, and improving the prison grounds	1248 days	50c.....	\$624 00
Farm and garden work	901 "	50c.....	450 50
Tracklaying, macadamizing, and road construction.....	1647 "	50c.....	823 91
Sundry works	420 "	50c.....	210 00

Mechanical Work.

Carpenter work.....	791 days	50c.....	\$395 92
Shoemaking	1621 "	40c.....	648 40
Tailoring.....	3256 "	35c.....	1,139 60
Painting, blacksmithing, and tinsmith's work.....	864 "	50c.....	432 00
Brush and mat making	382 "	50c.....	191 00
Bricklayers, stone masons, &c., &c.....	927 "	50c.....	463 50
	12,057 days		\$5,378 83

The domestic work performed by the prisoners was equal to 14,268 days' labour.

It is thus shown that the productive labour of the prisoners amounted, for the year to \$15,176.43, and the unproductive, so far as cash receipts are concerned, (although effecting a saving in expenditure) and excluding domestic labour, to \$5,378.83, or a total of \$20,656.26.

As work under the new contract with the Canada Car Company was not commenced until the later part of February, the receipts of the official year are in consequence much reduced. It is expected, however, that the Revenue from Prison labour, for the fiscal year of the Province, will be close upon \$20,000, and if the Canada Car Company carries out its contract with the Government, the Prison should be self-sustaining in 1877.

TRANSFER OF PRISONERS.

The following statement shows the number of prisoners transferred, each month, to the Central Prison from the various Gaols of the Province, together with the railway fares paid for such transference, and all other expenses connected therewith, by which it will be seen that the total sum thus expended for transferring 638 prisoners was, \$3,131.71 or \$4.90 per prisoner.

When Transferred.	Number of prisoners transferred.	Prisoners' fares to Toronto.	Travelling ex- penses of Bailiff.	Cab hire and food for prisoners.	Total.
October	27	\$91 05	\$59 70	\$21 58	\$172 33
November	32	125 33	89 14	24 50	238 97
December.....	34	93 33	88 41	28 10	209 84
January	50	123 88	104 73	44 29	272 90
February.....	41	112 21	96 50	37 33	246 04
March.....	38	105 57	118 21	40 80	264 58
April.....	69	147 25	124 03	43 59	314 87
May.....	72	132 12	116 57	50 53	299 22

August.....	53	102 95	98 23	29 25	230 43
September.....	64	135 05	114 38	46 44	295 87
Total.....	638	1,434 69	1,238 82	458 06	3,131 57
Average expense incurred per prisoner	2 24		1 94	71	4 90
	88				

DISCHARGED PRISONERS.

During the year, 298 discharged prisoners were returned to the places from which they were committed, or, if good reasons were given, to other points; the fare being the same. The following statement shows the places these ex-prisoners were sent to, and the cost of sending them:—

Where sent.	Number of Prisoners.	Cost.
Arthur	2	\$4 70
Amaranthe	1	2 45
Brockville	21	106 45

Total	298	\$985 08
Paid to H. Softly, Agent Prison Aid Association, by order of Inspector			\$35 40
			\$1,020 48

The above statement shows that the sum of \$1,020.48 was expended in returning ex-prisoners to their homes, of which amount \$491.65 was received from fines paid by prisoners, and the balance from the Treasury Department out of the appropriation for the administration of Justice.

The receipts and expenditures for the transfer of prisoners were as follows :—

RECEIPTS.

Balance in Pursar's hands from preceding year.....	\$ 161 32
From fines paid by prisoners	491 65
From Treasury Department	3700 00
	\$4,352 97

EXPENDED.

In transferring prisoners as per preceding table	\$3,131 57
In returning ex-prisoners	1,020 48
Balance in hands of Bursar at close of year	200 92
	\$4,352 97

The following estimate of the expenditure of the Prison for the year 1877 is prepared with a view to the Prison being filled, during that period, to its utmost capacity.

ESTIMATE OR EXPENDITURE at the Central Prison for the Year 1877 (336 Prisoners).

	1877.	1876.
Medicine, medical comforts and appliances	\$ 200 00	\$ 200 00
Butchers' meat and fish	7,000 00	7,000 00
Flour, bread and meal.....	5,000 00	5,000 00
Groceries and other provisions	4,000 00	5,000 00
Bedding, clothing and shoes	5,500 00	4,500 00
Fuel	3,500 00	3,500 00
Gas and oil	1,500 00	1,200 00

PROVINCIAL REFORMATORY

PENETANGUISHENE.

The following summary exhibits the operations of the Provincial Reformatory, in respect to the movement of prisoners, for the year ending 30th September, 1876:—

Remaining in custody 30th September, 1875.....	173
Admitted during the year.....	45
	218
Total number in custody.....	218
Discharged upon expiration of sentence	28
Reprieved by the Governor-General.....	6
Eloped	1
Died.....	1
	36
Remaining in custody on the 30th September, 1876	182

As the commitments of the preceding year numbered 71, it is shown that there is a falling off of 26 prisoners in the operations of this year. The number of boys remaining in custody at the close of the year was 182 against 173 on the 30th September, 1875. Since the opening of the Reformatory in 1859, up to the close of this official year, 850 youths have been committed to it, of whom 563 were discharged by expiration of sentence, 22 were transferred to the Kingston Penitentiary, and 16 to the Central Prison, owing to incorrigibility 48 were pardoned prior to the expiration of their sentences: 11 eloped, 1 was removed to an Asylum, being insane, and 7 died, leaving 182 in custody at the close of this official year. The crimes for which the 850 boys were committed to the Reformatory together with their nationality and religion, and the Counties from which they were committed are shown in the following summaries:—

CRIMES.

Larceny.....	563	<i>Brought forward</i>	724
Larceny and receiving.....	5	Receiving stolen money	1

INSPECTIONS.

The Reformatory was visited on three occasions during the year. At my first inspection, which took place on the 25th and 26th June, there were 183 boys in custody, which is the largest number that I ever found in confinement, and only left nine vacant cells. During my visit the inmates were employed as follows:—In the cigar shop, 70; cooper shop, 8; painter shop, 7; shoe shop, 11; tailor shop, 15; bakery, kitchen, &c., 15; cleaners in dormitories, 17; sawing wood, &c., 25; farm and garden, 13; and at the warden's and gate-house, 2.

The various shops were visited, and the books and stock examined, which were generally found in a satisfactory state. The large increase in the number of youths—a great proportion of whom are lads under 13 years of age—renders it most desirable that some industrial employment should be provided for that class. Owing to the general stagnation in trade, the cigar contractors do not feel encouraged to increase the number engaged at their work, and even if they did, it is very questionable if more lads should be placed at the trade of cigar making. The labour of the carpenter and cooper shop, as well as farming and gardening, is too hard for youths of that age, and owing to the location of the Reformatory, some advantage and not a little risk would attend the adoption of certain branches of manufactures that might be profitably carried on in a city. It is to be hoped, however, if the commitment of young boys continues to increase, that some suitable industrial employment will be found. It was my intention to have recommended that the labour of twenty of the youths most advanced in years, together with the machinery, fixtures, and motive power of the carpenter shop, and the shop itself, should be submitted to public competition; but owing to the number of structures that had to be erected on the Reformatory Grounds, as well as the ordinary repairs and alterations, the recommendation has been deferred for another year.

The Warden, however, was strongly urged to increase the number of boys in the cooper shop, as the trade is an excellent one, and all the boys who had, in the past, acquired a knowledge of it, found employment as soon as they left the Reformatory.

Both the Protestant and Roman Catholic schools were visited and examined during my inspection. In the former there were 107 pupils in attendance, and in the latter 63. In both, as in other schools, some of the pupils had made rapid progress, while many considering the time they had been under instruction, were in a most backward state. As pointed out, in previous reports, it is preposterous to look for any great degree of proficiency on the part of the pupils, or thoroughness in discipline, in a school of 107 pupils taught only two hours a day, by one master. No matter how capable or zealous the master may be, (and I believe the teachers here possess both qualities), his efforts under such circumstances, particularly where there are five or six grades of proficiency, cannot be successful. In view of this condition of things, the following recommendations were made :

1st. The teachers in both schools to become officers of the Institution, subject to its rules and regulations, and, as such, to devote their services exclusively to the Reformatory schools. Houses to be provided for them on the premises.

2nd. There shall be three distinct periods in each day for instruction, viz :—From 7 to 7 a.m., from 11 to twelve a.m., and from 3 to 5 p.m. The most advanced pupils to attend the morning session, the next in point of proficiency to attend in the forenoon, and the lowest grade and the beginners at the afternoon session.

3rd. The same registers, forms and books to be kept by the masters, as are required in the common schools of the Province.

4th. In addition to the regular day school, the teachers shall devote one hour every Sunday to the teaching of the pupils under the respective chaplains.

These recommendations having received the sanction of the Government, the Warden was instructed to re-organize the domestic and industrial affairs of the Reformatory, so as to harmonize with and facilitate the proper working of the new school arrangement, which was carried into effect on the 1st of September.

The Protestant Chaplain was authorized to increase the library for the pupils under his care, by 300 volumes, and instructions were given for the proper care of the books.

The inmates, at this inspection, were well clad, and were particularly clean, and neat looking in appearance. The general health of the establishment was excellent, and only one inmate was confined to bed.

Instructions were given to the surgeon in respect to the performance of certain duties devolving upon him.

I was present at the meals served during my visit, on which occasions the most commendable order and good discipline prevailed. The food was plain, as it should be, but was abundant and wholesome.

The dormitory and cells in the main structure, and the class rooms as well as the domestic departments in the basement, were found in good order, but the new wing dormitory for the small lads was found in a most untidy and disorderly state, to which the attention of the Warden was directed. The Warden was authorized to proceed with the following works of construction, alteration, and repair for which an appropriation was made by the Legislature, viz. :—1st. The erection of a frame house, or, if time would permit, of two houses, for guards, to replace those that had fallen into dilapidation ; 2nd. The erection of a play-shed and gymnasium, with a wash-house partitioned off in one end. The building to be of the dimensions of 95 feet by 26, and according to specifications furnished ; 3rd. To take down the house lately occupied by the Steward, which had become unfit for use, to paint the houses that were built the previous year, and to complete certain works ordered for the Butler's house ; 4th. To build a root-house of the dimensions specified ; 5th. To fit up a bath-room and lavatory, connecting the same with the tank in the garret ; 6th. To place eave troughs on the main building, and have the soft water tanked, in a cistern to be built, and force into the tank for use in the proposed bath-room and laundry. In carrying on these works the Warden was instructed to use as much of the old material on the premises as could be worked up, and to utilize the labour of the inmates to the fullest extent.

His Excellency the Lieutenant-Governor, the Attorney-General, the Commissioner of Public Works, and the undersigned, visited the Reformatory on the 2nd August last, remaining overnight, on which occasion the buildings and grounds were inspected. The inmates were all seen, and many conversed with, and the general working of the establishment examined into.

The Institution was again visited on the 27th September, chiefly for the purpose of ascertaining the progress that had been made with the various works that had been ordered

at my June inspection. I regretted to find that but little progress had been made, so little indeed as to warrant the conclusion that the working of the carpenter shop was in a most unsatisfactory state. If a very marked improvement did not immediately take place in that department, the Warden was instructed to dispense with the services of the Master-carpenter. The urgent need of the buildings and works specified rendered it necessary that they should be completed before winter; and to that end certain instructions were given to the Warden with a view to their being pushed forward with more vigour. These instructions the Warden has carried out, and the work is nearly completed at the time of writing this Report.

The cigar-shop contractors applied for a reduction in the rate paid for the labour furnished to them; basing their claim for the reduction upon the ground that the labour is not worth the contract price, and that many of the boys who have been engaged at the work for the past three years, have made little or no progress in acquiring a knowledge of the trade; in consequence of which they claim that the progressive scale of wages from fifteen cents for the first year's service, to forty cents for the fifth year, operates unfairly in their case. A minute inquiry was made into the working of the contract, and in view of the difficulties that had arisen in the discipline of the boys engaged in the shop, together with the circumstances above referred to, I recommended that the terms of the contract be abated so that the fourth year boys may, for the present year, be charged at the rate of 25 cents instead of 35 cents per day,—the contractors to employ the full number of boys required under the contract, and to continue to pay the bonus money stipulated for, with a view to encouraging proficiency, zeal, and good conduct. This recommendation was approved of by Order in Council, and with a view to improving the discipline of the shop a skilled cigar maker was employed to act as supervising guard.

In March last the Reverend George Hallen resigned the office of Protestant Chaplain, the duties of which he had most faithfully discharged for nearly twenty years, in view of which I recommended that the customary retiring gratuity be paid to him. The Rev. G. A. Anderson was appointed to the vacancy, and at once entered upon the duties of the office.

FINANCIAL.

The expenditure incurred in the maintenance of the Reformatory for the year ending 30th September, amounted to \$23,324 43, of which a detailed statement is annexed; as is also a return showing the cost of each inmate, under the various headings of expenditure and the aggregate of the whole, to have been \$132.52 per head. The cash receipts from the various shops amounted to \$3934.10, in addition to which the sum of \$1517.28 remained outstanding, making the revenue for the year \$5451.38. If to this amount is added the value of the work done by the inmates in the various shops, amounting to \$3443.69, on institution account, it will be found that the total value of the prisoners' mechanical labour (excluding all domestic and farm labour), amounted to \$8895.05 for the year.

STATEMENT of the Expenditure of the Provincial Reformatory, from 1st October, 1875, to 30th September, 1876:

Amount paid for the salaries of officers, guards, &c.....	\$10594	75

SEPARATE REPORTS UPON COMMON GAOLS.

BARRIE GAOL.

<i>Prisoners Committed during year</i>	275
<i>Greatest number confined at any one time</i>	44
<i>Number of re-conmittals</i>	34
<i>Total cost of maintaining Gaol</i>	\$3,420 28

Statutory inspection was made of this Gaol on the 11th March, and the 20th September. On the first occasion I found it to be in very fair order, and reasonably clean and neat in its various departments. The attention of the Gaoler, however, was called to the necessity of proceeding with the whitewashing as soon as possible.

In the female ward, two female lunatics were confined. Neither neatness nor cleanliness was observable in this ward, but that was in some degree attributable to the character of its inmates.

The locks on the cells of this Gaol have been found to be exceedingly defective, and a short time before my visit, a prisoner succeeded in getting out of his cell, and had nearly cut through the window bars before he was discovered. Some of the locks were under repair at the time of my visit, but I instructed the Sheriff to see that all were attended to.

I found 21 prisoners in custody—15 males and 6 females. Three of the latter, and one of the former were in custody as being insane. As two had not been certified to under the provisions of the Act, I called the attention of the Sheriff to the irregularity, requesting immediate compliance with the requirements of the Act, or the discharge of the prisoners.

The Gaol register showed an enormous increase in the number of vagrants admitted to the Gaol, many of whom were merely committed for a night, and discharged by the Mayor next day. For cases of this kind a lock-up should be provided by the Town of Barrie, as the Gaoler has no authority in law to receive such prisoners.

The system of allowing the Gaoler a certain fixed sum for dieting prisoners in this Gaol, is contrary to prison regulations, and although that sum is only a little in excess of what it would cost if properly done, the violation of the principle is equally baneful.

I found that the County Council of Simcoe gives the Gaoler \$1100 per annum, out of which sum he is expected to pay the Matron and Turnkey, the former \$50, and the latter \$200 per annum, retaining the balance as his own salary. This is a very serious violation of the prison regulations, and one that is calculated to destroy the authority that the Sheriff should have over his subordinate officials.

I have brought these defects in Gaol discipline to the notice of the County Council, requesting their immediate attention to the subject.

At my second visit I found the Gaol generally to be in a most disorderly state, with the loosest kind of discipline and management in every department. Although my inspection was made at 8 a. m., the wards and corridors were still unswept, and shockingly dirty, the sheets on the beds were filthy, and the bedding generally looked dirty, and the beds untidy. The walls were begrimed with smoke, and stood much in need of whitewashing, which the Gaoler admitted was only done once a year. The yards were in a badly kept state, with odds and ends lying about, and the privy in the male airing yard was so filthy as to thoroughly pollute the air. The management of the Gaol affairs, and its general discipline were about as bad as they could well be. The Turnkey had been absent for a week, having leave of absence, and as no one had been appointed to do his duty, the Gaoler was in sole charge, and evidently allowed the prisoners to do as they liked. When I entered, some of the prisoners were shouting, and others were lolling about in the dirty wards. Two boys who had been committed for stealing apples, were associated with the most depraved criminals, although

there was a ward vacant where they might have been confined, but was not used, as its occupation would have entailed a little extra trouble and labour upon the Gaoler. The prisoners in the two lower corridors could pass at any time into the gaol yard, as the door was constantly left open, and no person was near to watch them during most of the time. This has been done continually, although the practice is known to be unsafe, escapes having been made on three occasions. The Prison register was kept in such a slovenly manner, that without explanation, it was impossible to tell how many prisoners were in custody, and in two cases the periods of sentence were not recorded.

There were, on this occasion, 29 prisoners in custody, 16 males and 13 females. Three of the male prisoners were awaiting trial for very serious offences, two were on remand, and one was imprisoned as a debtor. All the other prisoners were under sentence. A man who had been committed as a vagrant, was evidently of unsound mind, and from his story and appearance had been sent by his relations in the United States to Canada in order to get rid of him. To prevent this man becoming a life charge upon the Province, the Sheriff was instructed to place himself in communication with the mayor, in order to have him sent back to the United States as soon as his sentence expired.

Notwithstanding the request I made to the County Council to have the salaries of the prison officials, separately voted and specified, they still continue to vote a bulk amount—viz. \$1200 to the *Gaoler*, out of which he pays \$200 to a Turnkey, and \$50 to a Matron, with their board. Contrary to prison regulations, the Gaoler, and not the Sheriff, appoints these subordinates, practically removing the responsibility from the Sheriff, and preventing the appointment of efficient persons by the lowness of the salary offered. I again brought the matter to the notice of the County Council, requesting them to introduce a by-law defining the salaries of each and all of the Gaol officials, whom the Sheriff should appoint, and for whose character and efficiency he should be held responsible.

The Council was also requested to take steps to lighten the cells for male prisoners in the basement story, by the introduction of barred windows looking into the yard.

Nothing has yet been done to provide a wood-shed, the plans and site for which were approved of a year since. The Gaoler reported that the water supply had been increased by sinking a new well. No action had been taken by the Council to provide drainage from the privies, although the matter had frequently been brought to their notice.

Enquiry was made by me into the circumstances attending the escape of two prisoners from the Gaol on the 20th August. The circumstances of this and two other escapes under circumstances equally if not more censurable, lead me to the conclusion that the Gaoler is utterly unfitted to hold the responsible position which he does, and the correctness of this conclusion is still further corroborated by the condition and management of the Gaol at my last visit. Under these circumstances I recommend his dismissal from office.

BELLEVILLE GAOL.

<i>Prisoners committed during the year</i>	202
<i>Greatest number confined at any one time</i>	27
<i>Number of re-committals</i>	92
<i>Total cost of maintaining gaol</i>	\$2,481.59

Statutory inspection was made of this Gaol on two occasions during the year. On the 24th March, I found the premises throughout in the highest condition of cleanliness and order, the more remarkable as having been once a most slovenly kept and disorderly prison. It is now second to none in the Province. The furniture, furnishings, bedding and clothing are sufficient, and in good condition; and the ventilation, on the day of my visit was all that could be desired. The regulations in respect to dietary are also strictly adhered to.

I found nineteen prisoners in custody, four of whom were committed as insane, all of whom were subsequently committed to Asylums. Of the other prisoners, seven were vagrants or drunken and disorderly characters; six were under sentences for minor offences, and of man who had been sentenced to the Penitentiary for three years, was awaiting removal.

I recommended that a gas jet be placed in the upper and lower entrance halls, as the Gaol officials complained of the darkness of the entrances at locking-up time. The County Council was requested to order that the work should be done.

At my second visit, the Gaol was found in equally good order. The cases of two insane persons were enquired into, and removal to an Asylum was recommended and carried out.

BERLIN GAOL.

<i>Prisoners committed during year</i>	120
<i>Greatest number confined at any one time</i>	17
<i>Number of re-committals</i>	19
<i>Total cost of maintaining Gaol</i>	\$2,030.54

Statutory inspection was made of this Gaol on the 13th April and 5th September. On the occasion of my first visit I found seven prisoners in custody, all males. One was an urgent case of insanity, and had at the time of my visit been recommended for transfer to the asylum for Insane, Toronto.

The attention of the County Council was directed to the lack of bathing appliances, and there exists, also, a great necessity for an Hospital Ward, I recommended for their consideration the advisability of erecting a rear extension to the Gaol for an hospital, bath rooms, and water-closets.

The Gaol was found to be in its usual condition of neatness and cleanliness, and with evidences of order and discipline in every department.

At my second visit I found six prisoners in custody, all males. Two were waiting trial, and four were under sentence for larceny. The register showed that no women had been imprisoned since April, and only two since the 1st January. The absence of this class of prisoners is the alleged reason for paying for the washing of the Gaol bedding and clothing.

The Gaol was found to be in most excellent order, with the most scrupulous cleanliness prevailing everywhere. The bedding and clothing were found to be sufficient for the requirements of the Prison.

No complaints were received from the prisoners.

I was glad to find that the County Council had decided to reconstruct the old Gaol, in order to provide proper accommodation for an hospital, stores, and office; and I gave instructions that when plans were prepared that they should at once be forwarded to me for approval, in order that the work might not be delayed.

The Gaol books were examined and found to be properly kept.

BRANTFORD GAOL.

<i>Prisoners committed during year</i>	382
<i>Greatest number confined at any one time</i>	63
<i>Number of re-committals</i>	163
<i>Total cost of maintaining Gaol</i>	\$4,399.91

Inspection was made of this Gaol on the 7th April and 14th September. On the occasion of my first visit I found 32 prisoners in custody, viz., 20 men and 12 women. Of this number, two were certified to be insane, one man and one woman. The woman was found in a dark cell, with nothing but loose straw to sleep on. The excuse offered for keeping her in this condition was, that she was noisy and destructive. This not being considered a sufficient reason, I ordered her removal to one of the ordinary cells in the female ward, and that a male prisoner be instructed to take charge of her pending her removal to an Asylum, which was authorized at the earliest possible moment.

I found the commitments to this Gaol to be greatly increased, the register showing that during the past winter over fifty prisoners have been in custody at one time.

The Gaol in all its departments was found to be in an orderly and cleanly condition. No complaints were received from the prisoners.

At my second inspection I found twenty prisoners in custody,—10 men and 10 women. One of the former was a lunatic, who, although most urgently in need of asylum treatment, remained in custody for a week before his certification papers were completed. Two of the latter, though committed for other offences, were, beyond a doubt, insane, and should have been examined with a view to their transfer to an Asylum.

Complaint was made to me by a female prisoner as to her treatment by the Gaol officials. On inquiry the complaint was found to be groundless.

The Gaol was found in a very clean and well kept condition, with general indications of good management. In the Gaoler's absence the Turnkey informed me that the bedding and clothing were sufficient for the requirements of the Gaol. His attention was called to the fact that two *sentenced* prisoners wore their own clothing, and he was instructed to have it replaced by Gaol clothing.

The work of raising the yard walls, recommended by me, was in progress; and a minute inspection of the yard surroundings revealed defects which were reported upon to the county authorities, as follows: the working yard of the Prison is also used by the Turnkey's family, and looking into it are several unbarred windows, rendering the yard very unsafe. I recommended that a wall be erected to divide the portion used by the Turnkey from the working yard. I also called the attention of the County Council to the low wall in front of the male corridor, looking into the working yard, which could be used as a step-ladder to effect escapes; also to the inferior description of padlocks on some of the Gaol doors and the yard gate. Until these defects are remedied, the Gaol cannot be reported secure.

BRAMPTON GAOL.

<i>Prisoners committed during year</i>	261
<i>Greatest number confined at any one time</i>	19
<i>Number of re-committals</i>	79
<i>Total cost of maintaining Gaol</i>	\$1,823.52

This Gaol was inspected on the 8th August, on which occasion only one prisoner, a female, was found in custody, who was certified to as an idiot, but judging from the answers to the queries and the woman's appearance, most incorrectly so. The Gaol was found in good order, both internally and in the yards.

This visit was more especially made for the purpose of enquiring into the circumstances attending the escape of a prisoner on the 3d August. The evidence proved that the prisoner, John Mallon, was committed to the Brampton Gaol on the 31st of July, on a charge of burglary, and that he elected to be tried by the County Judge without a jury, whereupon he was sentenced to the Provincial Penitentiary for a period of three years.

With the exception of an insane woman, Mallon was the only prisoner in the Gaol from the time of his commitment until his escape was effected; the circumstances connected with which, are as follows:—On the 2nd inst. he was sentenced, and it was the intention of the Sheriff to transfer him to the Penitentiary on the 4th. On the intervening day (the 3rd) he was let out of his cell in the morning by the turnkey between 6 and 7, and about nine o'clock he was placed at work, carrying in wood from the yard to the wood box in the corridor in which he was confined. Objection cannot be taken to using the prisoners' labour for that purpose, provided he is willing to do the work, but as the rules of the prison require that ordinary prisoners, sentenced to the Gaol, should be well guarded when out of their cells, or at work, the most ordinary prudence should have dictated that a prisoner sentenced to a period of three years in the Penitentiary, should have been closely and constantly watched. Such, however, was not the case in this instance, for from the time he was let out in the morning, until he escaped in the evening between 6 and 7, he had the *run* of his corridor and two of the yards, and for at least one-half of the day, without being guarded. In one of the yards there was a large quantity of cut wood, as well as a piece of plank and a pole, each about nine feet long. It was proved that the turnkey was away from the Gaol for an hour at breakfast, dinner, and tea, respectively; for another hour in the forenoon, and one in the afternoon, he assisted the Gaoler in his private work at his barn across the road from the Gaol, and at least on two other occasions in taking a walk on the street, showing that for at least half the day the prisoner was unguarded in his corridors or the yards, with the doors between the two wide open. The Gaoler admits that he did not see the prisoner at all from between two and three in the afternoon. His statement that "he thought the prisoner was being watched by the turnkey" is valueless, considering that he himself ordered the turnkey to go over to his barn to work. No order was given by the Gaoler to lock the pri-

oner up, as the regulations require when one or both officials absented themselves from guard.

In the face of such neglect of duty and careless supervision, it is not to be wondered at that a prisoner who was to be removed the following day to the Penitentiary, should have availed himself of the opportunities and means thus offered him to make his escape, which he did by splicing a pole that had been left in the yard to a plank, torn from the cover of the well, with strings made out of his guernsey shirt and drawers, by which means he scaled a wall 19 feet high, and jumped from the top of it to the outside. This is the third escape from this Gaol, two of which were directly due to over confidence, on the part of the officials, in prisoners, and to dependence upon structural restraint instead of personal supervision. Warnings have been given to the Gaoler on no less than five occasions, as my Reports will show, to keep a closer watch over prisoners, and other recommendations were made from time to time to that end.

Knowing that both Gaoler and Turnkey are faithful and honest men, and that they have generally performed their duty to the extent of their knowledge and ability, I regret that I am compelled to report that the escape of John Mallon from the Brampton Gaol, on the evening of the 3rd inst. was due:—

1st. To neglect of duty on the part of the Gaoler and Turnkey, in not locking the prisoner up when they absented themselves from keeping guard over him.

2nd. To neglect of duty on the part of the Gaoler and Turnkey, in absenting themselves from keeping guard over the prisoner when he was out of his cell, working, and in leaving the door between the corridor and the yards open on such an occasion.

3rd. To gross carelessness on the part of the Gaoler in allowing a plank and pole in the yard for more than a week, and which was the chief means the prisoner used to effect his escape.

4th. To an infraction of the rules, on the part of the Gaoler, in ordering the Turnkey (who should have been constantly guarding the prisoner, unless relieved by the Gaoler, or locked up in his cell,) to do work for him, to the neglect of his duty.

The evidence also showed that the Gaoler is afflicted with deafness, which must seriously interfere with the proper discharge of his duties.

For this neglect of duty, infraction of the regulations, and carelessness on the part of the Gaoler and Turnkey, I recommended that the Sheriff be instructed to dismiss them from their respective offices.

The evidence showed that the Sheriff took precautions to have the Gaol regulations enforced, and, as much as he could, the safe custody of the prisoners secured.

BROCKVILLE GAOL.

<i>Prisoners committed during year</i>
<i>Greatest number committed at any one time</i>
<i>Number of re-committals</i>
<i>Total cost of maintaining Gaol</i>

Inspection was made of this Gaol on the 9th May and 22nd August. On the occasion of my first visit I found some portions of the Gaol to be in a very clean and orderly state, while other parts were only in a tolerable condition of cleanliness. One of the day rooms for men was very much over-heated, and the upper day room for females was dark and gloomy, owing to the grating over the windows. The yards were found in excellent order, and the ventilation throughout was good.

The regulations requiring all sentenced prisoners to be clothed in prison clothing, I found to be almost ignored. The Sheriff was instructed to make a requisition upon the County Council for 12 suits of clothing, and failing compliance, to report to me. The bedding was found to be sufficient, and the dietary regulations to be adhered to.

I found 20 prisoners in custody, 12 males and 8 females. Three of the latter were committed as insane, but the County Judge having refused to certify to their insanity, although the certificates of two medical men had been obtained, their transfer to an Asylum could not be recommended. The grounds of the County Judge's refusal being that the prisoners were not persons likely to be benefited by Asylum treatment, and not that they were not

insane, I referred the matter for the consideration of the Hon. Attorney-General, being of opinion that the Judge's certificate is required mainly, although not altogether, as a guarantee of the *legality* of the proceedings, while those given by the Medical experts are as to the *mental condition*, and as to the necessity for Asylum treatment, I recommended that the Judge be requested to reconsider his decision with a view to the completion of the papers.

The second inspection was made by Mr. Scoble on the 22nd August, who reported as follows :—

In accordance with instructions, I visited Brockville Gaol, at 2.30 P.M., this day, finding 25 prisoners in custody, 13 males and 12 females; of the former ten were under sentence, 1 waiting sentence, and 2 on remand. Two were sentenced for six months as vagrants. Of the women, 11 were under sentence, and one was insane. The Gaol Surgeon was requested to certify to her with a view to her removal to an Asylum.

The Gaol was in a fair condition of cleanliness, but painting and whitewashing were in progress, which detracted from its tidy appearance; besides, on account of its structural character, this is a difficult Gaol to keep in order.

This Gaol is very strongly built, but the internal arrangement is bad. The doors are of wood, with iron bars running diagonally across, fastening with bolt locks. The cells are roomy and airy; the screens formerly in front of the windows in the women's corridor have been removed and inner gratings substituted, which adds greatly to the light in the apartments. The yard walls are 22 feet in height and are well built; no openings occur so near the angles as to be availed of in attempt to escape. The coping on the walls needs re-pointing. The character of the Gaol, though old fashioned, gives the idea of security. The Turnkey sleeps in the third story of the Court House, remote from the Gaol.

The books were examined and found to be correctly kept. The register is full, and another is required. No entries in punishment book.

CAYUGA GAOL.

<i>Persons committed during year</i>	64
<i>Greatest number confined at any one time</i>	11
<i>Number of re-committals</i>	15
<i>Total cost of maintaining Gaol</i>	\$2,011.00

Inspection was made of this Gaol on the 9th February, 31st May and 25th August. The first of these visits was made by Mr. Scoble, who reported as follows :—

Visited the Gaol at 10 a.m., found it to be in perfect order in all its departments, the corridors and cells being clean, the bedding clean and neatly disposed of in unoccupied cells, the water closets clean and free from smell.

As evinced in the growing number of committals to the Gaol, crime seems to be on the increase in this vicinity, ten prisoners being found in custody, nine men and one woman. Three of the former, and the latter were under sentence, one man committed as insane and dangerous to be at large, and the remainder were awaiting trial, two upon a charge of murder.

So long as the Gaol was tenanted by a very small number of prisoners, its structural defects were not such as could not be overcome, but now that its capacity is tested, the deficiencies of accommodation are strikingly apparent. Principal among these are the lack of day rooms or wards, and of means of separate classification of prisoners. Nothing short of remodelling of the interior, will, however, supply the requisites for a modern Gaol.

The attention of the Gaol Committee is again called to the necessity for furnishing bedsteads. It is impossible to observe neatness and cleanliness in the night cells, unless these are procured. Six iron bedsteads of Gaol pattern should be purchased.

The Gaol books were examined and found to be well kept. The register and daily journal of the movements of prisoners are models of neatness.

The Sheriff was requested to procure a Punishment Book in compliance with the Gaol regulations.

The Gaol is situated on the east bank of the Grand River. The buildings are of cut stone. The Gaol is in rear extension of the Court House, with lean-to additions on north and south ends, giving easy access to any who chose to climb up, to the very windows of the cells.

The interior upper flat of the Gaol building is used for the confinement of prisoners. The cells are very badly arranged. There are no day rooms. There is no provision for proper ventilation. The whole interior needs alteration.

One yard is used both for airing and working purposes. It is surrounded by a board fence that offers very slight obstacle to escape, being only eight feet high. There is a rookery of small sheds on the S.W. angle that affords additional facilities for sealing the fence.

The Gaoler appears to make the best use he can of the limited means at his command, but there is no attempt at classification. The ordinary arrangements of the Gaol are much interrupted on account of the brothers Young, who were committed for trial for the murder of Abel Maedonald. A detective was in the cell with the younger of the prisoners, with a view of obtaining his confidence. A plan of escape was discovered, written on the leaf of a Bible by James Young, and intended for his brother.* The elder brother, John, had been loosening the bars in his cell window, and using the lead he had picked up for writing. These communications were intercepted by the Gaoler, who thus obtained information as to all their plans.

The second visit was made (on the 31st May), in order to investigate into the circumstances connected with the escape of the murderers, John and James Young, on the evening of the 28th May.

The evidence clearly indicates the means that were used by the prisoners in order to effect their escape, and also who was to blame for what would have been the most signal defeat of the ends of public justice that ever occurred in the Province, had a recapture not been effected.

First, as to the method and means used in effecting the escape. It appears from the evidence of the Gaoler, which is corroborated by that of his son, who was acting as temporary Turnkey, and of his wife, who was the matron of the Gaol, that the Gaoler entered the Gaol alone on Sunday evening, the 28th May, at about 7 p. m., for the purpose of giving the prisoners their tea, attending to their wants, and afterwards locking them up in their respective cells for the night. The cells are in the second story of the Gaol structure, the first or ground flat being occupied as a dwelling by the Gaoler's family. The two corridors are only divided from each other by a wooden gate. In cells off the inner corridor three prisoners were confined, one of whom, John Young, was leg-ironed in his cell. Having locked up these prisoners, the Gaoler passed into the outer corridor, in which only one prisoner, James William Young, was confined, locking, in passing, the wooden gate which separates the corridors. He then opened the door of the cell in which James Young was confined, being fastened by a chain from his leg-irons to a ring in the floor, and proceeded to make up his, (the prisoner's) bed. After doing this he was in the act of locking the padlock which secured the iron window shutters, when he was felled to the floor by a blow on the left side of his head from the prisoner's fist. When down, Young must have used the leg irons to beat him into complete insensibility, as the cuts and bruises must have been inflicted by some such weapon. The locks of the leg-irons had evidently been picked by a false key made from a brace buckle, so that the leg-irons could instantly be removed the moment the Gaoler was knocked down. All the keys for opening every door and cell in the Gaol were on one bunch, which was in the hands of the Gaoler when he entered James Young's cell, and these Young secured and opened the wooden gates leading into the inner corridor, and the cell in which John Young was confined; the locks on the leg-irons on John Young were picked with a key similar to the one used for the same purpose by James, which at once gave both the prisoners the free use of their limbs. The entrance gate to the Gaol was then unlocked, and the prisoners passed down stairs and into the yard, one of them carrying in his hand the leg-irons taken from John Young's legs, evidently for the purpose of attacking any one who would attempt to obstruct their escape. Having got into the yard they climbed over the board fence, which is quite easily done at almost any point, and got under the bank of the river (immediately in rear of the yard), which they followed for about half a mile until they reached the woods. From the evidence of the witnesses who saw men running in the direction named at the time of the escape, I think that the Youngs reached the cover of the woods just about the time that the Gaoler recovered consciousness, and was able to go down stairs and give the alarm, but

* This plan of escape was the one that was afterwards so successfully carried out, and of which the Gaoler was fully informed.

before any one started in pursuit they must have had a start of not less than half an hour. The leg-irons and chains as well as the false keys were left in James Young's cell. John Young's leg-irons were carried down stairs and thrown upon a sofa in the lower hall, and both of the cells in which the prisoners were confined, as well as the inside wooden door and the outside iron gate, were left open, but the keys of the Gaol had not been found, having in all probability been carried off by the prisoners.

Such being the method and means adopted by the Youngs to effect their escape, it now devolves upon me to show who is to blame for the unfortunate occurrence; and, at the outset, it is almost unnecessary to state that if the Gaoler had not entered the corridors and cells of his Gaol on the occasion referred to, without having present a Turnkey, as the Gaol regulations require, the murderers Young would not have escaped.

Such an act on the part of a Gaoler, at any time, is attended with danger to himself and the safe custody of the prisoners; but when he has in charge two murderers under sentence of death, the risk and foolhardiness of the act is as inexplicable as it is unpardonable. The reason that the Gaoler gave for entering the Youngs' cell alone (not only at the time of escape, but on many previous occasions), namely, that the prisoners were both leg-ironed, and that one was chained to the floor as well, only shows that he does not possess the proper qualifications for a position requiring the exercise of such habitual vigilance and caution as will successfully cope with the desire of such prisoners to effect their escape, and their ingenuity to accomplish it. And it will not be denied that to enter the cell of a condemned murderer alone with the keys of every corridor, cell and door in the prison in one's hands, is quite sufficient to create a desire and incite ingenuity on the part of such prisoners. Further, the Gaoler cannot plead ignorance of the intentions of the Youngs in this respect, for Detective Murray stated in his evidence, at the time of his trial, that James Young had informed him that they purposed knocking the Gaoler down when he came into the cell, in order to effect their escape, which intention they exactly carried into effect.

The official conduct and action of the Deputy Sheriff in connection with the custody and escape of these prisoners, is sufficiently well shown by the evidence of that officer, sworn and subscribed to, to require much comment from me. Such gross ignorance of well defined duty, and culpable indifference to, and neglect of the most ordinary precautions for the safe custody of condemned murderers, have never before come under my notice. Owing to the advanced age of the Sheriff (his father), the Deputy is *de facto* Sheriff, and as such, the chief executive officer of the Gaol. But he was, or assumed to be, unaware of that fact so plainly stated in the Gaol regulations, and left the management of the Gaol entirely and absolutely in the hands of the Gaoler; he never appointed the turnkeys, and in fact did not know that it was compulsory to have one; he did not know when the post of turnkey was vacant, or who filled it for the time being; and although the Council voted a salary every year to that official, he allowed the Gaoler to draw it whether there was a turnkey on duty or not. Although the Gaol was externally notoriously insecure, and internally badly arranged and unsafe, and although he knew that the Youngs had made an effort to escape, and, from the evidence of Detective Murray, was aware that they intended to make an attempt to obtain their liberty in the very way that they subsequently did, still not only did he not appoint an extra guard, but he left the post of turnkey vacant (for it is a farce to suppose that the sons of the Gaoler had been thought to act in that capacity until after the escape, being mere lads of thirteen and sixteen years of age), ever since the Youngs were condemned to death, a period of two months, and left the Gaol in charge of one man, the Gaoler, whose resignation he had accepted a few months before for drunkenness and insubordination. From the evidence of the Gaoler, it would appear that the Deputy Sheriff only saw the Youngs some five or six times since their commitment; and from his own admission, it is clear that he had not seen them for three or four days before the escape, and the so-called turnkey had not seen them for ten days. Even after the escape, the Deputy Sheriff was true to the character he had made for himself in connection with Gaol matters, for instead of offering a *distinct sum* as a reward for the recapture of such notorious murderers, he only stated that a *handsome* reward would be given.

Having regard to the foregoing facts, involving gross carelessness, neglect of duty, and disregard of Gaol regulations on the part of the Gaoler and the Deputy Sheriff, the dismissal of these officials was recommended.

Representation was made to the County Council, again pointing out the insecurity of the Gaol building and recommending that such alterations should be made as would render it secure,

and give it the appliances that are necessary in modern Gaols. In consequence of this recommendation, I visited the Gaol on the 25th August, to confer with the special Committee appointed by the County Council, with reference to the alterations, additions and repairs necessary to be made in order to comply with the provisions of the Prisons Inspection Act of 1868. It was urged by a majority of the Committee that the accommodation afforded by the Gaol was generally sufficient for the requirements of the County, and that while they were ready to make any necessary repairs, the County should not be asked to build a new structure. I pointed out that as there were on some occasions as many as 15 prisoners in custody at one time, while there were only seven cells, neither a proper separation of the sexes, nor a classification of the prisoners could be carried out. The defects in arrangement, combined with the external insecurity, owing to the want of a wall around the Gaol yard, warranted my requiring the County Council to erect a new structure in rear of the present building, in accordance with the suggestion made by me in a previous communication to the Warden. The members having urged that, in the present financial condition of the County, the erection of a new Gaol structure would place a very serious burden upon the ratepayers, I proposed the following compromise, viz:—

1st. That the present building should be given up entirely for Gaol purposes, and that it should be remodelled and reconstructed internally, in order to obtain the requisite space for the proper classification of prisoners, and to overcome its present defects.

2nd. That a dwelling house be erected for the Gaoler, adjoining the Gaol.

3rd. That a stone wall be erected to enclose the Gaol yards, enclosing a larger area than the present board fence, with a partition wall to divide the Gaol yard from that used by the Gaoler's family. The stone wall to be 18 feet high.

The members of the special Committee accepted this compromise, and agreed to engage an architect to make a sketch plan of the proposed alterations. Subsequently, the work was submitted to tender, and an offer accepted for its completion.

At my last visit the Gaol was found in as good order as the structure will admit, and was clean and well kept throughout. The air in some of the cells was impure, owing to the confined cell space and small window openings.

There were five prisoners in custody, the two Youngs, one man committed for assault, one for selling liquor to Indians, and an insane woman, who had not at that time been certified to under the Act. The precautions which I instructed the Sheriff to take in order to secure the safe custody of the murderers, (Young), were being strictly enforced, and there were then on duty at the expense of Government, two night-guards and one day-guard, and at the expense of the County two night-guards and one day-guard. The Youngs were also securely fastened by their leg-irons to rings in the floors of their respective cells.

The Gaol books were examined and found to be correctly kept.

CHATHAM GAOL.

<i>Prisoners committed during year</i>	155
<i>Greatest number confined at any one time</i>	31
<i>Number of re-committals</i>	21
<i>Total cost of maintaining Gaol</i>	\$3,810.27

Inspection was made of this Gaol on the 11th February and the 12th July. The first inspection was made by Mr. Scoble, who reported as follows:—

Visited the Gaol at 10.30 a.m. Found the general condition to be very good; the beds and bedding clean and neatly made up; the cells clean and well ventilated. At the time of my visit the prisoners were engaged in holy-stoning the floors of the corridors, and cleaning the ironwork. The execution of this work of course detracted from the appearance of neatness, but evidences of cleanliness and order were everywhere apparent. The ventilation was particularly good, no offensive smell whatever being noticeable even in the water-closets. The water supply is sufficient. I found 25 prisoners in custody: 21 males and 4 females. One of the latter was sentenced for two years to the Central Prison, by the Police Magistrate. As that prison is intended for male offenders only, the sentence cannot be carried into effect. One of the men was committed as insane. He will be removed as soon as a vacancy occurs in London Asylum. Another man, acquitted of cutting and wounding on the ground of insanity,

will also be transferred. He has already been a patient in Malden and London Asylums. Of the remainder, fifteen are under sentence, six are awaiting trial, and one is confined as a debtor. I examined the Gaol books, and found them to be neatly and correctly kept. There is no punishment book, the one formerly in use being filled. The discipline and management of the Gaol reflect great credit on the Gaoler and his subordinates.

A second visit was made by me on the 12th July, on which occasion I found it throughout in admirable order and thoroughly clean, the bedding being very neat and tidy in appearance.

The wood-yard required to be cleaned up. The other yards were in a well-kept state.

The keeper of the Gaol reported the drains in a defective condition, with bad smells, indicating a stoppage somewhere, and most likely a want of trapping. It appears, also, that there is a cesspool about twenty yards from the gate, and immediately in front of the house, with an overflow to the river. Considering the importance of effective drainage, I recommended the construction of an arched sewer from the building, to connect with the one below the cesspool, and of doing away with the cesspool.

There were in custody at my visit 11 prisoners, of whom 9 were men, and 2 were women. Three of the men were waiting trial, and six were under sentence. The two women were under sentence, one of them for a period of two years to the Central Prison, for the larceny of wearing apparel to the value of \$15. As this woman could not be received into the Central Prison, her case and the circumstances connected with her commitment were brought under the consideration of the Attorney-General, and she was discharged from custody.

The regulations in respect to sentenced prisoners' clothing were not carried out strictly, some having only shirts, others trousers, etc. The Sheriff was instructed to make a requisition upon the County Council for twenty (20) suits of prisoners' clothing for males, of uniform pattern and make, the trousers to be made of two colours of cloth—one leg of light grey and the other of dark,—and the coat to be some plain but distinguishing colour.

The Gaol Register was found to be very neatly kept. The Gaol Surgeon's book should be always obtainable for the inspection of the Inspector, which is not the case.

CORNWALL GAOL.

<i>Prisoners committed during the year</i>	75
<i>Greatest number confined at any one time</i>	15
<i>Number of re-committals</i>	21
<i>Total Cost of maintaining Gaol</i>	\$1,858.35

Inspection was made of this Gaol on the 9th May and 22nd August. On the occasion of my first visit, I found the Gaol in fair order, and reasonably clean and neat. From the presence of smoke in the corridors, I imagine some of the flues were choked up, and instructions were given to have the matter looked into when the stove-pipes were taken down. Whitewashing had just been completed, and I recommended that in future the cut stone in the corridors should be whitewashed, and the lock plates painted black, as these things add much to the appearance of the Gaol.

The yards required cleaning. A step ladder, that had been used in the whitewashing, was found in the men's airing yard. The Gaoler was instructed that this should not be allowed, even for a single night. He was further instructed that if it was necessary for the Turnkey's family to use any portion of the men's airing yard, that a high board fence must be erected round such part, as no one but the Gaol officials should have the means of communicating with the prisoners. This matter, together with the removal of the water closet, and making connection with the main sewer, was brought to the attention of the County Council.

Eight prisoners were found in custody, 6 males and two females. Three of the number, two men and one woman, were certified as insane. One man was recommended for transfer to an Asylum, but the other two were imbeciles, who would not benefit by Asylum treatment. Subsequently the woman died in Gaol, and the man was removed to Orillia Asylum. Three prisoners were waiting trial, one of whom was extradited from the United States.

The Gaol Books were examined, and found to be correctly kept. No complaints were received from the prisoners.

The second visit was made by Mr. Scoble, who reported as follows:

I visited the Gaol at 8.30 a. m., when I found eight prisoners in custody, 7 men and 1 woman. Two of the former were under sentence for minor offences, three had been waiting trial, on a charge of forgery, since the 17th February, and the two remaining men and the woman were committed as insane. One of the men appeared to be perfectly recovered, and the Gaol Surgeon's attention was drawn to this case, with a view to his discharge. The woman has been twice committed as insane. It appears, upon enquiry, that she is unhappy in her domestic relations. As she seems to be perfectly sane at the present, the Gaol Surgeon was requested to make a special report in her case.

The Gaol was fairly clean, but not tidily kept. The yards were not orderly, and many things were left in them that should not have been there. A portion of the airing yard is cultivated as a garden. This was forbidden for the future, it being contrary to Gaol regulations.

Nothing has yet been done to the water-closet. It is evident that the sewerage cannot much longer be buried in the Gaol yard, without detriment to the health of the inmates. The attention of the Gaol Committee was called to this matter for the third time.

The Gaol yards are most insecure. The walls in the men's airing and working yards are only 17 feet high instead of 19 feet high. Buttresses project inside, to within three feet of the top, having irregular faces, affording foothold. The gateway of the working yard is secured by a slight iron bar, and a 2-inch common padlock. The angles formed by the yard and prison walls could easily be scaled, by means of window openings, projections on the walls, and the proximity of the Gaoler's kitchen on the west. The wall in the women's yard is only ten feet high, with a porch to within three feet of the top. A stairway by the side of the county buildings opens upon a platform, within three feet of the working yard wall, affording easy access from the outside. Altogether, I deem these yards to be extremely insecure.

All these defects have been referred to in previous inspection minutes, and I again brought them to the notice of the Gaol Committee.

An escape took place from the Gaol on the _____, but the prisoner was shortly afterwards recaptured. The escape was, to a certain extent, due to the defects before referred to, but also to the careless guard exercised over prisoners.

COBOURG GAOL.

<i>Prisoners committed during the year</i>	181
<i>Greatest number confined at any one time</i>	31
<i>Number of re-committals</i>	58
<i>Total cost of maintaining Gaol</i>	\$4,031.39

Inspection was made of this Gaol on the 25th April and the 29th August. On the occasion of my first visit, I found the various corridors, cells, and wards of the Prison in the most commendable state of cleanliness and good order.

The removal of the verandah from the outer windows of the south lower corridor, has very much lightened that formerly dark portion of the Gaol, which might still further be improved, without endangering the safety of the corridor in the slightest degree, if the flat bars attached to the outside iron grating were taken off.

While the bedding was reported by the Gaol officials to be sufficient, it was quite evident from the appearance of some of the sentenced prisoners, that there was a scarcity of Gaol clothing, and the Sheriff was instructed to make a requisition upon the County Council for 10 or 12 suits.

The yards were in course of being cleaned up. The water-closets were in as clean a state as they can be placed in, but disinfectants were required to be used pretty constantly.

At this visit there were 26 prisoners in custody, of whom 20 were males and six were females. Two of these prisoners were committed as lunatics, although only one was so certified, for whom a warrant had issued for transfer to Toronto Asylum, but the Medical Super-

intendent refused to admit, owing, as he stated, to the person being *idiotic*. The matter was brought to the notice of the Provincial Secretary.

One man was under sentence to the Penitentiary for a period of four years, and another to the Central Prison for one year, and one man was waiting trial for forgery. All the rest of the prisoners were under sentence for short periods to the Gaol, for petty larceny, vagrancy, drunkenness, assault, &c.

There were two cases, however, among the latter class, that I brought to the notice of the Honourable, the Attorney-General, with a view, if possible, to the correction of some of the misuses of this Gaol.

1st. In the case of a woman committed from the neighbouring town of Port Hope, as a vagrant, but who, I was credibly informed, was taken from a private house by the constable, the girl having \$5 in her possession when brought to Gaol, the fact being that she was brought to Gaol to be confined, which occurrence took place a week after her commitment. Why this girl should have been sent to Gaol, when there is a Lying in Hospital in Toronto, partly supported by the Government; or why she was committed as a vagrant, from a private house with money in her possession to pay for her support, is one of the mysteries of Police Magistrates' law.

2nd. A man was committed by the same Magistrate as a vagrant, when really the man was so far gone in consumption, that he might not live a week.

The various books were examined and found to be well kept

The prisoners were all conversed with, and no complaints were received.

The second visit was made by Mr. Scoble, who reports as follows:—

Visited the Gaol at 6.30 a. m., finding 11 prisoners in custody, seven males and four females; five of the former and two of the latter were under sentence, one man and two women awaiting trial at the assizes for very serious offences, and one idiot boy, who is recommended for transfer to the Asylum for Idiots as soon as open.

The man waiting trial for forgery appears to be suffering from Phthisis, as he has been spitting blood copiously. He has been in Gaol nearly 8 months, having postponed his trial from the spring assize. Another man, sentenced for six weeks for assault, was not in Gaol clothing, and had been in the habit of getting food from outside the Gaol, as he was supposed to be a respectable man. This was prohibited in the future.

The Gaol was in good condition, though the wards and cells on the south side are still very dark. It was found, however, that the lattice bars could not be removed, as suggested in the Inspector's minutes, as many of the inner bars had been sawn through. The walls of the yards are 17 feet high, plastered on the inside, but access from the outside can easily be obtained by means of a trellis, which is fastened to the outside wall on the south side, in order that vines may be trained against it. This matter is left for the Inspector's consideration. The corridors, cells and yards are in a cleanly condition, and the discipline and management of the Gaol is exceptionally good.

The Gaol books were examined, and found to be correctly kept. Punishments are entered in the book provided for the purpose.

GODERICH GAOL.

<i>Prisoners committed during year</i>	139
<i>Greatest number committed at any one time</i>	26
<i>Number of re-committals</i>	21
<i>Total cost of maintaining Gaol</i>	\$2,080.62

Inspection was made of this Gaol on the 6th September. I found 11 prisoners in custody, 10 men, and 1 girl under 14 years of age.

Two of the men were committed as insane. Although one had been in prison for nearly three weeks, the necessary papers to secure his transfer to an Asylum had not been received at the Department of the Provincial Secretary. This was the more inexcusable as the man appeared to be likely to benefit by Asylum treatment, and as there was plenty of room for warrant cases in the Asylum at the time. The Sheriff was requested to report to me for the information of the Government, who was responsible for the delay through which the man may possibly have, from lack of proper treatment, become chronically insane.

Two others of the male prisoners were waiting trial, and the remainder were under sentence. The Sheriff was instructed to report all prisoners sentenced for periods of four months up to two years, which had not been hitherto done.

The general state of the Gaol, as regards cleanliness and order, was fair. The building and clothing were reported by the Gaoler to be sufficient for the requirements of the Prison.

I brought under the notice of the County Council the following defects and requirements in connection with the Gaol structure, and requested that immediate steps might be taken to remedy the one and supply the other.

1st. Covering must be placed from wall to wall at the angles of the yards opening out from corridors Nos. 1 and 2. This is absolutely necessary to the safe-keeping of prisoners, as the window openings form a perfect ladder which can be used in effecting escapes.

2nd. Pointing the walls, and repairing foundations of the water closets.

3rd. Removing the common padlocks on corridor and cell doors, and replacing them with Chubb's (or other good makers') solid wrought iron padlocks.

4th. Heightening the chimneys to prevent their smoking.

5th. Furnishing sufficient paint for the wood and iron work of the prison, the labour to be done by prisoners.

The Sheriff was requested to communicate with the Warden of the County, making requisition for these alterations and repairs, and to report to me the result of his demand.

The various books were examined and found to be correctly kept.

GUELPH GAOL.

<i>Prisoners committed during year</i>	233
<i>Greatest number confined at any one time</i>	25
<i>Number of re-committals</i>	24
<i>Total cost of maintaining Gaol</i>	\$3,598.38

Inspection was made of this Gaol on the 13th April and 5th September. On the occasion of my first visit I found 14 prisoners in custody, 11 men and 3 women. One of the men had been committed as insane, but owing to differences of opinion on the part of the examining authorities, the certificates had not been completed in his case. Judging from appearance and manner, and from his hallucinations, the man was undoubtedly insane, and the attention of the examiners was again directed to his case. One of the prisoners was sentenced for a long period, but owing to his being maimed, he could not be transferred to the Central Prison, as he otherwise would have been. The remainder of the prisoners were sentenced for minor offences.

The condition of the Gaol was very good, both in respect to cleanliness and order. The corridor floor, so frequently complained of, had been renewed. The Prison officials reported a sufficiency of bedding and clothing for the requirements of the Prison.

The various books were examined and found to be correctly kept.

The second inspection was made on the 5th September. I then found in custody 11 prisoners, 6 men and 5 women. As the latter were all sentenced to long dates, the Gaoler was requested to keep them employed in making up and mending any articles of bedding and clothing that might be required for the Gaol. Two of the men had been re-transferred from the Central Prison as witnesses in a criminal case. As the term of sentence of one had nearly expired, the Sheriff was authorised to retain him in custody, and discharge him on the expiration of his sentence.

The Gaol was only in a fair condition of cleanliness and order, but the yards were thoroughly well kept. A much needed addition has been made for a gaol kitchen, and the kitchen and laundry formerly used, have been transferred from the interior of the building to the addition.

Enquiry was made into the circumstances attending the escape of a prisoner on the 10th July. It appeared that the Turnkey had a gang of eleven prisoners cutting wood in the working yard. He absented himself from them for a short time in order to let out a visitor, during which time the prisoner smashed the padlock on the large gate, through which wood is brought for prison purposes, and opening the gate, effected his escape. If any one is to blame in the matter, it is the Gaoler, who should have been present, either to let out the

visitor, or to take the Turnkey's place while he did so. Considering the expeditious manner in which the escape was effected, I am, however, inclined to a lenient view of the case in so far as the Gaol officials are concerned.

The locks on the gate were the ordinary useless japanned padlocks; and as a similar kind had been put on again, I instructed the Sheriff to have them replaced by the steel Chubb padlock.

HAMILTON GAOL.

<i>Prisoners committed during year</i>	1,041
<i>Greatest number confined at any one time</i>	111
<i>Number of re-committals</i>	575
<i>Total cost of maintaining Gaol</i>	\$7,275.00

Inspection was made of this Gaol on the 14th of February and 23rd of May. The first visit was made by Mr. Scoble, who reported as follows:—

“Visited the Gaol at 9.30 a.m. Found the general condition of the Gaol very good, the beds and bedding clean and neatly made up, the corridors and cells clean and tidy, the yards in good order, and good discipline and management apparent in every department.

It is to be regretted that, considering the care and expense attending the construction of this Gaol, that there should be defects in the ventilation and drainage. Despite the windows in the corridors being open, bad ventilation was apparent, particularly so in the east basement corridor and dark cells, and in No. 1 corridor east. In the upper flats and on the west side it is better, but the atmosphere is not pure. The cement flooring seems to be a failure, being worn out in many places, both in cells and corridors.

The supply of bedsteads is not equal to the requirements of the Prison at present, and many beds are made up on the floors. As this practice is destructive to the building, and is not cleanly or tidy, the purchase of additional bedsteads is recommended.

As the dry-earth closet system appears to be a failure, it is requested that the Gaoler report upon his trial of the system, and his views as to the causes of failure.

The yards all require to be gravelled or paved with cobble-stones; at present they are so muddy as to be almost useless for working.

I found seventy-nine prisoners in custody, fifty-seven men and twenty-two women. Four of each sex are committed as insane and dangerous to be at large. A coloured woman, committed as insane, was apparently dying at the time of my visit. The other women are fit subjects for Asylum treatment. The two others have been in the Gaol for a long time, and one seems more idiotic than insane. Of the male lunatics, one has already been in Toronto Asylum, having been transferred thence from the Central Prison. Michael McConnell, found guilty of murder is sentenced to be hanged on the 14th of March.

I found three prisoners sick in their cells, and one in the hospital. On examining the Gaol Surgeon's book I found no directions for the treatment of these prisoners. This should be amended, as unless written directions are given, the Gaoler and Turnkey cannot be held responsible for any neglect or want of attention to the requirements of the sick. The date and hours of the Gaol Surgeon's visit should also be distinctly specified on each occasion. With so large a number of prisoners as are at present confined, the visits should be made daily, at a certain hour.

The dietary is not strictly in accordance with the Gaol regulations, but, as understood with the Inspector, certain deviations are allowed.

The Gaol books were examined and found to be correctly kept.

The entire discipline and management of the Gaol are such as to reflect the greatest credit upon the officials, and leave nothing to be desired.

Order and regularity are strictly observed in every department, and rigid discipline enforced.”

The Gaoler made the following report upon the dry-earth system. As the experiment was fairly tried and has failed, it may be taken for granted that it is not adapted for the use of Gaols:—

"As requested, I beg to report upon the "Dry earth closet system," and my views as to the cause of its having proved a failure, as applied to the Hamilton Gaol.

I may say that theoretically the system is perfect, and have no doubt but, when possible to get *good dry earth*, and in places to which prisoners sentenced to *long periods* are consigned, it might be found practical. But my experience proves it to be impracticable, as applied to *Common Gaols*, where prisoners are confined for *short periods*, and whose time expires by the time they have become habituated to the system. Then again, many of the prisoners are utterly careless, and some of them old and infirm creatures and cripples, who, simple as the system is, will neglect it. There is also the difficulty, in fact the impossibility, of getting good dry earth, capable of absorbing the moisture of the excrement and the urine; and then again, the difficulties are increased from the fact that common buckets are used instead of properly constructed earth closets. We invariably found, when emptying the buckets each morning, that the contents had formed a plastic mud, which it was impossible to empty without scraping."

My second visit was made on the 23rd May, on which occasion I found 49 prisoners in custody—20 men and 29 women. One of the former was an idiot, whose transfer was recommended to the Orillia Asylum when opened. Three of the latter were not proper subjects for Asylum treatment.

The prompt removal of a large number of criminal vagrants, who, to a certain extent had made this Gaol their home, to the Central Prison, has helped to stamp out the offence of habitual vagrancy in the city, and left barely sufficient able-bodied prisoners in the Gaol to perform the ordinary industrial and domestic work of the Prison.

KINGSTON GAOL.

<i>Prisoners committed during year</i>	299
<i>Greatest number confined at any one time</i>	56
<i>Number of re-committals</i>	47
<i>Total cost of maintaining Gaol</i>	\$4,217.16

Inspection was made of this Gaol on the 11th January and the 16th May. The first inspection was made by Mr. Scoble, who reports as follows, viz. :—

41 prisoners—25 males and 16 females, found in custody. Of this number there were 3 men and 2 women committed as insane, and 1 girl as an idiot. Two men were under sentence, and 2 awaiting trial. The remainder were committed for minor offences,—chiefly vagrancy. It is a practice which cannot be too strongly condemned, that poor, and in some cases apparently respectable, persons, should be committed to gaol as a refuge, or temporary shelter for the destitute, innocent of crime; on this occasion the impropriety is more forcibly brought to notice by the imprisonment of three children, of tender years, for periods of from two to six months. The atmosphere of a gaol cannot be suited to children, no matter how humanely they may be cared for.

The general condition of the Gaol was very good, the walls being thoroughly whitewashed, and the floors of cells and corridors very clean. The temporary partitions for W. C.'s in some of the wards should be replaced by more permanent work, as a shaly partition detracts from the general appearance of the ward. The beds and bedding were clean and sufficient. Owing to the winter setting in while a drain was being built, the working yard was not as tidy in appearance as usual.

The airing yards were in better order. The water closet in the working yard requires to be emptied. The drains having been opened and cleaned last autumn, are in a satisfactory condition. The water supply is in course of being increased by widening and deepening the well.

The Gaol kitchen was examined, and the dinners inspected. They were found to be well cooked, and strictly in accordance with the Gaol regulations. The cost of rations per day is stated to be only 7½ cents. The whole management of the Gaol dietary, and the admirable manner in which the dietary book is kept, reflects the greatest credit upon the Gaoler.

The Gaol clothing appears to be sufficient in quantity in all articles, except caps and mitts, and the Sheriff was requested to make application for a sufficient number of these to supply working prisoners.

The various Gaol books were examined, and found to be admirably kept. The discipline of the Gaol was most excellent, and good management was apparent in every department.

My second visit was made on the 16th May, on which occasion 30 prisoners were found in custody, 22 men and 8 women. Six of these prisoners were certified under the provisions of Statute to be insane, three of whom had been warranted to Rockwood Asylum, and were shortly to be removed. Another was certified to be insane, and was recommended for transfer to Rockwood. An idiot girl will be transferred to Orillia Asylum, as soon as that establishment is ready for patients. In this manner all the mentally defective prisoners will be removed from Gaol, except one woman for whom nothing can be done at present. Of the remaining prisoners, only five are under sentence for criminal offences; all the rest for vagrancy and drunkenness.

The condition of this Gaol was, as usual, most satisfactory; every ward, cell and corridor being clean, neat and well kept. The yards were also found in a very tidy state.

The appearance of some of the prisoners indicated that an addition should be made to the stock of prison clothing. The bedding is reported by the Gaoler to be sufficient for the present requirements of the Gaol.

Now that all the long date prisoners are removed to the Central Prison from the Common Gaol, it is my intention to revise and simplify the dietary regulations, reducing, if possible, the dietary classifications to two. The Gaoler, who has had great experience in gaol management, and has systemized the dietary arrangements better than any other Gaoler in the Province, was requested to report his views upon the subject as soon as possible.

I brought under the notice of County Council, the insufficiency of the salaries paid to the Turnkeys of this Gaol. The amount, \$200 per annum and two rooms in the basement, with fuel and light, is quite insufficient for the married man—and \$200 with a room, out of which he has to pay \$100 for his board per annum, is equally insufficient for the unmarried man. These positions must be filled by men of good character, who possess fair ability and considerable activity. It being simply impossible to obtain these qualities in a man for \$200 a year and a room, the Council was asked to take steps to increase the sum, the more so, as I learned that one excellent Turnkey proposed leaving unless he obtained an increase.

In pursuance of this recommendation, I made a requisition upon the County Council, under the authority conferred upon me by the Prisons Inspection Act, requesting that the salaries should be fixed at the sum of \$300 and \$400 respectively, with rooms, fuel and light. At a meeting had subsequently with the County Council, I agreed to reduce these amounts to \$350 and \$250 respectively, but I have been informed that the County Council have declined to accede to my request, considering the salaries as fixed by me to be too large. The illiberality evinced by this county in dealing with its officials, points to the advisability of removing from their hands the right to fix the salaries of gaol officials, upon whose character and efficiency depends the local administration of justice.

LINDSAY GAOL.

<i>Prisoners committed during year</i>	101
<i>Greatest number confined at any one time</i>	20
<i>Number of re-committals</i>	6
<i>Total cost of maintaining Gaol</i>	\$1,566.13

I inspected the Lindsay Gaol on the 26th April, and found it throughout in its usual excellent condition of order and cleanliness. The bedding was particularly well kept and tidily arranged, although my visit was paid at 7.30 a.m.

The clothing and bedding are reported to be sufficient. The two airing-yards were found to be in capital order. The dry earth system of water-closets is reported to be giving great satisfaction.

Seven prisoners were found in confinement, viz., 6 men and 1 woman. In addition to this number, an old man, who had been committed as a vagrant, died in Gaol on the morning of my visit. No lunatics were in custody at this visit.

The various books were examined and found to be properly kept.

Inspection was again made of this Gaol by Mr. Scoble, on the 30th August, who reported as follows:—

Visited the Gaol at 8 p.m., finding 8 prisoners (7 males and 1 female) in custody. Six of the prisoners were under sentence, and one for want of securities. The female, a girl of even years of age, was committed as a prostitute. Having regard to the tender age of this child, precluding the possibility of the knowledge of the crime she had committed, a memorandum was made in the minutes suggesting the propriety of her removal to some Magdalen Asylum, where a moral as well as physical restraint would be imposed. This case points early to the necessity for a female reformatory, where the effort could be made to reclaim as well as punish juvenile female offenders.

The Gaol was found to be in very good order, the corridors and cells being clean and airy neat, the bedding clean and sufficient, and neatly folded in those cells not in immediate use. The yards were not as tidy as they might have been, as the masons are engaged in pointing the walls and replacing the coping.

Food, other than Gaol rations, having been found in the wards, the Gaoler was cautioned against a repetition of this breach of regulations.

The Gaol books were examined and found to be correctly kept.

Gaol walls 17 feet high. Gaoler does not sleep within Gaol precincts, but immediately outside.

LONDON GAOL.

<i>Prisoners committed during year</i>	743
<i>Greatest number confined at any one time</i>	70
<i>Number of re-committals</i>	319
<i>Total cost of maintaining Gaol</i>	\$6,690.11

Statutory inspection was made of this Gaol on the 14th April and 12th July. On the former occasion I found 55 prisoners in custody,—35 men and 20 women. One of the former, certified as insane, was undoubtedly restored to a sound mind, and his discharge was recommended. There were also four females committed as insane, one of whom had not been certified to. Only one of these women seemed likely to be benefited by Asylum treatment, and her transfer was subsequently recommended.

The Gaol was found in as clean and well-kept a state as its dilapidated condition would admit; and a further examination of the building convinced me that the partial reconstruction recommended by the Special Committee of the County Council, would only result, so far as the structural improvement of the Prison is concerned, in the money being wasted; it being simply impossible to alter the Gaol so as to make it acceptable under the provisions of the Inspection Act.

No complaints were received from the prisoners as to their treatment. The books were examined and found to be properly kept.

At my second visit I found 45 prisoners in custody, viz., 22 men and 23 women; one of the latter being insane, she was transferred to an asylum for treatment.

Five of the male prisoners were awaiting trial, and fourteen were under sentence for minor offences; the remainder being committed for contempt of court and want of sureties. The females were all of the vagrant class, most of them being habitual offenders.

As upon the occasion of my last visit, the Gaol was as clean as it could be expected to be under the circumstances, and the personal cleanliness of the prisoners appeared to be as well attended so as was possible, considering that there was not a bathing-tub in the Prison, and that only a small water supply is provided.

Nothing having been done up to the time of my visit to remedy the defects of this Gaol, the vermin in which are so numerous that the prisoners beg not to be shut up in their cells at night, as they are literally devoured in them,—and having been informed that plans have been prepared embodying alterations, additions, and repairs, but which had not been submitted to me for approval, although I had several times called at the County Clerk's office in order that I might see them, I drew the attention of the County Council to the immediate necessity that existed for submitting the plans, and carrying out the proposed alterations as soon as they should have been approved. Up to the present time this has not been done, and the Gaol still remains in its defective and dilapidated condition.

L'ORIGINAL GAOL.

<i>Prisoners committed during year</i>	30
<i>Greatest number confined at any one time</i>	8
<i>Number of re-committals</i>	5
<i>Total cost of maintaining Gaol</i>	\$938.67

Inspection was made of this Gaol on the 25th August, by Mr. Scoble, who reported as follows:—"I visited the Gaol at 1 p.m., finding four prisoners, all males, in custody. One man was awaiting trial for stabbing, one waiting sentence for theft and breaking gaol, and two under sentence. One of the latter was under sentence of 15 days' imprisonment or a fine of 20 cents (and \$6.55 costs), for stabbing; the magistrate inflicting this punishment because the wounded person failed to appear against him. The Gaoler not having the papers in the case, I requested the Sheriff to forward them for consideration.

"The Gaol was in a fair state of cleanliness throughout. The Gaoler was instructed not to make a garden (as at present), in the Gaol-yard, to have a new lock put upon the door between the male and female airing-yards, and a padlock upon the gateway from the outside. He was also instructed to keep the iron gateway between the wards. He has no turnkey. The means of escape from the Gaol yard were also pointed out to him, and he was instructed not to allow prisoners to be in the yard alone. The walls are only 17 feet high, and present facilities for scaling at the angles.

"The Gaol books were examined. The Register is filled up. The Gaol Surgeon's book has no entry since April 13th, which was the second visit for this year. No punishment book.

"The Gaoler is new, and has no knowledge of what should be done. He seems to be anxious to learn.

"An escape took place on the 27th August, which was not reported until December 6th. The prisoner was allowed to go to the W.C. at about 6 p.m., and it is supposed that he scaled the walls at the angle of the Gaol-yard, where the pointing was defective. An investigation has not yet been made into the circumstances of the escape."

MILTON GAOL.

<i>Prisoners committed during the year</i>	60
<i>Greatest number confined at any one time</i>	12
<i>Number of re-committals</i>	6
<i>Total cost of maintaining Gaol</i>	\$1,157.29

Statutory inspection was made of this Gaol on the 9th September, when I found six prisoners in custody, five men and one woman. The upper corridor of the Gaol, which communicates directly with the lower corridor, was occupied by Whitesides, who was charged with the murder of his father, and a detective. The lower corridor was tenanted by three male prisoners and a female (Whitesides' mother), proving that the separation of the sexes is not provided for in the structural arrangement of this Gaol. This has been reported upon in previous minutes of inspection. The single yard is also used, in common, by the male and female prisoners. This condition of things is not only in violation of prison discipline, but is also most demoralizing in its tendencies.

The ventilation of the lower ward is exceedingly defective, and many of the cells are quite dark. The yard space is very limited, and at some points is most insecure, as the window openings are so close to the angles of the wall as to afford easy means of scaling it. There is no prison kitchen, and consequently there are no means for carrying on the domestic arrangements of the prison properly.

For these and other reasons, I had to report the Milton Gaol as being unsafe and unfit for the confinement of prisoners, as required under the terms of the Prison Inspection Act and requested that the County Council would appoint a Special Committee to confer with me with a view to providing a remedy for the defects complained of.

NAPANEE GAOL.

<i>Prisoners committed during year</i>	49
<i>Greatest number confined at any one time</i>	18
<i>Number of re-committals</i>	4
<i>Total cost of maintaining Gaol</i>	\$2,028.68

This Gaol was inspected on the 16th May and 28th August. On the occasion of my first visit I found 11 prisoners in custody,—7 men and 4 women. Two of the former were mental defectives, who were charged with criminal offences, but on being arraigned were acquitted on the ground of insanity. At the time of my visit they had not been certified to the proper officer of the Court. One boy and two girls were idiotic, and their removal to the Orillia Asylum was recommended as soon as the Institution opened. Two of the men were awaiting their trial for horse stealing, and another for criminal assault. Two boys were under sentence for larceny, and two women were under sentence for vagrancy.

The Gaol in all its departments was found in the highest condition of cleanliness and order. The yards were thoroughly well-kept, and the general appearance of the Gaol indicated excellent management, and the existence of regularity and order.

The supply of bedding was reported sufficient, but the supply of prison clothing was insufficient. The dietary regulations appeared to be strictly carried out. The various books and records were examined, and found to be posted up and neatly kept.

The second visit was paid by Mr. Seoble, who reported as follows: viz.:—"I visited the Gaol at 2 p.m., finding seven prisoners in custody,—five males and two females. Four of the males are under sentence; the remaining one was an idiot, as were also the two females. These were recommended for removal to the Asylum at Orillia as soon as that Institution is opened.

On examining the Register I found that a man, committed January 7th, for arson, tried the Assizes 21st March, and acquitted on grounds of insanity, duly certified as insane, was discharged on June 15th by the County Judge, under the 15th section of the Act, without the order of His Honour the Lieutenant-Governor.

The Gaol was found to be in a most creditable condition of cleanliness, the cells and corridors clean and well ventilated, and the bedding sufficient and neatly arranged. The sheets are, however, of a single width common cotton, 28½ inches wide, not covering more than two-thirds of the bed-place. This is absurd economy on the part of the Gaol Committee, as it defeats the ends for which sheets are necessary. The yards and water-closets were tidy and clean.

There are only two suits of Gaol clothing in good condition. The idiot girls are neatly clothed.

The books were examined and found to be correctly kept.

OTTAWA GAOL.

<i>Prisoners committed during the year</i>	811
<i>Greatest number confined at any one time</i>	66
<i>Number of re-committals</i>	335
<i>Total cost of maintaining Gaol</i>	\$6,216.47

This Gaol was inspected on the 10th May and 24th August. On the occasion of my first visit I found that, except where whitewashing was going on, every department was in good order and in a well-kept condition.

The bedding and clothing are reported to be sufficient for the wants of the year, but there is a lack of personal clothing for the female sentenced prisoners. The Sheriff was requested to make a requisition for not less than twenty suits. I observed that the clothing of sentenced prisoners (women) was spread around various cells. I instructed that when the new clothing was furnished, all the articles of dress belonging to sentenced women should be placed in store, in the same manner as the men's.

A bad smell existed in the north basement, which was said to be attributable to the filthy habits of an imbecile vagrant (who is subject to fits) who was confined in that corridor. An

outside cell should be provided for such prisoners, in order to keep the air of the Gaol from being polluted.

On this occasion, I found forty-four prisoners in confinement, viz., twenty-one men and twenty-three women.

The preponderance of women is a new feature in the commitments, and is confined in the Province to the Ottawa Gaol. Most of the men were sentenced to short periods for drunkenness and disorderly conduct, and a large proportion of the women were prostitutes and disorderly characters.

A man who was committed as being insane, was evidently restored to a sound mind. As soon as the examiners certified to this, the Sheriff was instructed to discharge him.

I observed with satisfaction that the prisoners were still kept at work. Eight men were breaking stone, and a considerable number were employed in domestic work, while no less than nineteen of the women were knitting socks.

The Keeper of the Gaol was directed to see that the female prisoners were taken out into the yard for an airing daily.

No complaints were received, and the affairs of the Gaol seemed to be conducted with regularity and order.

A second visit was paid by Mr. Scoble on the 24th August, who reported as follows:—

“I visited the Gaol at 4.30 p.m., on the 24th instant, and found it in charge of one turnkey, the other turnkey and the Gaoler being absent. As I found that it would not be safe to take the turnkey from his duties, I declined to make an inspection.

“I visited the Gaol again at five p.m., on the 26th instant, and found fifty-eight prisoners in custody, thirty-one males and twenty-nine females. Of the former, two were awaiting trial, and the remainder were under sentence for short periods, except a boy of fifteen years of age who was sentenced to four years' imprisonment in the Provincial Reformatory. Of the women, twenty-five were under sentence, one was awaiting trial, and one was reported insane. She appeared to be a fit subject for Asylum treatment.

“On the occasion of my first visit, the yards were in a most disgraceful condition. In the one off the kitchen, ducks were kept, and it was littered with all sorts of rubbish. The larger yard was strewn with fragments of clothing and bedding; an iron spade (for cleaning the furnaces) with a heavy iron handle was lying near the gateway, a step-ladder was in the straw shed; the bed and bedding used by a filthy imbecile was in the well-house where he had been confined it was said, by the Inspector's orders, but whence he had been removed a few days before; the furnace room was open to access by prisoners employed in the kitchen, and heavy iron implements were lying there; two men were not in gaol clothing, although sentenced prisoners; and a laxity of discipline and management was everywhere apparent. At my second visit these things were much improved. I declined, however, to make a minute of inspection until the matter had been reported to the Inspector.

“The Gaoler reported a sufficient supply of bedding, and 38 suits winter, 38 suits men's summer clothing in good order, and 35 suits women's clothing in good order also. The cells and corridors were clean, but the men's day ward was close.

“The women were engaged in making straw hats, and the men were breaking stones.”

OWEN SOUND GAOL.

<i>Prisoners committed during year</i>	148
<i>Greatest number confined at any one time</i>	24
<i>Number of re-committals</i>	57
<i>Total cost of maintaining Gaol</i>	\$3,410.20

Statutory inspection was made of this Gaol on the 22nd of September, when its various wards and cells were found in very good order, and fairly clean throughout. The bedding was reasonably tidy, and was reported to be sufficient for the then wants of the Gaol. I observed that the clothing furnished to the sentenced prisoners was not uniform in pattern. This rule must be observed when the next supply is procured. One leg of the trousers should be light grey and the other dark, so that in the event of an escape the prisoner may have a distinguishing mark.

The yards were found in a tidy and well-kept state. The water closet in the airing

ward for males should be connected with the drain, and the water overflow, so as to enable it to be flushed and kept clean. I brought this work to the notice of the Gaol committee so that it might be proceeded with when the additions to the Gaol were commenced. I directed that the use of the male working yard by the matron for drying her clothes and other domestic purposes should cease, as the practice was both unsafe and improper. The Sheriff was requested to see that some other arrangement was made.

There were in custody at this inspection 17 prisoners, 13 men and 4 women. Of this number no less than 5, and perhaps 6, were mental defectives, viz:—Two women were idiotic, and three men were insane, one of whom had not yet been fully examined, but who appeared to be a proper subject for the Asylum.

A prisoner, committed for want of sureties to keep the peace, gave evidence, from his appearance and manner, of an unsound mind, and it was directed that he should be closely observed by the Gaol Surgeon. Two male prisoners were in custody for want of sureties to keep the peace, five were under sentence, two of whom for sufficiently long periods of warrant transfer to the Central Prison, and three were awaiting trial for robbery and assault. An unusually large number of prisoners are sent to this Gaol on remand for vagrancy and drunkenness, and afterwards acquitted without sentence being passed, a state of things that is calculated to abnormally swell the number of prisoners returned.

The commitment of Hospital and Poor-house cases is still a prominent feature in this Gaol's population. Four deaths from among this class took place last winter.

I was gratified to learn that the contract for the enlargement of this Gaol, which is so much needed, was about to be given out; and I recommended that the work should be pushed forward with all speed, so that the extra accommodation may be available at the earliest day.

The following works were ordered to be done at the same time:—

1st. The locks on the female airing yard changed as already recommended.

2nd. The connection of the male airing yard water closet with the drain and water supply.

3rd. The repair of the floor in the entrance corridor.

I had to call the attention of the Sheriff to the delay that occurs in this Gaol in the examination and certification of lunatics, and to express the hope that the matter would be remedied. The various books were examined and found to be correctly kept. Only three visits are recorded in the Gaol Surgeon's books during September.

It was strongly recommended that one of the dark cells in the ground floor be taken for a furnace room to heat the upper corridors with hot air, having pipes leading from it into the four inner and two outer corridors, and, if possible, into the proposed room for the Turnkey.

PERTH GAOL.

<i>Prisoners committed during year</i>	53
<i>Greatest number confined at any one time</i>	18
<i>Number of re-committals</i>	16
<i>Total cost of maintaining Gaol</i>	\$2,369.87

Inspection was made of this Gaol on the 11th May and 23rd August. At my first visit I found 11 prisoners in custody, among them three insane, and one idiot woman. I was glad to note a reduction in the number of old resident lodgers of the vagrant class, and trust that the Gaol will be used as an Asylum for such people no longer.

The building was found in good order throughout, but not as tidy as usual, partly on account of the cleaning then in progress. The yards were in a well-kept state.

The Gaoler complained of the want of a dark cell for the punishment of unruly prisoners, in consequence of which he was unable to control them. I suggested that a part of the bucket room in the north-east corridor might be used in the meantime, as even the knowledge that such a place exists, has a deterrent effect upon refractory characters.

The Gaol clothing and bedding were reported as being sufficient for the requirement of the prison. The Gaol books were examined, and found to be properly kept.

The second visit was made by Mr. Scoble, who reported as follows:—

Visited the Gaol at 7 a. m., finding 10 prisoners in confinement, 4 men and 6 women.

All of the former are old homeless vagrants, who are thus provided with shelter. Of the women, two are insane, and awaiting removal by the Sheriff, who has a warrant for their transfer to an Asylum. Two very old residents were still in custody as vagrants. The attention of the Sheriff was called to the case of one of the two—who was no longer insane, but was perfectly helpless—with a view to compelling her husband to make provision for her removal to a more fitting place than the Gaol. An idiot girl was awaiting transfer to the Asylum at Orillia. Another woman, committed as a vagrant, was dying of consumption, and should have been in an Hospital, not in a Gaol. In fact, of the ten inmates, there is not a criminal (as such) amongst them. The Gaol is more like an Infirmary than a penal institution.

Every part of the Gaol was found to be perfectly clean and wholesome, save that portion where the helpless woman was confined, where there was necessarily a bad smell. The bedding and clothing were clean and neat, and the inmates seemed well cared for.

The Gaol is very well arranged inside, save that the water closets cannot be used, on account of there being no water supply. They are, therefore, closed up for the present. The attention of the Gaol Committee was called to the necessity for supplying this requirement, and the dark cell asked for in the Inspector's last minute.

The yards are large and convenient, and are surrounded by walls from 16 to 20 feet in height. These can, however, be scaled at any angle by an active man, being built of rough coursed masonry, and affording projections for feet and hands to rest upon. I do not consider these walls safe until the angles are filled in, and an uniform height of 19 feet or more carried out along the whole boundary wall.

PICTON GAOL.

<i>Prisoners committed during year</i>	44
<i>Greatest number confined at any one time</i>	5
<i>Number of re-committals</i>	12
<i>Total cost of maintaining Gaol</i>	\$815.89

Statutory inspection was made of this Gaol on the 23rd September, on which occasion only one prisoner was found in custody. Having been sentenced to four months' imprisonment, the Sheriff was reminded that he should have returned this prisoner as being eligible for transfer to the Central Prison.

The Gaol was neither in a clean nor tidy condition, owing, the Gaoler informed me, to repairs having been in progress, and that since they had been completed, the place had not been put in order. He was requested to do it at once. The straw in the beds smelled badly, and evidently had not been changed for a considerable time. The want of good hard water is seriously felt, as not very wholesome soft water is used for all purposes. The County Council was requested to see that a plentiful supply of good spring water was obtained. The pointing of the yard walls had been done, but the want of a proper projection to the coping will necessitate a frequent repetition of that work.

The Gaol Register used is not such as the regulations require, and the Sheriff was instructed to obtain a proper one.

Only one criminal prisoner had been in custody for a period of six months up to the time of my visit.

PEMBROKE GAOL.

<i>Prisoners committed during year</i>	43
<i>Greatest number confined at any one time</i>	19
<i>Number of re-committals</i>	6
<i>Total cost of maintaining Gaol</i>	\$2,298.10

Statutory inspection was made of this Gaol on the 13th May and 23rd August. On the occasion of my first visit I found 12 prisoners in custody, no less than nine of whom were committed as lunatics. Four of this number had been certified to, and would have been transferred to an asylum but for informalities in the papers furnished. The papers in one very urgent case had not been made out at the time of my visit. All the other cases were

quiet, harmless imbeciles, who were not likely to be benefited by asylum treatment. The remainder of the prisoners were vagrants.

The upper corridors of the Gaol were found in a very clean state, and in perfect order, but those on the ground floor were not so tidy or so well kept. The bedding was reported to be sufficient for the requirements of the Gaol.

There were some defects in the internal construction of this Gaol which required to be remedied, and which are more specially referred to in my Report upon the escape of three prisoners from the Gaol.

The various books were examined and found to be very well and correctly kept.

At this visit I made investigation into the circumstances connected with the escape of three prisoners from the Gaol on the night of the 30th of April, the circumstances connected with which are detailed elsewhere. Having regard to all the facts brought out in relation to the management of the Gaol and the safe custody of prisoners, I could arrive at no other conclusion than that, notwithstanding the ingenuity of the prisoners, their escape was attributable to gross neglect of duty and carelessness on the part of both Gaoler and Turnkey, and I recommended that the Sheriff be instructed to dismiss them.

The second visit was made by Mr. Seoble, who reports as follows :—

Visited the Gaol at 5.30 p. m., this day. Found twelve prisoners in custody, 8 males and 4 females.

Three of the former are lunatics, who have long been inmates, two are aged vagrants, and three are waiting trial. Of the women, two are idiot sisters, who have been in the Gaol for some time, and one is committed as insane. As soon as the papers in her case are forwarded, she will be transferred to an Asylum. The other woman is sentenced to 30 days' imprisonment for selling liquor without licence.

The Gaol was found to be in a most commendable state of cleanliness in all its departments. The bedding and clothing was clean and sufficient, and the atmosphere of corridors and cells was pure and wholesome.

Great improvements have been made in the Gaol, adding very greatly to its security. The Hobb's padlocks furnished are, however, much too small and light, and should be exchanged for heavier ones. If all the inner doors could be opened with the same key it would be an advantage. The outer doors should have larger and heavier padlocks than is necessary for the inner ones.

The possibilities for escape by scaling the yard walls was pointed out to the Gaoler and Turnkey.

It appears that notwithstanding the recommendation of the Inspector, no Gaol clothing is yet supplied.

The Sheriff is requested to carry out the Inspector's instructions in this respect.

It is a great drawback that no water supply is introduced into the Gaol, it being necessary to carry water from the yard through the corridors, for purposes of cleaning and washing.

The waterclosets in the north yard require to be emptied.

The bedding was reported as sufficient.

The Sheriff is requested to ascertain upon what footing the rations are supplied to the prisoners, as the Gaoler is not aware upon what principle they are furnished. It appears that the Gaoler has been supplying them so far, which is contrary to the Gaol regulations.

The discipline and management of the Gaol appears to be very good.

The books were examined and found to be correctly kept.

PETERBOROUGH GAOL.

<i>Prisoners committed during year</i>	61
<i>Greatest number confined at any one time</i>	14
<i>Number of re-committals</i>	33
<i>Total cost of maintaining Gaol</i>	\$1,967.68

Inspection was made of this Gaol on the 26th April, and 29th August. On the first occasion, I found it in all its departments in very good order. The yards were also thoroughly well kept.

The erection of the wall to divide the men's airing yards, from that used by the Gaoler

for domestic purposes has been completed, and will add to the safety of the Gaol, and facilitate good management.

The Gaoler reports a sufficient supply of bedding and clothing.

There were 11 prisoners in custody, viz., 7 men and 4 women. Two of this number had been certified to be insane, both of whom were removed to the Toronto Asylum. Another man was also committed as being insane, (and for assault). His quiet demeanour, and the absence of anything to denote insanity, were certainly very marked at the time of my visit.

A prisoner had been sentenced about eight months prior to my visit, to eighteen months imprisonment in the Central Prison, but it would seem that the Central Prison bailiff had refused to take him, as he had only one hand. This detention of the prisoner in the Common Gaol, being contrary to the order of the Court and illegal, his removal was ordered. The sentencing of crippled men to a hard labour prison, however, was not contemplated by Government.

All the prisoners were conversed with, and no complaints were received.

The books were examined, and found to be correctly kept.

The second visit was made by Mr. Scoble, who reported as follows :—

Visited the Gaol at 2 p. m., this day, finding seven prisoners (5 males, and 2 females), in custody. One of the former is awaiting trial on a charge of murder. As this prisoner has already attempted escape, and also attempted to commit suicide, it is most necessary that a constant watch should be kept upon him. To this end it is desirable that some trustworthy person should be confined in his corridor, ostensibly as a criminal, who can give information to the Gaoler of any projected escape. During the time this person is in the Gaol, the turnkey must also sleep in the Gaol proper, in order to be on hand in case of necessity. Every precaution must be taken to prevent communication with the outside, as, with a little assistance, escape could be easily effected. Another man is waiting trial for assault. One is under sentence for selling liquor without a licence, and two are committed as lunatics. One of these is an epileptic, and certainly not insane, the other seems a harmless imbecile, but not dangerous to be at large. The Gaol Surgeon and another medical man, having certified that he is insane, it remains only that the County Judge should make enquiry under the Act, and either certify to his insanity, or order his discharge under the 15th section. He must not remain in Gaol under present circumstances any longer than is absolutely necessary for action.

The two women are committed as vagrants.

The Gaoler reports a sufficient supply of bedding, but not of gaol clothing. The Sheriff will be so good as to make up the deficiencies, so that six good suits are constantly in the Gaol. The ventilation is bad in the water-closet in No. 2 ward. As this is not traceable to bad drainage, the Gaoler will use disinfectants to reduce the nuisance.

The Gaol was found to be in very good order, and good management was perceptible in every department. The cells and corridors were clean and well ventilated. The yard on the north and east sides was fairly tidy, but that on the south side was not, owing to the fact that the masons have been at work re-pointing the walls, etc. This work should have been extended to the outside, as there are many places that an active man could scale with ease, and communicate with the prisoners. Under the present circumstances, as the man charged with murder has friends who might assist his escape, it is most necessary that every obstacle should be placed in the way. The coping on the wall requires to be re-set, and means taken to prevent the drip from injuring the wall.

The various books were examined and found to be correctly kept. The Sheriff is requested to procure a punishment book.

SIMCOE GAOL.

<i>Prisoners committed during the year</i>	193
<i>Greatest number confined at any one time</i>	30
<i>Number of re-committals</i>	48
<i>Total cost of maintaining Gaol</i>	\$2,039.52

Inspection was made of this Gaol on the 10th February and 1st June. The first visit was made by Mr. Scoble, who reported as follows :—

Visited the Gaol at 8.30 a.m. Was accompanied by the Sheriff during my inspection. Found the general condition of the Gaol to be good, so far as the defects in the construction

will allow. The beds and bedding were clean and neatly made up, the corridors and cells were clean. The ventilation is not good and cannot be, until the drainage is improved, and some system of ventilation adopted. The yards and water-closets were clean. The interior arrangement of the Gaol is most faulty. The locks to the corridor and cell doors are insufficient, as evidenced by the escape that took place last June. The water supply has been better arranged for, since that time, but is still defective.

I found seventeen prisoners in custody, all males. Of this number two are committed as insane, and one as an idiot; another boy, committed for bestiality, is evidently idiotic. Of the remainder, ten are under sentence, two are waiting sentence, and one is on remand. One man is waiting trial for murder.

Enquiry was made into the escape of three prisoners in June last. It appeared from the evidence of the Gaoler and of John Burley, one of the prisoners who escaped on that occasion but was retaken on the 9th of November last, that Reid, one of the prisoners, was detailed to take charge of two of the idiot boys, in the lower corridor of the east side. In order that he might empty their night buckets, the Gaoler was in the habit of allowing him continual access to the yard, and more liberty than the other prisoners. On the evening in question after locking up time, Reid accompanied the Gaoler to get a pail of fresh water from the yard outside the prison proper. The Gaoler allowed Reid to go to the pump alone, and awaited his return at the door of the corridor. When Reid returned, he put the pail of water down in the corridor and leaned against the doorpost of the turnkey's room, stretching his arm inside to where the keys of the back gate of the corridor hung. This could be done without the Gaoler observing him. He remained leaning against the door speaking to the Gaoler for a few moments, and then said he was ready to go in. The Gaoler let him in, and locked the outer corridor gate. In the night, Reid picked the locks of the upper west corridor gate and the cell doors of Burley and Perry, with a picklock made from the wire handle of a pail, went down stairs and unlocked the back corridor gate, of which he had the keys, and returned upstairs to tell these two prisoners that the way was clear. When they got into the yard, they found that a clothes line had been fastened to the window bars of the upper west corridor. With the assistance of this rope they scaled the wall.

The conclusions that I arrived at from the consideration of the evidence were:

1st. That the escape was due to the latitude allowed to the prisoner Reid, in order that he might be made useful as an attendant upon the two idiot boys.

2nd. That lack of discipline exists, in allowing Reid to lounge about in the passage, thereby giving him the opportunity to get the keys of the back gate.

3rd. That gross negligence was shown in allowing a rope to be placed in a room to which the prisoners had access.

The re-capture of Burley and Perry cost the Gaoler some \$200, which he has had to pay out of his own pocket, the County Council having refused to recognize his claim for reimbursement.

The various books were examined and found to be correctly kept. Two punishments are only recorded in the Punishment Book since 5th August, 1875.

The Gaol Surgeon's visits, as recorded, are now sufficient to meet the requirements of by-laws."

My second visit was made more particularly for the purpose of examining the lunatics confined in the Gaol, with a view to their transfer to Asylums. At the time of my visit there were no less than seven in custody. Two of these were idiotic, and were removed to Orillia Asylum when it opened, the remainder were recommended for transfer to the London Asylum.

In addition to the above inmates there were 6 prisoners in custody, 2 men and 4 women. The condition of this Prison in respect to cleanliness and order was only fair, even making allowances for the number of lunatics in confinement, and there was a want of neatness and order in the management which demanded remedy.

The walls were in need of whitewash, and a great deal of plaster was off. I am of opinion that, considering the extent of this dilapidation, it would be better to take the lath and plaster off the walls, and ceil with lumber, instead. Something also requires to be done to lighten up the front corridors of the Gaol, the cells at present being little more than dark cells. The Sheriff was requested to bring these structural defects to the notice of the County Council, and to report their action.

ST. CATHARINES GAOL.

<i>Prisoners committed during year</i>	229
<i>Greatest number confined at any one time</i>	36
<i>Number of re-committals</i>	17
<i>Total cost of maintaining Gaol</i>	\$4,091.64

Inspection was made of this Gaol on the 8th February and 24th August. The first visit was made by Mr. Scoble, who reported as follows:—

Visited the Gaol at 3 p.m. Found 26 prisoners in custody, 15 males and 11 females. Seven of the former and 6 of the latter were under sentence, 3 men were waiting trial, one on remand and another detained as a witness. The remainder—3 men and 5 women—were committed as insane. None of the men appeared at all to be dangerous cases, but nevertheless it would be desirable to have them removed as soon as vacancies occur. Four of the women should be first transferred as soon as possible; the remaining one seems a quiet chronic case. The opening of the Hamilton Asylum will give an opportunity for the transfer of these women.

The Gaol was found to be in a very good condition generally, the beds and bedding clean and neat, the corridors clean, and the air sweet and fresh, the cells tidy, the yards clean and well kept, and the general management and discipline good, and reflecting credit upon the Gaol Officials.

The Gaol books were examined and found to be correctly kept. The Surgeon's book shewed that he paid frequent visits. The punishment book showed two punishments for slight offences.

The indiscriminate mixture of prisoners, tried and untried, and of all classes, is an evil that should be avoided, so long as any opportunity for classification remains. The prisoner Rathburn, sentenced for two years to the Penitentiary, should not be allowed to occupy a corridor with unsentenced prisoners.

The presence of other than Gaol clothing in the corridors where sentenced prisoners are confined, should be avoided.

At my visit to the Gaol on the 24th August there were 30 prisoners in custody—19 men and 11 women—Four of this number were of unsound mind, two of whom, although they had been in custody a considerable time, had not then been certified. The Sheriff was requested to comply with the Act with a view either to the removal of the prisoners to an Asylum or their discharge from custody. The others, were an idiot boy, who was removed to the Orillia Asylum on the opening of that establishment, and an imbecile woman.

The condition of the Gaol was very good, although the lower corridors were not as neatly kept as they might have been.

The bedding was reported to be of sufficient quantity, and it was found in fair order.

Some of the sentenced prisoners were not clothed in prison garb, and the Sheriff was instructed to make requisition for a sufficient supply to enable this to be done.

The dietary regulations were carried out, the cooking being done by the turnkeys and prisoners.

The yards were found in admirable order.

ST. THOMAS GAOL.

<i>Prisoners committed during year</i>	170
<i>Greatest number confined at any one time</i>	23
<i>Number of re-committals</i>	7
<i>Total cost of maintaining Gaol</i>	\$3,084.78

Inspection was made of this Gaol on the 9th February and 1st June. Mr. Scoble made the first inspection, and reported as follows:—

I visited the St. Thomas Gaol accompanied by the Sheriff at 1.30 p.m., on the 9th inst., when I found the general condition of the Gaol to be good, the beds and bedding in fair condition, the cells and corridors clean and well ventilated. This being the first visit of inspec-

tion since the appointment of a new Gaoler, it is due to him to say, that his management of the Gaol shows that he is desirous of doing his duty, and it may be hoped that in the course of time, that he will make the Gaol a model in every respect.

I found 11 prisoners in custody, 9 males and 2 females, 2 of the former were awaiting trial and two waiting sentence, the remainder were under sentence for short periods.

Since the Government has granted the aid towards the construction of the Gaol, the attention of the Gaol Committee is drawn to the pressing necessity for a Gaol kitchen. It is urgently recommended that a stone building be erected on the west side of the Gaol, opening into the corridor, and dissociated with the present Gaoler's kitchen. Until this is done the preparation of prisoners' food must always be attended with risk, so long as prisoners are employed. If at the same time a wall were built enclosing a working yard, the labour of the prisoners could be employed to a much greater extent and with much less risk than at present.

The Gaol books were examined and found to be correctly kept. The Gaol Surgeon was requested to enter his instructions as to treatment in a book to be kept for that purpose. The Sheriff was requested to procure a punishment book.

At my visit on the 1st June, there were 9 prisoners under confinement, viz.: 8 men and 1 woman. Seven of the men were awaiting trial, nearly all for serious offences. No complaints were received.

The yards of the Prison were in excellent order, but some of the corridors were very untidy, and, although the inspection was made in the afternoon, they were still unswept. The Gaoler, who had just been in office only a short time, was instructed to see that the utmost neatness and order was enforced.

STRATFORD GAOL.

<i>Prisoners committed during year</i>	206
<i>Greatest number confined at any one time</i>	19
<i>Number of re-committals</i>	33
<i>Total cost of maintaining Gaol</i>	\$2,096.44

This Gaol was inspected on 15th April, and on 6th September. On both occasions the Gaol in its various departments was found in a very well kept and orderly condition.

At my first visit there were seven prisoners in custody—six men and one woman. One of the former, an idiot, was removed to the Orillia Asylum as soon as that Institution was opened.

The bedding and clothing were found to be sufficient for the requirements of the Gaol at that time.

A vagrant was found in bed suffering from pleurisy. It would appear that this man was taken sick at a tavern, and in order to get rid of him, was, while sick, placed on the street, and a charge of vagrancy laid by the owner of the tavern against him, when he was committed to gaol. If the facts stated were as stated to me, a more inhuman act, committed under the cover of the law, could not have been perpetrated, and it should have been examined into by the committing Magistrate.

The books of the Gaol, on examination, were found to be correctly kept. At my inspection in September there were eight prisoners in custody—all males. Three of them were at work in the wood yard, which has only a low board fence around it, in charge of the turnkey only, one of the three being under sentence for a considerable period. I warned the Sheriff and the Gaol officials that, in the event of an escape from this yard, which is beyond the Gaol precincts, the sole responsibility and its consequences would rest upon them.

A very bad smell came from the water-closet in the south yard, which is close under the corridor windows, and the Gaoler was instructed to use disinfectants constantly.

The bedding and clothing were said to be sufficient, but I called the attention of the Sheriff to the prison clothes in use, which comprised a variety of patterns and descriptions, and that in the event of an escape no distinguishing marks would exist, in order to assist in the recapture. I further instructed that when the next lot of clothes were made up, the trousers should be of uniform pattern, and each leg of different colours.

SANDWICH GAOL.

<i>Prisoners committed during year</i>	265
<i>Greatest number confined at any one time</i>	38
<i>Number of re-committals</i>	36
<i>Cost of maintaining Gaol</i>	\$2,871.15

Inspection was made of this gaol on the 11th February and 13th July. The visit in February was paid by Mr. Scoble, who reported as follows :—

Visited the Gaol at 5.30 p.m., accompanied by the Sheriff. Found the Gaoler absent. The general condition of the Gaol was as good as its crowded state would admit. The beds and bedding were in a fair state of cleanliness. The corridors and cells fairly clean. The defective ventilation was very apparent in the lower corridors. Nothing has, so far, been done to improve or increase the water supply. The attention of the Gaoler is again called to the presence of articles of clothing in the prisoners' cells, and in the corridors. The insufficient supply of gaol clothing to furnish the requirements of the large number of sentenced prisoners was made a subject of complaint by two of the prisoners. The straw in the beds also requires to be changed more frequently.

I found 28 prisoners in custody—22 males and 6 females; eight were awaiting trial, and the remainder were under sentence. One of the men, John Allen, was under sentence for two years to the Provincial Penitentiary. The Gaol kitchen was examined and found to be in good order. The various books of the Gaol were examined, and found to be correctly kept. The general discipline and management of the Gaol appear to be good, considering the very crowded state of the Gaol, want of classification, and the low class of prisoners confined. It is to be hoped that the County Council will take some steps to remedy the more glaring defects in construction and appliances of this Gaol.

At my visit to the Gaol on the 13th July, I made the following minute of inspection :—

The undersigned this day made a Statutory inspection of the Gaol, when it was found generally in a better condition of order and cleanliness than at any visits lately paid to it; and with few exceptions was all that could be expected.

The beds and bedding were very tidy and clean. The yards were in fair order, but there are some erections and *débris* by the ward yard that must be removed at once, as they may be taken advantage of to effect escapes. The ash house must be removed 20 feet from the wall. The division fence must be raised and spiked on top.

The air in the lower corridors was better than it has been for the past two years, indicating that the improvements to the water closets, and the additional supply of water have overcome the more serious defects in the ventilation and sewerage. There are now the means in existence of keeping the Gaol clean and sweet, provided they are availed of, systematically, and that the sewer pipe does not choke up.

As soon as Mr. Lloyd's plan of improving the heating is carried into effect, there is every reason to believe that that defect will also be overcome.

Under these circumstances the undersigned is now prepared to recommend that the Legislative appropriation of \$6,000.00 for Gaol improvements be paid over to the Treasurer of the County.

There were 23 prisoners found in custody, viz: 19 men, and 4 women. One of the former, John Burling, a lunatic, is in a very low state, and owing to his filthy habits has to be kept on a straw bed on the floor.

Provided the Gaol Physician is of opinion that the *removal* of this man to the Asylum will not cause his death, his transfer will be immediately recommended.

Of the remaining male prisoners, 14 are under sentence, many of them for drunkenness and vagrancy. The case of Reynolds, committed on a *capias* will be reported to the Attorney-General.

The various books of the Gaol were examined and found to be properly and neatly kept.

SARNIA GAOL.

<i>Prisoners committed during year</i>	429
<i>Greatest number confined at any one time</i>	35
<i>Number of re-committals</i>	67
<i>Total cost of maintaining Gaol</i>	\$3,795.31

This Gaol was visited on two occasions during the year, viz.: 12th February, and 24th July. The first visit was made by Mr. Scoble, who reported as follows:—

Visited the Gaol at 2 o'clock p. m. Found the general condition to be excellent, the cells and corridors to be as clean as possible, the beds and bedding clean and tidily made up, the water closets free from bad smell, and the water supply sufficient for the requirements of cleanliness. The ventilation in the corridors and cells was unexceptionally good, and gave evidence that a rigid system of cleanliness is a rule in the Gaol.

I found nineteen prisoners in custody, 16 males, and 3 females. W. H. Smith, who was sentenced to be hanged on the 23rd December, is not yet executed, proceedings having been stayed with a view to a new trial in his case. Mrs. Finlay has not yet been tried. Two males and one female are committed as insane. All should be transferred as soon as vacancies occur; the woman is of Indian birth, and seems partially idiotic. Of the remainder of the prisoners, 3 are sentenced, and one awaiting trial.

One of the prisoners complained that the potatoes given them were rotten. This complaint was investigated and found to be entirely groundless. The various Gaol books were examined and found to be correctly kept. The register was particularly neat and exact. The Surgeon's book was regular and precise in its directions as to treatment. No entries were made in the punishment book since March, 1874. In future a record of all punishments must be kept. The general discipline and management of the Gaol is particularly good, and reflects great credit on the Gaoler.

The Gaol was again visited by myself on the 13th July, on which occasion there were thirteen men, two women and a child in custody. One of the women and one of the men being properly certified to be insane, their removal to the London Asylum was recommended.

Among the male prisoners were two men who were sentenced to sufficiently long terms of warrant removal to the Central Prison, but who it would appear, were not reported, owing to physical inability to perform an ordinary day's work. The Sheriff was instructed to report all prisoners sentenced to periods over four months, leaving the question of ability or inability to be decided upon the report of the physician. Two men were waiting trial on a charge of murder.

A deformed cripple was in custody "until discharged by due course of law." Vagrancy being the alleged offence, a fixed period of imprisonment should have been attached to the sentence.

The Gaol throughout was found in a very clean and well-kept state.

The Council having decided, in conformity with a recommendation made by me, to flag the lower corridors of the Gaol, and carry out some other improvements, certain instructions were communicated to the Warden with a view to the proper performance of the work.

TORONTO GAOL.

<i>Prisoners committed during the year</i>	2,862
<i>Greatest number confined at any one time</i>	212
<i>Number of re-committals</i>	751
<i>Total cost of maintaining Gaol</i>	\$22,794 00

This Gaol was inspected on the 29th March and 6th October. At my first visit there were 164 prisoners in custody, viz., 115 men and 49 women. No less than 15 of those prisoners had been committed as being of unsound mind, and dangerous to be at large; of this number 8 were men and 7 women. Upon the advice of the Gaol Physician, who was present at the time of my inspection, nine of the most urgent and curable cases of lunacy were selected for transfer to the Toronto Asylum, where vacancies had taken place, owing to the removal of a number of incurables to the Hamilton Asylum. These were immediately transferred.

The remainder of this class of persons were idiotic and imbecile, the former of whom were removed to Orillia Asylum upon the opening of that Asylum. With the exception of seven prisoners who were awaiting trial, and the fifteen insane, all the rest were under sentence for short periods, chiefly for vagrancy, drunkenness, disorderly conduct, and prostitution. Only three of the sentenced male prisoners were committed for sufficiently long periods to warrant their transfer to the Central Prison.

I regret having to report that next to utter idleness prevails in this Gaol, the only work being the keeping of the building and yards in order. Having regard to the fact that a large proportion of these prisoners are habitual offenders, either in vagrancy or petty crime, I have no hesitation in recommending that they be placed in gangs upon the streets of Toronto for the purpose of breaking stone, excavating sewers, and performing corporation work generally. The sooner that this is done it will be the better for society and the interests of the city.

The Gaol in all its departments was found in the most commendable state of cleanliness, with good order and neatness everywhere apparent. The use of the steam-boilers in the basement of the main building has been discontinued, and a boiler-house has been erected in the female airing-yard in projection from the main structure, with two new boilers and connections complete. The water is also laid on from the city water works. These improvements, which have much improved the sanitary condition of the Gaol, were reported to be working satisfactorily.

The City Council does not provide coats for sentenced prisoners—only shirts and trousers. The Sheriff was requested to make requisitions for fifty coats.

On inspecting the Gaol on the 6th October, I found 158 prisoners in confinement—102 men and 56 women, 24 of whom were waiting trial; 7 were in custody for want of sureties to keep the peace, and the rest being under sentence.

For the first time in three years I was gratified to find the Gaol entirely clear of insane prisoners.

The health of the Prison was reported by the Gaol Physician to be exceptionally good, and only four prisoners were in hospital.

I saw all the prisoners in custody, from whom I received no complaints.

The Gaol throughout was again found in excellent order.

WOODSTOCK GAOL.

<i>Prisoners committed during year</i>	424
<i>Greatest number confined at any one time</i>	44
<i>Number of re-committals</i>	100
<i>Total cost of maintaining Gaol</i>	\$3,920.18

This Gaol was first inspected on the 11th July, on which I made the following minute in the inspection book :—

The undersigned visited and inspected the Gaol to-day, when ten prisoners were found in custody, viz.: nine men, and one woman. Sarah Paine, the only woman in custody, had been committed as a lunatic, and was so certified by two examining physicians, but had not been examined or certified by the County Judge. As her case is a very urgent one, the Gaoler will hasten the examination with a view to her transfer to London Asylum. The idiot boy Williams will be removed to Orillia Asylum as soon as it is ready. Five of the male prisoners are on remand or waiting trial for very serious offences. One is under sentence for forty days as a fraudulent debtor, and four others are under sentence, two to the Central Prison.

The condition of the Gaol in respect to cleanliness and order was not good, and the yards are not in a well kept state. The dark corridors and cells of this prison, and its defective internal construction, are not only a most serious hindrance to order and neatness, but prevent the enforcement of proper disciplinary regulations, and obstruct the classification and supervision of prisoners. These defects are so serious that they call for special action on the part of the County Council. Owing to the irregular and disjointed internal arrangement of the Gaol, it will be rather difficult to remedy the defects complained of, but the following plan is suggested for the consideration of the County Council, and that Body is requested to ap

point a special Committee in order to confer with me upon the matter, under the provisions of the Inspection Act.

1st. The removal of the present heating arrangement, and the temporary board and iron division wall from both the corridors, and the conversion of each corridor into two separate and distinct wards, by flooring over the ground wards and removing the walls of the present day rooms so as to enable an increased volume of light to be thrown into the wards from large barred windows looking out into the yards.

2nd. Placing proper heating furnaces in the cellar, with registers leading into each ward and department of the Prison.

3rd. Improving the ventilation and light of the cells. These works are absolutely required, both for the improvement of the sanative condition of the Gaol and its discipline. The wood and iron work of the Gaol also requires to be cleaned and painted.

I inspected the Gaol again on the 15th September, on which occasion there were 19 prisoners in confinement—17 men and 2 women. One of the former having been certified to be insane, his transfer to London Asylum was recommended. Another male prisoner had been remanded on a charge of insanity, but neither his appearance nor manner at the time of my visit denoted an unsound mind. Eight of the male prisoners were waiting trial, some for serious offences.

The Gaol was only in a fair state of cleanliness, and in the corridor used for females great untidiness prevailed.

On the 9th November I was notified by the County Clerk of Oxford that a special committee of the County Council had been appointed to confer with me upon the repairs and alterations required to render the Gaol conformable to the provisions of the Inspection Act, but a meeting has not yet taken place.

WALKERTON GAOL.

<i>Prisoners committed during year</i>	63
<i>Greatest number confined at any one time</i>	12
<i>Number of re-committals</i>	1
<i>Total cost of maintaining Gaol</i>	\$1,902.41

This Gaol was inspected on the 22nd September, and, except where additions and alterations are in progress, was found in a clean and well-ordered state. The floors, which had just been re-oiled, are the best of any Gaol in the Province, and give the Gaol generally a neat and tidy appearance.

The bedding and gaol clothing were reported by the Gaoler to be sufficient for the requirements of the Prison at that time.

The dietaries were served in accordance with the regulations. On entering one of the wards where four prisoners were confined, I noticed bread lying about, although breakfast had been over nearly three hours. The gaoler was given to understand that prisoners must have only a specified time to each meal, after which all food and dishes must be removed from the corridors.

Two beds were made up on the floor, owing to the insufficient number of bedsteads. The number was recommended to be increased to meet the wants of the Gaol.

The Gaoler's house was just about finished, and when occupied will add very much to the comfort of that official. The Sheriff, however, was instructed to see that the new house was not occupied, and that all openings from it into the Gaol yard were kept closed and locked, until the wall which the Council agreed to build is erected, and a complete separation was thus effected between the Gaoler's private yard and that used for prison purposes. In recommending that the \$6,000 voted by the Legislature should be paid over to the Municipality, it was distinctly understood that this wall, and the others referred to in previous reports, should be proceeded with without any delay, which understanding must be carried out. With a view to this, I approved of a plan, and left it in the Gaoler's hands, which provided for the following work:—

1st. The erection of a wall of the same elevation as the recent one, from the south corner of the water closet projection (and in rear of the new house) to connect with the eastern wall.

- 2nd. The erection of a wall from the middle door (which must be closed) in rear of the Gaol to connect with the south wall.
- 3rd. The erection of a wall to run diagonally from the south water-closet projection to about ten feet from the present wood gate.
- 4th. The taking down of the present board fence.

In this way four distinct and separate yards will be provided, viz.:—for the Gaoler's private use, for the female prisoners, for the male prisoners' working and airing-yard, and for the Turnkey's private use.

The various books were examined and found to be correctly kept.

WELLAND GAOL.

<i>Prisoners committed during the year</i>	251
<i>Greatest number confined at any one time</i>	32
<i>Number of re-committals</i>	56
<i>Total cost of maintaining Gaol</i>	\$3,084 33

This Gaol was visited on two occasions during the year, first by Mr. Scoble, on the 9th February, who reported as follows:—

Visited the Gaol for the purpose of making an inspection at 6 a.m., but was unable to effect an entrance until nearly 7 o'clock, as the Gaoler was not up. On gaining admission, I found the Gaol to be in a very untidy state, the prisoners in most cases being in bed, or just getting up. As I had to leave by the early train I declined to make an inspection, or to make an entry in the minute-book.

The Gaol was visited and inspected by myself on the 24th August. There were then nineteen prisoners in custody, of whom twelve were men, four boys under sixteen, and three women. One of the boys was not regularly committed, to which the attention of the Sheriff was called.

One of the men had been committed for insanity on the 10th of July, but had not been so certified under the provisions of the Act. It was ordered that if the man was not insane he should be discharged, and if insane, the papers should be sent forward in order that he might be transferred to an Asylum.

Six of the male prisoners were awaiting trial for very serious offences—one for murder. Only three of the adult males were under sentence.

The condition of the Gaol in respect to order and cleanliness was by no means what it should be, particularly in the lower corridors, and the discipline was evidently very lax. On entering the Gaol one of the male prisoners and a woman who was washing in a yard looking into the male corridor, were shouting to each other. In future, women prisoners were prohibited from going into the yard referred to. Smoking appeared to be indiscriminately allowed, which should not be the case.

The straw in the beds required renewing, as it was all broken up and had a bad smell. Improper newspaper literature was observed in one of the corridors—a paper called "Wild Oats" being anything but proper reading-matter for prisoners in a gaol. The yards were only in fair order, and the means of escape were still plentiful, even with the prisoners under close supervision. The yards were by no means as safe as they should have been, owing to their irregularity, but, with boards lying about, escapes could easily be effected if the prisoners were not closely watched.

I called the attention of the county authorities to the water-closet, which is placed against the yard wall, and recommended that it should be removed out from the wall not less than ten feet, with pipes leading from it to the sewer. Other portions of the yards are also very unsafe, particularly on account of the projections from the wall, which afford a foot-hold and the close proximity of certain openings to angles, one of which was ordered to be closed up. The padlock on the large door of the wood-yard, being of a very paltry kind, was ordered to be replaced with a Chubb's lock.

The various books were examined. The Register appeared to be well and neatly kept. There were no entries in the Gaol Surgeon's book for over three months. At this inspection an investigation was held into the circumstances connected with the sending of a female

natic to the Toronto Asylum in a bodily condition which indicated great want of attention, not great neglect, on the part of the Gaol officials. The result of this enquiry was communicated to the Honorable, the Provincial Secretary. The Sheriff was instructed to dis-
 ense with the services of the Gaoler and the Matron, and the Gaol Surgeon was censured.

WHITBY GAOL.

<i>Prisoners committed during the year</i>	133
<i>Greatest number confined at any one time</i>	21
<i>Total cost of maintaining Gaol</i>	43
<i>Number of re-committals</i>	\$2,428.56

Statutory inspection of this Gaol was made on 28th April and 18th July.

On the occasion of my first visit I found thirty-eight prisoners in custody, no less than
 ve of whom were lunatics, one of whom, a female, not having, so far, been certified to as
 asane, although there appeared to be very little doubt of the fact, as some of her hallucina-
 ons were very marked, such as the exchanging of her children. All these lunatics, with the
 ception of the one mentioned, were recommended for transfer to the Asylum for Insane,
 onto.

I found a prisoner who had been sentenced to the payment of a fine and costs, or im-
 risonment *until paid*, still in custody, having then been four months in the Gaol. The at-
 tion of the Hon. the Attorney-General was called to the case.

All the other prisoners (male) were under sentence for short periods, except one, who
 as been sentenced for one year to the Central Prison, but being unfit for hard labour he
 as retained in the Common Gaol. This retention in the Gaol is contrary to the order of
 he Court, and in violation of the law. His transfer was ordered to take place at once.

Stone-breaking was found to be the only hard labour for the male prisoners in the Gaol.
 about ten cords had been broken during the winter.

The outside iron grating upon the windows of this Gaol were found to be not only quite
 unnecessary for the safe keeping of the prisoners, but to make the corridors very dark, and
 an examination of their position revealed the fact that they might be successfully used as a
 means of escape, in the way of a ladder. I recommended for the consideration of the
 County Council that they should be removed from the windows.

The Gaol throughout was found in very good order, the female cells and corridors being
 remarkably clean, and neatly kept. The clothing and bedding were reported by the Gaoler
 to be in sufficient supply for the requirements of the Gaol, except when unusually full.

The various yards were found in a well-kept condition.

The different books were examined, and were found to be correctly kept, with the ex-
 ception of the Register, the defects in which were pointed out to the Gaoler.

No complaints were received from any of the prisoners.

A comparison of the commitments of the present year with those of the last is exhibited in the following table.

TABLE No. 1.

HOSPITALS

AND

CHARITABLE INSTITUTIONS

AIDED BY PROVINCIAL FUNDS.

HOSPITALS.

At the close of the last official year, there remained under treatment in the various Hospitals of the Province, 415 patients, and during the year ending 30th September, 1876, 3,247 patients were admitted, and 231 children were born in them, making a total of 3,893 patients who received treatment in these Institutions, in the twelve months.

During the same period 2,240 patients were discharged, and 251 died, leaving 402 under treatment at the close of the year.

In addition to the 3,893 persons who received treatment as resident patients, 7,592 are returned as having received medicine and treatment, but who were not inmates of the Hospitals. From these figures it would appear that no less than 11,485 persons were benefited by the Hospital operations of the Province during the year.

The following Table shows the distribution and movements of patients in the respective Hospitals, under the following headings :--

- 1st. The admissions, discharges, and deaths, and the number of patients remaining under treatment at the beginning and close of the year.
- 2nd. The religions and nationalities of the patients.
- 3rd. The places from which patients were admitted to the respective Hospitals.

TABLE No 1.

NAME OF HOSPITAL.	Admissions.				No. of patients remaining in the Hospital during the year.	No. of deaths in the Hospitals during the year.	No. of patients remaining in the Hospitals on the evening of the 30th September, 1876.	No. of persons who have received treatment or relief during the year, who were not inmates of the Hospitals.	Classification of patients or inmates treated or lodged during the year.		Nationalities of patients or inmates treated or lodged during the year.							RESIDENCE OF PATIENTS.

It will be observed that two Hospitals have been added to the list, viz., the General Hospital, Guelph, and the St. Joseph's Hospital at the same place, making twelve Institutions of this description that are now receiving Provincial aid. Both of the Hospitals referred to received aid last year from the supplementary appropriation, but as returns had not been received of their operations the year previous, the amount given was not based upon the number of patients treated, but took the form of a bulk sum of \$800 to each.

The following summaries give the nationalities and religions of the 3,893 patients who were under treatment during the year :—

Nationalities.

Canadians.....	1414
English.....	726
Irish.....	1116
Scotch.....	245
United States.....	153
Other Countries.....	239
	3,893

Religions.

Protestant denominations.....	2194
Roman Catholics.....	1486
Other denominations or not known.....	213
	3,893

The following summary shows the number of patients who were admitted into the respective Hospitals from the towns in which they are located, and the number received from other places :—

Admitted from the cities and towns in which the Hospitals are located, viz., Toronto, Hamilton, Kingston, London, Ottawa, St. Catharines and Guelph.....	2134
From the counties of which these towns and cities are the Capitals, viz., York, Wentworth, Frontenac, Middlesex, Carleton, Lincoln, and Wellington.....	655
From other counties of the Province.....	739
From the United States.....	63
Emigrants &c.	302
	3,893

The next Table (No. 2) gives the following information :—

1st. The total number of patients, male and female, that were under treatment in each Hospital; the average stay of each patient therein; and the collective stay of the whole number.

2nd. The first instalment of money that each Hospital is entitled to receive from Government under the provisions of section 3, sub-section A, of the "Charity Aid Act" of 1874, being 20 cents per day for every patient actual and in the Hospital.

3rd. The amounts received by Hospitals from all sources, other than the Government grant, and the proportion that one-fourth of that amount bears to the further allowance from Government of ten cents per day for each patient, under the provisions of section 4, sub-section A, of the Act referred to.

TABLE No. 2.

NAME OF HOSPITAL.	Total number of patients under treatment in the Hospitals during the year, including all patients in residence at the close of the previous year.		STAY OF PATIENTS.				Legislative grant, at the rate of 20 cents per day for each day's actual treatment and stay of each adult patient admitted, would amount to—	Amount of money received from all sources, other than the Province, towards the ordinary yearly maintenance of the Institution.	One-fourth of the last-named amounts would be equal to—	Further Legislative supplementary grant at rate of 10 cents per day's stay, not to exceed one-fourth of money received from other sources to maintenance.	
	Males.	Females.	Total.	Average days stay of patients in the Institution.	Collective days stay of adult patients in the Hospitals, exclusive of days of discharge.	Collective stay of infants under one year of age in the Institution, allowing half time.					Total collective stay of adults and infants for the year.

* The receipts of the Toronto Hospital include \$41,574 41, being income from property, and \$4,417 15, sales of land, less interest on debentures \$4,568 89, and debentures redeemed \$4,000 00.

It would appear from an examination of the preceding Table, that the 3,893 patients who were under Hospital treatment during the year, remained for an aggregate period equal to 159,120 days; the average period of residence in each Hospital, ranging from 15 $\frac{1}{4}$ days to 116 days per patient.

Under the third clause of the "Charity Aid Act" of 1874, providing for the payment of 20 cents per day for the treatment of every patient admitted to the various Hospitals, the sum of \$31,824.00 will be required as the first instalment of Provincial aid to these Institutions.

It would further appear, from the preceding Table that only four Hospitals received the requisite amount of municipal and private aid, to entitle them to receive the full amount of supplementary aid provided for by the Act, viz., ten cents additional per day. These were the General Hospitals at Toronto, Ottawa, and Guelph, and the Eye and Ear Infirmary, Toronto. All the other Hospitals are only entitled to receive as supplementary aid, a sum equal to one-fourth of the amount they obtained from municipal and private sources during the preceding year.

There would therefore be required under the provision of the fourth section of the Act a further sum of \$12,233.39 as supplementary aid to Hospitals.

In my report of last year, I used the following language in respect to the occupation of Hospital beds by persons suffering from chronic and incurable ailments:—"There are still, however, a number of improper cases retained in the wards of some Hospitals, and who have been there for years. As the object of granting Government aid to Hospitals, is to restore, as soon as possible, to the working community, those who have been withdrawn from it by sickness and disease, it will be apparent that that object is being defeated by the retention in the wards, of persons who are afflicted with incurable diseases, or who are mostly suffering from the infirmities of old age. I would therefore recommend that from the commencement of the present official year, the Government Hospital allowance shall be most strictly confined to curable patients (periods of residence to be as much as possible the test of curability); and if inmates, except in special cases, occupy beds for a longer period than is required for actual treatment, the Government allowance for such cases shall be the same as for inmates of Houses of Refuge."

Acting upon this recommendation, I have made reductions equivalent to the difference in the amount of statutory aid to Hospital patients and House of Refuge inmates, viz.: from thirty cents to seven cents per day for the time that such patients remained in the various Hospitals during the year.

The following Table, No. 3, shows the amount of such reductions, and the actual amount that each Hospital is entitled to receive as Government Aid for the year 1877.

TABLE No. 3.

NAME OF HOSPITAL.	Amount payable to each Hospital under the 20 cents per day Government allowance.		Amount payable to Hospitals under the supplementary allowance of 10 cents per day.		Amount payable to Hospitals in lieu of the 10 cents per day allowance, being one-fourth of money received from all other sources for ordinary maintenance than the Province.		TOTAL STATUTORY ALLOWANCE.		Reduce from 30 cents Hospital Allowance to 7 cents House of Refuge allowance per day for incurable patients included in returns.		Total amount that each Hospital is entitled to receive for the year 1877.		Total amount that each Hospital received from Government in 1876.

HOUSES OF REFUGE.

During the past year four additional institutions were placed in the Schedule entitling them to receive aid as Houses of Refuge, under the provisions of "The Charity Aid Act" of 1874.

These Houses are, the House of Providence, Kingston; the House of Providence, Guelph; the Home for Incurables, Toronto, and the Home for the Aged and Friendless, London.

As the requisite statistical information was not furnished last year to enable the grant in aid of these Houses to be based upon the aggregate residence of the inmates, a bulk sum was voted to each in the Supplementary Estimates. This year the amount of aid is determined under the provisions of the Act.

The following Table (No. 5) shows the number of inmates that remained in the respective Houses at the close of last year, the number admitted this year, and the total number of persons who were under lodgment during the year, together with the discharges, deaths, and the number that remained in each House at the close of the official year. The Table also gives the religions and nationalities of the inmates, and from what places they were admitted to the respective Houses:—

TABLE No. 5.

NAME OF HOUSE OF REFUGE.	ADMISSIONS.			Number discharged from the Institution during the year.	Number of deaths in the Institution during the year.	Number of inmates remaining in the Institution on the evening of the 30th September, 1876.	Number of persons who received relief during the year who were not inmates.	RELIGIONS OF INMATES LODGED DURING THE YEAR.			NATIONALITIES OF INMATES LODGED DURING THE YEAR.						RESIDENCE OF INMATES.					
	Number of inmates remaining in the Institution on the 1st October, 1876.	Number of inmates admitted during the year ending 30th September, 1876.	Total number of inmates who received relief from the Institution during the year, including those in residence at close of the previous year.					Protestants of any denomination.	Roman Catholics.	Other Religions (or not known).	England.	Ireland.	Scotland.	Canada.	United States.	Other Countries.	Received from the city or town in which the Institution is located.	Received from other counties in the Province of Ontario.	Received from the county in which Institution is located.	Received from the United States.	Received from other counties, including emigrants, foreigners and aliens.

The preceding Table shows that 1,114 persons were lodged and fed in these Houses of Refuge during the past year, of which number 650 were discharged, 66 died, and 398 remained in residence at the close of the official year.

The places from which these 1,114 inmates were admitted to the respective Houses were as follows :—

From the cities and towns where the Houses are located, viz.: Toronto, Kingston, Hamilton, London and Guelph	762
From the counties of which these cities and towns are the capitals.. ..	215
From other counties of the Province.....	74
Emigrants, foreigners, &c.....	63
	<hr/>
	1,114

The nationalities and religions of these persons are returned as follows :—

Canadian	297
English	159
Irish	580
Scotch	45
Other countries	33
	<hr/>
	1,114

Religions.

Protestants of all denominations	397
Roman Catholics	682
Other religious.....	35
	<hr/>
	1,114

The following Table (No. 6) shows—

1st. The number of inmates lodged, the average stay of each inmate, and the collective stay of the whole in the respective Houses.

2nd. The amount each House is entitled to receive under the clause in the Charity Aid Act providing for the payment of five cents per day for the lodgment of each inmate.

3rd. The amount received by the respective Houses from all sources other than the Government, and the further sum they would be entitled to receive in proportion to these receipts, as supplementary aid.

4th. The total amount that each House is entitled to receive for 1877, and a comparison of the amount with the aid granted in 1876.

TABLE No. 6.

NAME OF HOUSE OF REFUGE.	Total number of inmates who were lodged during the year (including those in residence at close of the previous year).			STAY OF INMATES.		Legislative airt, at the rate of 5 cents per day for each inmate admitted.	Amounts received from all sources other than the Province towards the ordinary yearly maintenance of the Institution.	One-fourth of the amount received from other than Government sources for maintenance.	Legislative supplementary airt at the rate of 2 cents per day's stay (not to exceed one-fourth of money received from other sources to maintenance).	Total amount of Legislative Grant to be given for the year 1877.	Grant for 1876.

ORPHAN ASYLUMS, &c.

The institutions of this class in receipt of Government Aid, now number twenty one. Six of these are regularly placed in the Schedule for the first time, although in the absence of the proper statistical information to base the statutory allowance upon, a bulk sum was appropriated to each last year. These new charitable Institutions are, the House of Providence Orphan Asylum, Kingston; the Protestant Orphan Home, London; the Industrial School, Hamilton; the St. Agatha Orphan Asylum, County of Waterloo; the Infants Home, Toronto, and the Home for the Friendless, Hamilton.

The operations of these Houses in respect to admissions and discharges are shown in the following Table:—

TABLE No. 7.

An examination of the preceding Table shows that 1,314 persons remained in the Institutions named at the close of last year, and that 1,250 were admitted to them during the twelve months, of whom 1,141 were discharged, 103 died, and 1,320 remained in residence at the close of this year.

It would thus appear that no less than 2,564 persons derived benefit from the operations of these twenty-one charitable Institutions during the year.

Of these, 2,295 were orphans or neglected and abandoned children, and 269 were fallen women.

The religions and nationalities of these 2,564 inmates were as follows:—

Religion.

Protestants of all denominations	1,147
Roman Catholics.....	1,216
Other religions, or not known	201
	<hr/>
	2,564

Nationalities.

English.....	257
Irish	292
Scotch	57
Canadians.....	1,636
United States.....	73
Other Countries	249
	<hr/>
	2,564

The places from which the inmates were received into the respective Institutions, were as follows:—

Received from the cities or towns in which the Institutions are located.....	1752
From the counties of which the cities and towns form part.....	167
Other counties of the Province	405
Emigrants, foreigners.....	240
	<hr/>
	2,564

The next Table No. 8, gives the following information:—

1st. The number of persons that were in the respective Institutions, and the collective stay of such inmates therein, for the year.

2nd. The sum that each Institution would be entitled to receive under the provisions of the Charity Aid Act, allowing one and a-half cents for every day's lodgment of an inmate.

3rd. The amount received from all sources, other than the Province, for the support of the respective Institutions, and the proportion that that sum bears to the further half cent. per day, statutory allowance, as supplementary aid.

4th. The total amount of Government Aid that each Institution would be entitled to receive for 1877, under the provisions of "The Charity Aid Act" of 1874, and a comparison of that sum with the appropriation of the previous year.

TABLE No. 8.

NAME OF INSTITUTION.	Total number of inmates who were lodged during the year, including those in residence at the close of the previous year.			Collective stay of inmates in the Institution, exclusive of day of discharge.	Legislative Grant, at the rate of 1½ cents per day for each day's actual lodgment of each inmate admitted, would amount to	Amount of all moneys received from all sources other than the Province to-maintenance of the Institution.	One-fourth of the amount received from other than Government sources for maintenance, would be equal to	Legislative Supplementary Grant, at the rate of ½ cent per day's stay, not to exceed one-fourth of maintenance. SEPARATE INSPECTION REPORTS

UPON

HOSPITALS AND CHARITABLE INSTITUTIONS.

GENERAL HOSPITAL, TORONTO

During the past year, 828 patients were admitted to this Hospital, who, together with the 146 that remained in the Institution at the close of the previous year, made a total of 974 patients who were under treatment during the twelve months, as compared with 1,087 the preceding year.

These 974 patients were received into the Hospital from the following places :—

From the City of Toronto.....	715
“ “ County of York.....	72
“ other counties in the Province.....	179
“ the United States.....	2
Emigrants.....	6
	974

The sex, nationalities and religious denominations of these patients were as follows :—
Males 656, females 318. Protestants 730, Roman Catholics 238, other denominations 8.
English 272, Irish 284, Scotch 87, Canadians 256, United States 45, and other countries 30.

The average stay of each patient in the Hospital was $53\frac{3}{4}$ days, and the aggregate stay of the whole number, excluding the days of discharge, was 52,414 days. The revenue that the Hospital received from all sources, other than the Provincial Grant, was considerably in excess of the amount entitling it to receive the full statutory allowance of Government Aid, which would be as follows :—

52,414 days treatment of patients at 20c. per day.....	\$10,482 80
Supplementary Aid at 10c. per day	5,241 40
	\$15,724 20
Less difference between 30c. and 7c. per day for 5, 124 days	
Hospital residence of incurables.....	1,178 52
	\$14,545 68

The total amount of Government Aid that this Hospital would be entitled to receive for 1877, is therefore \$14,545 68.

The revenue of the Hospital for the year, and the sources from which it was received were as follows :—

From the Province of Ontario.....	§15,478 36
“ Municipalities for the maintenance of patients	16,827 50
“ Paying patients themselves	2,827 81
“ Income from property belonging to the Hospital.....	11,574 41
“ Sale of lands.....	4,417 15
“ Subscriptions, donations and bequests of private individuals.....	1,218 01
“ Other sources.....	943 80
	§53,287 04

The expenditures for the same period were as follows :—

Beer, wine and spirits.....	924 18
Medicines and medical comforts	1,793 51
Milk.....	2,693 41
Butcher's meat, bread, groceries, provisions.....	10,609 63
Salaries and wages	6,573 25
Fuel, light, water, taxes, insurance, &c.....	4,705 42
Furniture, furnishings and clothing.....	3,073 30
Ordinary and extraordinary repairs.	11,902 16
Redemption of debentures.....	4,000 00
Interest on outstanding debentures	4,568 89
Other expenditures.....	1,105 83
	§51,949 58

It will be observed that there are included in the foregoing statements, both receipts and expenditures of an abnormal character, and which should not properly form part of the maintenance accounts. The actual receipts for maintaining the Hospital, exclusive of the Provincial Grant, amounted to §29,239 79, as shown in Table No. 2, and including the amount received from that source, §44,718 15. Eliminating the abnormal expenditures for extraordinary repairs amounting to §10,692 75, and §8,568 89 for payment of interest and redemption of debentures, the cost of maintaining the Hospital for the year amounted to §32,687.04.

Statutory inspection was made of this Hospital on the 18th August, when every part of the house was examined, and every patient in it was seen and conversed with. The number of patients in the Hospital on that day was 125, of whom 84 were males and 41 females. An examination of the register showed that these patients had been received from the following places viz. :—

From the City of Toronto.....	92
From the County of York.....	5
From other counties of the Province.....	3
Immigrants, foreigners, &c.....	25
	125

These patients were being supported in the Hospital as follows :—

By the City of Toronto.....	71
By other municipalities	17
By patients themselves.....	12
Occupying free beds.....	23
By Messrs. Ross and Elliott, Trustees.....	2
	125

From the above summary it would appear that the number of free beds has been very reduced, and the payments from municipalities for the support of patients correspond-

ingly increased during the past year. This state of things, viewed from a financial standpoint, must be accepted as satisfactory, particularly at a time when the Trustees are endeavouring to restore the financial affairs of the Hospital to a healthy and, if possible, self-sustaining basis. The Trustees, however, should not lose sight of the fact that the Government grant to this and other Hospitals in the Province is made chiefly for the purpose of providing Hospital accommodation and treatment to poor persons, who have neither the homes to be treated in while sick nor the means for paying for such treatment. For this class a considerable number of free beds should always be available, subject to the award of the Hospital Trustees, and without waiting for the order of the Mayor of Toronto or the guarantee of a municipality. Further, it is a question for the consideration of the Government whether the Provincial grant to Hospitals should not be made contingent upon a certain proportion of the beds, certainly not less than one-third, being made free to the sick poor who are unable to pay, many of whom may be most unwilling to solicit an order or a guarantee from a municipal official. Either this course should be adopted or the charges for the support of patients should be reduced to the lowest possible rate consistent with the effective maintenance of the Hospital.

I am glad to be able to report a considerable diminution in the large number of chronic and incurable patients who heretofore have found a *home* in this Hospital. There are still, however, a few inmates in residence to whom the Government grant cannot be extended, and whose cases and names were brought under the notice of the Medical Superintendent. In addition, there were about ten inmates who although, beyond doubt, incurable subjects, were receiving treatment with a view to the relief of their maladies but who could be treated and attended to quite as well in a House of Refuge. Of the 125 patients who were in residence at the time of my visit, 4 had been admitted prior to the 1st January, 1875; 11 between the 1st January and 1st October, 1875, and 13 between the last named day and the 1st January, 1876, the remaining 97 having been admitted since the 1st January up to the day of my inspection.

I saw and conversed with every patient (except two who were absent on leave), from whom I received no complaints whatever, either in respect to their lodgment and domestic comforts or their medical treatment; on the contrary, all expressed satisfaction with both.

The condition of the Hospital in the various wards and departments was most satisfactory, cleanliness and good order being everywhere apparent. The walls and ceilings had just been well white-washed, and the atmosphere was pure and wholesome throughout. The new water-closets and bath-rooms had been completed, and were reported to be working satisfactorily, and there was an abundant supply of water both for sanative and domestic purposes.

The Medical Superintendent reported that the steam-heating appliances that had lately been placed in the building, gave satisfaction last winter. These structural improvements, which were designed to overcome defects and supply deficiencies which previously existed, seem, so far as they can be judged at present, to render the sanitary arrangements of the Hospital most complete, and, at the same time have added greatly to the comfort of the patients. In addition, the cheerfulness of the Hospital has been vastly increased. There are now sixteen associated dormitories and ten single rooms in which 178 beds were made up on the day of my visit. This number of rooms affords excellent facilities for classifying the patients, which had been much neglected heretofore, but which is now one of the best features in the new management. The sexes are completely separated, and an accident and fever ward are allotted to each, besides which, every patient has access to one of the verandahs of the Hospital.

Not only has the accommodation for the patients been increased and bettered in all respects, but marked improvements have been made in the Medical Superintendent's quarters, the attendants' and servants' rooms, surgery, theatre, etc., as well as in all the domestic departments, and the grounds and the general surroundings of the Hospital.

I was present when dinner was served to the patients. The food, which consisted of roast beef, mutton, Irish stew, and three kinds of vegetables, was excellent, and both the quality and the variety of the food, as well as the mode of serving the meal, was in marked contrast with that of previous years. I was informed that the revision of the dietary lists received constant attention, as also did the wine and spirit list, and a very great reduction has been made in the cost of wine, beer and spirits, as compared with the two last years, although the number of patients has largely increased.

Notwithstanding what has been done to improve the structural condition of the Hospital there still remains some work to do, notably the erection of a new laundry building, and the provision of proper laundry appliances, as well as the relaying of some of the ward floors. It is to be hoped that these defects will be attended to as soon as the Hospital funds will permit.

In closing this report I may be permitted to express my deep regret at the death of Mr. C. S. Ross, chairman of the Hospital Trust. From the date of his appointment, up to within a short period of his death, he discharged the important duties of the Trust in the most assiduous and conscientious manner. To him, together with his colleagues and the able and experienced resident Physician, belongs the credit of bringing the Hospital up to its present high state of efficiency.

Mr. W. H. Howland was, upon the death of Mr. Ross, appointed Government Trustee.

HAMILTON CITY HOSPITAL.

The operations of this Hospital for the year ending 30th September, were as follows: Number of patients remaining at close of last year, 49; admitted during the year, 388 born in the Hospital, 31; making a total of 468 patients who were under treatment during the twelve months. Of this number 389 were discharged cured or improved, 32 died and 47 patients remained under treatment at the close of the year.

The 468 patients above referred to were received into the Hospital from the following places:—

From the City of Hamilton.....	391
From the County of Wentworth.....	38
From other Counties of the Province.....	20
From the United States.....	5
Emigrants, &c.....	13

163

The sex, nationalities, and religious denominations of these patients were as follows: Males, 294; Females, 174. Protestants, 318; Roman Catholics, 145; other denominations, 5. English, 108; Irish, 147; Scotch, 40; Canadians, 135; United States, 20 and other countries, 18.

The average stay of each patient in the Hospital was 45 days, and the collective stay of the 468 patients amounted to 21,129 days.

The amount that this Hospital received towards its ordinary maintenance from all sources, other than the Province, was not sufficient to entitle it to the full amount of supplementary aid.

The Government aid for 1877 would therefore be as follows:—

Allowance for 21,129 days treatment of patients at 20c. per day....	\$4225 80
One-fourth of \$3,395.64 being the amount received for ordinary maintenance from all other sources than the Government grant....	848 91

\$5,074 71

Less difference between 30c. and 7c. per day on 1830 days Hospital residence of incurables.....	420 90
---	--------

\$4,653 81

The above summary shows that the Hamilton Hospital is entitled to receive \$4,653.81 as the Government grant for 1877.

The Hospital revenue and the sources from which it came for the year were as follows:—

From the Province of Ontario.....	\$5796 46
From the City of Hamilton.....	2817 92
From other Municipalities in payment of patients' maintenance.....	347 50
From paying patients themselves.....	230 22

\$9,192 10

The Hospital expenditures for the year were as follows :

Beer, wine and spirits	259 80
Medicine and medical comforts.....	465 58
Milk.....	505 04
Butchers' meat, bread, groceries, and provisions.....	3036 90
Salaries and wages.....	1604 00
Fuel, light, water, taxes, insurance, &c.....	1683 01
Furniture, furnishing, and clothing	892 02
Ordinary and extraordinary repairs.....	332 26
Other expenditures.....	413 49
	\$9,192 10

Statutory inspection was made of this Hospital on the 13th September, when the building in all its departments was minutely examined, and the movements of patients enquired into.

There were in residence 47 patients—38 males and 9 females, who had received into the House from the following places:—

From the City of Hamilton	36
From the County of Wentworth	3
From other Counties	8
	47

From the above summary, it would appear that the benefits of this Hospital, at the date of my visit, were chiefly confined to persons belonging to the City of Hamilton, and the annual returns would seem to confirm this in respect to its general operations. The Toronto Hospital is more provincial in its operations, as perhaps it should be.

Six of the males, and one of the females were entered as paying patients; all the rest were being lodged and treated free of charge. Nine patients were residents of the Hospital prior to 1st January, 1876, of whom five, certainly, were not proper subjects for a curative institution, and in respect of whom the Government allowance to inmates of Houses of Refuge can only be made. From an examination of the other patients, they all seemed to be proper cases for an Hospital.

The name of a woman appeared on the Register as a *patient*, whereas she was only taking care of her sick child as a nurse. The Government allowance cannot be given in such a case.

An examination of the Register and a comparison of it with the names of the patients actually in residence, showed that in eight cases discharges had not been recorded. The Register should, at the close of each official year, be closed and balanced off to correspond exactly with the return made to Government. This had not been done, and indeed the day's pay of each patient had not been entered at all in the column for that purpose. The authorities of the Hospital were requested to strictly comply with all these forms in the future.

A book must also be opened in the office in which shall be recorded the date and hour of the day on which visits are paid to the Hospital by the attending physicians, with the signature of each physician attached. The same form to be followed by the members of the Managing Committee.

The number of beds made up in the twelve associated wards, and the two rooms for private patients, was 69, which left twenty-two vacancies in the Hospital. The beds were very comfortable and clean, and neatly kept generally, and the wards were in the same state. In two wards where the windows (which are the only means of ventilation), were all closed, the air was somewhat foul, but with these exceptions, the building was very free from bad odours.

I was present when the dinner was about to be served, and tasted the food; it consisted of roast beef, potatoes, carrots and bread, with a dessert for the weaker patients. The food was all of excellent quality, and well cooked.

I spoke to every patient in the Hospital, from only one of whom a complaint was received. The cause of complaint was found to be groundless.

The grounds around the Institution, and the yards, were in good order.

GENERAL HOSPITAL, KINGSTON.

The following summary exhibits the operations of the Hospital, in respect to movement of patients, for the year ending 30th September, 1876 :

Number of patients remaining on 1st October, 1875.....	54
Admitted during the year	399
Births in the Hospital	39
 Total number under treatment	 492
Discharges	422
Deaths	19
Remaining 30th Sept., 1876.....	51
	— 492

These patients were received into the Hospital from the following places :

From the City of Kingston	160
From the County of Frontenac	55
From other counties in the Province	169
From the United States	19
Immigrants, &c.	50
Not returned.....	49

492

These 492 patients comprised 274 men and 218 women, whose nationalities are reported to be as follows:—English, 72 ; Irish, 146 ; Scotch, 13 ; Canadians, 188 ; United States, 26 ; and other countries or unknown, 46.

The religions of the patients were:—Protestants, 326 ; Roman Catholics, 127 ; Unknown, 39.

The average stay of each patient in the Hospital, was $37\frac{1}{2}$ days, and the collective stay of the whole number, was 18,445 days.

As one-fourth of the entire amount that the Hospital received towards its ordinary maintenance, excluding the Government Grant, was not equal to the amount that would be derived from the ten cents per day supplementary grant, the former amount must be taken which would make the Government Grant to the Hospital for the year 1877, as follows:—

Allowance for 18,445 days treatment of patients at 20cts per day.....	\$3,689 00
One-fourth of \$2,919 73, being the amount received for maintenance exclusive of Government aid	729 93
	\$4,418 93
Less difference between 30cts. and 7c. on 1830 days maintenance of incurables	420 90
	\$3,998 03

The entire revenue of the Hospital for the year, and the sources from which it was derived, were as follows:—

From the Ontario Government	\$4,800 00
“ the Dominion “	500 00
“ Municipalities as grants	400 00
“ paying patients themselves.....	984 00
Subscriptions and donations of private individuals.....	395 59
Other sources.....	640 64

\$7,720 23

The expenditures for the same period, were as follows :

Beer, wine and spirits	71 58
Medicines and medical comforts	270 15
Butcher's meat, bread, groceries, and provisions.....	2,885 02
Milk	341 93
Salaries and wages	1,233 49
Fuel, light, water, taxes and insurance	1,131 22
Furniture, furnishings and clothing.....	315 81
Repairs	120 57
Other expenses.....	204 88
	\$6,574 65

Statutory Inspection was made of this Hospital on 6th May, on which occasion I found its various wards a greater number of patients than at any previous visit. These comprised 47 men and 26 women, or a total of 60 patients. Of this number, 8 were entered upon the register as paying patients, at weekly rates of from \$1.50 up to \$7.

An examination of the register, and a personal inspection of the inmates, showed that there were then 11 patients in the wards of the Hospital, who were not, in my opinion, proper subjects for such an Institution. In a few instances, these patients had been in residence from three to four years; some of them afflicted with physical diseases of a chronic and incurable nature, but in five cases, the infirmities of old age and general debility arising therefrom, were the only ailments. I brought to the notice of the Trustees, the necessity of making other provision for such inmates, and notified them that the Government grant to Hospital patients could no longer be given to them. I had also to call their attention to the practice which existed of admitting cases of pregnancy (of which class there were then six patients in the Hospital), at a much earlier period than there was any necessity for, and thus requiring a much larger Government appropriation for that purpose than the occasion demanded. All the other patients were recent admissions, and an unusual number of them were suffering from ulcerated legs and such like diseases. At the time of my visit there was one case of scarlet fever in an isolated ward.

It having come to my knowledge that some of the attending physicians were in the habit of admitting patients to the private wards of the Hospital, and of collecting from them ordinary professional fees charged for medical attendance in a private house. I brought the matter under the notice of the Honorary Secretary, and requested an explanation. It is clear that the Government grant to Hospitals was never intended to include such a class of patients.

The various books were examined, and found to be very neatly and, apparently, very correctly kept.

The Hospital throughout was found in excellent order, with the most scrupulous cleanliness prevailing everywhere.

HOTEL DIEU HOSPITAL, KINGSTON.

During the past year 283 patients were admitted to this Hospital, which with the 17 that remained in the house at the close of last official year, made a total of 300 patients, who were under treatment during the twelve months.

These 300 patients were received into the Hospital from the following places:—

From the City of Kingston.....	130
From the County of Frontenac.....	50
From other Counties in the Province.....	95
From the United States.....	10
Emigrants, &c.....	15

300

The sex, nationalities and religions of these 300 patients, were as follows :—Males, 144 females, 152. English, 12 ; Irish, 69 ; Scotch, 6 ; Canadians, 203. Roman Catholics, 26 Protestants, 12 ; other religions, or unknown, 20.

The average Hospital residence of each patient was $25\frac{1}{2}$ days, and the entire period of the 300 patients remained under Hospital treatment was 7,655 days.

A sufficient amount of revenue was not received to entitle the Hospital to the full extent of supplementary aid. The Government grant in aid of the Institution for the year 1876 will be as follows :—

Allowance for 7,655 days of Hospital treatment, at 20cts.....	\$1,531 00
One-fourth of \$1,243.08 which was the amount received by the Hospital exclusive of the Government grant for 1876.....	310 77
	<hr/>
	\$1,841 77
Less 1,095 days residence of incurable patients charged at 30c., allow 7c.	251 85
	<hr/>
	\$1,589 92

The revenue of the Hospital and the sources from which it was obtained were as follows :

From the Province of Ontario.....	\$2,019 37
“ Paying patients themselves.....	429 41
“ Municipalities.....	100 00
“ Income from property.....	28 49
Subscriptions and bequests of private individuals.....	674 93
Other sources.....	10 25
	<hr/>
	\$3,262 45

The expenditures for the year were as follows :—

Beer, wine and spirits.....	\$ 39 50
Medicines and medical comforts.....	139 06
Butchers' meat, bread, groceries and provisions.....	1,882 24
Milk.....	34 58
Salaries and wages.....	84 45
Fuel, light, water, taxes and insurance.....	643 64
Furniture, furnishings and clothing.....	380 83
Repairs.....	46 06
Other expenses.....	60 76
	<hr/>
	\$3,311 12

Statutory inspection was made of this Institution on the 28th September, on which date there were ten men and ten women under treatment. They were, with two exceptions, recent admissions, and, to all appearances, proper cases for such an Institution.

The patients made no complaint of their treatment, and appeared to be well cared for. The house, in its various departments, was in excellent order. The wards were very cheerful and the beds, as usual, were clean and tidy in their appearance.

The register was examined and found to be properly and neatly kept, giving all the information the Government requires. The twenty patients in residence had, according to the register, been received from the following places, viz :—city of Kingston, 10 ; county of Frontenac, 2 ; other counties of the Province, 6 ; Province of Quebec, 1 ; vagrant, 1 ; total, 20.

GENERAL PROTESTANT HOSPITAL, OTTAWA.

During the past year 171 patients were admitted to this Hospital, which, with the 30 remaining in the Institution at the close of last year, make a total of 201 patients who received treatment during the past twelve months, as compared with 247 in the preceding year.

The average stay of these 201 patients was 52 days per patient, making the collective stay of the whole equal to 10,463 days.

These 201 patients were received into the Hospital from the following places:—

From the City of Ottawa.....	129
“ County of Carleton	38
“ other Counties in the Province	15
“ the United States	1
“ other countries, including Emigrants, &c.....	18
	<hr/>
	201

The classification of these inmates as to sex, religious denominations and nationalities, was as follows:—

Males, 119; females, 82. Protestants of all denominations, 191; Roman Catholics, 8; other religions (or not known), 2. English, 55; Irish, 51; Scotch, 12; Canadians, 67; United States, 8; other countries, 8.

The entire receipts of the Hospital for the past year, and the sources from which they were derived, were as follows:—

From the Province of Ontario	\$2,858 30
“ Municipalities	5,185 00
“ Paying patients	579 05
“ Subscriptions, Donations, and bequests } of private individuals	2,706 57
Other sources not above enumerated	519 53
	<hr/>
	\$11,848 45

The expenditures for the year were as follows:—

Beer, wine and spirits	\$150 09
Medicines and medical comforts.....	471 76
Butchers' meat, bread, groceries and provisions.....	1,896 28
Milk	241 70
Salaries and wages.....	1,499 58
Fuel, light, water, taxes and insurance	852 83
Furniture, furnishings and clothing	1,041 54
Repairs, (ordinary and extraordinary)	3,192 45
Other expenses.....	836 81
	<hr/>
	\$10,183 04

The revenue which this Hospital received from all sources other than the Government grant, is in excess of the amount entitling it to receive the full statutory allowance of Provincial aid, which would be as follows:—

10,463 days treatment of patients @ 20c. per day.....	\$2,092 60
Supplementary aid @ 10c. per day.....	1,046 30
	<hr/>
	\$3,138 90
Less difference between 30c and 7c. per day. for 2,562 days } hospital residence of incurables	589 26
	<hr/>
	\$2,549 64

The amount of Government aid this Hospital would be entitled to receive for 1877, is therefore \$2,549 64.

Statutory inspection was made of this Hospital on 10th May, when it was found in the highest state of cleanliness, with the greatest neatness and order prevailing in every part of the building. For these commendable conditions, as well as for effective sanative appliances, and the cheerfulness of the wards, this Hospital stands first in the Province, as it also does in the regularity and system which now obtain in the management of its affairs.

The attention paid to brightening up the wards by inexpensive decorations is one of the most commendable features in the interior economy of the Hospital.

I found at this visit 34 patients, of whom 17 were men and 17 women. Among this number were 7 old hospital residents, afflicted with chronic and incurable diseases, which may be relieved but not cured by hospital treatment. As stated in my last report upon this Hospital, Provincial aid to the amount of 30c. per day was never intended to extend to this class: if given at all, such persons should only be included in Schedule B of the Charity Aid Act.

Of these seven cases referred to, two had been 7 years in the Hospital, one 6 years, one 5, two 4, and one a year. The remaining 27 patients were all recent admissions, and appeared to be proper subjects for an hospital. I conversed with all these patients, who expressed satisfaction with their treatment. Three only of the number were entered on the roll as paying patients, two of whom occupied private rooms.

A resolution passed by the Medical Board of this Hospital, asking the consent of the Board of Directors to permit the members of the medical staff to make the usual charge for professional services, as in ordinary practice outside the Hospital, for private patients who entered the Hospital under the care of any member of the medical staff, having been submitted to me for my opinion, I gave the following reply:—

- 1st. That such a practice, so far as I was aware, did not exist in any of the Hospitals of the Province in receipt of Government aid.
- 2nd. That the introduction of such a practice into our Hospitals would be a very marked departure from the policy of the Government in respect to such institutions, viz: that medical treatment shall be provided free to all inmates, and that a charge for *lodgment and board* shall only be made to such persons as are able to pay for the same.
- 3rd. That the adoption of such a practice would be in direct violation of the principles of maintaining Hospitals in this Province, viz: by the contributions of the Government, municipalities, and private individuals, through which all who have not homes to be treated in, or who may not have the means to pay for medical treatment, may avail themselves of hospital accommodation.

ROMAN CATHOLIC HOSPITAL, OTTAWA.

The operations of this Hospital for the year ending 30th September, were as follows:—

Number of patients remaining at close of last year, 30; admitted during the year, 322; born in the Hospital, 1; making a total of 353 patients who were under treatment during the twelve months. Of this number, 292 were discharged; 27 died, and 34 patients remained under treatment at the close of the year.

The 353 patients referred to, were received into the Hospital from the following places:—

From the City of Ottawa	84
From the County of Carleton	172
From other Counties of the Province	65
From the United States	3
Emigrants, &c.	29
	353

The sex, nationalities and religious denominations of these patients were as follows: Males 173; Females 180. Protestants 6; Roman Catholics 347. English 6; Irish 133; Canadian 204; United States 7; other countries 3. The average stay of each patient in the Hospital was 37 $\frac{1}{2}$ days, and the collective stay of the 353 patients amounted to 13,334 days.

The amount that this Hospital received towards its ordinary maintenance from all sources other than the Province, was not sufficient to entitle it to the full supplementary aid of ten cents per day.

The Provincial aid for 1877, would therefore be as follows :—

Allowance for 13,334 days treatment of patients at 20c. per day	\$2,666 80
One-fourth of \$3,891.58, being amount received for ordinary maintenance from other sources than the Government Grant.....	972 89
	<u>\$3,639 69</u>
Less difference between 30c. and 7c. per day for 1,758 days, Hospital Residence for incurables	404 34
	<u>\$3,235 35</u>

The Hospital revenue and the sources from which it came for the year were as follows :—

From the Province of Ontario	\$3,717 74
From the Municipalities as a Grant.....	100 00
Paying Patients themselves	989 05
Subscriptions, donations and bequests of private individuals	500 00
Other sources not above enumerated	2,302 53
	<u>\$7,609 32</u>

The Hospital expenditures for the year were as follows :—

Beer, wine and spirits	\$ 84 85
Medicines and medical comforts	222 52
Milk	59 35
Butchers meat, bread, groceries and provisions	4,976 83
Salaries and wages	282 53
Fuel, light, water, taxes and insurance	923 69
Furniture, furnishing and clothing.....	769 87
Repairs, ordinary	215 45
Other expenditures	43 23
	<u>\$7,578 32</u>

Statutory inspection was made of this Hospital on the 10th of May. There were then forty patients under treatment in its wards, of whom fourteen were men and twenty-six women. With the exception of three old women who had been in the house over a year, all the inmates appeared to be proper subjects for an Hospital. The greater portion of the patients had only been admitted within a month. In the cases of the three old women referred to, Government aid should only be given under the House of Refuge clause of the Act.

No complaints were received from any of the patients in respect to treatment ; on the contrary all expressed satisfaction.

The wards and other departments of the Hospital were found in their usual admirable state of cleanliness and order, although the female wards were frequently overcrowded. The affairs of the Hospital generally appeared to be conducted with great regularity and method. The air in the wards was sweet and wholesome ; the water-closets and bathing appliances were most effective and complete.

The register and books of the Hospital upon which the Government allowance is based, were examined and found to be well and properly kept.

GENERAL HOSPITAL, LONDON.

The movements of patients in this Hospital in respect to admission and discharge, are shown in the following summary :—

Remaining in the Hospital at the close of last year	26
Admitted during the year	214
Births	16
Total number under treatment	256
Discharged	210
Died	16
Remaining in residence on 30th September, 1876	30
	<u>256</u>

From the above, it would appear that 256 patients were under treatment, as compared with 267 the previous year. These 256 patients were received from the following places:

City of London.....	182
County of Middlesex	29
Other Counties in the Province	23
United States	2
Emigrants and Foreigners	20
	<u>256</u>

The sex, nationalities, and religious denominations of the patients were as follows:—Males, 162; females, 94; English, 64; Irish, 70; Scotch, 28, Canadians, 83; United States, 6; other countries, 5; Protestants, 195; Roman Catholics, 61.

The entire collective stay of these 256 patients in Hospital, amounted to 10,951 days; the average stay per patient being equal to 42 $\frac{3}{4}$ days.

The amount of revenue received in aid of the ordinary maintenance of the Hospital other than what was voted by the Legislature of the Province, was \$4,138.54; one-fourth of which sum being less than what the 10 cents per day supplementary aid would produce the former sum will have to be taken as the additional Government aid. The amount of Provincial aid to this Hospital for the year 1877, will therefore be—

Allowance for 10,951 days' residence of patients, at 20c. per day.....	\$2,190 20
One-fourth of amount received in aid of Hospital other than Government grant	1,034 63
	<u>\$3,224 83</u>
Less difference between 30c. and 7c. per day, for 2,190 days' Hospital residence of incurables	503 70
	<u>\$2,721 13</u>

The revenue of the Hospital for the past year, and the sources from which it was derived, were as follows:—

From the Province of Ontario	\$3,526 20
From the Municipalities	3,328 09
From paying Patients themselves	399 63
From other sources	410 82
	<u>\$7,664 74</u>

The expenditures for the year were as follows. (Beer, wine, and spirits are included in groceries):—

Medicines and medical comforts	\$ 312 90
Milk	152 48
Butchers' meat, bread, groceries, and provisions.....	2,401 92
Salaries and wages.....	1,525 97
Fuel, light, water, taxes, and insurance	2,306 44
	<u>\$6,699 71</u>

Carried forward.....

<i>Brought forward</i>	\$6,699 71
Furniture, furnishing, and clothing.....	810 73
Repairs, ordinary and extraordinary.....	1,972 48
Other expenditures.....	747 43
	\$10,230 35

Statutory inspection was made of this Hospital on 12th July, on which day there were 28 patients in residence,—or rather inmates and patients, for of the 28 no less than 11 were not cases to receive any permanent benefit from hospital treatment, and therefore were ineligible to be placed in Schedule “A” of the “Charity Aid Act” entitling the Hospital authorities to draw 30c. per day for each day’s actual *treatment* and stay of such inmate. If the Hospital is entitled to draw Legislative aid for such inmates at all, it should be under Schedule “B” of the Act, providing that 7c. per day should be paid for their lodgment and maintenance in Houses of Refuge.

The bodily condition and length of residence of these eleven inmates in the London Hospital were as follows:—

1 Paralytic, 3 years in Hospital.
1 Cripple, 4 “ “
1 Idiot 2½ “ “
1 “ 1½ “ “
1 (aged) 2¼ “ “
1 “ 2 “ “
1 (weakly) in and out of the Hospital.
1 (weak-minded) in and out of the Hospital.
1 Woman admitted three months before time to be confined.
2 Cripples, in and out of the Hospital.

The time having arrived for a strict enforcement of the provisions of the Charity Aid Act, if under force of circumstances, such persons are admitted to an Hospital, the Government can only allow 7c. per day for their lodgment and support.

Of the 28 inmates of the Hospital, 26 were received from the City of London, and two from the County of Middlesex, none being paying patients.

The condition of the various parts of the House was excellent, both in respect to order and cleanliness, and the grounds were in a well-kept state.

The various books were examined, and found to be well and neatly kept.

THE GENERAL AND MARINE HOSPITAL, ST. CATHARINES.

The movement of patients in this Hospital for the year ending 30th September, was as follows:—

Remaining in residence at the close of the year.....	25
Admitted during the year.....	295
Born in the Hospital.....	7
	327

Of this number, 288 were discharged, 16 died, and 23 patients remained under treatment at the close of the year.

The 327 patients above referred to were received into the Hospital from the following places:—

From the City of St. Catharines.....	128
“ County of Lincoln.....	102
“ other counties of the Province.....	79
“ the United States.....	13
Emigrants and foreigners.....	5
	327

The sex, nationalities and religious denominations of these patients were as follows: males, 253; females, 74. Protestants, 152; Roman Catholics, 172; other religions, English, 71; Irish, 120; Scotch, 15; Canadians, 70; United States, 28; other countries,

The entire collective stay of these 327 patients in Hospital amounted to 8,333 days, average stay of each patient being equal to 25½ days.

The revenue received in aid of the ordinary maintenance of the Hospital, other than what was received from the Province was \$2,057 55, one-fourth of this sum \$514 38, be less than the 10 cents per day supplementary aid would produce, \$833 30. The former amount will be taken as the additional Provincial Aid.

The total amount of Government Aid to this Hospital for the year 1877, will therefore be \$2,180 98.

The revenue of the Hospital for the past year, and the sources from which it was derived were as follows:—

From the Province of Ontario.....	2,285 70
“ Municipalities.....	550 00
“ Dominion Government.....	500 00
“ Paying patients themselves.....	290 58
Subscriptions, donations and bequests of private individuals...	699 32
Received from other sources.....	17 65
	\$4,343 25

The expenditures for the year were as follows:—

Beer, wine and spirits.....	33 65
Medicines and medical comforts.....	493 22
Milk.....	40 00
Butcher's meat, bread, groceries and provisions.....	1,230 81
Salaries and wages.....	729 42
Fuel, light, water, taxes and insurance.....	432 81
Furniture, furnishing and clothing.....	405 90
Repairs.....	113 28
Other expenditures.....	144 62
	\$3,623 71

Statutory inspection of this Hospital was made on the 24th August, on which day there were under treatment in the various wards 23 patients, of whom 18 were men and 5 women. These patients had been admitted from the following places, viz.:—

City of St. Catharines.....	6
County of Lincoln.....	2
Other counties of the Province.....	3
Sailors.....	2
Canal labourers.....	10
	23

From the above summary it will be seen that nearly one-half of the patients in residence were men engaged on the new canal works, and therefore in a large degree an abnormal charge upon the funds of the Hospital. As this state of things may continue for some time, I recommended that the various contractors should be asked by the Hospital managers to subscribe to the funds of the Hospital.

Of the 23 patients under treatment, only one was paying for his lodging; all the rest were on the free list.

With one exception, all the patients were recent admissions, and they all appeared to be proper subjects for Hospital treatment. No complaints were made to me whatever.

The condition of the house, in respect to order and cleanliness, was very fair, although the women's ward might have been a little tidier in appearance.

The Hospital Register was found, upon examination, not to be correctly kept; it had not been balanced off to correspond with the Returns made to Government at the close of the last official year, and the day's stay of the patients had not been entered up in some instances.

either was the registered number of patients kept up, and some patients who had been discharged were not so recorded. The day and hour of the visit of the physician to the Hospital were not entered.

THE BURNSIDE LYING-IN HOSPITAL.

The admissions and discharges of this Hospital, exclusive of the births were as follows, during the official year ending the 30th September, 1876.

Number of patients remaining in residence at the close of last year	9
Admitted during the year	138
Total number	147
Discharged.....	138
Remaining 30th September, 1876.....	9
	147

The women admitted were returned as residents of the following places :

City of Toronto.	86
County of York	7
Other Counties of the Province.. ..	41
United States	5
Emigrants and Foreigners.....	8
	147

The nationalities and religious denominations to which these 147 women belonged are reported to be as follows :—English, 27 ; Irish, 27 ; Scotch, 10 ; Canadian, 75 ; Other countries, 86. Protestants of all denominations, 113 ; Roman Catholics, 30 ; Other religions not known 4.

The receipts of the Hospital for the year were as follows :

From the Province of Ontario.....	\$813 60
From municipalities (as a grant).....	500 00
From paying patients themselves.....	569 50
From Income from property.....	151 00
Subscriptions, donations and bequests	218 60
Other sources.....	195 20
	\$2,447 90

The Expenditure for the same period amounted to \$2,368 17, as follows :—

Beer, wine and spirits.....	\$ 21 05
Medicines and medical comforts.....	70 92
Milk.....	92 71
Butcher's meat, bread and other provisions.....	885 48
Salaries and wages	372 00
Fuel, light, water, insurance and taxes	477 17
Furniture, furnishing and clothing	218 50
Repairs.....	146 90
Other Expenditures	83 44
	\$2,368 17

The average stay of each patient in the Hospital was 29 $\frac{1}{2}$ days, and the collective stay the 147 patients amounted to 4,278 days. The amount that this Hospital received towards ordinary maintenance from all sources other than the Province, was not sufficient to entitle to the full supplementary aid of ten cents per day.

The Provincial grant for 1877 will therefore be as follows :

Allowance for 4,278 days' stay of patients at 20 cents per day.....	\$855 60
One-fourth of \$1,634.30, being amount received for ordinary main- tenance from other sources than the Government Grant.....	408 57
	\$1,264 17

Statutory inspection was made of this Institution on 7th October. The building situated on the corner of Shepherd and Richmond Streets, and although rather an imposing looking structure externally, it was found to be by no means well-arranged for hospital purposes, and its location is very undesirable in many respects, particularly in its proximity to a narrow noisy street. Such an Institution should have quietness and a reasonable degree of privacy and seclusion, which are entirely wanting in this house. The size of the lot is also very limited.

The Hospital was fairly clean in its various departments, but the wood work was in need of paint, and the walls and ceilings should have been lime washed.

At the time of my last visit there were 9 patients in the wards, but there were beds made up for 16. Two of the inmates paid for their support at the rate of \$2.50 per week. The rest were on the free-list. Two of the women gave evidence of mental weakness, if not imbecility, one of whom had been in the Hospital on a previous occasion. Provision should be made for this class of unfortunates, so that they would be constantly under surveillance.

The register was examined. There is no column for the day's stay of each patient, nor for the aggregate stay of all for the year. Instructions were given to have this information supplied.

EYE AND EAR INFIRMARY, TORONTO.

During the past year 84 patients were admitted to the above Infirmary, which, with 12 remaining in residence at the close of the last official year, make a total of 96 patients who received lodging and treatment during the past twelve months, as compared with 76 the preceding year.

In addition to these 96 in-door patients, no less than 366 persons received medicine and treatment from the Infirmary surgeons, as external patients. The average stay of the 96 in-door patients was 27 days per patient, making the collective stay of the whole equal 2,603 days. These 96 patients were received into residence

From the City of Toronto	13
“ “ County of York	9
“ other Counties of the Province	71
Emigrants, &c.	3
	96

The nationalities and religious denominations of these 96 patients are reported to be as follows :—English, 23 ; Irish, 28 ; Scotch, 9 ; Canadians, 35 ; other countries, 1. Protestants of all denominations, 65 ; Roman Catholics, 31.

The receipts of the Infirmary for the year were as follows :

From the Province of Ontario	\$1,164 60
“ “ City of Toronto (as a grant)	100 00
“ “ “ “ (as payment for patients)	82 29
“ “ “ “ “ “	719 91
Subscriptions, donations and bequests	731 50
	\$2,768 30

The expenditures for the same period amounted to \$2,477.99, as follows :—

For medicines and medical comforts	\$ 53 99
“ board of in-door patients	1,272 99
Salaries and wages	527 65
Fuel, light and water	30 25
Furniture, furnishing and clothing	124 52
Taxes and Insurance	6 25
Repairs	69 02
Advertising, printing &c.	91 05
Other expenditures.....	302 27
	<u>\$2,477 99</u>

Under the provisions of the Charity Aid Act, the Infirmary will be entitled to receive the following appropriation of Government funds for the year 1877 :—

Twenty cents per day on 2,603 days' residence of patients	\$520 60
Supplementary aid at the rate of ten cents per day.....	260 30
	<u>\$780 90</u>

Statutory inspection was made of the Infirmary on 7th October, it being my first visit since its removal from Adelaide to Church Street. The change of building has resulted in little, if any, advantage or benefit to the Infirmary, as all the defects and deficiencies that existed, and have been so frequently commented upon at my visits of inspection to the old building, were equally prominent in this,—the amount of accommodation being reduced as well. The locality and surroundings are somewhat better, but the house and yards are in all respects as unsuitable as the one recently occupied by the Charity.

There is no water-closet or bath in the building, and there is no drain from the water-closet in the yard, which in consequence was very foul.

There were only three patients under treatment in the house on the day of my visit, two of whom were paying for their maintenance.

The number of patients who received medicine and treatment without being residents of the Infirmary had much fallen off as compared with last year, but a slight increase had taken place in the number of resident cases. It would appear, however, that the average period of residence had been reduced very much. The House Superintendent reported that notwithstanding the hard times, and many of the old subscribers having ceased to pay, still the amount received from that source would be in advance of previous years.

The register was examined, and found to be properly kept.

There were only 12 beds in the house, and the arrangements did not admit of a proper separation of the sexes.

GUELPH GENERAL HOSPITAL.

The following summary shows the operations of this Hospital, in respect to admissions and discharges for the year ending 30th September, 1876 :—

Remaining in residence at the close of last year.....	7
Admitted during the year.....	82
Births	5
	<u>94</u>
Total number under treatment	94
Discharged	76
Deaths.....	9
Remaining under treatment 30th Sept., 1876.....	9
	<u>94</u>

The 94 patients who were admitted to Hospital treatment, are reported to have been received from the following places :—

From the Town of Guelph	49
“ the County of Wellington.....	16
“ other Counties in the Province ..	24
“ the United States	2
Emigrants and Foreigners	3
	94

The sex, nationalities, and religious denominations of these 94 patients, were as follows: Males, 76; Females, 18; English, 12; Irish, 16; Scotch, 25; Canadians, 38; United States, 1; other countries, 2. Protestants of all denominations, 82; Roman Catholics, 12.

The average period of treatment of these 94 patients was 35½ days.

The entire collective stay of all the patients for the year (allowing half time for the infants), was 3,336 days.

Under the 20 cent per day provision of the Act, this Hospital would be entitled to receive \$667.20, and as a sufficient amount has been received from all other sources than the Province (as given in the annexed summary), it will be entitled to receive a further sum of ten cents per day, amounting to \$333.60 as supplementary aid, or a total Government allowance for the year, of \$1,000.80.

The receipts of the Hospital for the year ending 30th September, 1876, and the sources from which the money was received, were as follows:—

From the Province of Ontario	\$800 00
“ Municipalities (as a grant).....	1,800 00
“ “ payment of patients’.....	40 00
Paying patients themselves	409 80
Subscriptions, donations and bequests	470 90
Other sources	577 58
	\$4,098 28

The Expenditures incurred in maintaining this Hospital for the same period, were as follows:—

Beer, wine and spirits	\$30 80
Butcher’s meat	393 10
Flour and bread	121 20
General groceries and provisions	593 58
Milk.....	146 60
Salaries and wages	641 67
Fuel, light and water.....	468 63
Bedding, clothing, &c.....	2 38
Repairs	310 81
Advertising, postage, &c	85 11
Other expenditures	776 06
	\$3,569 94

Statutory inspection was made of this Hospital on 5th September, on which occasion there were 12 patients in residence, all of whom were recent admissions and proper subjects for an hospital. Only two of the number were entered on the Register as paying patients; all the rest occupied free beds in the establishment. No complaints were received in respect to treatment.

The condition of the Hospital, in regard to cleanliness and order, was commendable, and the beds and bedding were comfortable and clean. Nothing has yet been done to remedy the defects in the heating arrangements referred to in my previous Report. A small frame building has been erected in a corner of the Hospital lot, for small pox cases.

The various books, including the Register, were examined and found to be very well kept; but some suggestions were made to the House Surgeon with a view to improvement in some respects.

ST. JOSEPH'S HOSPITAL, GUELPH.

The operations of this Hospital, in respect to the movements of patients, are returned to me as follows:—Number of patients remaining under treatment at the close of the last official year, 10; admitted during the year, 43; making the total number under treatment during the year to have been 53. Of these patients—39 were discharged, one died, and 13 remained in the Hospital at the close of the year.

These 53 patients were received into the Hospital from the following places:—

Town of Guelph.....	28
County of Wellington.....	21
Other Counties of the Province.....	4
	—
	53

The sexes of the patients were, 27 males, and 26 females; the religions were, 49 Roman Catholics and 4 Protestants; and the nationalities were returned as 4 English, 25 Irish, 20 Canadians, 2 from the United States, and 2 from other countries.

The average day's stay of the male patients was returned as 154 $\frac{2}{5}$ days, and of the females 78 $\frac{9}{10}$ days, and the collective stay in the Hospital of the 53 patients was 6,179 days.

The receipts and expenditures of this Hospital are mixed up with those of the St. Joseph's House of Providence, the affairs of both being under the one management in the same premises.

The Hospital receipts from all sources, other than the Government grant, were not sufficient to entitle the Institution to receive the full amount of the statutory supplementary aid. The amount that the Hospital would be entitled to as Government aid for 1877, would be as follows:—

Allowance for 6,179 days of the Hospital residence of patients at 20c	\$1,235 80
One-fourth of half of the receipts of both Houses.....	531 71
	—
	\$1,767 51
Less difference between 30c. and 7c. per day of 2,928 days' residence of incurable patients.....	\$673 44
	—
	\$1,094 07

Statutory inspection was made of this Institution on 5th September. Although there are two separate houses in connection with this combined Hospital and House for the Poor, the patients, so called, and the indigent inmates are indiscriminately mixed together. The Hospital Register, at the time of my visit, indicated that there were fourteen patients under treatment, but of these, one has been an inmate of the House fourteen years, one nine years, one eight years, one seven years, one four years, three two years, two over a year, and only one had been recently admitted—indeed, with three exceptions, none of these inmates were proper subjects for an Hospital. Although all had some disease of an incurable and chronic nature, still four of the men were working about the House.

Of the seventeen patients who remained in Hospital on the 1st October, 1875, no less than eight are still inmates, but all of the class referred to. Three of the number in residence at the time of my visit were paying for their support, and eleven were occupying free beds. Ten were received from the town of Guelph, while the remaining four came from other parts of the Province. The inmates of the House of Providence numbered sixteen, which, added to those designated as *patients*, made a total of thirty souls, only three of whom could be classed as Hospital patients. The managers of the House have in contemplation the erection of an addition to the House, for the exclusive use of an Hospital, but seeing that there was abundance of room in the new General Hospital for a greater number of patients than in all likelihood would require hospital accommodation for many years to come in that neighbourhood, I strongly recommend that the Govern-

ment should discourage the erection of any additional buildings for that purpose, as being unnecessary. The House is situated too far from the town for hospital purposes.

The main building was in very good order, and very clean and neat; the adjoining House was not in so good order.

The Register of the House was not of the kind required by Government, but a proper one has since been provided.

HOUSE OF INDUSTRY, TORONTO.

Statutory inspection was made of this Charity in October last.

Every part of the House as well as the domestic departments, out-buildings, yards, &c., were found in most excellent order, with the most commendable cleanliness apparent throughout the entire premises. The dormitories were particularly well kept, and the beds and bedding were comfortable and tidy-looking. The air in these rooms was pure and wholesome—indeed there were no foul smells in any part of the house, evincing that proper attention was paid to sanative requisites, structurally and personally.

While I have pleasure in recording my satisfaction with the condition of the house and the inmates at the time of my visit, I may add that it was also very evident that its management and discipline were worthy of the highest praise, entitling the establishment to rank as a model in all respects.

The operations of the House for the year ending 1st October, may be summarized as follows:—Number of inmates during the year—

Males	109
Females	70
Total.....	179

Of whom 95 were discharged, 15 died, and 69 remained in residence at the close of the year.

Number in the House on date of inspection:—

Men	35
Women	29
Children	5
Total.....	69

Number of families assisted during the year by the out-door relief operations..... 825

Representing individuals as follows:—

Men.....	592
Women	936
Children	1,981
	3,509

Total number of casuals furnished with supper, bed and breakfast..... 4,550

Soup kitchen open $3\frac{1}{2}$ months, with a daily average of about 50 served.

The record of operations is a most satisfactory one, and the more so as a wise discrimination (based upon the observation and personal knowledge of the members of the Visiting Committee), was exercised in the distribution of out-door relief. In this manner, no doubt, the relief of improper and unworthy cases had been reduced to a minimum. For the out-door operations of the house, the system adopted by the House of Industry organization, is the only wise and proper one; for while well organized relief is a duty well performed, it is clear that indiscriminate and unsystematic relief fosters a spirit of dependence and begets pauperism.

The inmates of the House were all well, and they all appeared to be proper subjects for such a charity. A large number of them were utterly unfit to earn a living, owing to the infirmities of old age, while many were crippled, blind, or otherwise physically disabled.

Of the number found in residence at this visit, 49 were in the House at my last inspection; all the rest were admissions of the year. The aggregate stay of the entire number

lodged during the year amounted to 27,910 days, or an average of 155 $\frac{3}{4}$ days per annum to each person. An examination of the Register showed that a daily average of 87 persons were lodged or boarded in the House during the year.

The mortality proved to have been considerably in excess of previous years, but it is worthy of note that of the 15 deaths that occurred during the year, 8 were persons over 75 years of age, and the average age at death of the whole number was 70 years. These figures would seem to prove that the longevity of this class is fully equal to that of persons in well-to-do circumstances—attributable no doubt to the regularity of the lives of persons in such an Institution as this.

The casual relief operations, which consist of supper, bed and breakfast, had been unusually large during the past year, doubtless due in a large degree to the hardness of the times. It would appear that a considerable portion of the class obtaining this kind of relief, are of the criminal vagrant, and generally vicious classes, and that they come from all parts of the Province.

The Soup-kitchen was kept open a half month longer this year than usual, owing to the prevailing destitution.

An idiot boy, who was undoubtedly a proper subject for the Orillia Asylum, has since been transferred to that Institution.

No complaints were received from any of the inmates.

The 179 persons who had been inmates of the house during the year, were received into it from the following places:—

From the City of Toronto.....	95
“ County of York.....	20
“ other Counties in the Province.....	38
Emigrants, &c.....	26
	<hr/>
	179

The nationalities and religions of these inmates were reported to be as follows:— English, 37; Irish, 91; Scotch, 19; Canadians, 28; Emigrants, 4. Of the number 132 were Protestants of all denominations, 41 were Roman Catholics, and 6 professed other religions.

The receipts of the house for the year, and the sources from which they were derived, were as follows:—

From the Province of Ontario	\$2,900 00
“ City of Toronto.....	5,000 00
Payment of board by inmates.....	103 45
Income from property belonging to the House.....	1,577 78
Subscriptions, donations and bequests of private individuals ..	2,171 25
From other sources.....	23 00
	<hr/>
	\$11,775 48

The expenditure of the establishment for the same period, were as follows:—

The groceries and provisions, including what were distributed for out-door relief,	\$5,498 82
Clothing, furniture and furnishings ..	795 78
Fuel (including out-door distribution), light and cleaning	2,266 06
Salaries and wages.....	925 00
Repairs, ordinary and extraordinary ..	1,113 91
Other expenditures	1,662 43
	<hr/>
	\$12,262 00

The collective stay of all the inmates in the House having been 27,910 days, and a suffi-

cient amount having been received towards its ordinary maintenance to entitle it to the full amount of Government Aid, the allowance for the year 1877 will be as follows:—

27,910 days residence of inmates at 5c.	\$1,395 50
Supplementary aid, at the rate of 2c. per day	558 20
	\$1,953 70

HOUSE OF PROVIDENCE, TORONTO.

The operations of the House of Refuge branch of this Institution, are shown in the following summary:—

Number of inmates remaining, Oct. 1875	141
“ “ admitted during the year	296
	437

Of this number, 248 were discharged, 31 died, and 156 patients remained in residence at the close of the official year.

The places from which these 437 inmates were received, were as follows:

From the City of Toronto	307
“ “ County of York	15
“ “ other Counties of the Province	103
Emigrants, foreigners, &c.	12
	437

The sexes, religions and nationalities of these inmates were as follows, viz:—Males, 106; females, 331. Roman Catholics, 410; Protestants of any denomination, 27. English, 26; Irish, 272; Scotch, 6; Canadian, 122; Foreigners, 11.

The receipts of this Institution, and the sources from which they were derived, were as follows:—

From the Province of Ontario	\$3,391 22
“ “ city of Toronto	500 00
“ “ other municipalities	50 00
Payment of inmates for board	890 00
Subscriptions, donations and bequests of private individuals	4,786 60
Other sources not enumerated	2,875 57
	\$12,493 39

The expenditures for same period were as follows:

Groceries and provisions	\$5,662 22
Clothing, furniture and furnishings	2,106 43
Fuel, light and cleaning	1,566 20
Salaries and wages	220 00
Repairs, ordinary and extraordinary	287 35
Other expenses	2,645 40
	\$12,487 60

From the returns made to me, it would appear that the 437 inmates referred to, remaining for a collective period of 58,957 days, and the amount received in aid of the maintenance of the House was said to be \$8,875.48, one-fourth of which would entitle the Institution to receive the following amount of Government aid, which would be as follows, for the year 1877:—

Allowances of 58,957 days, at 5c per day	\$2,947 85
Supplementary “ “ 2c “ “	1,179 14
	\$4,126 99

Statutory inspection of this Charity was made on the 6th October. Owing to the preparations that were then in progress for winter heating, &c., the house, in some parts, was in confusion, but apart from this it was generally found in a fair state of cleanliness. The basement of the old portion of the main building, which is used for domestic purposes, has very low ceilings, and is very inconveniently arranged, generally. To a certain extent the same may be said of many portions of the old structure. The Directorate, however, seem to be doing everything in their power to overcome these structural defects, and much relief was granted on the completion of the new building, by the transfer into its airy and well arranged dormitories of the old women and the orphan girls. This year, the children under five years of age have been removed to a house in the western suburbs of the city, which was acquired for that purpose, and the rooms in the out-building that were formerly used for them has been given to the old men, who previously were much too crowded in their dormitories. Over crowding however is still apparent in many of the dormitories of the House. Although fault may be found with the old structure and its arrangement, still, considering the difficulties that have to be contended with and the honest endeavours of the Sisters to board and lodge the very utmost number of poor persons that they possibly can, considerable allowance must be made.

In the Poor-house department there were 158 inmates, viz., 37 men and 121 women. Many of these were bed-ridden people, whose care is attended with a great deal of trouble. No less than 40 were almost constantly confined to bed; six were entirely blind, and while three were insane and should have been removed to an asylum, many were weak-minded. Some were deaf and dumb, but not proper subjects for the Government Institution for that class.

Some of the patients in this House pay a little towards their support, and are known as private inmates. It is a question whether Government aid should be extended to this class.

I examined the register of the Institution, which is kept after the prescribed form, and properly.

HOUSE OF INDUSTRY, KINGSTON.

At the close of last year there remained in this House 37 inmates, and during the present year 158 were admitted to it, making a total of 195 poor persons who were boarded and lodged during the twelve months. Of this number, 155 were discharged, two died, and 38 remained in the House at the close of the year.

The places from which these 195 persons were admitted to the House, were as follows:—

From the City of Kingston	172
“ the County of Frontenac	22
Emigrant	1
	195

The sex, nationalities, and religions of these 195 inmates were as follows:—Males, 135; Females, 60. Protestants of all denominations, 130; Roman Catholics, 65. English, 41; Irish, 86; Scotch, 8; Canadians, 59; other countries, 1.

The revenue of the House, and the sources from which it was derived, for the year ending 30th September, were as follows:—

From the Province of Ontario	\$2,400 00
“ the City of Kingston	200 00
“ From the County of Frontenac	200 00
Payment of board by inmates	214 50
Other sources	160 19
	\$3,174 69

The expenditures for the same period, were as follows:—

Groceries and provisions	\$1,339 31
Clothing for inmates, and furniture and furnishings.	176 40
Fuel	61 45
Salaries and wages	400 00
Repairs, ordinary and extraordinary	298 30
Other expenses	105 14
	\$2,380 60

The statutory inspection aid that this Hospital is entitled to receive for the year 1877, would be as follows :

Allowance for 16,972 days' stay of inmates, at 5c.....	\$848 60
Supplementary aid, equal to one-fourth of amount the House received from all sources other than the Province, the amount not being sufficient to entitle it to the additional two cents per day	193 67
	<u>\$1,042 27</u>

Statutory inspection was made of this Institution on the 5th of May, 1876, when its various dormitories, sitting-rooms, and the other portions of the building were all found in a very commendable state of cleanliness, with, having regard to the character of the establishment, considerable neatness generally prevailing.

The beds appeared to be very comfortable, and the bedding was clean and tidy-looking in appearance. The inmates were all decently clad, and, judging from their appearance, their comforts and wants were as well attended to as could be expected in a house of this kind.

The method and order apparent in the management of the House indicated that its affairs were being well and economically administered.

As there were no by-laws for the guidance of the officers, and for regulating the conduct of the inmates, I brought the matter under the notice of the Board of Management, and suggested that regulations of that kind should be printed, framed, and exposed in various parts of the building.

On the day of my visit there were forty-two inmates in the House, viz:—22 men, 16 women, and 4 children; total, 42.

Although the Register used in this Institution was of the form prescribed by Government, I found that the number of days' stay of each inmate, and the collective stay of all, was not registered to correspond with the annual returns sent to this Department. I desired the managers to conform with this requirement, so that the Register would show the exact number of days' stay of each patient, and the collective stay of the whole on the close of September of each year.

Thirteen of the inmates of the House had been in residence since January, 1876. All the rest prior to that date.

HOUSE OF PROVIDENCE, KINGSTON.

The operations of the Department for the care of the poor in this House, are shown in the following summary:—

Number of Inmates remaining 1st October, 1875	55
“ “ admitted during the year.....	37
	<u>92</u>
Total lodged during the year.....	92

Of this number, 38 were discharged, 14 died, and 40 remained in residence at the close of the official year.

The places from which these 92 inmates were received were as follows:—

From the City of Kingston	19
From the County of Frontenac	3
From the other Counties of the Province.....	60
From the United States.....	7
Emigrants, foreigners, etc.	3
	<u>92</u>

The sexes, nationalities, and religions of these inmates, were as follows; viz., males, 44; females, 48; English, 2; Irish, 70; Scotch, 3; Canadian, 9; United States, 7; foreigners, 1; Protestants of any denomination, 4; Roman Catholics, 8.

The receipts of this Institution and the sources from which they were derived, were as follows :—

From the Province of Ontario	\$1,000 00
From the City of Kingston	Nothing.
Income from Property	59 74
Subscriptions, donations, and bequests from private individuals	2,116 78
From other sources not enumerated.....	1,903 57
	<hr/>
	\$5,080 09

The expenditures for the same period were as follows :—

Groceries, provisions, etc.....	\$2,222 32
Salaries, wages, etc.	
Expended on out-door poor ..	536 73
Fuel, light, water, and all other expenses	2,333 34
	<hr/>
	\$5,092 39

From the returns made to me, it would appear that the 92 inmates referred to, remained for a collective period of equal to 16,677 days.

The accounts for the Poor-house branch and the Orphan Asylum branch, were not kept separate; and the receipts in aid of each could not, therefore, be correctly obtained. From the returns made to me, however, there was a sufficient amount received to entitle both the departments to receive the full amount of supplementary aid. The Government allowance, therefore, for the year 1877 to this House, would be as follows :—

Allowance for 16,677 days' stay of inmates, at 5c. per day	\$833 85
Supplementary " " " 2c. per day	333 54
	<hr/>
	\$1,167 39

Statutory inspection was made of this Institution on the 28th September, on which day the following population was found in residence, viz :—

Poor-house Department.

Old men	16
Old women.....	23
	<hr/>
	39

Orphanage.

Boys	26
Girls	4
	<hr/>
	30

The Register showed the above numbers to be in residence, and I saw all the old men and women, but the orphan boys were attending the "Brothers' School" in the City, so that I did not see them.

The Register was not properly kept; and the form required by Government was sent to the Managers, with a request that it would be adopted and adhered to.

The House in its various departments was generally clean and well-kept, but the wards were all very much overcrowded; and in the old men's dormitory this defect was aggravated by its being a basement room. The pressure for admission to the House appeared to be the only excuse for overcrowding; but it seems to me most desirable that the accommodation should be increased at an early day.

Among the male poor was a helpless cripple; and among the women were two idiots and one insane woman, for whom such accommodation was not at all suited. Two of the number were blind.

There appeared to be some defect in the water-closet arrangements, or drainage from them, as a bad odour pervaded the air in proximity to them.

HOUSE OF REFUGE, HAMILTON.

The following summary shows the operations of this House in respect to admissions and discharges, for the year ending 30th September, 1876 :—

Remaining in the Institution at the close of last year.....	36
Admitted during the year	50
<hr/>	
Total number of inmates	86
Discharged	56
Deaths	2
Number of patients remaining in on the evening of the 30th September, 1876	28
<hr/>	
	— 86

The sex, nationalities and religious denominations of these 86 inmates, were as follows :—Males, 14 ; females, 72. English, 16 ; Irish, 34 ; Scotch, 5 ; Canadians, 27 ; United States, 3 ; other countries, 1. Protestants, 51 ; Roman Catholics, 35.

These 86 inmates were received from the following places, viz. :—

From the City of Hamilton.....	78
“ other counties in the Province.....	3
“ the United States.....	5
<hr/>	
	86

The amount of revenue received in aid of the ordinary maintenance of the House, and the sources from which it was derived, were as follows :—

From the Province of Ontario.....	\$1,060 43
“ City of Hamilton.	893 60
“ other sources	21 75
<hr/>	
	\$1,975 78

The expenditures for the same period were as follows :—

Groceries and provisions.....	1,198 85
Clothing for inmates, furniture and furnishings,	197 56
Fuel, light and cleaning.....	79 75
Salaries and wages	350 04
Repairs, ordinary and extraordinary.....	31 45
Other expenditures.....	118 13
<hr/>	
	\$1,975 78

The average period of residence of these 86 inmates was $135\frac{1}{2}$ days, and the entire collective stay was equal to 11,637 days.

The amount of Provincial Aid that the House is entitled to receive for 1877, would therefore be as follows :—

Allowance for 11,637 days' stay of inmates, at 5c. per day.....	581 85
Supplementary aid	228 83
<hr/>	
	\$810 68

Statutory inspection was made of this House on 13th September, and considering its structurally dilapidated state, and bad internal arrangement, it was found, throughout, in a very clean and well-kept condition, evidencing good management on the part of the Superintendent.

There were 25 persons in residence, viz. :—21 women, 2 men, and 2 children, all from the City of Hamilton. Indeed, admission seemed to be awarded only to the poor of the city. Having regard to this fact, and that the establishment is owned and maintained by the Corporation of the City of Hamilton, it becomes a question whether it should receive aid from the Government at all, as it certainly can only be classed as a Corporation Poor House, of the same description as the one in the County of Waterloo.

The affairs of the House are very economically and efficiently managed, the only paid officers or servants, being the Superintendent and Matron—man and wife.

There is bed accommodation for about fifty persons in the House

The dietaries were very good, consisting chiefly of meat, potatoes and bread, all of which, on the date of inspection, were of good quality.

The Register was properly and neatly kept, and gave all requisite information.

HOUSE OF PROVIDENCE, GUELPH.

The buildings used for the purposes of this charity are also used for the St. Joseph's Hospital. The operations of the Poor-house branch for the year were as follows, viz:—Inmates remaining at the close of last year, 19; admitted during the year, 23; making a total of 42 persons who were relieved by its operations. Of this number, 25 were discharged, and 17 remained in the house at the close of the year.

The places from which these 42 persons were received into the House, were as follows:—

From the Town of Guelph	25
“ “ County of Wellington	9
“ other Counties of the Province	8
	42

The sex, religions and nationalities of these inmates were as follows:—Males, 15; females, 27. Roman Catholic, 38; Protestants, 4. Irish, 16; Canadians, 26.

The receipts and expenditures connected with the Poor-house branch of this establishment, are mixed up with those of the Hospital department, and therefore cannot be given in separate form. The amount that the House would be entitled to receive as statutory aid for the year 1877, would be as follows:

Allowance for 6,238 days' lodgment of inmates at 5s. per day	\$311 90
Supplementary aid for 6,238 days' at 2s. per day	124 76
	\$436 66

Statutory inspection was made of this House at the same time that the Hospital was inspected, and the remarks in reference to that branch equally apply to this.

HOME FOR INCURABLES, TORONTO.

During the past year, 16 patients were maintained in this Institution, who remained therein for a collective period equal to 4,945 days. These 16 patients were all admitted from the City of Toronto, their nationalities being—English, 6; Irish, 6; Scotch, 2; Canadians, 2. Their religions were reported to be—Protestant, 14; Roman Catholic, 2.

The receipts for the year were as follows:—

From the Province of Ontario	\$500 00
“ Municipalities	33 50
Subscriptions, donations and bequests from private individuals	2,347 21
From other sources	2,308 40
	\$5,189 11

The expenditures for the same period were as follows:—

Groceries, provisions, &c.....	\$805 25
Clothing, furniture and furnishings.....	235 05
Fuel, light and cleaning	267 21
Salaries and wages	434 00
Repairs, ordinary and extraordinary.....	2 43
Other expenses	712 11
	\$2,456 05

The collective stay of these patients numbering 4,945 days, the amount of statutory aid that the Home would be entitled to for the year 1877, would be as follows:—

Allowance for 4,945 days, at 5c.....	\$247 25
Supplementary aid at 2c.....	98 90
	\$346 15

Statutory inspection was made of the Home on 12th September, when 15 inmates were found in residence, 6 men and 9 women. Considering the very limited accommodation of the Home, it having capacity only for 19 beds, and the fact that there were many suitable subjects waiting to be awarded admission, it was to be regretted that all the beds were not occupied. There were four vacant at the time of my visit, and during my recent visit to the General Hospital in this city, there were no less than ten persons who should have been in a Home for Incurables, instead of a curative Institution. The cost of fuel, light and wages would be the same for 19 as for 15 inmates. For these reasons, as well as for others of still more importance, it is to be hoped that the Directorate will soon see their way to the erection of a suitable building, affording capacity for not less than fifty inmates. All the inmates were afflicted with incurable ailments, and many of them were quite helpless; five were crippled with paralysis, three with chronic rheumatism, two from fractures, three from other causes, and two were blind. I conversed with all the inmates and received no complaints, on the contrary, all were greatly satisfied with their treatment. The house throughout was found in a thoroughly clean and well-ordered condition, and the wards were very cheerful and homelike in their surroundings. I examined the Register, which was not of the form required by Government, and the President was furnished with a copy of that now in general use.

ROMAN CATHOLIC ORPHAN ASYLUM, TORONTO.

The operations of this Asylum for the year were as follows:—Remaining in residence at the close of last year, 203; admitted during the past twelve months, 209, making a total number of 412 that were taken care of during the year. Of this number, 205 were discharged, 12 died, and 197 remained at the close of the year.

These 412 children remained in the Asylum for a collective period, equal to 70,200 days, entitling the Asylum to \$1,405.22, as Government aid for the year 1877.

Statutory Inspection was made of this Institution on the 6th of October. The Orphanage forms a portion of the House of Providence, and within the past month all the children under five years of age had been removed to a separate building known as "Sunnyside," in the western suburbs of the city.

The dormitories used for the girls were very roomy and cheerful, but those used for the boys, in the upper part of the house, were confined and overcrowded. Everything seemed to be done for the children to make them comfortable that could be expected under the circumstances.

School is taught in two rooms of the building by the sisters, one of them being for the boys and the other for the girls. In the former, 78 were under instruction, and in the latter, 99.

The children were all very decently and comfortably clothed, and seemed to be well looked after.

The population of the Orphanage was as follows:—Boys, 83, Girls, 92, Children under five years of age at Sunnyside, 29—or a total of 204.

I checked the Register of the Institution, and found it to be kept properly and in accordance with the prescribed form.

ORPHANS' HOME AND FEMALE AID SOCIETY, TORONTO.

During the year, 154 children were cared for in this Home, including 107 who were in residence on the 30th September of last year. Of this number, 53 were discharged and three died, leaving 98 in the Home at the close of the year.

As the collective stay of the 154 inmates amounted to 37,158 days, the amount of Government aid that the Home is entitled to receive for 1877, is \$743.16.

Statutory inspection was made of this Charity on 5th October, when I found in residence 102 inmates—66 boys and 36 girls. This number about exhausted the capacity of the Home.

The regulations of this Institution are, that only orphans and half-orphans shall be admitted, and that illegitimate children shall not be awarded admission. With very few exceptions, the children in the Home, at the time of my visit, were half-orphans.

School is taught upon the premises, and 90 children were then on the roll.

The children were clean and neat in their persons generally, and were very healthy-looking in appearance. Only one lad was confined to bed, and only for some trifling complaint. An idiot boy, who was a proper subject for the Idiot Asylum, was subsequently transferred to that Institution.

In my last Report I found it necessary to reflect with some severity upon the condition of this Home, but I have now pleasure in recording my satisfaction with the order and cleanliness that prevailed at this visit. The partitions, which rendered some of the dormitories dark and cheerless, had been removed, and the woodwork had been painted throughout the entire building, whilst the walls had been well limewashed. The basement had also been improved in appearance.

The beds and bedding were comfortable, and were tidily kept.

The form of register prescribed by the Government was not used, so that I could not check the number of pupils returned, nor their stay in the Home. The Managers were requested to provide a proper register, and to keep it in the manner prescribed.

GIRLS' HOME, TORONTO.

At the close of last year 102 children remained in this Home, and during the past twelve months 72 were admitted to it. Of this number, 66 were discharged, two died, and 106 remained in the Home at the close of the year.

The collective stay of these 174 inmates numbered 42,196 days, entitling the Home to the sum of \$843.92, as Government aid for the year 1877.

Statutory inspection was made of the Home on the 10th October. From basement to garret the Institution was found in the most admirable state of cleanliness, with the greatest neatness and order prevailing in all the apartments. The dormitories were very tidily kept, and the beds comfortable. The air throughout the Home was pure and wholesome.

A new furnace has been placed in the basement, and a good deal of work has been done during the year, which improves the condition and appearance of the Institution.

There were 102 children in the Home on the day of my visit, of whom 72 were girls and 30 boys,—17 of the number being under three years of age. They were well and tidily clad, and they had a healthy and cheerful look, denoting that they were well cared for.

The health of the Home was good. Only three children were in bed at the time of my inspection, and these for trifling complaints.

The average number of children that attends school in the building is 60. These are instructed in the common English branches.

Provided the school in this and other Institutions of a similar character is kept in conformity with the school laws, I do not see why they should not receive a share of school funds—the same as the Roman Catholic Orphanages now obtain. I would respectfully recommend that the matter receive consideration.

All the sewing, mending, making up of clothes, and knitting is done by the inmates, under the superintendence of the matron.

I was surprised to learn that the Managers had not the power to enforce the compulsory residence of inmates.

The register of the Home was not kept in accordance with the Government forms.

BOYS' HOME, TORONTO.

During the year, 77 children were admitted to this Home, who, with the 73 in residence at the close of the preceding year, make a total of 150 who were cared for during the twelve months. No deaths occurred in the Home during that period, but 53 were discharged, leaving 97 in the Home on 30th Sept. last.

As the collective stay of these 150 boys was equal to 30,031 days, the Home would be entitled to \$600.62 for 1877.

Statutory inspection was made of this Institution on the 3rd of October, when there were in residence 94 lads. They were all healthy-looking and comfortably clothed.

The health of the Home has been remarkably good, and on the day of my visit there was not a case of sickness in the Institution.

Two of the lads were to all appearance idiotic, and at least two more were very weak minded. The surgeon of the Home was asked to report upon the mental condition of these lads with a view to their transfer, if proper cases, to Orillia Asylum.

The number of pupils on the school roll at my visit was 90, who were taught by a mistress in the house. The same remarks that were made in reference to the school taught in the Girls Home apply to this Institution. If the school were to receive Government aid, I have no doubt that its efficiency would be greatly increased.

The House, throughout, on the day of my visit, was found in the highest order, and thoroughly clean. The adornment of the walls with pictures, and in other inexpensive ways, was a most commendable feature, and added much to the cheerfulness of the Home.

The beds were comfortable and neatly kept, and the dormitories were clean and free from bad smells.

The Register of the house is kept by the Secretary at her residence, so that I could not examine it.

I have issued instructions to the managers of all charitable institutions to have their Registers, at all times, in the Institution open to inspection.

NEWSBOYS' LODGINGS, TORONTO.

During the year, 108 boys were benefited by the operations of this establishment. These 108 inmates remained in the lodging for a collective period of 4,581 days, which, at 2c. per day, would entitle the House to receive \$91.61 for the year 1877.

Statutory inspection was made of this Home on 10th October. The wood-work of the building was much in want of paint, and the plaster of whitewash.

The building is not a very suitable one for the purposes of the Charity under the most favourable circumstances, and the defects mentioned rendered it rather gloomy and uncheerful. The basement is very dark and out of repair. The bedding, although fairly clean, was scrimp in supply, and rather dilapidated-looking in appearance. Although the House and the furnishings could not positively be said to be dirty, still they were untidy, and not such as are calculated to inculcate orderly and neat habits among the lodgers, which I presume is one of the objects of the Institution.

The register had not been properly filled up for the year, so that I could not check the returns. The capacity of the House is sufficient for 50 inmates, but only 37 beds were made up, and on the night previous to my visit 17 inmates were lodged and boarded.

There is a school or study-room in the building, where instruction is given to the lodgers.

In last year's report I stated the terms and conditions upon which lodgers are admitted to this Charity, which is one of the most useful in the city.

ORPHANS' HOME, KINGSTON.

The operations of this Institution for the year were as follows:—Remaining at the close of last official year, 56; admitted during the year, 11; making a total of 67, of which number 17 were discharged and one died, leaving 49 in the Home at the close of the year.

These 67 children remained in the Home during the year, for a collective period of 18,974 days, entitling the Institution to the sum of \$379.48 for the year 1877.

Statutory inspection was made of the Institution on 16th May, when I found in residence 51 inmates,—26 boys and 25 girls. The Register showed that this number was somewhat below the average that had been in attendance.

The various dormitories and rooms in the House, including the domestic department in the basement, were all found in a very well-kept state, and the surroundings of the establishment had been considerably improved since my last visit. A plentiful supply of water has been brought into the House; and, as soon as their funds will permit, it is the intention

of the Board to construct water-closets and bathing-rooms in projection, which are very much required.

I was present when the children were at dinner. The food served to them was very wholesome, and sufficient for their wants; and everything seemed to be done which could be under the circumstances, to promote their health and comfort.

ORPHANAGE OF THE HOUSE OF PROVIDENCE, KINGSTON.

During the year, the Orphanage Department of this House cared for 43 children; of which number 16 were discharged, 1 died, and 26 remained under lodgment at the close of the year.

The collective stay of the 43 children having been 8,422 days, the Orphanage would be entitled to \$168.44 for the year 1877.

As this Institution forms a part of the House of Providence, the remarks in respect to that establishment apply equally to this.

ROMAN CATHOLIC ORPHAN ASYLUM, ST. JOSEPH'S, LONDON.

There remained in this Asylum at the close of last year, 71 children, and 50 additional were admitted to it during the year, making a total of 121 who derived benefit from its operations during the past twelve months.

The aggregate stay of these 121 inmates numbered 26,817 days, which at the Government allowance of 2 cents per day, would entitle the House to \$536.34 for the year 1877.

Statutory inspection was made of this Institution on the 7th September. All its departments were found in a thoroughly well-kept state. The overcrowding still continues in the dormitories, but a large and commodious brick structure is now being erected, which will give abundance of room, both for dormitory and class-room purposes, for over 100 inmates. This building will be completed next year, and will cost from \$25,600 to \$30,000. At the time of my visit there were said to be about 70 youths in residence, and 3 adult inmates, but I only saw 51. The rest were said to be at school and out on leave. The children were well clad, and very neat and clean in appearance. A school is taught on the premises by the Sisters, which, I was informed, was aided under the Separate School Act.

I examined the Register, and found it to be properly kept.

PROTESTANT ORPHANS' HOME, LONDON.

This Home forms a part of the Institution known as the "Protestant Home for Orphans, Aged, and Friendless." The operations of the Orphanage Department are mixed up with the other, causing some difficulty in determining the amount that the respective branches of the Institution are entitled to receive as Government aid. The Managers have been requested to keep a separate register for each class in future.

It would appear that, of the 116 persons who were in the Institution during the year, 51 were children, who remained for a collective period equal to 5,276 days, which, at the rate of two cents a day, would entitle the Orphanage Department to \$105.52 for 1877. The Poor House department is entitled to \$407.68.

Statutory inspection was made of this Institution on the 12th July, when it was found in a very well-kept condition.

There were only 13 inmates in the House at the time of my visit, viz. — 4 boys, 2 girls, 3 old men, and 4 old women.

I called the attention of the Managers to the fact that the plan of keeping the register did not furnish the information the Government required to base the Legislative appropriation to the House upon, and instructed them upon the following three points:—

1st. The actual stay of each inmate in the House must be entered opposite the name of every person admitted.

2nd. The stay of old people who are admitted to the House as indigents must be kept separate from that of orphan children and youths, as the former come under Schedule B, and the latter under Schedule C of "The Charity Aid Act."

3rd. The register must be entered up and closed on the 30th September of each year, and the annual return to Government on that day must exactly correspond with such register.

It having come to my knowledge that the Managers contemplated purchasing a building which was very ill adapted, in its internal arrangement, to the wants of the Home, I strongly urged them against the purchase, and recommended the erection of an entirely new building upon the plans now in the possession of the managers.

ST. MARY'S ORPHAN ASYLUM, HAMILTON.

During the past year 43 children were admitted to this Asylum, which, with 107 who remained in residence at the close of the preceding year, made a total of 150, who were boarded and lodged in the Asylum during the year. Of this number, 34 were discharged, 4 died, and 112 remained in the Asylum at the close of the year.

The 150 children who were in residence during the year remained an aggregate period equal to 40,727 days, which would entitle the Asylum to the sum of \$814.54 as statutory aid for 1877.

Statutory inspection was made of this Institution on 13th September, when the buildings used for the purposes of the Orphanage were found, as usual, in a very clean and orderly condition. They are, however, entirely too limited in space to give proper accommodation for the number of children found in residence. The dormitories were overcrowded, and were it not for the number of windows in them, the air could not be kept sweet, and even then it must be difficult in winter and at night. The associated refectory is entirely too small, and, being in the basement, the evils of overcrowding are very apparent.

There were said to be 121 children in the House on the day of my visit, but I only saw 107; the rest were said to be absent on errands, &c. This number comprises 62 boys and 59 girls, of whom 21 were infants under four years of age.

There were two idiotic girls in the House, who should be removed to the Idiot Asylum at Orillia.

The children were all very clean and decent-looking in appearance, and they all seemed to be well cared for. School is taught on the premises.

I examined the register, which was found to be properly kept, and gave all the information required by Government.

ORPHAN ASYLUM (PROTESTANT), HAMILTON.

Thirty children remained in this Asylum at the close of last year, and only three were admitted during the year, making 33 who were cared for during the year; of whom 6 were discharged, and 27 remained on the 30th September last.

These 33 children remained in the Asylum for a collective period of 10,178 days, which would entitle the Asylum to \$203.56 for 1877.

Statutory inspection was made of this Asylum on 14th September, on which occasion there were 28 names on the register. One girl, however, has been removed to the Blind Institution, leaving 27 orphans in residence—22 boys and 5 girls.

The children were all clean and well-clad, and appeared to be well cared for. There were 10 cases of hooping cough in the House at the time of my visit; otherwise the health was reported to be good. The number of inmates was fewer than usual, and the admissions of the year only numbers 3, with 4 discharges. Having regard to these figures, it appears to me a great pity that the managers of this Orphanage and those of the Boys' Home could not agree to combine these two useful institutions, and thus increase their usefulness and power to do good. One organization would be quite sufficient for the purposes of both, and their aims are similar.

An addition is now being made to the House, in order to provide accommodation for indigent old women. The managers have been able to do this, owing to the liberality of the late Mrs. Jackson, who bequeathed the sum of \$4,000 for the purpose.

The books were examined, and the Register found to be properly and neatly kept.

BOYS' HOME, HAMILTON.

The operations of the Home for the past year were as follows:—Remaining in the Home on the 30th Sep., 1875, 64; admitted during the year, 37; making a total of 101. Of this number, 33 were discharged, leaving 68 in the Home at the close of the year.

The collective stay of the 101 inmates numbered 24,876 days, which under the provisions of "The Charity Aid Act, 1874," would entitle the Home to the sum of \$497.52 for the year 1877.

Statutory inspection was made of this charity on 13th September. The number of boys said to be in the Home on that day was 66, but as nearly all of them were at a picnic (or enjoying a holiday), I did not see them.

The Register is not kept in the manner prescribed by Government, and does not furnish the stay of each inmate in the Home, nor other information required by law. A proper form was sent to the Secretary, with a request that it should be adopted and adhered to.

The house used for the Home is not a good one, and is out of repair. Order and neatness could not be looked for, but it was fairly clean and well kept in its various departments. The Managers, however, were erecting a fine and commodious brick structure in the upper part of the city, which comprises a centre building and two wings, and will furnish accommodation for over 100 inmates. This will effectually overcome the troubles that the Board are labouring under in the present house. It is to be regretted however, that terms of union could not have been arranged, so as to place this Home and the Orphan Asylum under the same management, as one establishment.

ST. PATRICK'S ORPHAN ASYLUM, OTTAWA.

One hundred and thirty one children were cared for in this Asylum during the year, who remained in it for a collective period equal to 31,171 days.

This stay of the inmates entitles the Asylum to the sum of \$623 42, as Government Aid for 1877.

This Asylum was inspected by Mr. Scoble on the 26th August, who reported as follows:—

"In accordance with instructions, I visited the St. Patrick's Orphan Asylum in this city, at 9 a.m., this morning.

The building is large and commodious, built of stone, and well adapted for the purpose for which it is built.

The inmates are of two classes, viz.:—1st, destitute children, orphans or semi-orphans, principally, but in some cases having both parents living. 2nd, destitute or infirm men and women. Of the two classes, there were in residence at the time of my visit,

Girls—6 orphans; 21 semi-orphans; 4 not orphans	31
Boys—5 " 15 " 4 "	24
Aged and infirm men, 10; women, 11.	21
Crippled lad (one leg only).....	1

77

The children are of various ages, from eighteen months to fourteen years old. They are all instructed daily. Some of the old people assist in the house-work, and in cultivating the garden.

The house was found in a perfect condition of neatness and cleanliness, and the inmates bore evidence of care and kindness.

The Register of admissions was examined, but did not agree with the numbers found in residence. This was explained by the Superior to be owing to the fact that all entries were made by the Secretary, who had not made up the books for some time.

ORPHANS' HOME, OTTAWA.

At the close of the year 37 children remained under accommodation, and during the year 68 were admitted, making a total of 105 that were benefited by its operations during

the past twelve months. Of this number, 70 were discharged, 3 died, leaving 32 in the Home on the 30th September.

The collective stay of these inmates having been 14,754 days, the Home would be entitled to \$295.08 for 1877.

Statutory inspection was made of this charity on 11th May, when I found 40 inmates in the House, of whom 19 were boys, 18 girls, and 3 adults.

The Register proved that a greater number had frequently been in the House during the past winter. The attention of the Secretary was called to the practice of not filling in the entire days' stay in the column intended for that purpose in the Register, and he was requested to comply with the rule in this respect.

I saw all the inmates; they were clean and neat in their personal appearance, and very healthy-looking. Everything seems to be done that can be for their comfort. Most of the children are not orphans, but those who have been neglected and abandoned by their parents. Nine of them were babies in the nursery.

The spring cleaning of the House was in progress, but apart from that it was wholesome and clean.

School is taught upon the premises by a female teacher.

ST. JOSEPH'S ORPHAN ASYLUM, OTTAWA.

Seventy two children remained in this Asylum at the close of last year, and 67 were admitted to it during the year. The total collective stay of these 139 inmates amounted to 27,175 days, entitling the Asylum to receive \$543.50 as Government aid for the year 1877.

Statutory inspection was made of this Institution on the 10th May, when every part of the building was found in the most commendable state of order and cleanliness. The dormitories were exceedingly well kept, both in respect to the condition of the rooms and the cleanliness and neatness of the beds and bedding. In one of the dormitories, the cots were placed too near to each other, but the window ventilation of the rooms used for dormitories was good and effective.

There were on the Register of the Asylum on the day of my visit, the names of 74 inmates, comprising the following, viz:—

Boys.....	29
Girls	38
Babies of both sexes	7
	—
	74

The children were all clean in their persons, and were very healthy-looking in appearance. Many of them were children who had been abandoned by their parents, which class are admitted as well as orphans. The adult pupils attend one of the separate schools in the city.

This Asylum is rather confined in space for such a number of inmates.

INDUSTRIAL SCHOOL, HAMILTON.

The movement of inmates in this Institution for the year ending 30th September, 1876, was as follows:—Remaining in residence at the close of last year, 56; admitted during the year, 57; making the total number under lodgment, 113. Of this number 49 were discharged, and 64 remained in the house at the close of the year.

The collective stay of these 113 children in the house was 21,690 days, which would entitle the school to \$433.80, for 1877.

Statutory inspection was made of this House on 13th September, when 63 inmates were found in residence, of whom 58 were girls, and 5 were boys under four years of age.

The building has accommodation for about 100 inmates. It was found throughout in very good order, and appeared to be very well managed. The children were comfortably clad, and clean and tidy looking in their appearance. School is taught on the premises by a resident school-mistress.

The Register of the Institution could not be found, so that I could not check the record of admissions and discharges, nor report upon the manner in which it was kept. The Secretary was instructed to have the book always open for inspection, and the proper form was sent to her.

INFANTS' HOME, TORONTO.

The operations of this Institution for the year ending 30th September, were as follows.—

	Mothers.	Infants.	Total.
Number of Mothers and Infants remaining in the home on 30th September, 1875	4	14	18
Number admitted during the year	55	139	194
Total number in the Home during the year.....	59	153	212
Number of infants that died during year		67	
“ “ “ sent away “ “		55	
“ “ mothers discharged “		44	
Remaining in Home at close of year, 14 mother nurses and 32 infants		46	
			212

The total collective stay of these 59 mother nurses and 153 infants, was equal to 12,140 days, which at two cents per day, would entitle the Home to the sum of \$218.80 for the year 1877.

Statutory inspection was made of the Home on the 10th of October. The Managers have leased a roomy and rather well-arranged house on the corner of Yonge and Bloor Streets, very well adapted for the purposes of the Home, and a very great improvement on the premises previously occupied. It is most desirable, however, that all charitable institutions in receipt of Government aid should own the property they occupy, in order that permanency and stability may characterize their operations, and that structural alterations and additions may take place when required.

The house throughout, although in want of repairs, was as clean and well kept as could be expected in such an Institution.

There were 32 infants in the Home, and 12 mothers of infants who acted as nurses. The House was capable of giving accommodation to 40 infants and the requisite staff of nurses and domestics.

As the Register was not open for inspection at the house, I was unable to comment upon the operations.

MAGDALEN ASYLUM, TORONTO.

The operations of this Asylum for the year were as follows, viz., number of inmates remaining in the House at the close of last year, 28; admitted this year, 56; making a total of 84 who were under lodgment during the year. Of this number 1 died, and 33 remained in residence on the 30th September.

The collective period of residence of these 84 inmates of the Asylum, was 11,576 days, which under sec. 3, sub-section C, of the Charity Aid Act of 1874, would entitle the Asylum to receive \$231.52 for the year 1877.

Statutory inspection was made of this Institution on 10th October, when 31 women were found as inmates. Many of them were confirmed prostitutes, not a few of whom, doubtless, sought and obtained admission to the Asylum from selfish motives; while others, it is to be hoped, entered with a sincere desire to reform their lives. There were others who, although fallen from virtue, had not yet entered upon a life of prostitution. Both of these classes of women were associated together in the same dormitories and work-rooms. If the object of this Asylum is the reclamation of fallen women, and not merely a temporary refuge, then the very first principles which should govern the Managers in their laudable efforts are being ignored; for without a complete separation of these

classes, and the introduction of a perfect system of classification, the work will not only be fruitless, but, as long as the indiscriminate association of the depraved prostitute with the unfortunate woman who has only once fallen, and is seeking assistance and counsel to keep her from prostitution, is allowed, reformation is next to impossible.

I can fully appreciate the difficulties that have to be encountered in the work that the Lady Managers of this Asylum have undertaken, but I conceive that the Asylum can accomplish little, if anything, as a reformatory, in the permanent reclamation of fallen women under the present system. As a refuge for fallen women it is an admirably conducted Institution.

The House was scrupulously clean and neat throughout.

Family washing and sewing are the only industries in which the women are engaged. Owing to the absence of the matron, I could not see the Register.

HOME FOR THE FRIENDLESS, HAMILTON.

During the past year 40 women were admitted to this Magdalen Asylum, who along with 9 that remained in the House at the close of the preceding year, made 49 inmates lodged during the year. Of this number 2 died, and 13 remained in the Asylum on 30th September last. These 49 inmates were in residence for a collective period equal to 4,130 days, which at 2 cents per day, would entitle the Asylum to receive the sum of \$82.60 for the year 1877.

Statutory inspection of this Institution was made on the 13th September. There were 9 inmates in the House, but as the matron was away on leave of absence, and I could find no Register, I could make no examination of the record of admissions and discharges, or of the operations of the House. The managers were requested to have these books always in the Board-room, in order that an inspection could be made of them; and a copy of the form required by Government was sent for the information and guidance of the Board.

From inquiries I made I found that nearly all the inmates in residence on the date of inspection were re-admissions. This is of frequent occurrence, and I fear, furnishes proof that the good accomplished by these homes is only of a transitory character, and that application for re-admission is prompted very frequently by a very selfish motive, and not by an earnest desire to reform. Compulsory detention might effect some good in such instances.

A good deal of washing of the finer description is performed by the inmates, which is the only industry, except keeping the house clean and in order.

MAGDALEN ASYLUM, OTTAWA.

The operations of this Asylum, in respect to the movement of inmates, were as follows, viz: remaining at the close of last year, 78; admitted during the past year, 58; making a total of 136, who were under lodgment during the year. Of this number 51 were discharged, 1 died, and 84 remained in the Asylum at the close of the year. These 136 inmates resided in the House for an aggregate period of 28,686 days, which, under the provisions of the Charity Aid Act, would entitle the House to receive \$573.72, for the year 1877.

This Asylum was visited by Mr. Seoble on the 26th August, who reported as follows:— I visited the Magdalen Asylum in this city, conducted by the Sisters of the Good Shepherd. The inmates of the Institution are of three classes: 1st, the *entrants*, who are women off the streets, and taken from the gaol, and who pass a period of probation in the Institution; 2nd, penitents, who are women of the former class, who have, after six months' residence, evinced a desire to lead a moral life; 3rd, the children of women of a degraded class, who are taken into the Institution to prevent their leading a life of crime.

At the time of my visit there were in residence 25 *entrants*, 24 penitents, 30 children, 79 inmates.

The buildings at present occupied are not of a suitable class, and are very much crowded in the dormitories. There is, however, a handsome stone building in course of erection, which will meet all the requirements of the Institution.

The work done in the Institution is principally fine laundry work, knitting, sewing, &c. The children receive instruction daily.

The buildings were scrupulously clean, and every attention seemed to be paid to the wants of the inmates.

No register or books are kept.

CONCLUSION.

Owing to the establishment of two new institutions, the Appendix to the Report of this year is more voluminous than hitherto. It contains the following documents, viz. :— The Reports of the Medical Superintendents of the Asylums for the Insane at Toronto, London, Kingston, Hamilton, and of the Asylum for Idiots at Orillia.

These Reports, together with the statistical tables attached thereto, furnish information in regard to the movements of inmates and the general operations of the respective Asylums.

There will be also found the Reports of the Principals of the Institutions for the Deaf and Dumb at Belleville, and for the Blind at Brantford, respectively together with those of the physicians to the establishments. Also the Reports of the Wardens of the Central Prison, Toronto, and of the Provincial Reformatory, Penetanguishene, respectively, together with those of the chaplains to those establishments.

I have the honour to be,

Your Excellency's most obedient servant,

JOHN W. LANGMUIR,

Inspector.

Office of the Inspector of Prisons and Public Charities for Ontario,
December, 1876.

APPENDIX TO REPORT

OF

INSPECTOR OF ASYLUMS, PRISONS, &c.,

FOR THE YEAR ENDING 30TH SEPTEMBER, 1876.

REPORT OF THE MEDICAL SUPERINTENDENT OF THE ASYLUM
FOR THE INSANE, TORONTO, FOR THE YEAR ENDING 30TH
SEPTEMBER, 1876.

J. W. LANGMUIR, ESQ.,

Inspector of Asylums, &c.

SIR,—According to instructions received from you on the 15th September, I have the honour to submit the thirty-sixth annual report of this Asylum, up to 30th September, inst. I have departed from the usual method of inserting the customary tables in the text, and have appended them to the remarks recording the requirements, workings, and history of the Institution for the current year. I hope in this way to entice many who should take an interest in our work “to read and inwardly digest” the explanatory notes, to whom tables and figures have no attractions. At the same time it must be remembered that the biting sarcasm of a modern cynical philosopher, who says that “nothing lies like figures,” is not in strict accordance with facts, when applied to the carefully compiled statistics of Asylums. In the conclusions drawn therefrom often lie the fallacies; but no one is responsible for such deductions except the illogical theorist. At the same time such figures are of great interest to theologians, political economists, and specialists. It is to be hoped they will not be overlooked, even if they should not be placed before them in the most inviting way.

Repairs and Alterations.

During the present year a dumb waiter has been erected through the central part of the main building. The provisions for the use of three tables were formerly carried by hand, up one, two and three flights of stairs, from distant kitchens in the basement, involving a great amount of labour. The waiter reduces the work greatly, and the cooked victuals are more presentable.

Part of the main drain running parallel to the main building, on the south side, fell in when spring opened, and a considerable section had to be replaced with sound bricks. Several of the branch drains running from the building into the main were also found in a bad condition, and the walls of brick where discovered to be dilapidated were replaced by tiles in a substantial manner.

The faulty construction of the water closets in the wings, has been the cause, since their erection, of much discomfort, and the source of disease. The work of tearing down and rebuilding according to a more rational sanitary plan, has been done by our own employees, in

the east wing, under my supervision. The former arrangement consisted of one main perpendicular soil pipe put through the building from base to garret. It had inserted into it, on the different stories, the exit pipes of all the closets. At the bottom of this upright tube was inserted a syphon trap to prevent the gases of the main drain from ascending into the main building, but there was no provision for preventing the foul emanations generated on the sides of the pipes from always filling the tubes and infecting the air of the several wards into which they entered. These outlets are always coated more or less with faecal accumulations. The consequence was, that not only was there a never ceasing discharge of putrescent air, but when fluids were poured in, and occupied necessarily for a short time the lower part of the upright tube, by a natural law of displacement, the foul air was shot upwards with a rush into the rooms and corridors. The pipes for outflow of water from the sinks, baths, and *water tanks* enter the soil pipes *untrapped*. The foul air rushes upward into these rooms, and especially over the surface of large reservoirs containing water for domestic purposes. How long would pure water remain so if set in a vessel on a seat of an untrapped water-closet? In spite of constant flushing and the maintenance of the utmost cleanliness, the nostrils could always detect foulness in the adjacent atmosphere. To obviate this difficulty it was found necessary to take out the trap near the drain, to allow the free outflow of fluids. An S trap was put immediately under each closet pan. A ventilating tube from the upper edge of each pan was run into the nearest chimney. The one shut off all the foul air from the closets, and the other freed the respective closets of any which might accumulate in each room from neglect to properly flush the several pans. It is difficult to describe the two methods in words; suffice it to say, that the result has been highly satisfactory. Under the former arrangement, the sinks for furnishing necessary water to the various wards were in the same rooms as the water-closets. The pipes inserted to carry away the overflow ran through an adjacent partition, and between the floor and ceiling almost on a dead level. As might have been expected, constant leakage took place in this horizontal section, and kept ceilings as well as walls wet from the percolation of water. The destruction of the wood work of that section of the building throughout all its stories, and the unhealthy vapours from decaying and saturated timber made these compartments, as well as the corridors, unhealthy. The sinks have been placed in the bath-rooms, near the baths. The horizontal pipes have been removed, being now unnecessary. Baths, closet-pans, sinks are near the perpendicular pipes which lead into the main drain. The floors and joists in these bath-rooms and closets, including three in the main building have been relaid, such to the comfort of the patients.

The walls of the different landings and stairways in the main entrance and upwards have been painted. The rooms occupied by the different officers have either been papered or painted. Wards No. 5 and 6 have been painted in the corridors, and two sitting-rooms in each. The large sitting-room in No. 5 has been papered. It is used by paying patients. The colours are light and add much to the cheerful appearance of the sections renovated.

The stables, driving house, and granary have been roofed with slate, instead of the old shingle roof which had become leaky and rotten. This improvement gives a greater security against fire, not to speak of its comparative economy in the end.

The foundation of the south and east sides of the bakery has sunk. It seems to have been built on an unstable substratum, with the usual results. The walls have swayed outwards to such an extent as to become dangerous, and have been propped up from the outside with ungainly timbers, to prevent their falling into ruins. It is possible that brick buttresses built on the outside might make the walls secure, if not the walls must be taken down, and a better foundation sought for. The concrete floor, being made on the sand has settled in sections, and is broken into fragments whose surfaces show a variety of angles. The floor of the basement in the main building needs renewing. On the underside the timber and flooring are rotten, and on the upper worn so much as to be dangerous. This floor is that put down 30 years ago.

When referring to these slight structural changes it will not be out of place to note the gloomy entrance of such a substantial and fine pile of buildings. The original design intended the main entrance door to enter on the first floor, from a landing approached by two substantial flights of stone steps. This foundation was to have been protected by a roof supported by costly and elaborate pillars of stone. That design has not been carried out, but if the landing only could be erected, so as to make the entrance where it was originally intended, it would materially improve the appearance of the front part, and give cheer-

fulness to the corridor within, most desirable to patients being admitted for the first time, whose ideas of a mad house are usually of the most gloomy kind. The existing arrangement compels all who enter the main building through any of the doors to descend several steps into a cellar passage not by any means conducive to exaltation of spirits. The cost would not be much, and the advantage would more than compensate for the outlay.

There are seven kitchens in operation in different parts of the building. Under the best management, the necessary waste must be far greater than would be in one large kitchen, built on the more improved plan of modern construction, and heated by steam. The wholesale grocer has little waste in comparison to the retail, because his sales require little division of supplies. The kitchen that does a wholesale business in cooking victuals has very little more waste than any moderately sized kitchen, for the larger proportion of loss is in minute distribution of raw material. It is scarcely necessary to add that a small amount of difference daily, between one common kitchen and seven small ones, means a considerable sum total of lost value yearly, when multiplied by 365 days. But that is not the only objection to the existing plan. All the cooking stoves use wood. They consume 200 cords of hard-wood per annum, at an average price of \$5.00 per cord, viz., \$1,000 of fuel each year. An improved range, heated by steam that can be economised for other purposes after serving the kitchen, would reduce the heating expense to a minimum. Seven cooks and four scullery maids are now required for the different kitchens; with an improved cooking range, four cooks and two scullery maids could do the same work, with greater ease than at present. That would make a monthly saving of the wages of three cooks and two scullery maids, amounting to \$43.00, or an annual reduction of \$516.00. I am sure these changes would effect a saving each year of at least \$400.00, and I cannot urge too strongly that needed erections should be completed at an early day. A reduction from these sources would far more than compensate, in one year, for the outlay, because a "penny saved is a penny gained."

In the quadrangle are four unsightly wooden sheds, in close proximity to one another and to the main building. They are as dry and combustible as tinder. In the autumn and early winter 1,000 tons of coal and 200 cords of wood are "stowed away" here. I need scarcely say that a fire in them would put in great danger the buildings. In fact, it may be safely said that the destruction of the former by fire, means the consumption of the latter. Such a large quantity of fuel, not to speak of the erections themselves, would literally roast out the whole establishment, if such a disaster should take place. These sheds are only 40 feet from the wings, 103 feet from the main building; and the wooden sheds are 24 feet from those containing coal. Brick sheds could easily be erected near the south wall, sufficiently far away to be safe, and easy of access.

Discharges.

The discharges of the current year are considerably above the average, but this can be accounted for, in the first place, by the large number of warrant cases, who came under treatment, while suffering from recent attacks. In other words, the cases of disease had not become chronic and incurable. In the second place, a number were sent from gaols who might have been set at liberty without transfer here. Several were cases of dipsomania; they got on a drunken spree; they became the victims of dissipation, and were seized with *delirium tremens*. If they did not see snakes in their boots, or his Satanic Majesty prowling about the house corners, they had other hallucinations or illusions of the senses. The friends are anxious to get such in "durance vile" out of the way; doctors are called in to consign him to limbo, with pens which are mightier than pills; the victim of the bottle recites the story of his sights and sounds; he performs a few fantastic tricks, and is trundled off to prison. He finally finds his way to an asylum under warrant, but long before this time, because of enforced total abstinence, he has been restored to a sound mind, if not to sound habits, and if not a criminal, should have been set at liberty. It will be observed in the tabulated statement that a considerable number was those afflicted with puerperal mania, consequent on child-bed fever, of whom a large percentage speedily recover. This may be said of all recent cases. Insanity in its incipency is as amenable to treatment as any other disease, and as large a proportion recover. This is the experience of all specialists, whose testimony might be quoted almost to an indefinite extent, corroborating this statement. It shows the importance of friends at once consigning their insane to asylum treatment, and

the responsibility they incur in nursing such at home, until the cases become chronic, incurable and hopeless. The State is not guiltless, if from want of proper and efficient accommodation it allows those over whom it has legislative control, to become a permanent burden on the people, who might when properly cared for, again become active, industrious, and useful members of society.

By referring to the tables, it will be seen that the discharges this year amount to the large number of 106 cured, and 6 improved, of these only two returned to us from relapse. When it is considered that at least seven-eighths of the inmates are chronic cases, in fact the filterings of a series of years, and that the large majority of recoveries must necessarily be among those who are recently admitted, it will be seen that 297 were admitted during the year. The recoveries have been nearly 36 per cent. of that number, and even taking chronic cases in the calculation this year, one-sixth of the whole have been discharged as cured or improved. No stronger argument need be adduced of the importance of putting recent cases at the early stage under asylum treatment. The history of the Institution corroborates this fact, of as many comparative recoveries from recent cases, but from so many vacancies occurring this year, the recoveries are proportionately larger.

Pay Patients.

It will be observed in the financial statement that there has been a large increase in the revenue from paying patients during the current year. On the female side, the superior paying ward has been full for the greater part of the time, and often more applied for admission into this ward than could be accommodated; such were temporarily located in other parts of the building (by the consent of friends,) waiting for a vacancy. The superior male ward has not been crowded to this extent, but has been well filled. These wards are fairly comfortable and cheap at \$4.00 per week. This sum scarcely pays for board and lodgings of patients, not to speak of medical attendance. These wards only hold twenty-four patients each. Those who pay less are accommodated in two other wards. A considerable number of persons applying to have relatives admitted, being in comfortable circumstances, were willing to pay from \$6.00 to \$10.00 per week, if better furnished rooms, more comforts, and *isolated lodgings* were furnished to their friends. The residence in the large building, so prison-like, is always repugnant to such, and if wealthy, or even well-to-do, they send their friends to "retreats," in the United States, when, if proper accommodation could be provided nearer home, of a superior kind, they would be sent here for treatment. The central location would make this point accessible from all parts of the Province. Our east and west hospitals are used for quiet patients, but they could easily be provided for elsewhere, and those substantial separate edifices could be used for extra-paying patients, by the addition of dormitories, and a proper furnishing of rooms, in keeping with the purpose indicated. They are finely situated among the trees of the lawn, and are well adapted for comfortable and quiet asylum treatment. Thirty dormitories attached to each hospital would be sufficient for a beginning, and the financial results would satisfactorily warrant the investment. It would be a great comfort to Canadians to have their suffering relatives within visiting distance of their homes, instead of being obliged to send them to a foreign country, to seek relief and comforts not supplied in this Dominion. It is easy to show that it would pay, were I to urge it on that low ground. The sums received from year to year for paying patients have been gradually augmenting, and if extended accommodation were furnished, a goodly income would be the result. In the financial year 1868-69, there was received \$5,573.10, and in the current year, \$17,189.00. We cannot realise much more *per annum* from paying patients, for lack of more extended accommodation, unless by raising the rate per week for the occupants now in the Asylum. This would not be advisable, for the paying wards now in use meet the wants of a large class of our population who are in moderate circumstances, and not able to pay for comfort and space that would readily be accepted by those in affluence, to whom money is no object. There is still remaining a considerable sum in arrears on current year, more than was proportionately due last year at the same time, and this is due largely to the hard times. If the usual payments had been made at the customary time, the receipts would have been at least \$2,000 *mo.e.* Of course this sum will swell the amount paid up for next year, but it is not available at present.

Protection from Fire.

Fire would make swift progress, if unfortunately it got mastery in the building; although the main part is substantially built, and the wings fairly constructed, and notwithstanding the structural precautions in the shape of iron doors, brick walls and partitions, as well as a thick layer of mortar between the floors and subjacent ceilings. The dumb waiters are wooden shafts running through all the stories; the dust flues; and the bed shafts and wooden stair passages perforate the building throughout, lined with wood. A spark from the pipe of an inmate in the basement, or an ignited match among the straw bedding, however keenly watched and strictly forbidden, would be blown with a fierce draught up these flues to the topmost story, with a force equal to a furnace. It would devour the wooden casings on its way upward, and with our meagre means of extinction, would be uncontrollable. These avenues of possible destruction, not to say tragedy, are causes of great anxiety to myself, both night and day. To remedy these obvious defects, it is recommended that the walls of these shafts be constructed of brick, or sheet iron, with outlets at the top to ensure perfect safety. There is a reel of hose in every corridor; but as the reservoir in the dome holds only 12,000 gallons of water, and those on the wings are proportionately small, it is evident that were they full the supply would soon be exhausted in a conflagration. The distance of the Asylum from the quarters of any of the city Fire Companies, is considerable. The time required to reach us would necessarily be sufficient to allow the most disastrous results. Fire extinguishers in every corridor are required to ensure comparative safety, and their presence would relieve my mind of the constant dread of a calamity, with no adequate means at hand to avert it.

Visitors.

One of the many annoyances a Superintendent has to endure, is the continual demand of the general public to see the Asylum, and, as a matter of course, the inmates. It is a public Institution, and it is the privilege of the British subject, if he should happen to be "a free and independent elector" to look upon an Asylum to the support of which he has contributed his mite of taxes, as a huge menagerie, erected for the purpose of gratifying his morbid curiosity. It is a matter of secondary importance to such, that a daily influx of visitors to the wards causes undue excitement, and retards the recovery of the afflicted under treatment. If Paul Pry should be refused, he threatens an appeal to "our member," and a complaint to Government about the audacious conduct of Asylum officials. He pretends to think that there must be "ways that are dark," and corruption lurking in an Institution within whose walls he is not privileged to air his importance, and carry off his budget of news, gathered from the mad utterances of ones "more unfortunate," so that their babblings may be the gossips of a country side. His inspection often consists of a view of a clean floor, and taking attendants for patients. It is necessary he should look through the wards for the benefit of Her Majesty's liege subjects, lest any of them should be immured in dungeons, chained to stone walls, loaded with iron manacles, or illegally detained by designing knaves outside. It never enters the noddles of such visitors how they would like *their* fathers or mothers, sisters or brothers, wives or dear friends to be stared at from day to day, and made the object of jeer, jest, or jollity from ignorance, or hard heartedness. Not having the fear of these before my eyes, and believing that my first duty was the care of the patients committed to my charge, not only in the employment of every legitimate means for their recovery at my command, but also in the prevention of aught detrimental to them, I imposed strict regulations to prevent needless visitations. Many relatives and friends possessed of good judgment would come to visit patients, sometimes from long distances, but learning that their appearance might injure them, by exciting longings for home, or in stirring up emotions not desirable, have returned home without seeing them, after providing for their comfort, if in a financial position to do so. It is a pity the same could not be said of all who have been warned of the evil consequences of visiting excited lunatics at periods when their language and conduct could give no comfort to any one. It is a pleasure to conduct relatives to see such, when they are quiet, improving, or restored to soundness of mind. Those having such claims, or sent by them, and professional men having scientific objects in view, are al-

ways welcome under these conditions and considerations which must commend themselves to every thoughtful and well-minded person. None were more grateful for this check upon sight-seers than a majority of the patients themselves. It is often pitiful to see them hiding in corners, closets, bed rooms, or any other available place when strangers are approaching in order to avoid their gaze and questionings. They know their sad condition, and naturally desire to flee from the presence of the gaping multitude of curiosity hunters. My stringent rules may have brought displeasure upon my head, but not from the merciful and christian visitor. The grounds are always open to the public during the day time, and are much admired by citizens and strangers, who look upon them as one of the sights of the city.

Amusements.

During the winter months, and well into the summer, the patients were entertained weekly, with concerts, readings, and dramatic performances on every Monday evening. Each Friday evening there was a dance, which was enjoyed by the patients who were able to attend. The attendants were also benefited, for these evenings helped to relieve the tedium and monotony of the wards, consequent on incessant supervision of those under their charge. The different City Choirs kindly came to our assistance. Three Dramatic Companies freely gave their time and talents. Several professional singers charmed us with their vocal powers. Members of our staff, with outside assistance, gave three performances, and two dissolving views. These entertainments made an excellent programme for the winter. Henry Cameron, Esq., of the city, acted as secretary, and to his energy is largely due our success in securing so much talent. He has the thanks and gratitude of all who were recipients of his kindness. A new piano of excellent tone has been purchased for the concert room, to supersede one whose days of service had nearly ended. Four hundred and fifty-four books were purchased for the library. The sum total of volumes in use is nine hundred, consisting of books relating to history, biography, science, travels, and the higher class of light literature. To keep this small number up to the requirements of the patients, at least fifty volumes are required annually. It is impossible to estimate the great benefits derived from these sources of amusement, instruction, and recreation. The ministry "to a mind diseased" by all lawful auxiliaries within reach, can never be estimated at their true value, because the benefits are not immediately evident; but the diversion of the mind towards anything external to itself is a great boon, and a powerful remedial agent for good, especially to those afflicted with melancholia and monomania, that

"Which crazed King Lear,
The continual racking of the brain
With one idea,

Bad Water.

When the Spring began to open, typhoid fever broke out simultaneously in the Asylum and Central Prison. Both Institutions are supplied from the same source, at the western outlet of the Bay. An examination of the water showed that it was full of animal impurities. It needed no chemical process to do this. The putrescent water that stood only for a few hours could be detected by not overly sensitive nostrils. The unusually large quantity of sediment found in a vessel containing water taken from our reservoir, consisted to a large extent of organic matter, and doubtless was supplied from the sewers of the city, with the addition of the fluid extract of a dead-horse, and of a few dogs floating in the Bay, when spring dissolved their icy coverings. The sewers from this Asylum, and from the Central Prison empty into the Bay about 250 yards from where we procure our supply. The city sewage also enters the Bay at different points in front of the city, making in the aggregate a continual flowing river of filth. A few drops of dirty water will defile a bucket full of it. It need not be stated what must be the condition of a small land-locked sheet of water like that of the Bay, with a stream of pollution pouring into it night and day, of sufficient volume to drive the machinery of a dozen grist mills. In winter time when ice covers this enclosure, the still water below becomes a cess-pool, and continues in that state for months. There are only two comparatively small and shallow outlets into the lake. At this cold

season of the year the wind has no influence to move out this impregnated body of water. There is no ebbing and flowing tide, as at the seaboard, to do the work of scavengers. The impurities of the city lie at the bottom of the Bay, or are in a state of solution above the foully deposit. When spring comes, and the ice disappears, the wind and waves stir up the noisavory compound. The germs of disease are carried back to their fountain; there is "death in the pot;" the air becomes impregnated with the impure exhalations, to the destruction of precious lives. It is a well established fact that water apparently too pure for the chemist to detect any foulness in, may still be loaded with causes of disease. The rice water evacuations of cholera patients, may be deluted to such an extent that no impurities can be detected after the most searching examination, but still are capable of generating that particular disease. The experiments of medical men of high repute, show that in all probability vaccine matter cannot be diluted sufficiently to render it incapable of inoculation. That indefinable organic matter which is known to generate disease according to its kind, can have its watery vehicle augmented until this seed can only be present to an infinitesimal extent, and still it will have the potency to propagate communicable disease. It is a matter of experiment that living organisms will exist and flourish under conditions of heat and cold, that were long supposed to be antagonistic to vitality. If atmospheric or artificial influences are favourable, a small quantity of sewage charged with specific germs of disease will produce a luxuriant crop. When unusual mortality takes possession of the city, and especially of our crowded and mammoth Institutions, then it will be discovered, that "some one has blundered" when too late to avert a calamity consequent upon the violation of sanitary laws. In a direct line southerly from the Asylum, the open lake can be reached, at a distance no greater than at present. Here much purer water can be obtained at a moderate cost, but in a matter of life and death pecuniary expenditure should be of secondary consideration. This is of vital importance, and doubtless will receive from the proper authorities the attention it deserves. So detrimental to health is the water, that since the fever broke out, the patients are not allowed to use the Bay water for drinking purposes. We have several wells, and our supply from these sources, although limited in quantity, has contributed greatly to our comfort and health. Immediately after we refrained from using lake water, the fever subsided, and in a few weeks disappeared.

Visit to United States.

The visits made to Asylums in the United States, and the attendance at the discussions which took place during the sittings of the Association of Medical Superintendents of Asylums held at Philadelphia on June 9th, 10th, 11th, 12th, and 13th, proved not only pleasant but profitable. The public Asylums at Washington, Baltimore, Philadelphia, New York, and Utica were inspected, and through the uniform kindness of the officers of these different Institutions a good insight was obtained of their organization and economies. No two of them were alike in these respects, and a majority of them had excellent features which were of interest, and by a species of eclecticism the commendable of each could be profitably copied. This Asylum has much in its executive arrangement equal to that of our energetic and intelligent neighbours. None of the seven Asylums visited had as fine a pile of buildings externally as those of this Asylum. It is a pity the same could not be said of its internal fittings. In this the contrast was most marked. In all but two of those Institutions the comfort of the patients was greatly enhanced by superior ranges for cooking, steam laundries of the most approved design in structure, appliances, and ventilation, by means of pans driven by steam, as well as heating by the same process. Bedsteads, bureaus, carpets, sofas, pictures, statuary, apparatus for amusements, gymnasia, &c., were all appropriate, excellent in design, and superior in quality. Liberal though our legislators have been in providing accommodation and comfort for all our afflicted, yet much remains to be done in this respect to enable us to approximate in excellency, with communities no wealthier *per capita* than the Province of Ontario.

Certificates of Insanity.

Medical practitioners too often forget that the Superintendent of an Asylum cannot admit a patient of whose insanity three medical men have certified to, not only based upon the statements of other observers, but, also upon *specific acts* perceived by them selves.

from which they would infer unsoundness of mind. The statutory certificates filled up by the medical examiners require these two principal items of information about the patient. On these two classes of observed facts they form an opinion of the insanity of the individual examined, and of the desirability or otherwise of confining such in an Asylum. The Superintendent must base his judgment of the mental state of the individual so charged by these credentials, before admission; and is responsible to the subject, as well as amenable to law, if he admits and retains any who are not insane, especially if the certificates are not sufficiently definite, or are too ambiguous to warrant committal for insanity. It would be ludicrous, were it not so provoking, to have the certificates of insanity filled up with vague generalities which might be predicated with genuine fitness of every adult son and daughter of Adam. Those subjoined are a few choice specimens upon the reception of which I was expected to incarcerate the parties charged; and which could be applied with equal propriety to the writers even were they Solons or Bacons. I give the answers in full under the important heading of facts observed by the medical men, and in all, they recommend Asylum treatment based on these loose statements. How many of these medical men would like to file these Bills of Charges in a Court of Justice, or recite them in a witness box, and ask that lunacy be recorded against the person thus accused, founded on such premises?

I am well aware it is sometimes difficult to extract facts from those who are sullenly taciturn, or subject to melancholy, and in whom no overt or unusual conduct is observed. It is but just to the writers to say that none of that class are included in the following examples culled out of hundreds which might be adduced. They are inserted for the purpose of preventing repetition. Of course these are the worst examples I could find, and are in striking contrast to the majority of certificates sent by the members of a profession second to none in intelligence and acuteness of observation.

In answer to the question,

"Facts indicating insanity observed by myself," the following replies were received:

1. "Disposed to fuddle in water and slop around the house, working the door and washing the clothes."
2. "He refused to allow me to feel his pulse, and in a loud peremptory manner ordered me to get away from him. Refused to talk to me about his health."
3. "Peculiar manner and demeanour."
4. "From his conduct, and from the fact of his having been in an Asylum before."
5. "In answer to all my questions he merely replied "a Scotchman is always a Scotchman."
6. "From the eyes I would infer that there is some disease of the brain. His emaciated condition."
7. "Personal acquaintance."
8. "Personal appearances. Fretful disposition. Peculiar manner."

It might not be improper to say here, that the existing method of sending patients to Gaol, and then to Asylums from thence, is not satisfactory. When the Lieutenant-Governor's Warrant is received by a Sheriff to transfer a patient from his keeping to an Asylum, the Superintendent is notified of it, and a statutory form containing a history of the patient is sent, being filled out by the committing Justice. Many of the questions that require to be answered are medical, and cannot have the blanks satisfactorily filled up but by a professional man. For example, very few magistrates can answer the following medical queries, for the simple reason that the bodily diseases to which they refer are seldom matters of study or observation outside of medical circles.

(12.) Whether the prisoner is subject to epilepsy or paralysis?

(13.) Whether the prisoner has been subject to any bodily ailments, and if so, their nature.

(17.) Whether the prisoner is idiotic, imbecile, or incurable.

The justice who can answer these intelligently should receive a license to practice medicine, especially if well versed on the *incurability* of the insane. Either all medical men should be made justices, or all magistrates should be made medical men, in order to answer these questions in a proper manner. The medical certificates of insanity, on the strength of which the Lieutenant-Governor's Warrant is issued and commitment to Gaol takes place, are not seen by those in charge of Asylums. The warrant compels admission when a vacancy occurs, and the above mentioned history is all the information a Superintendent receives

about the patient sent. The ordinary admissions are much more satisfactory. The friends of other than warrant patients must produce three medical certificates, and bearing date "within three months of the time of admission." The warrant order on the other hand, requires us to receive patients, without being in possession of any evidence of insanity beyond the general history referred to until the mental state is ascertained in time and by observation, yet the records of Asylum authorities testify that many of these have been several years in prison, and if they had been re-examined medically at the end of a definite time, a large percentage might have been returned to relatives or friends without the trouble, expense, and chagrin consequent on Asylum confinement, and which to many is a matter of much social importance. The medical certificates first obtained, should be forwarded with the history as in non-warrant cases; but the patient should be re-examined by qualified men when about to be transferred to an Asylum, if the person has been confined longer than three months, and set at liberty if sane, as provided by statute, or if not, these certificates should precede the patient to his new abode. The medical testimony is very important to those in charge, for the purpose of classification, but is wanting in all warrant cases, and the absence of something definite about the peculiarities, and it may be, dangerous tendencies of those recently admitted from Gaol, is a source of much anxiety to those in whose charge they have been placed.

Warrant Patients.

On account of the Inebriate Asylum at Hamilton having been changed into an insane Asylum for the quiet and incurable, one hundred and thirty-six of our inmates were sent there. The vacancies were filled up from those insane who found temporary lodgings in the Gaols of the Province. Some of them had been confined in prison cells for years, and a large portion was unruly and turbulent. These came in by instalments to enable us to classify according to their condition. I feel it my duty to state that a large number of these were delivered into my care tied with ropes, and manacled with irons like savage beasts would be. Some had large ulcers on the wrists and ankles, as many as seven being on the two wrists of one person, from the chafing of the handcuffs. Another had burns on the hands, and large ulcers on the back. Several were brought in a dying condition, so helpless that it was found necessary to carry them into the wards, only to die in a few days after admission. Such should never have been removed; long journeys only precipitated their death. A number was covered with vermin: dirty in person and clothing. In some sections in the Province soap must be dear and water scarce. The idea seems to prevail even among Gaol officials, that insane persons must be tied up and cribbed lest manslaughter ensue, forgetting that kindness is never lost on the worst of these objects of pity, and that undue restraint only aggravates the evil, by unnecessarily irritating those, who would otherwise never have become excited and violent. It is gratifying to state that although an addition of nearly one-fourth of the whole number of inmates was admitted within the months of March, April, May, and June, no unusual difficulty was found in putting them under proper treatment, supervision, and classification. I reported to you at once the deplorable state of the warrant patients referred to, and it is pleasing to record that the energetic action taken by you resulted in the dismissal of several Gaol officers, also led to an improvement in the condition of those sent here since that time.

Although this Asylum has been temporarily relieved by the exodus of a comparatively small number to Hamilton, already it is rapidly filling, as the tables of admissions testify. The Gaols, whence a large proportion of the new arrivals come, are being occupied largely by this class, as a temporary refuge until provided for in Asylums. In a year from this time the cry will be for more room, but in the majority of cases it will be in vain. The poor creatures must lie for months and years in prison cells, not intended nor adapted for the accommodation of such. Philanthropy demands that provision should be made in time for this ever increasing class in a manner commensurate with its need. It is a work of years to erect suitable structures, and I cannot refrain from sounding a warning note, which I am sure will be attentively listened to, and carefully considered by those legislators who have the weal of the commonwealth in their keeping. We have a pléthoric public purse, and while millions are being devoted to other public works, a few thousands expended in this way must always be a noble contribution to a work of mercy, that in the mysterious ways of Pro-

vidence may prove a boon to us or our friends in a dark hour, which may come like "a thief in the night."

One of the three ways to provide the increased space required might be adopted (1) by adding wings to the present building; (2) by building cottages in the grounds for the most tractable patients, such as are now domiciled in our detached hospitals; (3) by erecting another Asylum. Much might be said in the favour of the first two, but the third plan would be in the end most satisfactory. The city is spreading on all sides of these premises, with all the noise consequent from streets and houses. Three railroads and King Street run through our farm, and it seems another will do so soon, with possibly sheds, station, &c., erected near by. A fourth now skirts the southern boundary. The trains and shrieking locomotives keep up a concert night and day, more forcible than melodious, much to the disquietude of our patients, especially recent arrivals, who are not accustomed to such dismal choruses, and whose sleep is disturbed thereby. It is possible a migration must be made from these commodious buildings at some distant day. If any lands could be found suitable in close proximity to the city, and a beginning made by the erection of a wing for males, say of sufficient size to accommodate 300, a step in the direction of permanent removal could be made, and the necessary adornment, tillage, drainage, fencing, &c. could be commenced by means of the labour of patients. Property is now cheaper than it ever can be expected again, in proximity to a growing city like Toronto. A purchase of this kind with its erections would give additional room, and at the same time would only be necessary expenditure in a permanent location. Out of that number sufficient labour could be utilized to such an extent as to be beneficial to the health of the patients, and at the same time contribute largely towards their maintenance. For a few years one wing of this branch Asylum could be occupied by males, and by these the lands could be efficiently worked, leaving one wing and the main building for females, until finally the sexes could be cared for in two distinct buildings. My limited experience teaches me that a separation of the males and females into two distinct buildings would be preferable in many respects. Wherever this plan has been adopted it has succeeded as might be expected. Dr. Nichols, "President of the Association of Medical Superintendents of the U.S." says in his report of 1875.

"The treatment of the insane patients of both sexes in the same connected structure is attended with many embarrassments, occasionally, in spite of all precautions, with serious evils, and is a source of unremitting anxiety to the officers of institutions of this class. The liberty of both sexes, but especially that of the females, is necessarily much restricted by their exercise in the same grounds; and in addition to the unsuitable acquaintances that will spring up between the sexes when treated in contiguous buildings, sometimes attended with ultimate consequences much to be deplored, the surveillance necessary to render their proximity to each other as innocuous as possible is a source of considerable irritation and ill feeling on the part of those who are the most needful of it." The Board of Visitors and Superintendent have given the important question of the most suitable manner of enlarging the hospital much consideration, and for the reasons that have now been briefly set forth, they earnestly recommend the erection of a separate hospital edifice for the female patients. The patients of each sex could enjoy as much liberty and derive as much benefit from exercise in the air as the individual cases would be capable of, without the liability of the augmentations of morbid sexual susceptibilities, to the formation of unsuitable acquaintances, and to one of the irritations of restraint which must always, more or less, attend their proximity in the same buildings and grounds. At the Pennsylvania Hospital for the Insane, in the city of Philadelphia; at the New York City Lunatic Asylum, on the islands in the East River; and the Michigan State Asylum for the Insane, at Kalamazoo, provision has been made for the treatment of the sexes in separate buildings, and the conductors of these Institutions bear the strongest testimony to the unqualified advantages of such separation. Dr. Thomas S. Kirkbride, the very distinguished Superintendent of the Pennsylvania Hospital for the Insane, writes the Superintendent of this Institution—"We have now had sixteen years experience of a separation of the sexes. We have found only advantages in the arrangement, and nothing would induce us to go back to the old plan of having both sexes in the same building. Of the advantages of the plan, it seems to me, there can be no doubt, and I am inclined to think that in the end it will be found more economical than any other."

Elopements.

The elopers for the year were six. Unfortunately, one of these was found drowned in the lake a week after he escaped from the Asylum. It is impossible to say whether his death was the result of accident or by suicide. He had always been quiet, and seemed contented, and at the time of his escape was with a working party on the farm outside of the walls. The jury, at the inquest, returned a verdict, "Found drowned."

Three of the others were much improved in mind, and would soon have been discharged. They were allowed a good deal of liberty, and took advantage of it to go home when the opportunity offered. I think it better to give out-door exercise and a reasonable latitude without strict prison-like *surveillance* to the improved and quiet patients, even if one occasionally escapes, than to keep such in constant confinement for fear of a few elopements. Three of those were traced to their homes, but they were found to be harmless and contented, and allowed to remain with their friends.

Deaths.

The mortality of the past year has been large, numbering as high as seventy-one. This is attributable to the fact that the year has proved unusually severe on the aged, not only in our public institutions, but also among the general population. It will be seen in the appended tables that a large number of deaths is among the old people. The sending to Hamilton of 136 patients, who were comparatively healthy, necessitated a large proportionate residue, who were of weakly constitutions, or on the sick list. A quarter of those well were deducted from the balance of healthy and sick together, so it is evidence that a much larger percentage of the remainder must be more liable to die than if those transferred had remained, and few warrant cases had been sent in their stead.

In the place of these sent away, I received a large number from the gaols who were in the physical condition I have mentioned elsewhere. A number of these died shortly after admission when delivered to my care. Twenty-eight of these who died were admitted during the current year. In other words, over a third of all the deaths were among recent admissions, and some were residents for only a few days, or weeks at the most, before death put an end to their misery.

Among the deaths were a number of old patients. Reg. No. 1871, was aged 68 years; residence in Asylum, 18 years 6 months 6 days. Reg. No. 1486, aged 65; residence in Asylum, 21 years 10 months 12 days. Reg. No. 1541, aged 62 years; residence in Asylum, 21 years, 7 months 16 days. Reg. No. 514, aged 68 years; residence in Asylum, 28 years 4 months 14 days. Reg. No. 998 was a well-known character, who had a residence of 25 years 7 months 13 days. She had murdered her husband, and doubtless was insane at the time. Since her admission she has been quiet and harmless, showing at no time of her residence murderous propensities. She was a great reader of the Bible, but her study of the Scriptures was to a great part mechanical.

Reg. No. 4234 had the delusion that she had no mouth, and consequently could not eat. She had to be fed with a tube for several weeks, and at last the stomach-pump had to be resorted to. She was fed with milk, eggs and a little whiskey in this way for four months and a day, but at last died from dysentery. I am not aware of any one having been kept alive before for such a length of time by the same means. It is not for me to say that physiologists are in error in making saliva so indispensable to digestion, but it is certain that no saliva could mingle with her food at the time of injection, and that it could only be supplied in small quantities by deglutition.

Farm.

The farming operations of the year have been carried on as successfully as formerly. The wet spring, followed by a long drought in July and August, did considerable injury to the crops. In comparison with the agricultural prospects in the country around us, we perhaps, should not complain. The Hungarian grass and Indian corn were only an average crop, and did not turn out nearly as well as last year. The quality of the potato crop is excellent; but the continuous dry weather at a critical time, diminished the number and

size of the tubers. An "irrepressible conflict" was carried on against the industrious and destructive potato bug. The popular antidote, Paris Green, could not be used on account of its poisonous properties, but patients were furnished with tin pails. The potato fields were turned into a gymnasium, and bushel after bushel of the enemy was captured. In spite of our vigorous daily assaults, they did us some injury, but the yield will be an average crop. The oats and hay are splendid crops. A field of hay was purchased for use. Our own labour cut and housed it. It is possible we may not need all the fodder, but it is economy to buy cheaply in the fall, and if the hay should not be required, it can be sold to advantage in the spring. If the winter should happen to be severe, and of the usual duration, our stock will need it all. The details of our farming operations will be seen in another part of the report. The proceeds of the farm, as will be seen from Steward's report, amounted in value to \$11,537.91.

There is a total of about 160 acres of land, of this at least 20 acres are ornamental. King Street has been extended through the farm, and has taken from us a wide strip of our most arable land. Including our pasturage there is not more than 135 acres under cultivation, and it is no boast to say, considering the unpropitious season, the appended amount of valuable farm products will compare favourably with the best tilled farms of the Province. Of the above amount \$495 was realized from pork, and \$112 from rye sold, the products of 1875, but disposed of after last year's returns were made. This system of crediting such amounts to current year being annually adopted, the two sides of the equation is approximately correct in comparing one year with the other.

Expenses per Head.

By looking at the Bursar's Statement, it will be seen that the expense per head for this year is \$133.51, against \$129.42 last year. This increase is more apparent than real, and is not due to any *per capita* augmentation of expenditure, but is sunk in the ordinary running cost of the establishment, with a smaller average number of patients. The transfer to Hamilton left us for several months, and even up to the present date, with vacancies, that did not occur last year. This gave us less months to feed, and fewer to clothe, but that is the only reduction. The salaries, consumption of fuel, general repairs, usual tear and wear, &c., are the same with one number as the other. Our daily average in 1876 is 317, and that of 1875 was 350. The keeping of 33 patients during the year would be much less proportionately than would a corresponding reduction (were it possible) of the necessary running expenses. The whole machinery has to be kept in motion to the same extent for the smaller number as for the larger. A boarding-house can keep twenty persons at a cheaper rate per head than half that number on the same principle.

The expenditure for 1875 was \$84,125. That of the current year is \$82,382, or \$1,743 less than last year. The cost of the 33 patients that would be required to equal last year at this year's average, if residents during the whole year, would be \$4,405.83. If we deduct the difference of the expenditure mentioned above, this sum would be \$2,662.83, the amount required to pay extra current expenses, with 33 patients less to supervise and provide for. In other words, the expenses last year and this year, if the Asylum had remained full, would have been nearly the same, and should be this year, less the cost of feeding and clothing 33 patients to make the full complement. It will be seen that to divide the annual expenditure by the 350 in the one year, and only 317 in the following, makes an erroneous quotient in calculating the cost per patient. The \$17,189.48 received for paying patients, and the \$1,950.94 from sales, will reduce the actual total outlay from the public treasury annually per patient to \$103.95. Of course it will be understood that this sum is applied to all current expenses, and that the actual personal expenditure of each patient for food and clothing (less the consumption of the products of the farm), must necessarily be much less per head than above sum.

Divine Service.

Divine Service has been held very regularly throughout the year. The Church of England supplied us on the mornings of Sunday, and one of the other religious bodies in the afternoons. It need scarcely be said that all these services have been highly appreciated by the inmates. To all ministers who so freely came to our aid during the past year, the heart-

felt thanks of this community is due. Provost Whitaker and the Rev. William Reid, who kindly undertook to correspond with those ministers who had volunteered their services, have my thanks for their labour of love. These religious services were eagerly looked forward to from week to week, and were productive of good results. The Clergy of the Roman Catholic Church hold no regular service in the building, but I find them ready to visit, by night or day, any members of their Church who are in need of their services, and the sick or dying of that Communion have always manifested thankfulness for the spontaneous visitations.

Telegraph Office.

A Telegraph Office was opened last spring, in the building, and has been found of great service to us. Under the former order of things, messages were sent to a city office, the nearest being some distance off, and a messenger carried the telegram to its destination. For this service he was paid the usual *bonus* as ear hire. If a dispatch for us reached the city late in the evening it was often next morning before it was delivered. On the other hand, in order to send a message away, a servant had to be sent to a city office to deliver a telegraphic order, and there was no assurance then that it would be sent away in time to be of service. In a large Institution like this, where bodily sickness is often suddenly fatal on account of the large number of fit cases and of those afflicted with chronic disease, it is a great comfort to be able to telegraph at once to friends in the city or at a distance, the condition of patients thus situated. A good deal of ordinary business is done by the wires in a more expeditious and satisfactory manner than by mail. The Montreal Company laid the wires, furnished the necessary instruments, and sent an instructor to teach the younger members of the staff free of charge. Now all of them can send and receive messages with considerable skill and dexterity. The Company has not lost pecuniarily by the new arrangement.

It would be a great service to us to have throughout the buildings electric calls such as are in hotels, and in many of the new asylums recently erected. They save many a weary step necessarily taken by attendants when their presence is required in different parts of the building and hospitals. This will be readily understood when it is known that the main building is 523 feet in length, and from four to six stories in height. The wings attached are 190 feet in length, and four stories high. The Hospitals are 209 and 250 feet respectively from the wings, and could be cheaply connected with the main building, by underground wires. The whole apparatus would not cost more than \$175. To an ordinary reader, a number of these requirements may seem insignificant, but it needs only a limited experience of large establishments to know that in details of apparently minor importance success depends. Those of greater importance are few, but the so-called insignificant "littles" are legion, and in the aggregate materially affect the whole organization for better or worse. A screw loose and unattended to will in the end bring destruction to the best machinery.

Newspapers and Periodicals.

The following newspapers and periodicals have been sent gratuitously.

Toronto <i>Leader</i>	Weekly.	Algoma <i>Pioneer</i>	Weekly.
London <i>Herald</i>	Daily.	<i>Christian Advocate</i>	"
Chatham <i>Planet</i>	Tri-weekly.	<i>Chronicle and News</i>	"
Ottawa <i>Citizen</i>	Weekly.	Elora <i>Lightning Express</i>	"
Woodstock <i>Review</i>	"	<i>Canada Statesman</i>	"
Woodstock <i>Times</i>	"	Peterboro' <i>Review</i>	"
<i>Christian Guardian</i>	"	Montreal <i>Witness</i> (2 copies)	"
Guelph <i>Mercury</i>	"	<i>Evangelical Churchman</i>	"
Guelph <i>Herald</i>	"	<i>Canada Presbyterian</i>	"
Galt <i>Reporter</i>	"	Paris <i>Star</i>	"
Stratford <i>Beacon</i>	"	<i>Journal of Education</i>	"
Stratford <i>Herald</i>	"	Collingwood <i>Enterprise</i>	"
Berlin <i>Telegraph</i>	"		

All the papers above-mentioned, have been sent free, with the exception of the Toronto dailies. If the proprietors of these newspapers could only see the avidity with which they

are read, especially those published in the different sections, whence the patients come, and containing local news, they would be amply rewarded for their kindness. At the same time, these papers should be paid for, on the same principle as we pay for our flour, beef, and groceries. Editors do not live on ambrosia, however angelic they may be, and in justice should receive the subscription prices as they do from other readers, and on behalf of other public Institutions. A number on the free list have been sent for a quarter of a century. Dues for the past will not be expected, but it is a commercial transaction, and when value is received, remuneration should follow. The proprietors have my thanks for their generous donations.

On the second day of March, Mr. D. H. Mooney, Bursar, came to a melancholy end by drowning. On account of his genial, kindly disposition, he was a general favourite. On the 12th day of June, Mr. James Henry, Steward, died, after a comparatively short illness. He had been a faithful servant for over seventeen years. He gave no eye service, but was found at his post early and late, doing his utmost to make his department a success. Mr. Thos. J. Tracey has been appointed Bursar, and Mr. Allan McLean, Steward. The above is a summary of the changes and work of the year. It will be seen that these are numerous, in respect to structural arrangements, internal economy, and officers. It has been to me a year of anxiety, care, and labour. Throughout the 365 days of the year, the responsible head of an Institution of this kind has no freedom, night or day, from the burdens which belong to a trying position. It is a great satisfaction to me to say that the different officers in their varied relations, have seconded all my efforts in the most efficient manner; and especially is this true of Dr. Metcalf, Assistant-Superintendent, who had sole charge of the Asylum for several months before my incumbency on the 26th of last December.

Before closing this Report, I feel it my duty to thank you for your kindly assistance and generous support in every effort made to increase the efficiency of this Asylum. Dr. Workman, my distinguished predecessor for twenty-two years, has given me valuable advice from time to time, on matters which need experience to unravel in connection with this mystery of mysteries.

I have the honour to be, Sir, your obedient servant,
 DANIEL CLARK, M.D.,
Medical Superintendent.

TABLE No. 1.

Showing movements of patients in the Asylum for the official year ending 30th Sept., 1876.

	Male.	Female.	Total.
Remaining, October 1st, 1875.....	337	322	659
Admitted during year:—			
By Lieutenant-Governor's Warrant.....	91	68	159

LONDON ASYLUM.

REPORT OF MEDICAL SUPERINTENDENT,

AND

STATISTICAL INFORMATION, 1875-6.

LONDON ASYLUM,

October 1st, 1875.

To J. W. LANGMUIR, ESQ.,

Inspector of Asylums

For the Province of Ontario.

SIR,—I present my Report for the year ending September 30th, 1876. It is brief, and I have not thought it necessary to repeat the recommendation of improvements mentioned in the Reports of former years.

They are still waiting for authority and money to do them, and are more urgently necessary than they were last year. I will name them:—

Coal sheds, chimneys, cottages, extension of buildings, roof repairs, flooring hardwood, windows, &c.

Water and sewage are now in the hands of the Board of Works, with every prospect of completion in reasonable time. With the hope that all repairs and buildings necessary to make this Asylum complete will be finished next year, and close for ever the capital account, I will proceed with my remarks on the operations of the Asylum during the past year.

The admissions during the past year have been 112—males, 60; females, 52.

The discharges cured and improved, males, 22; females, 13; while two of each have been discharged not improved, shewing 31.240 per cent. cured and improved.

The deaths have been 32—males, 22; females, 10; on a total under treatment of 705, or 4.53 per cent.

The average residence of the 35 cured and improved would be a little less than a year; individually extending from two months to more than three years.

If the account given by relatives could be depended upon, it would be seen that the duration of the disorder before admission corresponded with the duration of residence before discharged cured. But the statements on admission papers cannot be relied upon to justify a table, only to show approximately that speedy admission means speedy cure.

For speedy cure, more accommodation is needed. There has been no case calling for any special remark amongst the admissions. Cases of paresis have increased in the admissions, and the table of deaths shows that paresis has been the cause of three deaths. There are other cases about to die.

For a few years there were no admissions of paretic cases into this Asylum, and one year was entirely free from deaths by this disease. Since that time the cases have been numerous. One woman is now in the house, paretic.

There has been one inquest on an old man, who was accidentally scalded while in the bath; but the medical evidence before the coroner, and the verdict of the jury, went to show that the cause of death was extensive disease in the brain and the lungs, and the scalding ad nothing to do with the death, as the skin was healed again, except in one place, and there had never been any shock to the system in the medical sense.

But there was no doubt that the attendant in charge of the bath was guilty of carelessness at the time, and neglect of instructions most fully laid down for his direction in the use of hot water. In all cases of carelessness their cause is that long immunity from harm leads to the belief that harm will never come. I have to repeat the same caution at intervals,

whether anything has given occasion for the repetition or not, for all Asylum officers, from the Chief to the lowest, never know when, in spite of every caution, accidents or misfortunes will occur. I think every precaution is taken in this Asylum that rules, cautions, and vigilance can provide.

Fifty patients have been transferred to other Asylums. Amongst these are six idiots sent to the new Idiot Asylum at Orillia, and in addition to the fifty are the idiots hitherto in the building called "Idiot Asylum" on these grounds.

I am glad they are gone where attention can be given to their peculiar wants in an institution fitted as far as I know for training and teaching them.

Amongst the transfers, is one criminal, a man who killed his wife, and was sent to the Asylum for observation.

He was arraigned at the Assizes at Simcoe, and the Judge referred him to the Jury to report on his mental state.

The Jury on medical testimony said he was insane, and by warrant he was sent here.

After three months' observation of him and a thorough examination into his mental history for eight years, I came to the conclusion that he is not insane, and sent to you a report giving the evidence and the reasons on which that opinion is founded.

I have also caused an examination of temperature of the body to be taken in order to compare his with that of parietic and dementia cases, the two diseases he was said to suffer under. The result shows that his temperature does not accord with either, but more nearly coincides with that of the healthy men taken at the same time. This must be taken as only corroborative evidence of insanity, but not warranting conclusions of itself. The table of temperature is annexed. It presents curious results as regards paresis.

But so few cases justify no positive conclusions. More examinations must be made before any general positive statements can be hazarded. This is one of those difficult cases of feigned diseases requiring much consideration and the utmost attention a Physician can give. And, however certain the Physician may be of the justice and correctness of his own conclusions, he need not feel surprised if other men should differ from him. I am, therefore, glad that he is transferred to another Asylum for more observation. Of the 112 admissions, no less than 43 males and 39 females, total 82, are recorded, on the admission papers and certificates, as dangerous to others, homicidal, or suicidal. The Physicians are, until they become acquainted with the admissions, obliged to act on the information of the papers. They have, therefore, to provide fitting rooms and associations for all these dangerous patients when they present themselves.

If the accommodations of the Asylum are considered by you, can you be surprised at the opportunity I have displayed in reports and letters addressed to you to obtain accommodation for patients of this kind which will enable us to classify them properly. I have been compelled to place many of them together in the same ward, with the result of quarrels, fighting, and injury, and without the power of doubling our attendants. In this Asylum, up to 1874, no patients were ever under restraint, but I am sorry to say that since that year overcrowding of violent patients has compelled me to put the worst into muffs. Two are occasionally muffed, but if the extension of the building that was used for idiots should be built next year, all necessity for restraints will be done away with. There are few improvements so needed as this extension. The plans as they have been designed and sent to you will work well and remedy the evils of this crowded Asylum. Once more when they are completed, classification will be possible, and avoidance of restraint certain without an increase of ordinary staff.

Officers.

The Officers of this Asylum continue to do the work in harmony with each other, every one striving to do the allotted duty with efficiency. Your quarterly minutes bear witness to the satisfactory performance of duties by all. I have, however, to regret the death of Mr. Davey, the store-keeper during the past year. He was a most efficient storekeeper and telegraph operator. His loss has not been replaced, and, besides, our telegraph communication with the rest of the Province has entirely ceased. It ought to be renewed as it is in every

respect a loss to the Asylum. I have shewn you in my letter on this subject that it interferes with admissions, deaths, and business, and throws delay and difficulty over every branch of administration.

In the Toronto Asylum I am informed that the young pupils are operators. There is no school of medicine in London whence to obtain pupils who can work in the Asylum and continue attendance on lectures during their Asylum residence. Pupils cannot be had here even if they were very desirable acquisitions, for there is no inducement for them to enter on this branch of the profession in the utter hopelessness of promotion, however well qualified they may be. I have to congratulate you on the possession of so active and able an Assistant Physician, as Dr. Burgess, who was appointed second Assistant Physician in the early part of the official year. With Dr. Lett, whose abilities I have often recorded, and Dr. Burgess I am fortunately provided, and the Government is to be congratulated in having such officers who merit at their hands better remuneration than they receive, and higher offices than it seems they are likely to obtain.

The work of the Matron has been well done.

Engineer's work is named under the head of work done in the Asylum. No institution has a more efficient engineer or carpenter.

The Asylum is obliged to the Episcopal clergy of the city who share amongst them the Sunday services, and who have done this kind duty without remuneration. I feel very thankful to them.

Estimates.

The Bursar has made estimates for the ensuing year according to your request. I have gone over them with him, and embodied in them the additions to wages necessitated by the times. The revival of the oil business in this district has created a demand for engineers and stokers who can run an engine and attend to a boiler, and the wages given in London and Petrolia will withdraw our men unless they are increased \$5 00 per month. This increase is put in the estimates. The Bricklayer is also placed on the estimates, at \$550 00, instead of \$600 00, as one will be required until the Asylum is gradually rebuilt, so bad is the workmanship of this Institution. The Carpenter is also put at an estimate of \$550 00, to equalise him with other Institutions, and because he is a sober, industrious and intelligent man, equal to any work that can be required of him. The estimates are based on a population of 620. Both the Bursar and myself beg to state that the maintenance can be provided for on these estimates, and that they admit of no reduction, without throwing part of the expenditure of the year on the succeeding year. We call your attention to the fact that we have sent you estimates for the last three years, and that every year our estimates have been cut down about \$3,000 00, and every year a debt has been borne by the succeeding year to about the amount so cut down. This year we have strictly balanced the sum asked for, with the sum needed, and we have to state that if the sum asked for is granted, it will be sufficient to meet all expenditures and leave the Asylum clear of obligations to be borne by the next year.

We also present to you an estimate of the materials needed in furniture, bedding, and ornamentation, to renew worn-out stock, and to bring the internal decorations of the Asylum up to the level of other Asylums for similar classes of patients on this continent. I have accompanied this statement with a letter, showing the details of alterations in the pay list, and the reasons for them.

Amusements.

I am indebted this year to the London Musical Union for an admirable concert given to the patients, and much enjoyed by them. I have some patients and some attendants able to form a band, and I have asked you for a grant to buy instruments and a small sum for instruction. I have so often pointed out the deficiencies of our amusements, and the difficulty of devising amusements for such a chronic class of patients as there are here, that I trust the addition of a band will recommend itself to you as a means of entertainment valuable to the Asylum.

I regret I have no visit from our liberal and esteemed friend, Mr. Cool Burgess, this year. Gifts, except of old periodicals, we have had none this year. We are open to gifts of all benevolent liberal men.

It has been found better to pay for newspapers and journals than to importune proprietors of newspapers for gifts of their industry which they are no more bound to present to us than the ironmongers, or grocers, or wine dealers are bound to give out of their stock.

Dietary.

I have been asked to record the diet list. It is difficult, because it varies weekly, but I print a sample for one week, September 3rd. According to the productions of the farm, there are sent into the house fruit for supper or tomatoes, or lettuces, or radishes or young onions in their season. All the small fruits, as strawberries, gooseberries, currants, raspberries, of which our garden sends in many hundred quarts, are consumed by the house, and are not preserved for winter consumption. We buy for that purpose. This year the apple crop affords a large supply for suppers, so that the diet list as now given, by no means represents the variety the patients enjoy, nor is the diet invariable through the year. In the autumn and winter we kill about 200 pigs which are consumed as fresh pork. Prunes and raisins are bought for stews for supper in large quantities, the first by the ton, as they are needed. I think the dietary is as good as can be needed in any Asylum for patients who are wholly provided for by the Government. It cannot be said that they are underfed. If diet will cure, our cures ought to be in excess of many other Asylums, but they are not, and it still remains an obscure question, what will afford the largest percentage of cures in Asylums, phisic or hygiene.

TABLE OF DIET.

Breakfast.

Cold Meat every day or hash for the working men ; Bread and butter every day.

Supper.

Monday.....	Stewed Apples.
Tuesday.....	Stewed Prunes.
Wednesday—No. 1 Dining room—	Rolls, with butter.
“ No. 2 “	Baked Apples.
Thursday.....	Buns.
Friday—No. 1 Dining room.....	Baked Apples
“ “ 2 “	Rolls, with butter.
Saturday.....	Stewed Apples.
Sunday—	Bread and butter every day for supper and breakfast ; Tea and Coffee every morning and evening.

Dinners.

Sunday	Meat, stew Potatoes.
Monday	Corned Beef, Cabbage, Beets, Potatoes.
Tuesday	Roast Beef, Potatoes, Bread-pudding.
Wednesday.....	Boiled Beef, Potatoes, Tomatoes.
Thursday	Lo bseons, Baked Bread Pudding.
Friday.....	Boiled Beef, Fish, Potatoes, Tomatoes, Rice and Syrup.
Saturday.....	Roast Beef, Potatoes, Bread-pudding.

Visits.

The Asylum was favoured with a visit by His Honour the Lieutenant-Governor of the Province, accompanied by the Provincial Secretary, last November. More visits were promised, but the honour then conferred was the last, and I am afraid the Asy'um will not have the advantage of obtaining further inspection from the high officials of the Province. But nothing can be more useful to the Institution or more advantageous to the officers, than frequent visits from ministers and members of the Legislature. Our wants would be sifted, our merits recorded, and our deficiencies censured ; and in all respects the public would be assured that the benevolent Institutions they are taxed to support, are properly managed.

Nothing but full information given to the public will establish confidence in the officers of Institutions, and enable them to obtain freely and liberally the funds necessary for their support. It is therefore to be lamented that these visits are so seldom paid.

Probation.

The number of patients sent out on probation during this year is 29, of whom only one has been returned to the Asylum.

Work.

I have not every year given the amount of work done by the patients and the few persons who are employed to overlook and teach them and help them. But as it has been said that the amount of work done does not equal that of other Asylums, I now give the details of the past year. The Table No. 8 shows that 6,227 articles have been made in the sewing-room, and 7,923 repaired. The particular articles are named in the Table. 440 yards of rag carpet prepared.

Table No. 9 shows that in the wards, 728 articles have been made; 27,574 articles have been repaired by patients on the wards. 360 lbs. of wool spun, and cotton also prepared, which the patients have used in making 505 pairs of stockings, and 1,070 pairs of socks, other socks repaired, making a total of 1,730, presenting a total of 9,185 articles made, and 37,277 repaired in this Asylum.

In the laundry, 243,385 articles have been washed, and only 195 have been lost, and those chiefly small things, like socks and collars. This is the female work of the Asylum, done by 197 female patients.

The males have kept the farm and garden in order as usual, and the tables of produce exhibit the results, to which I refer you. In addition to the ordinary work, the patients have dug and filled in again a trench for gas-pipes of 1,370 yards in length, and opened the old trench of 500 yards to take up the old gas-pipe. They have made box and other drains, 140 yards; placed 1,000 feet of boards at the bottom of the garden fence, and carted 200 loads of clay to the fence. They have hauled 70,000 feet of lumber from town; 216 loads of ice; moved 2,000 tons of earth twice; transplanted 560 trees; moved and put down again 500 yards of wire fence, with posts; and planted 1,477 yards of willow hedge, and kept 20 acres of garden and lawn mown and clean, and; with the help of three gardeners, planted more than 20,000 bedding plants, geraniums, petunias, bulbs, &c., all which were raised on the premises by the gardeners. Sixty acres of grain were kept clean by them, and the produce (amount stated in the Farm Table) raised; 31 acres of roots, as per Table, kept in order, and 70 acres of hay housed, yielding 130 tons.

Green crops and Hungarian Grass in the Table.

The work of men on the wards, in the boiler-houses, has gone on all the time. 1,200 tons of coal carted from the sheds to the engine-houses, 400 cords of wood to the boilers, in the summer, also. Nine corridors, of an average of 80 feet in length and 12 in breadth have been floored with hardwood, and the same ceiled with pine, by our own men and by patients—the same have been painted. Four dining-rooms have been floored, ceiled and painted. In this carpenter work, one extra man was hired for four months. The whole of the water-closets have been taken out and replaced with water-tanks, 18 in number, by our own men, which has entirely removed all offensive smells from the building.

The boilers have been repaired, and the kitchen steaming apparatus, and the washing-machines, by our own men. The basement of the Asylum has been cleaned. This last work required the assistance of three hired labourers.

The whole of this work has been done by 166 male patients and their attendants. Total working patients, 303, out of 626 average population.

I think few Asylums can show a better record of work or exhibit grounds kept in better order, and not one on the continent that I have seen has a larger or more attractive flower garden, in which patients and all employed find a pleasure during the summer.

The addition of a few summer-houses will be found pleasant, and when the necessary improvements to buildings are completed, they can be made by our own men.

With good attendants, work can be obtained from patients. It is somewhat remarkable that we so seldom have shoemakers able to follow their trade, even in the small matter of repairing boots and shoes. Tailors are also rare inmates, and hardly more than two have ever been useful to the Asylum; therefore, in the matter of trades, this Asylum makes a poor exhibition. Perhaps trained men might be had to teach those who never had a trade, but the resulting articles would be of small value in workmanship, and dearer, on the whole, to the Asylum than those articles bought from the contractors. Trades learnt by insane are not economical, and patients can be employed otherwise.

R. MATHISON,
Bursar.

Farm and Garden.

The summer commenced with great promise of very abundant crops of all kinds of produce. Up to the end of June dropping rains continued to fall and everything gladdened the farmer's hopes. But then there came a change and no rain fell in this district for nearly two months. The Hay turned out a large crop of good quality.

The Oats and Barley looked well, the straw plentiful and the grain heading well; but the black oats became rusty and yielded not more than from 30 to 35 bushels, light in weight, and not looking healthy.

The Barley was exceedingly light. The "White Australian" Oat, obtained from Mr. Weld of the *Farmer's Advocate*, was an excellent crop, 45 bushels to the acre, free from rust, with beautiful white straw.

Mangolds, a plentiful crop, but smaller than usual. The same with carrots. Turnips good but not full sized.

Potatoes in number abundant, only not half a crop in weight; 14 acres only yielding 1,800 bushels. As many more will have to be bought next year for house use. The green crops used for cattle feed were good. Hungarian grass good. The Garden was productive in small fruits, Apples and Pears—the Plums a total failure. Vegetables very inferior both in crop and quality. Cabbages miserable, about 30,000 were planted and not more than one-fifth survived. The loss was owing to the ravages of some caterpillar which the learned entomologists distinguish by a long aristocratic name, and they tell us all about its origin and anatomy, and its tastes for useful vegetables. But all they can say about the method of meeting its depredations is, "When you catch him, kill him." It is to be hoped the useful gentlemen who comprise the association will direct their attention to some method of destroying the pests that now make gardening an expensive luxury. The apple and other fruit trees have been troubled with some disease, which, as Dean Swift foretold in his own case, begins to kill at the top. The extremities of the branches become blackened and withered, and then extending to the trunk, the tree dies. We have lost a large number of trees which will have to be replaced next year.

Here again science is at a loss, and cannot inform us how to cure. Our flower garden, notwithstanding the largest number of annuals ever planted, looked worse than it ever has in former years. This disastrous season bore as hard on flowers as on farm produce. The ornamental grounds, on the whole, looked exceedingly well, owing to the attention and care the gardeners bestowed upon them. The farm and garden, notwithstanding the bad season, exhibit a balance in the Asylum favour of \$5,878.22. If the labour of patients at the estimate of last year \$3,000 is deducted, the profit of the year is \$2,878.22.

REPORT
OF THE
MEDICAL SUPERINTENDENT
OF
ROCKWOOD ASYLUM, KINGSTON,
IN REGARD TO ONTARIO PATIENTS.

KINGSTON, ONT., October 7th, 1876.

J. W. LANGMUIR, Esq.,
Inspector of Asylums, &c.,
for the Province of Ontario.

SIR.—I am reminded by you that the time has arrived for me to present another Annual Report on the movements of the Ontario patients in this Asylum for the year ending 30th September, 1876.

In comparing the tables in the Report for the year ending 30th September, 1875, with the present one, I find the figures under the different divisions approximate very closely, which is readily accounted for by the very large preponderance in the number of incurable cases in the Asylum occupying room, a portion of which could be vastly more profitably devoted to acute cases.

The following table exhibits the respective numbers in the two years:—

	1875.	1876.
Under treatment during the year	400	401
Died during the year	14	14
Discharged during the year	23	21
Remaining at end of year	362	337
Transferred to Hamilton Asylum, end of year		28

The acute cases to be sent in lieu of the chronic ones transferred to Hamilton have not yet arrived, hence the disparity in numbers of those remaining at the end of two years.

The removals of chronic and incurable cases into a separate Asylum will increase the efficiency in a marked degree of the three principal Asylums now in the Province, as thereby those Asylums will be enabled to receive a larger number of cases in the acute stage, when the results of treatment will be vastly more successful.

Last year I indulged the hope that before another Annual Report would be presented, this Asylum would have passed into the hands of the Province, where all the usual topics discussed in reports of this sort could be introduced. However, I am still a Dominion officer, and cannot, therefore, report to the Provincial Government on the general requirements of the Asylum or the particulars of expenditure for different purposes. I sincerely hope, however, that a decision will soon be arrived at, as there are several things to be done that are absolutely essential, and that will not safely admit of postponement much longer, but which I fear will not be undertaken until after it will be decided whether this Asylum will continue the property of the Dominion or be transferred to the Province.

The usual tables will be found appended.

I have the honour to be, Sir,

Your obedient servant,

JOHN R. DICKSON, M.D., F.R.C.S.E.,

Medical Superintendent.

REPORT

OF THE

MEDICAL SUPERINTENDENT

OF THE

Asylum for the Insane, Hamilton.

To J. W. LANGMUIR, ESQ.,
Inspector of Asylums and Prisons.

Receiving Patients.

SIR.—This Asylum was opened for the reception of patients on the 17th day of March of this year. From that date until the present time, we have received the following patients on the dates shown in the table. Of these patients, 6 have died, 3 have been returned to London, 202 are at present resident in the Asylum.

Total received to September 30th.....		86	125	211

Deaths.

Of those which died, 4 were men and 2 women. Of those returned to London, all three were women. Of those remaining in the Asylum therefore, 82 are men, and 120 women. The six deaths were as follows:—

Name.	Whence admitted.	Date admitted.	Date of death.	Cause of death.
J. H.	Toronto,	March 23rd,	May 6th.	Exh'n. of Epileptic Mania.
C. J.	“	April 8th,	June 16th.	Senile decay.
J. M.	London,	June 1st,	“ 18th.	Phthisis.
A. McM.	“	“	“ 25th.	“
S. D.	Toronto,	May 3rd,	July 7th.	“
L. S.	“	April 8th,	Sept. 19th.	Serious effusion on brain.

Three of the female patients received from London were returned to that Asylum, because they were not fit patients to be kept in this one, being either so filthy in their habits, or so destructive, that they required to be kept at night in small and strong dormitories, and during the day in halls of which the walls were all stone or brick.

This Asylum is now fully occupied; we have a patient in every bed, and there is not room to make up any more beds.

Nature of Building.

This building, as it is at present, cannot be used except as an Asylum for mild, chronic, and for the most part, incurable cases; as it is neither properly planned, nor strongly enough built for acute or violent cases. To make this building really useful, its capacity should be at least doubled by additions properly constructed and planned for acute cases. The present building could then always be kept full by draughting into it from the new halls such patients as it is fitted to be occupied by. The Asylum also, by being enlarged to the extent proposed, could be much more economically managed than at present, as the same staff which is occupied now with the care of two hundred patients could attend just as well (the number of servants being increased) double or more than double that number.

Fences, need of.

No fence has as yet been constructed about the ground belonging to this Asylum. The want of this fence has been severely felt; several patients have escaped from the Asylum who would not have got away had we had a proper fence, and though we succeeded in finding them all again, it was at the expense of a great deal of trouble and anxiety, as well as a little money. As we need a fence to keep our patients in, so we have very much felt the want of one to keep the public out, especially on Sundays; we have frequently had as many as a hundred boys and men about the Asylum at one time, and have often had a good deal of trouble to keep the crowd away from the patients; they climb on the airing-court fences; crowd about the wind ws; talk to the patients through the windows; and they have even come into the house, and walked about it until they were sent out. Besides these inconveniences from the want of a fence, we have not of course been able to put in any crop, or plant any trees, and as the fence is not yet begun, and I suppose cannot now be begun until next spring, I am afraid we shall not be able to put in any crop, or plant any trees during the season of 1877. Not only can we put in no crop and plant no trees for want of a fence, but we can make no use of some eighty acres of excellent pasture. From fifty to one hundred cows and horses belonging to people who live in the neighbourhood, run over our ground and eat our pasture, while we buy our milk at an average cost of a first-rate cow every month.

Work done and Doing.

I do not think it necessary to say much about work done and changes made at the Asylum before the 17th of March, the day upon which we received our first patients. Before taking patients, several changes were found necessary; a room was added to the Superintendent's apartments, and a bath and water-closet constructed for his family. A bedroom from the adjoining hall was annexed to the Assistant Superintendent's sitting-room, by means of breaking a door through the wall. A dispensary was joined to the general office in the same way. Store-rooms were fitted up for the Bursar, Matron, and chief males, and chief female attendants. China closets were built in the dining-rooms, sinks set up, and hot and cold water laid on, and many other smaller changes were made.

The chief, almost the only use that we have made of our labour so far since opening the Asylum has been, in the first place, as soon as the frost was out of the ground to dig up stumps and clean up the airing-courts and the ground about the building, and then, as soon as the necessary surveys were made and an understanding had with the Public Works Department, to employ it upon the construction of a road from the top of James Street hill to the front door of the Asylum, a distance of about a third of a mile. We have employed all the labour that we could spare outside the building upon this road since the first of July, and have made considerable progress; two large culverts have been built under the road, the grading is almost all done, and six inches of coarse stone has been laid on about two-thirds of its length. Besides this, more than half enough stone to over-lay the six inches of coarse stone three inches deep, is quarried and broken ready to put on. Should we have favourable weather for the work, I hope to complete the work by the end of the year. In the plan of the road furnished to me by the Public Works Department a side-walk is laid down; this is, of course, a necessity to us, and as the Public Works Department has included it in their

plan I can hardly be wrong in supposing that they will build it. I mention it here to say that it might be gone on with almost at once; at all events by the time the job can be given out, and the man taking it is ready to go to work, we shall be ready for him. We shall be put to a good deal of inconvenience if the sidewalk is not built before the winter.

Asylum Locks.

We did have for some time after we began receiving patients a good deal of difficulty with our locks. We had about fifty different kinds of locks throughout the building when we ought to have had only one kind; the difficulty was attempted to be met in the first place by the use of master keys, three of which opened all the doors, but this plan not being found to answer at all, as it was not easy to tell which key to use for a given door, and not always easy to open the door with the key when you had found the right one, the locks themselves were altered so as all to open with one master key; in this way the difficulty has been surmounted to a certain extent, but not wholly, for the key which we have to use being a master or skeleton key, it has to be made very light and consequently is very liable to break, as the accounts of our locksmith, Mr. Hennesy, will show. Then it has seemed impossible to make all the locks exactly alike, and so in going through the building with any one key one occasionally comes to a door that he cannot open, or perhaps having opened cannot relock. But what I have chiefly to urge against our locks is, that they are not the right kind of lock. An Asylum lock should have no latch—nothing but a spring bolt, so that when a door is shut it is and must be locked, and no key is required to lock it. With such locks, it being no trouble to lock a door, all the doors that should be kept locked are so. But the most important point is, that every closed door being a locked door, there is no chance that doors which ought to be locked shall be left unlocked through inadvertency.

Cooking Range.

When I first took charge of this Asylum, the cooking-range did not do well at all, in fact it took the greater part of a day to cook meat in any of its ovens. I had an Emerson top put on the chimney, and tore down the brick work at the back of the range, and built it up differently so as to make the flues more direct. These changes so improved the draught of the range, that it has done fairly ever since. It still, however, does not draw as well as it should. On the 23rd of September, Mr. Humphrey, of the firm of Bramhall and Deane from which firm we got the range, came to Hamilton, and after enquiring about the range and as to how it was put up, he decided to tear down the back again, and build it up on another plan; this was done under his personal directions. No difference appears to have been made in the draught of the range, however, by this change; it does as it did before, not well but fairly. The fault must be, as I had the honour to report to you before, in the chimney, and it was Mr. Humphrey's opinion that the flue of the chimney, which is about 7 x 9 inches, is not as large as it should be for a range, though it might do well enough for a stove. We shall have to be content with the range as it is now, as long as we continue to use our present kitchen.

Water-tanks, Breakage of.

Although our water-tanks, which are built in the rock close to the Asylum, and into which we pump water from the city for the supply of the Asylum, were repaired in June last; they still leaked in July as much as ever, so that, as I had the honour to report to you at the time, I estimated, after careful measurements extending over a period of seventeen days, that we lost water from there at the rate of about four thousand gallons every twenty-four hours; this loss is, without doubt, still going on, and it adds of course a good deal to the work of our engineer, and increases considerably our consumption of coal at the lower engine-house. If it is impossible, as it seems to be, to make these tanks water-tight, it would surely be good economy in the long run, to put in metallic tanks.

Out-buildings.

Up to the present time we have no out-buildings at this Asylum, except a small stable

barely large enough for four horses, and for a month's feed for them. If we are to make any use of our land and keep what stock it would be profitable for us to keep upon it, we shall need a good-sized barn, a cowstable and cowsheds. It would have been good economy to have had a piggery and henary as soon as the Asylum was opened, and it will still be good economy to have them put up now as soon as convenient, so that we may use the refuse of the food which is now lost. In connection with those out-buildings, as there is no water on the farm except what we pump up from the city, we shall require the water to be carried to the stables by means of a pipe from our present tanks under the roof of the Asylum, running under ground below the front line of the barn, as we could not well water a lot of stock as we water our horses now, by leading them to the back door and giving them water in a tub.

Coal-shed.

Another building very much required here is a coal-shed. At present we have to use a part of the basement for this purpose, it is not large enough for a coal-shed, and is required for other purposes; the space in question can only be approached by the front, and as long as we continue to use it as a coal-shed we can do little or nothing towards laying out and planting the piece of ground in front of the building.

Sewerage.

Even if the number of inmates at this Asylum remains the same as it is now, I believe that before long some other plan than the present one will have to be adopted to carry off our sewage. Should the number of inmates be doubled, I am sure that a different arrangement would have to be made at once. Only a few weeks ago the smell from them was becoming so unbearable that I had a hundred pounds of chloride of lime divided between the three cesspools, and already, since then, the smell from them is, on some days, very noticeable. I believe the proper remedy for this state of things would be to induce the city to build a sewer along Queen Street, where one is greatly needed for city purposes, and prolong that up the mountain to the Asylum. In this way absolutely perfect sewerage could be obtained, and I should not think that the cost would be very great, that is, if the city could be persuaded to construct the sewer nearly or quite to its own limit.

Officers' Houses and Lodges.

Whether or not an addition be built to this Asylum, it is highly desirable, almost necessary, that some buildings be erected for at least some, if not all, of the officers who cannot live in the building. The Bursar should have a house within easy walking distance, otherwise he must have a house for himself, as at present, and even that is not nearly so convenient as it would be to have a house closer to the Asylum. It is scarcely safe to have the Engineer away at night and on Sunday as at present, for should a fire break out, or a large pipe burst, carrying either gas or water, he would be wanted immediately, and from where he lives now it would take nearly or quite an hour to get him to the Asylum. The farmer certainly should have a house upon the premises by the time we begin to cultivate the land. And it would be much more convenient and more economical to have a house close by for the carpenter. Besides these houses, we must have one, and I should much prefer to have two, small houses at the gates, where married attendants would live, whose families would attend the gates, and at which houses, they being away from the Asylum and quiet, the night-watchers could sleep. If the Asylum be enlarged, I think it will be found that the best plan that can be adopted to this end will involve the conversion of the space at present occupied by the Medical Superintendent into a larger dining-room for patients. In this case a house would have to be built for the Medical Superintendent, so that we should require in all—

A house for the Medical Superintendent,

“ “ Bursar,
 “ “ Engineer,
 “ “ Farmer,
 “ “ Carpenter,

And two lodges at the gates.

Steam-pipes.

The steam-pipes in the patients' dormitories should be covered with wire-netting, the same as those in the halls. I am satisfied that if this is not done we shall have some bad cases of burning before the winter is over. The beds are, in nearly every dormitory, placed necessarily close to the pipes, so close that the hand or foot of the patient might come in contact with the hot pipe while he or she was asleep. Not only this, but there is no means of preventing the bedding from occasionally coming in contact with the pipes, and I do not feel at all sure but that the heat of the pipes is sometimes sufficient under certain circumstances to set fire to cotton fabrics.

Bell.

We require a good signal bell to be hung outside the building, to ring the hours for meals, &c., &c. At present we have to get on as well as we can with a hand-bell, which is quite inadequate for the purpose; it gives a great deal of trouble to ring, and is not heard over a sufficient area.

Bedsteads.

Our bedsteads have given us a very great deal of trouble. We have, up to this date, repaired seventy-five (75) of them, and at the present moment out of two hundred and fifteen (215) in use by patients and attendants, two hundred and seven (207) are open in one or more joints, and require refitting. The timber has shrunk in such a way that the pieces of the bedsteads cannot be replaced without being planed down. Mr. Graham (of Brierly & Graham) says that the only way the bedsteads can be put in order is to take them to the shop, take them to pieces, and re-fit them; he says that if this be done next spring, that by that time the timber will be so thoroughly seasoned that they will not again come apart. If we continue to use the bedsteads in their present condition, they will not only continue always to give us a great deal of trouble by coming to pieces, but the open seams will so encourage the production of vermin that it will be impossible to keep them clean. I suppose the firm which furnished the bedsteads could be made to bear the expense of re-fitting them; I am sure it would be nothing more than right that they should do so.

Health of Asylum.

We have great reason to congratulate ourselves upon the health of this establishment so far. I know that the actual site was chosen among other reasons, because it was foreseen that it would be more than ordinarily salubrious. The result has shown the wisdom of the choice made. Of the six deaths we have had, the two patients from London were dying when they were sent here, a third died of old age, and the other three would have died about the time they did wherever they had been; but the healthfulness of the situation is not shown so much by a low death rate as by the increased vigour of the living. A very large proportion of our patients have improved in body or mind or both since coming here, and some very markedly. This improvement is not due to the use of stimulants, of which they get very little, nor to medicines of which they are given still less, but entirely to the healthfulness of the situation, aided by a somewhat more liberal diet than I think they had been used to in the other asylums from which they came.

Improvements.

Should it be found possible to have the fence completed around our land in time to plant trees and cultivate the soil during the summer of 1877, I should very much desire an appropriation for the following purposes:—

1. To buy six or seven hundred trees to plant an avenue from the top of the James St. Hill along the road to the front door.
2. To divide the farm into fields with partition fences.
3. level, lay out, and plant the ornamental part of the grounds.
4. To buy fruit trees, grape vines, currant, gooseberry, raspberry, and strawberry bushes and plants, &c., for an orchard and garden.
5. To buy a waggon, plough and harrows, &c., for the use of the farm.
6. To buy cows, pigs, fowls, &c., to stock the farm.

For all these purposes, including the purchase of the bell above mentioned, I think about three thousand dollars (\$3,000) might be advantageously spent; not, perhaps, all at once, but gradually, as we could do the work of fencing, planting, &c.

I cannot close this, my first annual Report, without expressing my past satisfaction with the appointments that have been made to this Asylum. Every officer in the establishment has seemed not only anxious but determined to do his or her duty to the fullest extent, and in the pleasantest manner. The Bursar has not only done his own duty, as I believe, very thoroughly, but has always been willing to assist me in mine on every occasion in which I have required his advice or assistance. I believe it would be impossible to find a more efficient or a more pleasant assistant than the Assistant Superintendent, and the rest of the staff deserve equal praise.

Under these circumstances, the task of organizing and managing this Asylum has been comparatively easy; and an undertaking entered upon by me with some misgivings, has been so far accomplished with far less difficulty than I had reason to expect to encounter.

All of which is respectfully submitted.

R. M. BUCKE,
Medical Superintendent.

REPORT OF THE SUPERINTENDENT

OF THE

Ontario Asylum for Idiots, Orillia.

JOHN W. LANGMUIR, ESQ.,
Inspector of Asylums, Prisons, &c.,
 Toronto.

SIR,—The Asylum for Idiots at Orillia was opened for the admission of patients on the 5th September last, by the transfer from the idiotic department of the London Asylum of 24 male and 20 female idiots; and up to the date of this report, September 30th, 9 males and 6 females have been admitted from Gaols, making the total number in the Asylum at present date, 59. The returns are necessarily very incomplete, from the fact that in many of the cases transferred from London I have not received any description papers, and in the Gaol cases, no warrant have as yet been received. About two-thirds of the number—male and female—already admitted, are old neglected cases, many of them helpless epileptics, susceptible of little—if any—improvement, but merely requiring the attention and care of a Custodial Institution. The remaining third, and a number of those on my list to whom admission is warranted, but not yet admitted, are capable of some degree of improvement and instruction, and of being much improved in their condition and habits.

The Asylum buildings are very well adapted for, and are furnished with all the necessary convenience for, the purposes of a Custodial Asylum, but the training department must be small and imperfect until more extensive and suitable buildings are erected, and a sufficient extent of good farming land obtained on which to employ and exercise the pupils.

In July last, in obedience to instructions received from you, I visited several Asylums and Institutions for the training of imbeciles and idiots, in the United States. There are now in active operation in the United States ten Idiot Asylums. The first was founded by the Legislature of Massachusetts at Boston, and under the management of Dr. S. G. Howe, in 1848. The Legislature of the State of New York founded an Asylum in 1851, and called to its management Dr. H. B. Wilbur, who had for some years previously conducted a private school at Barre, Mass. Under Dr. Wilbur's very able management, the Institution has for many years been an established success, and from his success and example all the other Asylums for idiots in the States have sprung. The New York Asylum for Idiots at Syracuse is a very handsome building, in the Italian style of architecture, surrounded by tastefully laid-out grounds, and a farm extending to about fifty acres. The rooms in the main building are admirably arranged, and afford accommodation at present for about 200 pupils. A large additional wing is being erected, which will give increased accommodation for about 75 more. Pupils are admitted from all parts of the State, and their ages range from four years upwards, to twenty. Six teachers, besides a teacher of gymnastics, and an overseer to direct the pupils in their out-door work and exercises are employed. Various mechanical industries are taught and carried on to a considerable extent, such as the manufacture of brushes of different kinds, mats, boots and shoes, and several of the older boys have acquired considerable proficiency as carpenters, and the work on the farm is almost wholly done by them. The various processes of training are carried out by the teachers, attendants, and gymnast, under the direction of the Superintendent. Early in the morning, as soon as dressed, and breakfast over, the pupils commence their work under the attendants. At 9 o'clock School opens, and

from half hour to half hour they pass from one exercise to another—locomotion, training the hand to prehension, imitation, feeling; errors of the senses corrected, singing, and musical exercises; reading, writing, and arithmetic,—from early morning until bedtime they are kept in a state of activity, with the exception of short intervals for meals and rest. Many of the pupils write well, have mastered the simple rules of arithmetic, and read correctly. The females are taught to sew and do many varieties of fancy work, and a large share of the domestic work of the Institution is done by them. I also visited the Pennsylvania State Asylum for the training of idiots. It is situated near the town of Media, on Westchester Railway, twelve miles from Philadelphia. The Asylum building is a very large and substantial stone structure, with a large number of out-buildings, also of stone, and surrounded by well-arranged pleasure grounds, and an extensive farm. There is a small custodial department attached to this Asylum. Dr. Kerlin, the Superintendent, was absent during my visit, but I had every opportunity afforded me by the matron to thoroughly inspect the buildings, and witness the various exercises, and the methods of instruction pursued in the School-rooms and gymnasium. The system of training followed here is similar to that at Syracuse, with some slight differences. The average number of inmates is about 230.

The Ohio State Asylum at Columbus is a magnificent establishment. It is situated about two miles from the city; surrounded with very extensive lawns and pleasure grounds, and farming land to the extent of 200 acres. Under the superintendence of Dr. G. Doren, the arrangements of this Asylum for the purposes of a training school are well nigh perfection. Its pupils average about 400, and the result of treatment in the highest degree satisfactory. Sixteen teachers, besides gymnasts and overseers are employed, mechanical industries are carried on quite extensively, and the patients not only work the 200 acres belonging to the Institution, but Dr. Doren rents 200 acres adjoining, and farms it also, thereby very materially lessening the expenditure for maintenance of the Institution.

The foregoing brief Report is respectfully submitted.

I have the honour to be, Sir,

Your obedient servant,

JAMES M. WALLACE,
Medical Superintendent.

REPORT OF THE PRINCIPAL
OF THE
ONTARIO INSTITUTION
FOR THE

Education of the Deaf and Dumb,

BELLEVILLE.

J. W. LANGMUIR, Esq.,
Inspector of Asylums, Prisons, &c.,
Toronto.

SIR:—In conformity with the requirement of the Statute, I beg leave to submit my Sixth Annual Report, showing the operations of the Ontario Institution for the Deaf and Dumb during the year, ending September 30th 1876.

The number of pupils in attendance during that period was as follows:—

Males	160
Females	96
Total	256

They were supported as follows:—

By parents or friends	42
By the Government of Ontario as Orphans ...	17
Admitted free under the amended By-laws ...	197
Total	256

From the above it will be seen that the number of pupils in attendance during the year was 256. During the preceding year 238 pupils entered the Institution, making an increase of 18 for the present year.

From the following Tables you will see the nationality, religion, and occupations of the parents; also, the ages of the pupils in attendance during the year:—

Nationality.

Canada	77	United States.....	8
Indian (Canada).....	2	France	1

Leeds and Grenville.....	3	York.....	22
Lennox and Addington.....	5		
Lincoln.....	7		256

During the period of six years ending October 20th, 1876, the total number of deaf-mutes who have entered the Institution was 335. Up to this date, the present term, 217 pupils have returned to school, leaving 118 who have not been sent back. These may be counted for as follows:—

Died.....	9
Removed from Canada.....	7
Remaining at home.....	102
Total.....	118

Of this number, 47 would have received no benefit from a longer continuance in the institution, owing to age, mental incapacity, &c.; but 55 should have been sent back to school, and most of them are kept at home without any good and sufficient reason. Cannot you suggest some means to remedy this dereliction on the part of parents and friends of deaf-mutes? Certainly if parents are required by law to send their hearing and speaking children to school for a certain period each year, some similar provision is far more necessary for those who are deprived of hearing and speech. I have made diligent enquiry, and know that in many instances the pupils above alluded to are quite anxious to return to school, and complete their education.

I am glad to be able to state, that the pupils have returned to school with remarkable promptitude the present term, yet some, who intend to return, will not be sent forward until the Christmas Holidays are over. I would suggest that in future, parents should be required to send pupils forward not later than the 1st of October in each term, unless detained at home for causes satisfactory to the Inspector and Principal.

In the Educational Department the progress has been as great as could be expected in a comparatively new Institution. Just before the close of our term in June, Dr. James Carlyle, Mathematical Master of the Normal School, Toronto, in compliance with your instruction made a complete and thorough examination of all the classes connected with the Institution, a full report of which he forwarded to you. The examination occupied a week, and he expressed himself as satisfied with the general results.

In accordance with a recommendation made by yourself during several inspection visits, I proceeded the first month of the term to make a thorough classification of the pupils. The results developed in the recent examination gave me considerable assistance, and it gives me pleasure to state that the classes are now better arranged than at any time since the opening of the Institution. No teacher, except in the highest class and several of the junior classes, will have more than one division, and pupils who have heretofore retarded the progress of classes will receive special instructions from monitors. There are ten regular classes besides the class in drawing and painting, and the class of semi-nunes in articulation. The silver medal, given by His Excellency Lord Dufferin for general proficiency in the Literary Department, was awarded to Isabella McKillop, of Elgin Co. A special prize for general proficiency was, by your direction, given to Andrew R. Porter, of Simcoe Co., as he ranked second in his class. I would recommend that a special prize be given next year for proficiency in drawing.

All the teachers express themselves as well pleased with the present classification, and I feel sure that during the coming year you may look for more encouraging results from their labours.

Our pupils receive religious instruction as heretofore. On Sunday, two lectures on Scripture History are delivered in the Chapel; in the morning, by the Principal, and in the afternoon by the Male Teacher in charge. In addition to this, the Principal instructs a Bible Class of about 50 of the more advanced pupils an hour in the evening. The Catholic pupils attend mass every Sunday, and receive special religious instruction from Mr. Denys. I am also under obligations to the Protestant clergymen and the Catholic priest for their kindness in visiting the pupils, whose parents are connected with their several churches, each month, and addressing to them words of kindness and sympathy. This attention is highly appreciated by the pupils, who feel that although absent from home, they have kind friends who take an interest in their spiritual welfare.

Out of school hours the female pupils are in charge of the Matron, except during study hours, when they are under the supervision of Miss Annie Symes who was appointed supervisor of girls in May last. They are generally employed in sewing, knitting, &c., while a large number of them receive special instruction in ornamental and fancy work from Miss Annie Perry. I have received requests from several parents asking that more attention be paid to instructing their daughters in tailoring and dress-making. It will be impossible for us to do this, unless we can devise some means to secure regular work of this kind. The clothing of our pupils, except that of orphans, is mostly made at home during the vacation, so this leaves us comparatively little of this class of work to be done by the girls during the term.

Out of school hours, 21 of the male pupils work in the carpenter and cabinet shop, and 45 in the shoe shop. This leaves a large number unemployed, many of whom are too small to work in either of the shops. We cannot employ in the shops more than the number above stated owing to want of space. It becomes then a matter for serious consideration how the remainder of our male pupils shall be employed.

In the carpenter and cabinet shop a large amount of work has been done which it is not necessary here to enumerate. The time of each pupil has been kept, and a value placed upon the amount of work done, which makes a total of \$809.16, during the past year. In addition to the saving to the Institution (as this work would have been paid for under other circumstances at regular rates), the pupils are learning a trade which will be of great use to them when they have completed their education.

In the shoe shop the amount and value of the work will be seen from the following statement furnished by the Bursar :—

Brogans and Slippers furnished Public Institutions	\$529 50
Work, including repairs for pupils and others	339 65
Brogans, &c., on hand	97 20
	\$966 35

The fact that the value of work done was less than last year may be accounted for in part by the close of the shop for more than a month during the term, on account of the illness of the foreman, also by the falling off of orders from other institutions.

A number of the boys engaged in both shops are making rapid proficiency in learning the trade they have selected, and will be prepared when their education is completed to secure work in similar shops in their respective neighbourhoods.

The bronze medal, given by His Excellency, Lord Dufferin, was awarded to Andrew Noyes, of Middlesex County, for general proficiency in the shoe shop. In accordance with your instruction I gave a special prize of a set of shoemaker's tools, to J. W. Gee, of Middlesex County, who stood second as to proficiency in the shoe shop. I hope you will take steps to carry out the suggestion made during your last inspection visit, to create a fund, from which we would be able to give a set of tools to each deserving pupil on the completion of his education.

The erection of the Gymnasium has been productive of great benefit in the way of providing amusement as well as healthy exercise for the male pupils out of school hours.

You will find herewith the report of Dr. Hope, from which you will see that our pupils, and others connected with the Institution, have been remarkably exempt from sickness and disease of an epidemic nature. Only one pupil died during the year, James Emy, of Peterborough, aged nine years. He died of croup, which proved fatal nine hours after he was attacked. I hope that due attention will be given to the suggestions made by Dr. Hope, in relation to the heating and drainage of the buildings.

Mrs. M. Spaight, of Orillia, was appointed housekeeper in November, 1875, and since that time has had charge of the domestic department. She has discharged the duties in a satisfactory manner. The appointment of a special nurse for the smaller boys, and their separation from the larger boys as to dormitories, lavatories, bath-rooms, &c., has worked well, and has removed all cause of complaint as to the want of proper care and attention being paid to the younger male pupils. I hope that during the coming year we will be enabled to provide for a separate sitting-room and play ground for them also.

As supervisor of the boys, A. Willason continues to give satisfaction. Since the commencement of the present term the duties of Visitors' Attendant have been performed by Duncan W. McDermid, who also acts as Telegraph Operator and Clerk in the offices of Principal and Bursar.

I regret that we again cannot present a favourable report of our farming operations during the past year. In the early part of the season a good crop of hay was gathered, but the drought continuing during most of the summer, rendered our crop of potatoes and other roots almost a complete failure. The team has done the usual amount of hauling manure and gravel, besides the ordinary work of the farm. Permit me again to repeat the opinion expressed in my last Report, that "an experience of six years has convinced me that it will require a large expenditure for lime, manure, drainage, &c., to get this stiff, clay soil in proper condition for profitable farming."

The Gardener presents the following Report, showing the products of the garden during the year :—

39 Bushels Potatoes,	1 Bushel Artichokes,
65 " Beets,	2 " Salsify,
30 " Carrots,	76 dozen Sweet Corn,
6 " Parsnips,	20 " Peppers,
3 " Beans,	166 Quarts Snap Beans,
31 " Tomatoes,	54 " Peas,
3 " Onions,	11 Baskets Spinach,

284 Bunches Asparagus,	150 Cauliflower,
175 " Radishes,	500 Celery,
161 " Lettuce,	4,525 Cucumbers,
12 " Swiss Chard,	72 Melons and Citrons,
562 " Rhubarb,	1,007 Summer Squash,
50 " Onions,	500 Kohl Rabbi.
4,000 Cabbage,	

Some of the vegetables were inferior in quality to those produced last year, owing to the drought. In addition to his work in the garden, he has devoted as much time as he could spare to the cultivation of flowers for the fruit grounds. He has also made several additional rustic vases and seats during the past winter. If it is intended that he should keep the front grounds in order, as well as cultivate the garden, he should certainly have an assistant, for he receives comparatively little help from the pupils out of school hours; and, besides, during July and August, when assistance is most required, the pupils are at home spending vacation.

Permit me in this connection to call attention to the present condition of the front grounds. The trees and shrubs planted and now living have shown scarcely any increase in growth during the past two or three years. Many as you are aware have died each year, and I cannot recommend farther planting until the ground is thoroughly drained. I have earnestly recommended this in previous reports; this can easily be done by constructing, in addition to the present drain leading to the bay, another drain on the eastern side of the grounds, then lateral drains could be run into the main drains on either side. If another drain is constructed as proposed, leading to the bay, it would be highly beneficial in furnishing an outlet for drains to be constructed on the east side of the farm, besides furnishing good and sufficient drainage so much needed for the cellars etc. on the eastern side of main building. The deepening of the present drain would involve a considerable outlay on account of the amount of blasting to be done, besides it would not prove satisfactory for the purposes above mentioned. I consider that a new drain is absolutely required, and hope that this recommendation will be respectfully considered.

While the present pump at the bay furnishes an ample supply of water to the tanks in the building, it becomes my duty to state that it is not of sufficient power to render the hydrants around the building effective in case of a fire.

The proposed improvements, viz. :—the building of residence for Principal; the extension of the chapel building on west end, and the erection of a building for Bursar's store-room, sitting-room, and dormitories for the older male pupils, will by utilizing the rooms made vacant by these changes furnish accommodation for 250 pupils, which is probably as many as we will ever be called upon to provide for. In addition to this it will be necessary to relay the floor of the girls' sitting-room, and hall on second floor, as well as the floors of the school rooms with hard wood; to put up partitions to the ceiling dividing the school-rooms on first floor, instead of half partitions as at present; to provide additional bath-rooms for both male and female pupils; to build new outside privies; to insert two new boilers for heating the building, and to change the steam pipes so as to equalize the heat in different portions of the building.

In making the above recommendations, I have only proposed such changes and improvements as I considered absolutely necessary for the health, comfort, and accommodation of all connected with the Institution, as well as for the general improvement of the grounds and premises.

Our thanks are due the officers of the following Railways for passing pupils to and from their homes for one fare: The Grand Trunk—The Great Western.—The Midland Railway of Canada—The Northern Railway— and the Toronto, Grey and Bruce Railway. To the local officers of the Grand Trunk at Toronto, and Belleville, and to the local officers of the Great Western, at Toronto and to the Conductors of the several lines we are under continued obligations for the care and attention shown our pupils on their way to and from home; also, to H. P. Dwight, Esq., Superintendent of the Montreal Telegraph Co., for favours extended.

We take this occasion to return our thanks to Mr. L. T. Cameron, of Scotland, Brant County, for the very liberal donation of a Sciopticon, with a number of beautiful views, which have afforded much pleasure and amusement to our pupils.

The following newspapers have been sent to the Institution free during the year, for which courtesy the publishers will accept our thanks :—

Frank Leslie's Illustrated Newspaper, New York.

The Journal of Education, Toronto.

The Advertiser, London.

The Farmer's Advocate, London.

The Times, Ottawa.

The Herald, Stratford.

The Times, Orillia.

The Courier, Trenton.

The Ensign, Brighton.

The Beaver, Napanee.

The West Durham News, Bowmanville.

The Times, Port Hope.

The Deaf Mute, Omaha, Nebraska.

The Christian Advocate, Hamilton.

The Gopher, Fairbault, Minnesota.

The Dumb Mute Mirror, Flent, Michigan.

T. James Claxton, Esq., of Montreal, sent me a large collection of illustrated newspapers and periodicals for distribution among our pupils, for which he is entitled to our thanks.

In accordance with your instructions I attended the Third Conference of Principals and Superintendents of American Institutions for the Deaf and Dumb, held in Philadelphia, on the 12th, 13th, and 14th of July. It was the largest conference of a similar nature ever assembled, and besides the pleasure afforded of social intercourse with our co-labourers in the United States and Canada, we feel that much good was accomplished by the free interchange of thought on a great variety of subjects of interest to our profession.

The proceedings of the Convention of American Instructors of the Deaf and Dumb held in Bellville, in July 1874, have been published and distributed among institutions in America as well as foreign countries.

The visit of His Honor, Lieutenant-Governor MacDonald, accompanied by the Honourable Mr. Wells and yourself on the 20th of October 1875, being the fifth anniversary of the opening of the Institution, is an event which was much enjoyed, and will not be soon forgotten by all connected with the Institution.

Permit me, in conclusion, to express my acknowledgments to you for your continued interest and hearty support in all matters pertaining to the welfare and prosperity of the Institution. Hoping that the Government will continue its fostering care, and that our Heavenly Father will extend His blessings on our labours in the future as in the past, we would respectfully submit this report.

W. J. PALMER,

Principal.

Ontario Institution for the Deaf and Dumb,
Belleville, October 1st, 1876.

ONTARIO INSTITUTION FOR THE DEAF AND DUMB,
BELLEVILLE, September 30th, 1876.

J. W. LANGMUIR, Esq.,

Inspector of Asylums, &c., &c.

SIR,—I have the honour of transmitting to you my Annual Report of the Ontario Institution for the Deaf and Dumb for the year ending September 30th, 1876.

The number of pupils who applied for admission was 223, all of whom were found to be eligible, and if we add to those the officers and servants of the Institution together

with their families, we have the aggregate number of 316, which the By-law of the Institution places under my professional care.

Of this number, 216 appear on the Register as having received more or less medical treatment. This shows that a large percentage of sickness prevailed in the Institution; but if we compare it with that which prevailed in private families at the same time in this vicinity we have reason to be thankful that we escaped so fortunately.

It is well-known to all that the last winter was characterized by very sudden changes of temperature, and few escaped entirely from its effects.

I regret to announce the loss of one of our pupils, Jarvis Emery, aged nine years, who died December 21st, of croup; the disease pursued an unusually rapid course; he was in his class in the afternoon, was attacked at 5 o'clock, p. m., and died in eight hours.

In regard to the food of the pupils, I have to remark that I have not heard a complaint during the year, and from my own observation I have reason to know that there were no grounds for any.

In regard to the clothing of the pupils I am happy in being able to state that there have been great improvements upon that which formerly prevailed, although there are still a few boys who have been neglected by their parents in this respect, and I trust the delinquents will see to it that this be remedied during the present session.

In regard to the heating apparatus, I have to say that sufficient heat has been generated to warm the building from the cellar to the attic; but in portions of the building the heat is so great as to render them unfit for use. This can only be remedied by alterations being made in the heating apparatus, so that the occupants of the rooms can turn off the steam when found necessary to do so.

In regard to drainage, I have to remark that it was thought when the old drain was deepened some three years since, that it would be sufficient to meet the wants of the Institution; this was not found to be the case. It is now evident that the old drain has not been sunk a sufficient depth to fully drain the main building—the drain may answer very well for draining the Laundry and the buildings connected therewith, and also that portion of the farm on the west side of the building.

I would respectfully suggest that a drain be constructed on the east side of the building to the bay. By making this drain in addition to getting a proper depth for the purpose of draining the main building, it would offer facilities for draining that portion of the farm on the east side of the building, which stands so much in need of it; indeed it is very doubtful whether this land can ever be made fertile unless it is thoroughly drained.

Respectfully submitted,

W. HOPE, M.D.,
Physician.

REPORT OF THE PRINCIPAL

OF THE

Ontario Institution for the Education of the Blind, BRANTFORD.

W. LANGMUIR, Esq.,
Inspector of Ontario Public Institutions,
Toronto.

SIR,—I have the honour to present for the official year ending September 30th, 1876 the Principal's Report of the Ontario Institution for the Blind.

Literary Department.

In my last Report I briefly described the leading systems of typography used for the instruction of the Blind ; their most important educational instruments and appliances ; finally, the types, instruments and appliances used in the Ontario Institution. During the past year the application of Point Print has received much of our attention. A very large number of pupils are now attaining such a mastery of this embossed character, as to use it with great facility for purposes of correspondence and taking notes of lessons. As formerly explained, though the Blind can and do learn to write manuscript in the ordinary character used by the seeing, they are quite unable to read their own writing, or indeed to distinguish by the touch, written from an unwritten page, unless the writing should be unusually rough. It is just here that Point Print becomes available. Though this alphabet is represented by combinations of raised dots, and appears intricate, it can with a fair amount of attention be readily read or written. In urging the study of this most important branch of instruction, I was for some time arrested by the difficulty that the only available text book for beginners—Mr. Wait's Point Primer—had passed out of print, and was no longer procurable. In this strait set about devising an inexpensive process by which I could print within our own walls, such lessons as may be found necessary and could not be otherwise procured in printed form. It was essential, not only that a relieve impression should be obtained on paper, sufficiently sharp to be easily tangible, but that the impression should in the process of printing be so hardened as to resist compression by the blind reader's finger. The experiments necessary to secure these points, and consumed, for some months, all my leisure moments, which, as you are aware, are at no season of the year abundant. Miss Tyrrell kindly acted both as compositor and proof-reader, and I had thus the satisfaction of placing in the hands of our pupils, a Point Primer, that they find very legible, accurate, and free from the irritating sharpness of the primers as originally printed. Taking advantage of the opportunity, Miss Tyrrell prepared an appendix, illustrating the application of Point Print to commercial arithmetic, and this has been bound up with our copies of the primer. Then gathering courage as we proceeded, we developed this arithmetical appendix into a systematic treatise on arithmetic. In arranging the subject matter, I have adopted the principle of teaching by graduated examples worked out, and the so-called arithmetical analysis has been applied to the solution of all questions not purely mechanical. Only a few pages still remain to be printed, in

order to complete the first Point Print Arithmetic. The pupils now receive daily drill in the useful applications of this subject, and they are becoming quite skilful in taking down and casting up accounts. The potential value of such instruction is obvious. In England the legal status of blind persons has been the subject of considerable difficulty and of special legislation; it was even doubted for some time whether a blind person could make a valid will, and, in money matters, much hardship has arisen from inability to keep accounts in a form recognizable by the blind writer himself. With, however, the general use of Point Print by the Blind, such disabilities must vanish. Documents written in this character are definite and unvarying in their interpretation as those legally valid wills that eccentric Englishmen sometimes indite in the dead languages.

There is a serious defect in all the appliances yet used for the writing of Point Print: the characters are *written* on the side, and in the order reverse from those in which they are *read*. This is, of course, a great embarrassment to the learner, and, in arithmetic, as the results at every stage of the work have to be taken up and carried forward, the inconvenience of repeatedly turning over the sheet of paper becomes a serious impediment to progress. I commend this subject to the consideration of my inventive brethren in the United States' Institutions. I have myself spent some time fashioning, in rude model, a "guide," by which a relief impression can be raised on the writing side of the paper; and I purpose, whenever opportunity offers, to complete my experiments in this direction. The precision required in all Point-Print appliances renders their construction very tedious and expensive. In a recent announcement, the Council of the British and Foreign Blind Association present us with the fruit of their experience in the statement that "no one who had not made the attempt can have any idea of the extreme difficulty of combining great accuracy and durability with cheapness." There can, however, be no doubt that, were the same intense thought and active invention which abound on the highways of commerce and manufactures turned into the by-paths of philanthropy, and specially directed to appliances for the blind, the lot of this afflicted class would be much alleviated. But an invitation for the use of blind persons offers no hope of emolument, and, in a pecuniary sense, is not worth patenting: the inventor must accept the reward of a good conscience as the interest of his expended money, time and thought. American Institutions are honourably distinguished for their many ingenious inventions tending to lessen the disadvantage of blindness, and they well deserve the warm praise lately bestowed upon them by Professor Fawcett, the well-known lecturer and publicist. In our own Institution, it would be an exercise of wise economy to devote annually a liberal expenditure to the designing and improvement of educational appliances. During last Session, we undertook the construction of some large physical dissected maps that were not purchaseable. One map was completed, but the inconvenience of carrying the work repeatedly, between the Institution and the factory—a mile and a half distant—was such that I have deferred the manufacture of other maps until the work can be superintended in the building.

Miss M. Scott has, by her energetic handling of geography, made it a very attractive subject to our pupils, many of whom have already acquired such a minute acquaintance with our railroad systems and other unfrequented tracts of school geography as greatly surprises the visiting public. I am very anxious that our teachers should be promptly supplied with such appliances as they find necessary for the thorough treatment of their subjects; but I have been hitherto much cramped by the lack of proper tools and motive power. The latter want has recently, through your kind exertions, been supplied, and I hope that the coming year will bring us a good lathe, a scroll saw, and those other tools for the shaping of wood and metal that are, or ought to be, in constant requisition in an educational Institution of this special character.

With the imperfect instruments at my command, several new appliances have been constructed during the year. I have already noticed the printing of Miss Tyrrell's class books. A flexible rubber writing tablet of my own contrivance is now being used by the pupils, instead of the old French writing card, and I have devised a piece of apparatus for turning out these improved tablets with speed and accuracy. Miss Scott has extended her new process of printing to the reproduction of small class-room maps; notes on English literature are also being printed for the use of her class. Mr. Wickens has, with the assistance of the carpenter, G. G. Lambden, completed an excellent dissected map of the United States, which is on exhibition, with some other products of our industry, at the Centennial Exposition.

Since my last Report, some additions have been made to the list of embossed line-type publications. Mr. Kneass, of Philadelphia, has published the Poet Laureate's *Enoch Arden*, and he has printed for the National Association, Marez's valuable work, *The Universal School Music*, so as to form two companion volumes to the same author's *Dictionary of Musical Terms*, already issued from Mr. Kneass' press. The American Printing House for the Blind (Louisville, Ky.), has laid us under fresh obligations by reproducing, with the assistance of new stereotype process, Sir Walter Scott's *Lady of the Lake*; also, by issuing several excellent school-books at prices that barely cover the cost of publication. In these new publications the important typographical changes proposed last year have been adopted.

In order to bridge over the interval from the old type to the new, I requested Mr. Hunn, the unwearied Secretary of the American Printing House, to kindly print for the use of our pupils special letter and word sheets in the reformed typography. With a little preliminary drill on these sheets, our pupils are found to read with great facility the new publications.

At the Convention of Instructors of the Blind recently held at Philadelphia, and attended by a very large number of representatives from the various States of the Union, a resolution was passed strongly commending the American Printing House to the liberality of Congress, and urging that it receive a subsidy, or an endowment in the form of public lands, to the amount of \$,000,000. If this appeal should fortunately prove successful, the education of the blind may be expected to enter on a new era.

Among the announcements made in the Literary Department of the Philadelphia Convention, was the application of the newly introduced type-writer to the use of the blind. In the sightless, writing in any of the existing forms, is a most painfully slow process, and blind authors have hitherto, almost without exception, been forced to employ an amanuensis. With the aid, however, of the new mechanism, it is asserted that an expert blind operator can set off, in a given time, a report of a speech or a lecture, in a form two or three times as expedient as can be reached by a seeing reporter, using ordinary written characters. The manufacturers describe this interesting appliance as follows: "The type-writer in size and appearance resembles the family sewing machine. Its appearance is graceful and ornamental, making it a beautiful piece of furniture for any office, study or parlor.

"Writing with this machine is done simply by touching keys, which are compactly arranged in four rows of eleven each, and may be operated by any finger of either hand. On each key is only printed the letter or character it represents by depressing any key, the corresponding character is printed on the paper. The "action" is fully as rapid and much easier than that of the piano. It will thus be seen that any desired letter or character is completely transcribed in the same time, and by the one motion that is required to bring a pen with the first position. Its rapidity is therefore manifest. Its simplicity is such that anyone who can spell can write with it, and its manipulation is so easily understood, that but little practice is required to enable the operator to become an expert in its use. It writes from one to twenty copies at the same time. The size of paper which can be used is practically unlimited, and it is adapted to any width from one-inch to a continuous roll. Envelopes can be readily pressed with it. It is equally adapted to any thickness of paper, and the quality of paper is also unlimited, as it will write legibly on the commonest wrapping paper. The alphabet, numerals, and all necessary characters for punctuation, italicizing and reference, are made by a single key. It is instantly adjustable to any desired spacing between lines. The type receives ink on a moving ribbon, one and three-eighths inches wide and thirty-six feet long, and as the letter takes but one-eighth of an inch of space, for a single impression, there is practically over 400 available feet of inking surface. The ribbon is so prepared that it can be used for months without being inked, and when exhausted the ribbon can be sent by mail to the General Office and re-inked at a trifling expense. With proper usage these ribbons will last many years." Mr. Superintendent Smead, of the Ohio Institution for the Blind, reported to the Convention the results obtained by his pupils with four type-writers, as very encouraging. Principal Campbell, of the Royal College for the Blind (Upper Norwood, London), from his entire sightlessness, is specially entitled to speak with authority on a question of this kind, regards the type-writer "as destined to exercise much influence upon the higher education of the blind, and (he believes), to furnish remunerative employment for blind students." He adds that proof copies of the Report from which this extract is taken, were prepared for the Executive Committee of the College on one of these machines. In view of

the favourable opinions expressed by these educationists, I would recommend that one or two type-writers be added to our school-room appliances. I have now before me a type-written letter from J. W. Smith, Esq., Professor of piano-tuning in the Boston Institution. Mr. Smith is entirely sightless, but he can evidently use the type-writer to most excellent purpose. Through this new medium of communication he announces still another invention for the Blind, an ingenious contrivance of his own, (the Daisy Tablet), by which a complete character in the French (or Braille) Point Print can be written at once, and not laboriously written, as at present, one point at a time. Before leaving the literary work of the past year, I have to acknowledge two kind donations to the Institution library. To Captain T. V. Scott, of Ottawa, I am indebted for several volumes of Dr. Moon's embossed edition of the Scriptures, the legacy of a blind lady, lately deceased. I have also received, from an anonymous donor, through Messrs. Rowsell & Hutchinson, Booksellers, Toronto, a miscellaneous collection of embossed publications. My acknowledgments are due to the Hon. David Christie, Speaker of the Senate, for the blue-books and daily proceedings of the Dominion Parliament, during its last session.

In my report for 1874 I suggested that Telegraphy might be brought within the range of the Blind. By the kindness of W. Griffin, Esq., the Brantford Agent of the Dominion Telegraph Company, the wires and necessary appliances have been introduced into the Institution, and a class has been formed with Mr. Wickens as instructor. The results of this novel experiment cannot fail to be interesting and instructive.

Musical Department.

In the Musical Department we greatly require additional instruments. Though the attendance of pupils has within a short period doubled, the educational outfit of the Institution remains precisely as it was when but half the present attendance was provided for. The present demand for musical instruction would necessitate the purchase of two reed organs, besides the piano recommended in my last report, but not yet procured. I have already brought under your consideration the completion of our Music Hall, by the purchase of a large pipe-organ, such as is found in every important Institution for the Blind. Miss Alexander and Mr. Truss visited, during the summer vacation, various British Institutions for the Blind, and though these derive but a precarious and intermittent support from private charity, the managers attach so much weight to high-class musical instruction that they have in nearly every case drawn on their slender revenues to procure a good church organ. Indeed the importance of music in every system of training for the Blind is now fully recognized by all educationists; and, in music, as in literature, the works of the best masters have the highest educational value. If not in 1877, at all events in 1878, I trust that we shall be supplied with an instrument adequate for the worthy rendition of oratorios and other sacred music of the highest class. Professor Cheesbro has devised a Musical Dial, which being applicable for the instruction of the seeing as well as the Blind, he has taken steps to secure by copyright. As inquiries have been made respecting this Dial by the musical instructors of other Institutions, Professor Cheesbro will be allowed, in his own words, to state its range and capabilities: "The Dial will form any musical scale, major or minor, from C to 7 sharps, or from C to 7 flats, also every interval of these scales, give their harmonic names, and show the *Do, Re, Mi*, system with any and all intervals of any or all scales. It will also show the Tonic or Key-note of any and all scales, indicate what the note is Key-note of, and how many sharps or flats, showing their proper position on the staff; then immediately showing the fingering for both hands for any or all keys, also the common chord and its relative minor of any and all keys; then shows the Dominant chord of the 7th and its resolution, and the Diminished chord of the seventh and its resolution. It likewise shows all time movements used, and the proper placing of the accent in such time; the common alphabet in the Bass and Treble Clefs; the valuation of time and rests; position of Bass, Treble, Alto, and Tenor Clefs; the number of vibrations per second necessary to produce Middle C on the piano, and from the octave up to C third Space (Chromatically); the lengths of string which when weighted will give any Metronome movement used; the compass of voices, Soprano, Mezzo-Soprano, Alto, Tenor, Baritone, and Bass, showing the Chest, Medium, and Head registers of all according to Bassini. It defines the latitude allowed in Allegro, Andante, and other mov-

ts; the fingering for all brass instruments working on 3 or 4 valves, Bass Clef (Chromatically), and full compass of the instruments. Finally, the Dial shows the character of keys, also all intervals of the scale, whether diminished, perfect, flat, sharp, or augmented." This cyclopaedia of musical memoranda is contained on a card of some eight or nine inches diameter.

A very pleasing feature of the past year was the fortnightly musical and literary entertainments given in the Music Hall, but open only to residents of the Institution. The songs were prepared for the musical exercises by Miss Alexander, who has attained great skill as an instructor of the Blind, while her devotion to her work is unremitting. The selections and dialogues were selected and arranged by the literary teachers. These entertainments exert a most valuable aesthetic influence on the Blind, whose bearing and address are often susceptible of much improvement.

Technical Department.

In the Technical Instruction of the older boys no change has been made since last report, except by the extension of the cane-seating classes. I have made an arrangement with the Ontario Furniture Co., by which the pupils are supplied with chair-frames and cane, while the full sum is allowed to the Institution for the pupils' work. Basket-making continues to be the leading feature of the boys' industrial department. Where workshops are occupied by co-operative blind artisans, and administered by a sighted Superintendent, mattrass-making and certain other employments are sometimes found more remunerative; but for the men dependent upon individual capital and skill, willow-work appears to me to possess three decisive advantages over every other trade that has yet been proposed. *First*, the manual labour required is of so varied a character that it can hardly be displaced by machinery. *Secondly*, the tools are strong, simple, inexpensive—and with moderate care, will last a long time. *Finally*, the raw material required can be grown on any ordinary soil; for modern agriculture has shown that the willow like many similar plants inhabits swampy grounds, for sufficient reason that it is not permitted to grow elsewhere, and that if so permitted it increases as much by cultivation as those more brilliant favourites of our flower gardens which were once insignificant and worthless occupants of the marsh. During his recent visit to the Island, Mr. Truss the trade instructor, made inquiries into the comparative value of various employments, as furnishing a livelihood to the blind, and willow-work appeared to stand the best among the various mechanical employments that have been tried. The introduction of broom-making into the Institution has often been suggested, and Mr. Truss has qualified himself to give instruction in it; but I am of opinion that the concurrent manufacture of willow and willow-work would lead to the neglect of the latter, because broom-making is much more readily acquired, though, when examined by the three tests above applied to willow-work, its inferior value as a trade for the blind is manifest.

In the girls' industrial department several new features have lately been introduced. At the Philadelphia Convention Mr. Wait of New York announced that he had succeeded in bringing machine-knitting within the reach of blind girls, and Miss Porad, a pupil of this Institution, gave interesting exhibitions of her skill both at the Convention and at the Centennial Exhibition—at the latter as the representative of the Dana Bickford Knitting Machine Company. I lost no time in procuring from this Company an experimental machine for the benefit of our pupils. This I placed under the charge of Miss Tyrrell, who, in a wonderfully short time, has not only mastered the details of the mechanism, but has taught six of our blind girls to knit with great facility. These results were so encouraging that I recommended the immediate purchase of additional machines, which are now on the way from New York. The demand for socks at the Central Prison will furnish our girls with excellent practice in hand and machine knitting.

Miss Elliott, our energetic Housekeeper, has made a series of experiments to determine which form of sewing machine is best adapted for the use of the blind. The results of these interesting experiments so far appear to favour the use of a bobbin-machine (such as Wheeler & Wilson), rather than of a shuttle machine. I would recommend the purchase as early a date as possible of additional sewing machines such as these experiments may approve.

A large number of pupils, both male and female, have been instructed by Miss Tyrrell

in the many forms of bead and crochet work, many of the articles produced being characterized by great harmony of colour, symmetry of form, and beauty of design. Among recent novelties of fancy work, may be mentioned embroidery on perforated card.

Under the tuition of Miss Alexander and Miss Scott, many of our little boys, as well as girls, have learned to use deftly their crochet and knitting needles.

Religious Instruction, &c.

My warm acknowledgments are due to the Brantford Clergy for their regular attendance at the Sunday services of the Institution. Our Catholic pupils have not only the kind oversight of the Rev. Mr. Bardou, but also weekly visits from the Sisters of St. Joseph. The Institution has now a continuous plank walk communicating with all the churches in Brantford, and the pupils possess much greater religious advantages than formerly.

The Young Men's Christian Association has befriended our inmates in many ways. Mr. George Macdonald (Secretary of the Association), and Mr. S. M. Thompson have been particularly kind in their attentions. Private philanthropic effort is witnessed in Brantford on a scale that can be hardly paralleled elsewhere in Ontario; and one of these private charitable institutions (maintained by T. S. Shenstone, Esq., and I. Cockhutt, Esq.) opened its hospitable doors to one of our poor blind children when she had been cast off by an inhuman municipal Council, and was thus left without a home during the summer recess.

Domestic Department.

Under Miss Elliott's administration the Domestic Department has maintained a high degree of efficiency. Her efforts have been seconded by the introduction of many conveniences and appliances into the kitchen and laundry, which ought really to have formed part of the original outfit of the Institution. I observed last Christmas Day by setting into position two ranges and a broiler manufactured by Bramhall, Deane & Co. (New York), which have greatly relieved the pressure on our culinary service. To complete this most serviceable apparatus, we still require a "circulatory boiler" furnishing a constant supply of hot water for domestic purposes. The Laundry has been furnished with one of Oakley & Keating's (40 Cortlandt St., New York) "Extra Large" washing machines. This contrivance is named by its makers "The Nonpareil," and very fairly, for it appears to be the most effective laundry machine at present in the market. It has proved an unspeakable convenience to us, at once reducing to one-half, the time occupied in washing; and rendering us less dependent upon the manual labour of servants whose proverbial restiveness and caprice often much disorder the administration of Public Institutions. To complete the equipment of our Laundry we still require a power-mangle which ought of course to represent the most improved mechanism procurable. The engine that actuates the washing-machine will also afford motive power for the mangle, and in placing the line shafts, I have provided for this contingency. To the manufacturers of this new engine and its attached boiler (Messrs. Waterous & Co., Brantford), it is only due to say that this machinery affords me the utmost satisfaction. The economy of fuel secured by the use of the new boiler is as surprising as it is gratifying. I have so connected this small "auxiliary" as to furnish steam to the engine-pump in the basement, to a line of jacketed kettles in the kitchen, to a large soap-tank, to the washing-machine, and to tiers of jacketed vessels and washing-vats in the Laundry; to the drying-room on the ground-floor, and to bath-rooms on the second floor. The plumbing and fitting involved in these and in the many other improvements recently made in our steam, gas, and water service have been executed in a most careful and workmanlike manner by Mr. John Marter, the Institution Engineer, assisted by the Fireman, James Kelly. The large boilers in the basement are now almost entirely reserved for the heating of the building, which is of course suspended whenever the temperature of the external air permits. This office of heating the building demands a large volume of low-pressure steam, whereas the culinary and other service above enumerated require the precisely opposite condition of a small volume of high-pressure steam. Any attempt to combine these two conflicting requirements will result in lavish use of fuel as well as a severe and quite unnecessary strain on the general heating equipment, and a consequent large expenditure for repairs and renewals. To render

heating-boilers more efficient for their special function, their steam-space has been enlarged by the removal of the highest tier of tubes, while the draught has been maintained by the insertion of additional tubes on the right and the left of the remaining tiers. The brickwork encasing each boiler, has also been so modified as to become in effect a pre-heater, and thus dry the steam before it leaves the boiler. During even the brief interval that has elapsed since the erection of this Institution, immense strides have been made in the application of steam to the heating of public buildings, and we must endeavour to keep abreast of these recent improvements.

The capacity of each of the four water tanks that are under the Institution roof was this summer enlarged by one half; but the pumping engine that fills three of those tanks, and forms our main reliance in an outbreak of fire, is sadly hampered by a most inefficient boiler which ought at once to be replaced by a boiler of more modern construction, and able, without using special fuel, to raise steam in fifteen minutes. The chimney over the boiler-house was recently repaired in the hope that the present hazardous delay in raising steam might be avoided, but it is now quite evident that a new boiler is indispensable. I cannot too often repeat that, in the event of a fire, this Institution would be entirely dependent upon its own water works; and the thorough efficiency of all our appliances thus becomes a question of the most importance. A good hose reel filled with a reserve of one inch rubber hose would prove a valuable addition to our present equipment. To secure the utmost vigilance on the part of the night watchman, I require of him to strike every hour from ten o'clock p.m., to five o'clock a.m., on the tower bell; also, to record on Lefort's Patent Detector, the precise times at which he goes his rounds. This responsible post is filled by G. G. Lambden, whom I have to commend for his faithful services both as watchman and carpenter.

The storage of our fuel deserves attention. At present a very large quantity of the coal comes saturated with rain and snow to the great injury of the fuel. In these enlightened days few engineers or firemen will deliberately wet their coal to improve combustion, except when as wet their own jackets to promote animal warmth. The section of our coal shed that is now occupied as an ice-house ought to be restored to its original use, and the whole framework of the building strengthened by plank sheeting. A combined roof and ice-house is much required, and ought to be provided for.

The men employed in the boiler-rooms frequently complain of headache and other ailments arising apparently from insufficient ventilation. I would recommend that a galvanized iron pipe of twelve inches diameter, be carried from each of the basement boiler-rooms vertically upwards through the roof of the rear building. One of those ventilating shafts would traverse the laundry and the girls' dining-room,—the other, the kitchen and the boys' living room; and by suitable valves would draw off the exhalations that are apt to stagnate in such places. The main smoke-stack has already so many openings that the draught is somewhat affected, and it would be far preferable on both this and other grounds to provide independent ventilating shafts in the manner just indicated.

An outbreak of scarlet fever among us last season very forcibly revived the question of providing for the sick, an isolated hospital, or at least detached hospital wards. Except in the case of one of my own children, the epidemic that passed over us was of a very mild type, but so large a number of pupils were more or less affected by it, it was found necessary to close the session earlier than usual. Under Dr. Corson's professional skill and the attention of careful nurses,—among whom Miss Hudson deserves especial mention,—none of the ill effects followed that often render scarlet fever more formidable in its results, than in its direct assault. Now that the attendance of pupils has become so large, the Institution ought, in my opinion, to enjoy the advantage of a daily visit from a staff physician. It is well known, that the vitality of the blind is much lower than that of the seeing. Even in Institutions like our own, where regular hours, open air exercise, and an abundance of wholesome food, insure to the blind inmates a far higher degree of health than they enjoy elsewhere, there is an evident deficiency in vitality as compared with seeing children similarly circumstanced. This important point has been elaborately investigated by Mr. E. B. Elliott, a Boston actuary, and from his tables recently published, I find that in 1,102 blind persons admitted to United States Asylums, the power to resist destructive influences was 10.3 less than that of the population of all England, and that the number of deaths is from 60 to 80 per cent. greater than the number required by the English life-tables. Principal Campbell—who

belongs to the class of whom he writes—discusses this question in the last edition of the *Encyclopædia Britannica*, and remarks that, if the basis of calculation were not confined to the fortunately-conditioned inmates of Institutions, but extended over the whole blind population, the average vital force would probably be found “*nearly one-fifth less than that of ordinary persons.*” Principal Campbell does not pursue this interesting question further; but, assuming the facts to be as represented, it is evident to my mind that we have here a vital law, the applications of which ought to determine for Institutions their sanitary, dietary, and general domestic engagements; and ought also to some extent to set the gauge of their expenditure, both as to amount and direction. For example, using the last result above stated, it follows that where *five* ordinary persons may, without detriment to health, occupy simultaneously the same class-room, or sitting-room, or dormitory, only *four* blind persons would be admissible. My own observations on the quality of the atmosphere, where our pupils have been for a short time assembled, would confirm the above theoretical result.

Additional Accommodation Needed.

The number of inmates now in this Institution has far outrun our estimated maximum accommodation, and the extension of our buildings cannot be deferred without injury to the present inmates, and without the greatest injustice to the large number of youthful blind who still remain neglected, and who, year by year, are growing up in a state of mental as well as physical paralysis. The observations contained in my last Annual Report, respecting the deplorable condition of uneducated blind, and respecting the urgent need of an enactment similar to the compulsory clauses of the Public School Act, have been greatly confirmed by the results of this year's official visitation of the Blind. The work so well done by the late officer, Mr. Brown, has been vigorously taken up, and carried forward by his successor, Mr. Walter Wickens, who has exhibited much tact and diligence in the execution of his mission. I have now recorded in my office the names and addresses of 280 blind minors residing in Ontario, and in the majority of cases I have collected information as to their mental, physical, and social condition. Our search for the blind will hereafter be much facilitated by the co-operation of the Educational Department, in the way that I suggested in my Report for 1874. As soon as ever the matter was brought under the notice of the Honourable the Minister of Education, he arranged to obtain from all future Annual Reports of Public School Trustees the names, ages, and particular addresses of those youth who, from either physical or mental infirmity, are debarred from the advantages of a Public School; thus in effect requiring of Public School Inspectors to account satisfactorily for the whole school population of their districts. As this machinery gets into full motion, it will turn out annually a complete and authoritative census, which will enable this and other special Institutions, to effectually use such power as the Legislature may intrust to them. Without, however, waiting for any complete census of the blind—which would involve a serious delay—it might be quite safely assumed, that with suitable legislation next session, an attendance of from 200 to 250 youthful blind can at once be had, and, concurrently with such legislation, adequate accommodation and educational equipment must, of course, be provided. The enactments now required should embrace these two essential points:—(1.) The training of the Blind ought to become compulsory, and attendance at this Institution ought to be enforced by statutory provisions similar to those in the Public School Law of this and other countries, and similar to the compulsory Act relating to the Blind of Pennsylvania. As is found in the administration of our Public School Act, the presence of such a provision on the Statute Book need only be hinted at, to bring neglectful parents to a recollection of their duties. Few indeed are so indifferent to public opinion as to desire an appearance before a magistrate on the charge of neglecting their own offspring. The age for Institution purposes ought to range between seven and *twenty-one*, as a considerable number of persons become blind after attaining twelve (the Public School limit), when their special tactile education has to begin, as though they had never been trained at all. In dealing with the great variety of cases that will come up for consideration, the Principal of the Institution will require considerable discretionary power. (2) The second requirement—without which the first would be utterly futile—is that a fund be provided for the clothing and travelling expenses of indigents. This fund might be raised by imposing on each county a small annual

pitation allowance for each blind resident under twenty-one years of age, *whether in attendance at the Institution or not*, so that no motive might arise for the detention of the blind. Though the burden on each county would be utterly insignificant, the total fund would be considerable; and if any surplus should arise, it would most suitably be expended in giving our trained apprentices (female as well as male) a mechanical outfit which would relieve the municipalities of indigent adult blind, and thus refund, with large usury, to those corporations, their annual contribution to this Institution fund. These finished apprentices ought for some time after their discharge to be kept under a friendly surveillance, and periodically visited, with a view to removing, as far as possible, the special difficulties that arise from their sightless condition. The massing of adult blind at a central point, even though it be an industrial home, does not commend itself to my judgment; the experience of every such establishment is, that, as a combination, blind artisans are apt to do less for their own support than when dependent upon their own individual capital and skill; and every such workshop as a serious annual deficit. The distribution system here recommended is certainly more natural, it does not interfere with the family relation, and under judicious advice and encouragement the blind artisan will more probably develop the sterling qualities of self-reliance, industry, and thrift. The objections to *Asylums* for the Blind are still more cogent. If the institution system is made thoroughly effective, the class of persons requiring, or at all events deserving, asylum relief will speedily disappear, and there is immeasurably less objection to making a special but temporary provision for the present generation of aged and indigent blind than in committing ourselves to a permanent heavy outlay for Asylums which once opened could not readily be closed. The thorough, and if necessary enforced, training of our youthful blind constitutes the key of the whole position, and to their training, technical as well as literary, we ought to direct our most strenuous exertions. Their number and requirements are the factors to be considered in extending and outfitting our Institution. The details under these heads will more appropriately form the subject of a special Report.

Institution Visited—Improvements on Grounds.

Since writing my last Annual Report, not only has the Institution received the frequent and welcome visits of Mr. Inspector Langmuir—the great value of whose official connection with the Institution I thoroughly appreciate, but also, several members of the Government have, by their presence among us, greatly sustained and encouraged us in our work. His Honour, the Lieutenant-Governor, and the Hon. Provincial Secretary, officially visited the Institution and grounds. The Hon. Commissioner of Public Works, after a personal examination of the grounds and premises, approved of certain important expenditures that had formed the subject matter of your official recommendations. I was authorized to take measures for the security of the Institution terrace, and the building itself, against the floods of water that, at every shower, ploughed the sand into deep gorges, and threatened to sweep terrace, institution and all into the valley beneath. I carried a carefully laid open brick drain along the row of the embankment to the distance of about 500 feet, drawing off the water at intervals by ducts leading to the low ground below. The embankment, which is no better than a rick-sand, I bound together by a heavy dressing of swamp muck, that speedily became overgrown with coarse strong grass, finally, the terrace itself after being prepared with a surface of gashme, was protected from the local action of rain or melting snow by a deposit of gravel, which in places exceeds six inches in depth. The large mass of material required for this work, I drew from our lot on the Grand River.

Substantial progress has been made in the ornamentation of the grounds, though theiless and scorching summer has killed many of our trees. Enough, however, survive to give a great relief to the treeless waste that has hitherto surrounded the Institution. Notwithstanding the severe drought of the season, the cultivated grounds have, through the industry of the farmer, James Williams, and the gardener, Robert Ward, yielded an unusually good turn of vegetables and farm products, potatoes being the only crop that is noticeably efficient.

The difficulty connected with boiler drainage, has been satisfactorily disposed of by conducting it directly into the main-drain. External latrines on improved sanitary principles have been erected.

The question of sidewalk communication with Brantford is now happily disposed of.

I presented to the Brantford Town Council petitions signed by four hundred of the leading ratepayers, requesting that the Dumfries street walk be continued to the southern boundary of the Institution grounds. I am much indebted to the Mayor and Corporation of Brantford for their alacrity and public spirit in laying this extended sidewalk. At its termination our system of sidewalks, uniform in width, commences, and leads the visitor to the main door of the Institution. A six-foot plank walk has also been laid from the rear door of the west-wing to the workshop, and thence to the lower engine-house and spring. On the residents, and especially the blind residents of this Institution, no greater boon than these sidewalks could have been bestowed. The Hon. the Provincial Secretary made a second official visit to the Institution to obtain data for considering the enlargement of the premises.

The Hon. the Premier also found opportunity amid his incessant engagements to visit us, and spend some time in examining our improved educational appliances.

A few days ago, while engaged on the official visitation of the High and Public Schools of Brantford, the Hon. the Minister of Education kindly accepted an invitation to come up and see us at work. The various industries of the Institution were shown in actual operation in the Music Hall, and the Hon. Minister expressed himself greatly gratified at the new and somewhat startling applications of blind labour. He addressed to the pupils words of kind sympathy and encouragement.

Among other visits with which we were favoured, may be noticed those of the Grand Juries, who have commended us to the still further liberality of the Government; the visit of the Grand Division of the Sons of Temperance, headed by G. W. Ross, Esq., M.P.; finally the visit of the distinguished blind orator, the Rev. W. H. Milburn, to whose lecture, "What a Blind Man saw in England," our pupils were admitted through the great kindness of the Young Men's Christian Association, and who, on the following day, at my request, came up to the Institution, and, after minutely examining our work and appliances, addressed the pupils. Mr. Milburn, as one entitled to advise those who shared his own affliction, skillfully and tenderly swept the sympathetic chord; then rising into a strain of brilliant eloquence, he showed these unfortunate youths of what magnificent achievements the Blind are capable.

I have honour to be, Sir,

Your obedient Servant,

J. HOWARD HUNTER,
Principal.

REPORT OF THE PHYSICIAN OF THE ONTARIO INSTITUTION FOR THE EDUCATION OF THE BLIND.

J. W. LANGRISH, Esq.,
Inspector of Prisons, Asylums, &c., &c.

SIR,—In furnishing you with a general statement and facts respecting the Medical department of this Institution, I have, first of all, the satisfaction to observe that no deaths have taken place within its walls during the current year. It is my painful duty, however, to mention the death of the excellent teacher, Prof. T. M. Brown, which took place at his residence in the town on the first day of October, 1875. Of a naturally delicate constitution, with a frame still further enfeebled by excessive journeys on foot in the good cause of the Institution, he had the misfortune to contract a malignant form of Typhoid Fever, which, in a little more than a week terminated his useful life.

According to a suggestion made in my second annual report, new water closets, supplied with an efficient drain, were constructed last vacation under the personal supervision of the Principal, so that all sewerage waste is now discharged at a safe distance from the buildings. With this provision all danger of water contamination, or the admission of foul air into any apartment seems past, and we may congratulate ourselves on a thorough protection against Typhoid Fever, or other diseases depending upon a like specific blood poison. Indeed, it may be remarked that though Typhoid Fever is a constantly recurring

disease in the town, there has never been a single case in the Institution, a fact which attests favourably of its sanitary condition.

In the effort to keep out the cold during the winter months by sealing up the windows with storm sashes, it is to be feared that fresh air has been at the same time too much excluded, the effect of which has been that peculiar odour, so easily generated in public buildings of this nature. It shall be my duty in the future to insist upon what I have had much difficulty in enforcing in the past, viz., such a thorough ventilation as will ensure a constant supply of fresh air. With the increased number of pupils in residence, such a precaution becomes imperative. I may here also remark that the recent accessions to our number will necessitate very considerable additions to the present buildings in order to meet the prospective needs for accommodation, for by the timely erection of such additions will the evil and danger of overcrowding, which now threaten us, be effectually prevented.

During the month of March last, a child of the Principal and one of the pupils were simultaneously attacked with scarlet fever in rather severe form, though ending in protracted recovery. After the lapse of two weeks, other pupils were down with the same disease, and after a few weeks more there was a third group, until the whole number was swelled to eleven cases, all of which passed through the disease safely. Upon inquiry, it was found that only a small proportion of the pupils had ever been the subjects of scarlet fever, and there was therefore every probability that the number of cases after each period of incubation would be repeated in something like arithmetical progression, until the outbreak should become general. Under these circumstances, it was deemed prudent by the Government to close the Institution for the balance of the term. In this epidemic, we sadly felt the need of a separate building for hospital purposes to enable us to isolate the disease and thus prevent, if possible, its further spread.

Quite a number of pupils with eyes so diseased as to result in partial or complete loss of vision, come to the Institution every year for the purpose of receiving medical treatment, in the hope of having the sight restored, fully ten per cent in the now opening session belonging to this class. Though such an object was never contemplated by the Government, yet you will readily grant it will be only an act of humanity to give them the benefit of such special treatment, and our success in this direction is an encouragement to bestow such attention upon these unfortunate ones as time will permit. I cannot close without acknowledging the faithful services of the nurse, Miss Christie, whose kindness and attention to those under her care have been unceasing.

The subjoined Table will show at a glance the class of diseases for which we have been called to prescribe, though there have been many less serious ailments not here set down:—

Abscess, mammary	- - -	1	Epilepsy	- - - - -	2
Adenitis	- - - - -	1	Febricula	- - - - -	7
Acne, simplex	- - - - -	1	Furunculus	- - - - -	1
Amœorrhœa	- - - - -	1	Gastric derangement	- - - - -	1
Anæmia	- - - - -	1	Granular lids	- - - - -	6
Bronchitis	- - - - -	8	Indigestion	- - - - -	6
Bronchocele	- - - - -	3	Leprosy	- - - - -	1
Cataract (operation)	- - - - -	2	Neuralgia	- - - - -	2

Dyspepsia	- - - - -	1	Ulcer, soft palate	- - - - -	1
Eczema	- - - - -	2			

I have been asked by the Principal if I were favourable to a law compelling attendance at this Institution of all the blind of suitable age within the Province. In my estimation

such legislation would be most wise, as great injustice is done to blind children by parents who, from mistaken ideas of kindness, allow their children to remain at home. only to sink into a mental as well as physical degeneracy, which falls little short of helpless idiocy.

I have the honour to be, Sir,

Your obedient servant,

WILLIAM C. CORSON, M.D.

REPORT OF THE WARDEN
OF THE
CENTRAL PRISON OF ONTARIO.

WARDEN'S OFFICE, CENTRAL PRISON OF ONTARIO,
TORONTO, October 9th, 1876.

*To the Inspector of Prisons, &c.,
Ontario.*

SIR,—In accordance with the Rules and Regulations of the Central Prison, I have the honour to transmit to you my Annual Report up to the 30th September instant, with the accompanying annual returns.

Referring to the operations of the Central Prison, I desire to state that the "Canada Car and Manufacturing Company" resumed work in the month of November last. Few prisoners were employed by the Company at the commencement, but the number gradually increased to 127. One hundred more prisoners were tendered on the 1st of August, in accordance with the terms of the contract, but none of these were accepted, the Company pleading that, pending the completion of their additional buildings and machinery, they had no work for them. Since then there has been erected by prison labour, for the use of the Company, a drying kiln capable of containing between sixty and seventy thousand feet of lumber, with a large room on the second story, which is intended to be utilized as a workshop for the Prison tailors, shoemakers, and menders—an apartment which hitherto has been much needed, as in its absence I have been obliged to set apart portions of the dining-hall for these several occupations.

The construction of railway cars was abandoned by the Company upon the introduction by them of new work, which consists in the manufacture of wooden work, brooms, brushes, &c. The building formerly used as a scrap shop is being reconstructed by them into a machine shop. This, together with other additions which the Company deem it advisable to carry out in order to prosecute their works with success, will, I am in hopes, enable them in a short time to utilize the labour of 260 prisoners.

The Company employing 127 prisoners, left me a considerable surplus, who were kept at hard labour since December last, in breaking stones, and constructing roads within the prison walls, deducting those employed in domestic labour, such as corridor men, tailors, shoemakers, menders and convalescents. Contracts were entered into with parties in the city for breaking 2000 toise of field stone at \$3 per toise the stone being furnished by the contractors. The quantity of stone broken to the 30th September, has been upwards of 1,340 toise. A larger quantity might have been accomplished, but it must be borne in mind, that the quality of stone is what is termed field stone—large boulders, necessitating severer labour in breaking than the ordinary lime or quarry stone, formerly used in Macadamizing streets.

The conduct of the prisoners, with but few exceptions, has been good. In the prosecution of their respective tasks, they have worked with diligence. I have frequently questioned the Superintendent and Foreman, as to their opinion of the work performed by the prisoners in their respective departments, and have met with the most satisfactory replies, some of the Foremen remarking that free labour men could not do better. While upon this subject I wish to draw your attention to a matter which was brought up before me some months ago, though not officially. Objections were raised to prisoners being

sent direct from punishment to work on the contracts, and suggesting that they should receive from twelve to fourteen hours respite. I had no recollection of such a regulation in the States Prisons when I visited them in 1873. On the contrary, I saw prisoners taken out of irons and sent directly to work. Anticipating the question would arise, I communicated with the Wardens of several prisons in the States, requesting them to furnish me with their regulations on the case. In reply, I received the information that, except when in the opinion of the medical officer the prisoner is unfit for work, they are taken from punishment and put directly to daily labour.

The following are a few extracts received by me on this subject :—

Michigan State Prison states.—“When a prisoner is released from a dark cell in irons, if the punishment has been but *three or four days*, he is sent into the shop at once; if longer, and, in the opinion of the Physician, the prisoner is too much weakened to do a day's work on the contract, he is put on half duty, or excused from work, as the case may demand.”

Illinois State Prison states.—“When a prisoner comes out of punishment he goes right to work, if released in the morning; or sent to work the next morning, if released in the evening, whether he has been in irons or not, and is compelled to do his best.”

Ohio State Prison states.—“After a prisoner is punished in irons in a dark cell, he is taken from the cell in the usual way and put to work on the contract without any respite at all. We think it none of the contractor's business whether or how the men are punished.”

I have other communications corroborative of the above, as the regulation in other Penal Institutions.

In reporting upon the sanitary condition of the prisoners, I have to state, that up to the month of April last the health of the prisoners was excellent; in fact, I believe that no Prison containing the same number of prisoners could have boasted of such complete immunity from sickness. But in the month of April, Typhoid Fever made its appearance, rapidly spread, and *being without any Hospital accommodation* I was compelled to utilise the Chapel for the purpose. Upwards of thirty-six prisoners were attacked, two of whom died. I can form no opinion as to the origin of its introduction into the Prison, the building being situated in a remarkably healthy locality, everything kept scrupulously clean, and ventilation very good. It might have originated from a prisoner who had been transferred a short time before the disease appeared, and who appeared weak and debilitated from attacks of Typhoid, which he stated he had been suffering from, previous to his transfer to the Central Prison. This, however, I cannot vouch for. An opinion was advanced that the use of wooden buckets by the prisoners was the cause of the outbreak of Typhoid Fever, and dissenting from this I communicated with some of the States Prison Surgeons requesting that they would furnish me with their opinions as to the wooden bucket system, from their own professional knowledge and experience in the Penitentiaries to which they were attached.

The following are some extracts verbatim from letters received by me upon the subject :—

Illinois State Penitentiary remarks, after stating that it can be safely said that it is impossible for the wooden buckets, however illy cleaned, to cause the disease :—

“In this Institution there are about 1,500 convicts; owing to the crowded condition of the Prison, two men occupy each cell, with *one wooden bucket in common*, the daily sick average three to four in hospital, two to three in sick cells, and perhaps 20 reporting themselves as sick for trifling reasons, but able to work; thus the health of the prisoners in the Institution is extraordinary good.” The medical officer further states: “That he has been Surgeon of the Illinois State Prison for three years, and Consulting Physician six years, and that during that entire period he had not met with a single case of typhoid fever in the Prison.”

The Albany Penitentiary states :—“The wooden bucket system is the system of the States' Prisons, and after much experience and consideration, the opinion has been arrived at that it is the best system that can be made use of in these Institutions. Cleanliness

must be preserved, and can be more completely so with this system than with any other. The Albany Penitentiary has been quite free from typhoid fever for the last seven years, with the exception of four cases occurring about the same time, all of which came from the upper tier of cells, and was attributable to the want of proper ventilation. No sickness of any kind has been traced to the use of the wooden buckets, and there is no possibility of their being instrumental in propagating disease."

Letters from other Prisons have been received, supporting the views above expressed.

I trust you will call the attention of the Government to the subject of my letter to you, dated the 10th of August last, as the absence of the necessary water power within the Prison premises in case of fire,—surrounded as the buildings are with such inflammable material—is a matter for serious reflection.

There has been one escape from the Central Prison since the month of June, 1875. This occurred on the 27th of April last. A prisoner named George Barber effected his escape by getting out of the window of the apartment used as a surgery. The window is close to, and nearly on a level with, the roof of the north corridor, he then proceeded along the eaves-trough and descended, by means of a ladder that was in use by men employed in repairing the slates of the roof. The prisoner had been employed as Hospital orderly since the previous September, and had rendered excellent service in attending the sick and in the performance of duty connected with the Medical Department. He would have received his discharge in a few days.

I have also to report a daring attempt at escape which took place on the sixth of last August. At 12 o'clock noon on the prisoners falling in at the dinner hour, two of them named Bourke and Reynolds who had been transferred from St. Catharines, seized a ladder in use by the Car Company, in the broom manufacturing departments, and ran towards the centre gate, leading into the lumber yard, bringing down upon them the fire of the north-west and south-west Tower Guards, which did not take effect. Not heeding this, they scaled the wall, which at this spot is about 16 feet high, and having once got into the lumber yard, were lost to view until they appeared topping the lumber yard fence, when the guards again fired at them but without effect. The chief guard (Mr. Stedman) and myself went in pursuit, and after a run of about three quarters of a mile they were recaptured by the chief guard (who had the legs of me; the thermometer being 96 degrees in the shade at the time), and brought back to the prison within seventy minutes from the time they scaled the walls. This lumber yard, which adjoins the western wall of the Prison, is a constant source of anxiety to me, as a beacon towards escape, upon which the eyes and thoughts of every prisoner is directed; and in accordance with the authority received from the Department of the Prison Inspector, I am erecting a tower on the western side of the lumber yard, which is to be occupied by an armed guard. This I hope will effectually put a stop to attempts at escape, and I earnestly request that the Government will sanction the addition to the Central Prison staff, of another "guard," as the proper security of the prisoners imperatively demands it.

I experience a good deal of inconvenience from the copies of sentences of prisoners not being regularly furnished me by the Sheriffs in accordance with section 21 of the Central Prison Act, and very many of them are improperly certified to. I would suggest that the Prison Bailiff be ordered to bring with each prisoner the copy of his sentence, and that no prisoner should be received by him for conveyance to the Central Prison without a copy of the sentence being delivered to the Bailiff at the time.

The average cost of subsistence per prisoner has been during the past year about 11½ cts., and the average cost of the Guards' messing, 30 $\frac{40}{100}$ cts.

The Engineer being an official whose services are in constant requisition, it would be an advantage if a house could be built for him in the Prison grounds. Stabling is also much required. In conclusion I cannot refrain from bringing under your notice, for the favourable consideration of the Government, the valuable services rendered to the Government, and to myself as Warden of the Prison, by Mr. Richard Stedman, who has been officiating as Chief Guard since the beginning of March last. His services have been of the greatest assistance to me since the opening of the Prison, in strict supervision of the Prison discipline, and in the enforcement of orders that I have found it necessary to issue from time to time to get an establishment like this in proper working order; indeed, had it not been for the

trustworthiness and energy in the discharge of the onerous duties of his office, I should have experienced serious trouble in the organization and management of the Prison.

I have also to refer to the efficient services of Guard "Edwin Newton," who has been officiating as Deputy Chief Guard since the beginning of March last.

I have the honour to be, Sir,

Your obedient servant,

WILLIAM STRATTON PRINCE,
Warden.

REPORT OF THE SURGEON OF THE CENTRAL PRISON.

JOHN W. LANGMUIR, ESQ.,
Inspector of Prisons, Asylums, &c.,

SIR,—The report of the Surgeon for the Central Prison for the year ending 30th Sept., 1876, respectfully represents that the health of the prisoners during this period was not as uniformly good as in the preceding year.

In early spring inflammations of the throat and allied affections largely prevailed, due, in part at least, to the fact that on one or two occasions, the men were unfortunately kept to work in the rain until they were drenched, and that without dry clothing wherewith to change; the Warden ascertaining this, prevented a repetition of the occurrence. At a little later period Typhoid Fever broke out; and 31 cases were admitted into hospital, 6 of them within one month.

As to the cause—there were numerous sources of blood contamination which would have the way for, or produce, the disease:—1st, The water supply—which is not the city one—was not above suspicion, as on examination it was ascertained that dead horses, dead dogs, and butchers' offal were dumped into the lake near the supply pipe, or thrown on the shore to putrify and be washed down by the rains. Now that the city is about to have pure water, the Prison also should be supplied with the same. 2nd, The overflow pipes from the tanks whence the prisoners derived their drinking-water were untrapped, thus allowing sewer gas to form an atmosphere over the water and be absorbed thereby. 3rd, The soil-pipe from the closet into which all the night-buckets were emptied, though supposedly all right, was not trapped. 4th, The main sewer was out of order. 5th, The situation of the closet above, the only one for the prisoners, is most objectionable, being close to the windows of the south corridor; and while the buckets are being emptied, the trench is often blown directly into the building and cells of the prisoners. 6th, There is no building into which to place the buckets: and all the day upwards of three hundred (300) of these vessels stand out in the air and sun near the closet, more or less fouling the surrounding atmosphere. 7th, A part of the closet building is appropriated for storing the clothing belonging to the prisoners, and, notwithstanding its ventilation, the odour herefrom has sometimes occasioned vomiting to those entering. At one time the wind would carry the foul air from these clothes, this closet, and these buckets into the corridor and throughout the entire building, or, moving in an opposite direction, it would convey the effluvia to the gangs breaking stones in that vicinity; and these gangs contributed nearly all the fever cases. 8th, The Chapel is used as a Hospital. There is no water-closet in it, and all the evacuations of the sick—rich in poisonous germs—have to be carried down two flights of stairs, through the building, to reach the outside closet. It will be impossible to prevent Diarrhoea, Dysentery, Typhoid Fever, &c., from occurring, unless the outside closet and clothes-room are removed far away from the main building, a suitable room provided for the buckets by day, and a properly furnished Hospital erected. The loss of service to the country from sickness and death, and the additional expense in caring for the sick, would more than cover the interest of the money expended for the needful improvements.

Ultimately the kitchen will have to be removed. In summer the heat in it is almost intolerable, and unquestionably injurious to those working there. It is hoped that when the improvements above indicated are carried out, the erection of a stable will not be omitted.

Several insane were admitted during the year, and it is very likely that many of the prisoners will end their days in Asylums sent there by their own self-pollution.

There were, during the year, four deaths: Newman, after long sickness, from tubercular peritonitis; Comb, after forty-two days, from pleuro-pneumonia, caused by cold; Perkins and Patterson, from typhoid fever.

Two years ago it was reported to you that the dark cells were unhealthy; no change in them has been made.

The following table shows the number of applications at the Prison Surgery for treatment during the year:—

Abscess	41	Inflammation of throat	40
Ague	46	" Of other parts	36
Asthma	6	Influenza	23

General Remarks.

From year to year, since the inauguration of this Institution, it has been my pleasing duty to report favourably of the general good conduct of the boys under my charge, and in no year have they conducted themselves more to my satisfaction than in the present, which induces me to trust that, when their time comes to go abroad again, they may follow in the footsteps of hundreds of their predecessors, who, having left the Institution, are now living as industrious and useful members of Society.

I have to report the escape of one prisoner, an American vagrant, about nineteen years of age, who, in the year previously, was sentenced to two years' imprisonment in the Reformatory. Although the Act specifically directs, that boys sent to this Institution must be under sixteen years of age, it is much to be regretted, that this clause of the Act cannot be strictly adhered to, as young men of his class, when sentenced to the Reformatory, are likely to set a bad example, and work material injury amongst the younger inmates. On two occasions I reported this young man as incorrigible, and recommended his removal to the Central Prison.

The Inspector on every occasion willingly adopts my recommendation in such matters, and I have no doubt that my suggestion in this boy's case, would have been acted upon, but there is some difficulty as to the law which prevented its accomplishment, and which I hope may be represented to, and corrected by, the Legislature, as a subject of no small importance to the well-being of this establishment.

The Honourable the Provincial Secretary, accompanied by the Inspector of Prisons, officially visited this Institution during last May; the recommendations then made, respecting the change in school hours, have been acted on, and I feel confident that the schoolmasters are using every endeavour to make the lengthened period recommended, useful to the boys. I, at the same time, respectfully bear witness to the regular attendance and proficiency attained for the short term of study heretofore afforded to them, and believe, in their general attainments, the boys would compare favourably with the same number in the common schools of the country.

The Institution was also honoured with a visit in August, from His Excellency the Lieutenant Governor, the Honourable the Premier, and the Honourable the Commissioner of the Board of Works, accompanied by the Inspector of Prisons, and although they arrived late in the evening, when I received the order that all the boys should be forthwith mustered they fell into line as regularly as a company of soldiers; and I may here remark, that I had them regularly drilled some few years ago, but being disappointed in obtaining instruments for a band, the enthusiasm died out; yet some are of opinion that the practice would have been useful, and a source of much innocent enjoyment to the boys.

It has frequently arisen in my mind, how little heretofore has been the interest manifested by the members of the Legislature, as regards this Institution, yet it appears to me that its importance is second to none of the Public Institutions of the country, as in the training that youthful criminals receive here, must in a great measure, if not altogether, depend the future welfare of the youths themselves, and to the extent of their reform, the relief of the country from the many evil results of crime in its midst, as well as the economy arising from a well ordered community, as compared with a criminal one. How far it may be agreeable to the Legislature to cause an official visit, of two or three of its members, during the approaching Session, from each side of the Speaker's chair, to this Institution, I am unable to surmise, but I am satisfied it would have a most happy influence on the youths of the Reformatory, to feel that their moral improvement and material condition was matter of such importance to the Legislature of the country, and I can safely say, that the late visit of His Excellency, and the other High Officials with him, has been taken by all the members of the Institution, officers and boys, as the highest honour, and the evincement of so kindly an interest in the welfare of the poor youths will have a most beneficial effect as tending to inspire them with self-respect, and an emulation to deserve by their conduct the esteem of those who hold the highest position amongst their fellow citizens.

Having for a long time been desirous of the opportunity of comparing the system and management of other similar Institutions with this, under the kind permission of the Honourable Provincial Secretary, I visited the Quebec Reformatory, under the supervision of the Christian Brothers, which is conducted much in the same way as this; subsequently, I went to New York, and was conducted through the Catholic Protectory in that city, an Institution to provide for the education and support of idle, truant and vagrant children, from seven to fourteen years of age. It is an admirable Institution, where hundreds of the street Arabs of New York find a shelter, are maintained, educated and taught a trade, and are thus afforded the opportunity of returning to the world and acting the part of good and industrious citizens. I also visited the New York Juvenile Asylum, a valuable Institution, where truant and disobedient children of both sexes are received, but as none of those charitable Institutions were analogous in their working to this Reformatory, I proceeded to the City of Rochester. There I found the House of Refuge, an Institution precisely similar in its objects to this. The Superintendent kindly accompanied me through the Institution, and by his intelligent assistance I possessed myself of its salient features and management. Boys are received into the House of Refuge between the ages of seven and sixteen and are detained until they reach their twenty-first year, unless good conduct entitles them to an earlier discharge. The greater proportion of the inmates have been convicted of petty larceny, some there are, however, who have been convicted of graver offences. The outer walls of the building are stone, and enclose an area of six acres, they are eighteen feet high in front and twenty-two feet in the rear, four feet six inches thick at the bottom and twenty inches at the top, perpendicular on the inside, but buttressed on the outer face. The dormitories are large, and are erected on long corridors, with tiers of cells 560 in all, well built, and heated by steam, and furnished with iron bedsteads; each door has a strong iron hasp, with a padlock. The boys are locked in during the night; they are regularly drilled; have a very fine band, and are marched to the dining-room at the sound of the drum at all meals.

I was much gratified to find that the rules and regulations in this Model Reformatory are almost identical with the rules and regulations adopted by me, and acted upon during the past eighteen years. I was also much gratified in the discovery that the correspondence which passed between Mr. Purell, one of the Directors, and myself, had produced very favourable results as regarded the Catholic boys, who number about one fifth of the inmates, they are now (which was not formerly the case) instructed in their religious duties by a clergyman of their own persuasion, a Catholic as well as a Protestant Chaplain having been appointed, and the adoption of this system of equal justice in religious matters has established a general confidence in the Institution among all classes of the community.

In this Reformatory there are Protestants of more than one denomination; the Presbyterians number twenty-one. A very worthy clergyman drives every Thursday nine miles to give religious instruction to those youths; he is chiefly supported here by the Presbyterian officers of the Institution. During the period when I considered it as part of my duty, to exercise a discretionary power in such a contingency, I paid this gentleman's predecessor a

small amount. At present the use of that discretion is in other hands, and I regret that my recommendation of the payment of the very small sum of fifty dollars for his useful services has been disallowed; yet I still very respectfully recommend a reconsideration of the subject, and hope that a payment, which I consider a very small acknowledgment for such services, will not ultimately be refused, and which, as Warden, I recommend as a matter of justice to a clergyman performing onerous duties. It is a small amount, and its payment begets a confidence in the community at large, that no denomination is unduly neglected.

With much satisfaction I refer to my last year's report, giving conclusive evidence that of the 565 boys discharged, 29 only have relapsed, and it is beyond cavil, doubt, or controversy, that 536 are leading as good lives as their neighbours, and since their discharge have been no burthen on the country, such and so great have been the benefits of this Reformatory. Wherever I go I am certain to be accosted by some of my boys. Even in the City of Montreal I met one in St. James Street, well dressed and respectable. A few days ago in the village another very fine young fellow saluted me, who, with his brother, served a term here: both are now doing well. Without difficulty I could muster 50 in the City of Toronto, following various trades and occupations, whose names do not appear, nor have they appeared, at the Police Court; and in proportion the same number can be found in all the cities, towns, and country parts in Ontario.

I have no personal object to subserve by lauding the results of the training in this Institution, but when I can do so in the most irrefragable testimony (*vide* my last year's Report) it must be gratifying to the Government I serve, as well as to the tax-payers of Ontario, to be made aware they receive compound interest for their money. I am as satisfied, as I now write, that at the very least eighty-five per cent. of the boys discharged, now numbering six hundred and sixty-eight, that five hundred and sixty-eight are leading honest and industrious lives. It would be very difficult to say what the fate of so many young men would have been had this Institution not been established. Is it to be wondered at that such a reformation should have been effected, as few of them are so ingrained in vice, that when removed from their old associates, educated both religiously and secularly, get a good trade, undergo strict training, well fed, clothed, lodged, and mercifully treated, should turn out good citizens?

The well-conducted youths are allowed to travel over the whole farm, where business may take them, to the surprise of visitors, and I have never known one to break his parole until recently, when a Mohawk Indian (who should never have been sent here) sloped away. It was unnecessary for him to forfeit his word, for at any time a boy can easily knock off one of the boards, and in a few minutes conceal himself in the woods, where it would be almost as difficult to find him as the needle in the straw; but to do them justice, they rarely give me trouble on this score; the more creditable to them, as I must have upwards of fifty eighteen years of age, and some older—another slight proof of the salutary training in this Institution.

It is a pleasure to visit the Institutions in the State of New York: there all their requirements are at once provided for, which facilitates strict discipline being observed, while I have been kept in lime and mortar every year for the last eighteen, the grant having been always given in dribbles, but now that it is an unalterable fact, that the Reformatory is permanently established here, I hope to see forty thousand dollars in the Estimates to cover the many wants of this Institution, and instead of a rickety board fence, decoying young men to clope, a good stone wall, similar to the one in the Model Rochester Reformatory, may be erected.

I have the honour to be, Sir,

Your obedient, humble servant.

WILLIAM MOOR KELLY,
Warden.

 PROTESTANT CHAPLAIN'S REPORT.

PENETANGUISHENE, 6th Dec. 1876.

 J. W. LANGMUIR, Esq.,
Inspector of Asylums, &c.,
Ontario.

Sir,—In presenting my first Report as Protestant Chaplain of the Provincial Reformatory for Ontario, I have the honour to inform you, that on assuming this responsible position in April last, I found that my venerable predecessor had devoted much time and labour to the religious instruction of the lads, who from various causes, had been placed in this Institution; many of them would have passed very creditably in any Sunday School or Bible Class in the Province.

Feeling that a Chaplain of an Institution such as this, may be the instrument of forming the minds of many of the youth of the Province, whose religious education had evidently been overlooked, I not only say the service of the Church of England, and preach a short simple sermon on each Sunday morning, but I meet the boys frequently in class during the week for religious training. When a lad enters my class I, as far as possible, obtain from him a history of his antecedents, which I make use of in private conversation, and endeavour to gain his confidence and respect, and so influence him for good.

I have adopted the rule of, when a boy leaves the Reformatory, writing to the Minister of the Congregation to which he has professed to belong, asking him to interest himself on the lad's behalf, and obtain employment for him. I have already in reply to my letters received encouraging reports from Ministers, of the improved condition, morally, of boys whose term of imprisonment had expired.

I have the honour to be, Sir,

Your obedient servant.

G. A. ANDERSON,
Protestant Chaplain Provincial Reformatory.

 ROMAN CATHOLIC CHAPLAIN'S REPORT.

 REFORMATORY, PENETANGUISHENE,
 December 10th, 1876.

 JOHN W. LANGMUIR, Esq.,
Inspector of Asylums, Prisons, &c.

SIR,—I have the honour to submit my Report for the year 1876. Among the boys sentenced in this past year to the Reformatory, there is a large proportion that are very young. They have generally received no instruction, religious or secular, and even the older ones are not much superior in that respect to the younger class. And though some of them are of an age at which, according to our usage, they should have been admitted to the Sacraments, they had not prepared for that duty. However, they manifest an intention of improving the occasion they have of getting better, and as it is my practice to see them individually when they arrive, I endeavour to show them the benefits they may derive, while they are here, with regard to secular and religious instruction, and moral improvement, and to bring them to a resolution to profit by the advantages this Institution offers them. In this manner, I try to present to their mind some end in view, to gain which they should strive with courage and perseverance, and I may say, it is not difficult to inspire them with those good intentions.

It has always been a custom among our boys, when they are to leave the Reformatory at the expiration of their sentence, to come and see their chaplain and to prepare for their religious duties. They wish to re-enter the world, so to say, with honour, and so to live, as to counteract the impression that was left when they were sent here. In due time I ascertain when their time expires, and remind them, should they forget it, of the preparations they have to make before leaving this Institution. I always find that then they are impressed with the necessity of gnarling against the dangerous occasions they are sure to meet with in the outer world, and fully determined to become good members of society. I find that they have thought of it, and that they have made their calculations so as to overcome dangers and temptations.

I have no hesitation in saying that they persevere in their good disposition, and show by their conduct that they intend to be good and useful citizens. What is to be deplored and what may become a danger to them is, that when they leave the Reformatory, some have no homes to go to, no friends to help and encourage them, and may be forcibly thrown in circumstances in which stronger men would not stand.

Beside the usual duties on Sunday and during the week, three or four times in the year I devote a few days to special instructions and devotional exercises, which have a very beneficial effect on them.

At those times especially, I have to call them together, when they are at their work; and I always found their worthy Warden willing and anxious to second me and to send them to me, as I desire. However I feel bound to be more scrupulous with regard to calling boys out of the cigar-shop, as their labour is under contract; and though I find it at times inconvenient, I refrain as much as possible from asking them out during working hours; however I always found the Superintendent ready to oblige me.

I have the honour to be, Sir,

Your obedient servant,

THOS. F. LABOUREAU,

Catholic Chaplain.

SURGEON'S REPORT.

PENETANGUISHENE, Dec., 1876.

J. W. LANGMUIR, ESQ.,

*Inspector of Asylums, Prisons, &c.,
for Ontario.*

SIR,—I have the honour to submit the Medical Report of the Provincial Reformatory for the year ending 30th September, 1876.

It has been a source of much gratification that I have had to report so few casualties during my connexion with the Reformatory, and it is with pleasure that I now remark the continued good health of the boys—having had but *one* death in three years, viz.; John Smith, who died of *heart disease*.

The death-rate of this Institution is certainly very small when we take into consideration that we have now the largest number ever confined in the Reformatory.

Our hospital accommodation has been improved during the past year, and when the works now under construction for bathing, heating, and ventilation are completed, our boys will be quite comfortable.

On reference I find that the following diseases have been treated, in addition to which were the usual number of coughs, colds, scalds, bruises, and other minor accidents.

The number treated has been somewhat large, but this is not surprising when we consider the class of community which we recruit from—many of the boys bringing with them the germs of disease acquired from bad habits or inherited from worse parents.

Typhoid Fever (so prevalent this year) made its appearance, but after disinfecting the buildings, and having the buckets (which are of wood) tarred and burnt occasionally, it died out without any fatal result.

Diseases Treated.

Abscess	Fracture, Elbow,
Bronchitis, acute	Frost-bites,
“ chronic,	Gonorrhœa,
Bronchitis,	Glut,
Carbuncle,	Hernia,
Congestion of Lungs,	Heart Disease,

PART I.

GENERAL REPORT

ON

EDUCATION IN ONTARIO.

1875.

ANNUAL REPORT
OF THE
Normal, Model, High and Public Schools
OF THE
PROVINCE OF ONTARIO.
FOR THE YEAR 1875.

PART I.—GENERAL REPORT.

*To His Honour the Honourable D. A. Macdonald, Lieutenant-Governor
of the Province of Ontario.*

MAY IT PLEASE YOUR HONOUR,

I herewith present the Report of the Education Department on the condition of the Normal, Model, High and Public Schools of the Province of Ontario, for the year 1875.

I will now proceed to give a summary view of the condition of the High and Public Schools of Ontario, condensed from the Statistical Tables accompanying this Report:—

I.—TABLE A.—RECEIPTS AND EXPENDITURE OF PUBLIC SCHOOL MONEYS.

The Receipts.

1. The amount apportioned from the Legislative Grant was \$248,061—increase, \$3,128. The amount apportioned for the purchase of maps, apparatus, prize and library books was \$21,983—decrease, \$865. The principle of distribution is according to the average attendance and the time of keeping open the Schools of each Section.

2. The amount from County *Municipal* Assessment was \$758,467, showing an apparent increase of \$151,928.

3. The amount available from *Trustees' School* Assessment was \$1,547,125—apparent decrease, \$61,312.

NOTE.—The apparent decrease of *Trustees' School* Assessments and increase of *Municipal School* Assessments is caused by some of the *Municipal School* Assessments having been reported in the wrong column for 1874, under the *Trustees' School* Assessment for that year. The increase under the two heads combined is \$90,616.

4. The amount from *Clergy Reserves* Moneys, and from other sources, applied to School purposes in 1875, was \$789,816—increase, \$33,303.

5. The Total Receipts for all Public School purposes for the year 1875 amounted to \$3,365,454, showing an increase of \$126,182 over the total receipts of the preceding year. For the past three years the rate of increase has been—for 1873, \$437,094; for 1874 \$271,906; and for 1875, \$126,182.

6. The following table shows the progressive increase in the amounts levied by the Municipal and School Trustee Corporations, and also the yearly increase in the total receipts since 1860.

	1860	1861	1862	1863	1864	1865	1866	1867	1868	1869	1870	1871	1872	1873	1874	1875

The Expenditure.

1. The amount paid by trustees for salaries of teachers in 1875 was \$1,758,150—increase \$110,349, and showing the tendency on the part of trustees to give teachers fairer remuneration. (See Table D. on Annual Salaries.)

2. For maps, globes, prize books and libraries, \$53,800, decrease \$1,188. The Legislative aid given to trustees for these objects was \$21,983.

3. For sites and building of School-houses, \$702,330—increase, \$2,782.

4. For rents and repairs of School-houses, \$148,454—decrease, \$5,581.

5. For School-books, stationery, fuel, and other expenses, \$330,394—increase \$21,386.

6. Total expenditure for all Public School purposes, \$2,993,080—increase, \$127,747.

7. Balance of School Moneys not paid at the end of the year when the returns were made, \$372,373—decrease, \$1,564.

II.—TABLE B.—SCHOOL POPULATION, AGES OF PUPILS, PUPILS ATTENDING PUBLIC SCHOOLS, AVERAGE ATTENDANCE.

The Statute requires that the trustees' returns of School population shall include the entire number of children resident in their School Division; and it confers the equal right of attending the Schools upon all residents in such divisions, between the ages of five and twenty-one years.

1. The School population (comprising only children between the ages of five and sixteen years) reported by trustees was 501,083—decrease, 10,520.

NOTE.—This is the result of a special census taken in December, 1875, and its correctness may be doubted.

2. The number of pupils between the ages of five and sixteen years attending the Schools, was 450,805—increase, 7,706. Number of pupils of other ages attending the Schools, 23,436—increase, 2,488. Total number of pupils attending the Schools, 474,241—increase, 10,194.

3. The number of boys attending the Schools, 250,430—increase, 6,224. The number of girls attending the Schools, 223,811—increase, 3,970.

4. The ages of pupils are: 1,737, under five years of age; 216,689, between five and ten; 205,492, between eleven and sixteen; 20,323, between seventeen and twenty-one.

5. The number reported as not attending any School is 10,809—increase, 488. They were between the ages of seven and twelve years, which are the ages fixed by the Statute during which all the children of a School Division should receive instruction in some School.

6. The average attendance, viz., the aggregate daily attendance divided by the legal number of teaching days in the year, was 198,574—increase, 5,676.

The attention of trustees, parents and inspectors, is called to the non-attendance of some children, and the partial and irregular attendance of many. It is to be hoped that parents will be aroused to the performance of the duty which our common Christianity and patriotism alike demand from them. Trustees and Inspectors should omit no effort in inciting parents to understand and fulfil their duty; and when persuasion, argument, and urgent appeals are powerless to move the parent, then it is imperative on trustees to give effect to the enactments of the law, and compel the attendance of the children.

III.—TABLE C.—NUMBER OF PUPILS IN THE DIFFERENT BRANCHES OF INSTRUCTION.

This Table has been rendered necessary in consequence of the system of classification of pupils which the new programme has introduced into the Public Schools. It shows the number of pupils which have been put back from the higher classes of the old system to the other classes under the new system. It also shows how efficient have been the County Inspectors in the discharge of this unpleasant part of their duties, in thus carefully examining and classifying, according to their attainments, the pupils in the various Schools.

IV.—TABLE D.—RELIGIOUS DENOMINATIONS, CERTIFICATES, ANNUAL SALARIES OF TEACHERS.

1. *Number of Teachers, Male and Female.*—In the 4,834 Schools reported, 6,018 teachers have been employed—increase, 282; of whom 2,645 are male teachers—increase 44; and 3,373 are female teachers—increase, 238. It will thus be seen that there are about 700 more female than male teachers.

2. *Religious Persuasions of Teachers.*—Under this head there is little variation. The teachers are reported to be of the following persuasions: Church of England, 945—increase, 21; Church of Rome, 726—increase, 34; Presbyterians (of different classes), 1,829—increase, 49; Methodists (of different classes), 1,884—increase, 111; Baptists (of different classes), 324—decrease, 4; Congregationalists, 80—increase, 11; Lutherans, 29; Quakers, 21; Christians and Disciples, 67; reported as Protestants, 52; Unitarians, 5; other persuasions, 48.

Of the 726 teachers of the Church of Rome, 516 are employed in the Public Schools, and 210 are teachers of R. C. Separate Schools.

3. *Teachers' Certificates.*—Total number of certificated or licensed teachers reported is 6,018—increase, 282; Provincial Certificates, 1st class, 236—increase, 21; 2nd class, 1,088—increase, 231; County Board Certificates of the Old Standard, 1st class, 411—decrease, 153; 2nd class, 163—decrease, 252; 3rd class, 29—decrease, 27; New County Board, 3rd class Certificates, 3,552—increase, 483; Interim Certificates, 539.

4. *Number of Schools which have more than one teacher,* 620—increase, 106.

5. *Annual Salaries of Teachers.*—The highest salary paid to a male teacher in a *County*, \$800—the lowest, \$120; in a *City*, the highest, \$1,000—the lowest, \$400; in a *Town*, the highest, \$1,000—the lowest, \$300. The average salary of male teachers in *Counties* was \$361—of female teachers, \$236; in *Cities*, of male teachers, \$728—of female teachers, \$295; in *Towns*, of male teachers, \$564—of female teachers, \$267. The average increase of male teachers' salaries for the Province during 1875, is \$21 per male teacher, \$12 per female teacher, while for 1874 it was \$10 per male teacher; for females, \$7 per teacher.

V.—TABLE E.—SCHOOL SECTIONS, SCHOOL-HOUSES AND TITLES, SCHOOL VISITS, SCHOOL LECTURES, SCHOOL EXAMINATIONS AND RECITATIONS, PRIZES, TIME OF KEEPING OPEN THE SCHOOLS, PRAYERS, &c.

1. The whole number of *School Sections* reported, 4,912—increase, 81, chiefly in new townships. The number of *Schools reported as kept open* is 4,834—increase, 76, these also mostly in new townships.

2. The increase in number of *School-houses* was 31. Of late years there has been a most

satisfactory decrease in the number of log-built School-houses, while stone, brick and frame School-houses have been substituted.

3. The whole number of School-houses reported is 4,858, of which 1,232 are *brick*, 492 *stone*, 2,117 *frame*, 1,017 *log*.

4. *Titles to School Sites*.—*Freehold*, 4590—*increase*, 82 ; *Rented*, 268—*decrease*, 51.

5. *School Visits*.—By Inspectors, 11,452—*increase*, 1,084 ; by Clergymen, 7,176—*decrease*, 3 ; by Municipal Councillors and Magistrates, 2,232—*increase*, 326 ; by Judges and Members of Parliament, 261—*decrease*, 64 ; by Trustees, 20,487—*decrease*, 699 ; by other persons, 43,862—*increase*, 2,889. Total School visits, 85,560—*increase*, 3,533. Trustees especially are bound to show zeal and interest in Public School education and by personal visits to the schools, and counsel to parents incite them to educate their children.

6. *School Lectures*.—By Inspectors, 1,026—*decrease*, 848 ; by other persons, 210—*decrease*, 113.

7. *Time of Keeping the Schools Open*.—The average time of keeping the Schools open, including the holidays and Sundays, was *eleven months and eleven days* in 1875.

8. *Public School Examinations*.—The whole number of Public School Examinations was 11,189—*increase*, 1,674 ; though less than two for each School. The law *requires* that there should be in each School a public *quarterly* examination, of which the teacher should give notice to trustees and parents of pupils, and to the School visitors (clergymen, magistrates, &c.,) resident in the School Sections. The time has now arrived when this requirement of the law should be insisted on and except in cases where sufficient reasons are shown, the apportionment of the School Fund must be withheld from the Schools in which this provision of the law is violated. Such examinations being tests of efficiency on the part of teachers, and of progress on the part of pupils, cannot fail to produce beneficial effects on Public Schools.

9. *The number of Schools holding Public Recitations* of prose or poetry by the pupils was 3,119—*increase*, 262. This exercise tends to promote improvement in reading, spelling and speaking ; and the more agreeable and attractive such exercises, as well as School examinations, can be made, the more rapid and successful will School progress become.

10. *School Prizes and Merit Cards*.—The number of Schools in which prizes are reported as having been distributed to reward and encourage meritorious pupils is 1,888—*increase*, 4.

11. *Prayers and Ten Commandments*.—Of the 4,834 Schools reported, the daily exercises were opened and closed with prayers in 4,014 of them—*decrease* 19 ; and the Ten Commandments were taught in 3,009—*decrease* 158. The law provides that "no child can be compelled to be present at religious instruction, reading or exercise, against the wish of his parents or guardians expressed in writing." The Department submits forms of prayer, and makes recommendations on the subject, but compliance with its recommendations are altogether voluntary. In 4,014, out of 4,834 Schools, religious exercises of this kind are voluntarily practised.

12. *Maps, Globes, and other apparatus*.—The maps and globes, and most of the other apparatus used in schools, are now manufactured in Ontario. Blackboards are used in 4,834 (or all) the Schools—*increase* 181 ; globes are used in 2,078 Schools—*increase* 311 ; maps are used in 4,499 Schools—*increase* 42. Total number of maps used in Schools, 35,389—*increase* 1,553.

VI.—TABLE F.—ROMAN CATHOLIC SEPARATE SCHOOLS.

1. The number of Roman Catholic Separate Schools is 156—*decrease* during the year, 10.

2. *Receipts*.—The amount apportioned and paid by the Chief Superintendent from the Legislative Grant to Separate Schools according to average attendance of pupils as compared with that at the Public Schools in the same Municipalities, was \$13,499—*increase* \$2,666. The amount apportioned and paid for the purchase of maps, prize books and libraries, upon the usual condition of an equal sum being provided from local sources, was \$954—*increase* \$124. The amount of School *rates* from the supporters of Separate Schools, was \$50,690—*decrease*, \$3,368. The amount *subscribed* by supporters of Separate Schools, and from other sources, was \$25,482—*increase*, \$3,089. Total amount received from all sources was \$90,62—*increase* \$2,263.

3. *Expenditure.*—For payments of teachers, \$58,025—increase, \$6,881; for maps, prize books and libraries, \$2,261—decrease, \$171; for other School purposes, \$30,339—decrease, \$4,446.

4. *Pupils.*—The number of pupils reported as attending the Separate Schools was 22,673—decrease, 113. Average attendance 11,774—decrease, 76.

5. The whole number of teachers employed in the Separate Schools was 210—decrease, 68; male teachers 79—decrease 13; female teachers, 131—decrease, 55.

6. The same table shows the branches taught in the Separate Schools, and the number of pupils in each branch; also the number of schools using maps, apparatus and black-boards.

7. According to the returns of the religious denominations of teachers, as given in Table D and noted previously, the number of Roman Catholic teachers of the Public Schools is 726, of whom 210 only are teachers in the Separate Schools. There were, therefore, 516 Roman Catholic teachers employed in the non-denominational Public Schools.

VII.—TABLE G.—HIGH SCHOOLS, RECEIPTS AND EXPENDITURES, PUPILS' FEES.

Receipts.—The balances reported from the preceding year (that is, of moneys not paid out by the 31st December, 1875), were \$12,366—decrease, \$219. The amount received by the High School Boards from Legislative grant for the salaries of teachers, was \$76,042—increase, \$488. The amount of Legislative grant apportioned for maps, prize books, etc., was \$1,793—increase, \$472. The amount of *Municipal Grants* in support of High Schools was \$160,223—increase, 2,242. The amount received for *pupils' fees* was 17,990—decrease, \$1,032. Balances of the preceding year and other sources, \$79,601—increase, \$26,926. Total receipts, \$348,018—increase, \$49,057.

Expenditures.—For salaries of masters and teachers, \$184,752—increase, \$4,806; for building, rents and repairs, \$76,586—increase, \$12,901; for fuel, books and contingencies, \$66,600—increase, \$26,960; for maps, prize books, apparatus and libraries, \$4,073—increase, \$750. Total expenditure for the year 1875, \$332,013—increase, \$45,419. Balances of moneys not paid out at the end of the year, \$16,004—decrease, \$3,668.

Number of Pupils, 8,342—decrease, 471.

Number of Schools, 108.

VIII.—TABLE H.—HIGH SCHOOLS, NUMBER OF PUPILS IN THE VARIOUS BRANCHES AND MISCELLANEOUS INFORMATION.

Table H shows both the subjects taught and the number of pupils in each subject in each of the High Schools, the names, university degree (or certificate) of the Head Masters, and the number of masters employed in each School, &c.

No. of Pupils.—In *English Grammar and Literature*, 8,130; in *Composition*, 7,557; in *Reading, Dictation and Elocution*, 7,949; in *Penmanship*, 6,861; in *Linear Drawing*, 3,201; in *Book-keeping*, 3,403; in *Arithmetic*, 8,146; in *Algebra*, 7,038; in *Geometry*, 4,513; in *Logic*, 279; in *Mensuration*, 3,301; in *History*, 7,580; in *Geography*, 7,866; in *Natural Philosophy*, 2,134; in *Chemistry*, 1,924; in *Natural History*, 2,156; in *Physiology*, 1792; in *French*, 2,956; in *German*, 509; in *Latin*, 3,864; in *Greek*, 875; in *Gymnastics and Drill*, 536.

Of the School-houses, 65 were of brick, 23 stone, 18 frame and 1 concrete; 18 were rented or leased, the remainder freehold. Galt has the finest playground of any of the High Schools—it consists of 7 acres; Lindsay and Metcalfe, 6 acres; London, 5 acres; Barrie and Guelph, 4 acres. The other play-grounds vary in size, the smallest being only $\frac{1}{2}$ of an acre—or one fourth of the minimum size required of the smallest Public School. The estimated value of each School-house and site varies from \$35,000 and \$30,000 (Toronto and Peterboro') down to \$600 (Berlin and Pakenham).

64 High Schools were under Union High and Public School Boards; Kingston is the oldest High School in Ontario, dating from 1792; Cornwall, 1806; Brockville, 1818; Niagara, 1808; St. Catharines, 1828. 1938 maps were used in the 108 High Schools; 59 Schools use the Bible; in 95 there were daily prayers; 100 pupils matriculated at some University during 1875; 454 pupils entered mercantile life; 278 adopted agriculture as a pursuit; 326 joined the learned professions; 586 went to other occupations. Nearly all the Schools have now additional masters, when under the old system, a great majority of the

Schools had only one master. The position of the High Schools as an essential and integral part of our educational system, is becoming better understood. They constitute the necessary stepping-stone between the Public Schools and the University, and upon their efficiency depends the success of our efforts in opening the avenues of learning to every child in the Province, as well as in affording to each youth of ability the opportunity for the highest intellectual career. The High School is intended to meet in each county the requisites of higher education, just as the Public School in each section is established to furnish elementary instruction.

The Report of the Inspectors, Messrs. Buchan and Marling, will be found in Appendix A to this Report.

X.—TABLE K.—NORMAL AND MODEL SCHOOLS.

Table K contains three abstracts, the first of which gives the gross number of applications, the number that had been teachers before entering the Normal School, attendance of teachers in training, certificates, and other particulars respecting them during the twenty five years' existence of the Normal School; the second abstract gives the counties from whence these students have come; and the third gives the religious persuasion of these students.

Table K shows that of the 7,513 students admitted (out of 8,330 applicants) to the Normal School since the beginning, 3,653 of them had been teachers; and of those admitted, 3,790 were males, and 3,753 were females. Of the 3,790 male candidates admitted, 2,509 of them had been teachers; of the 3,753 female candidates admitted, 1,144 of them had been teachers. The number admitted during the session of 1875 was 176. Of these, 87 were males, and 89 females. Of the male students admitted, 62 had been teachers; of the female students admitted, 32 had been teachers.

XI.—TABLE L.—OTHER EDUCATIONAL INSTITUTIONS.

The Public and High Schools are the educational agencies which come under the direct administration of this Department. Other Institutions have in former Reports been referred to in order to ascertain the state of education throughout the Province. Table L contains an abstract of the information collected respecting these institutions. It can only be regarded as an approximate. It might, with advantage to the public interests, be made incumbent on all such institutions to report specifically in each year to your Honour, in order that their returns may be collated by this Department. These Institutions comprise the University of Toronto, with University College and Upper Canada College, which are provincially endowed, and are subject to the control of your Honour in Council. Causes of a social or denominational character have given origin to other colleges and institutions. The following possess university powers:—the University of Victoria College, Cobourg; University and Queen's College, Kingston; University of Trinity College, Toronto; Albert University, Belleville; Ottawa College.

XII.—TABLE M.—FREE PUBLIC LIBRARIES.

1. The amount expended in library books during 1875, was \$5,610, of which one-half has been provided from local sources. The number of volumes supplied was 7,744.

2. The value of Public free libraries furnished to the end of 1875 was \$158,030.

The number of Libraries, exclusive of subdivisions, 1,390—increase 56. The number of volumes in these libraries was 273,790—increase 7,744.

3. Sunday School Libraries reported, 2,557. The number of volumes in these libraries was 382,302.

4. Other Public Libraries reported, 164. The number of volumes in these libraries was 133,982.

The total number of Public Libraries in Ontario, 4,111. The total number of volumes in these libraries, 790,074.

6. Number and classification of public libraries and prize books which have been sent out from the Depository of the Department from 1853 to 1875 inclusive. The total number of volumes for Public Free Libraries sent out, 273,790. The classification of these books is as

llows:—*History*, 46,647; *Zoology and Physiology*, 16,201; *Botany*, 2,965; *Phenomena*, 6,621; *Physical Science*, 5,106; *Geology*, 2,374; *Natural Philosophy and Manufactures*, 13,841; *Chemistry*, 2,442; *Practical Agriculture*, 10,313; *Literature*, 26,004; *Voyages*, 24,726; *Biography*, 30,902; *Tales and Sketches, Practical Life*, 77,886; *Fiction*, 2,997; *Teachers' Library*, 765. Total number of *Prize Books* sent out, 839,455. Grand Total of library and prize books (including, but not included in the above, 22,885 volumes sent to Mechanics' Institutes and Sunday Schools, paid for wholly from local sources) 1,136,130.

III.—TABLE N.—SUMMARY OF THE MAPS, APPARATUS, AND PRIZE BOOKS SUPPLIED TO THE COUNTIES, CITIES, TOWNS AND VILLAGES DURING THE YEAR.

1. The amount expended by the Education Department in supplying maps, apparatus, and prize books for the Schools, was \$46,114; increase, \$1,483; the amount purchased from booksellers, \$2060.94. The one-half of these sums were provided voluntarily from local sources; in all cases the books or articles are applied for, and fifty per cent. of the value paid for by the parties concerned. The number of Maps of the World sent out was 333; of Europe, 426; of Asia, 332; of Africa, 306; of America, 387; of British North America, and Canada, 526; of Great Britain and Ireland, 232; of Single Hemispheres, 208; of Scriptural and Classical, 128; of other charts and maps, 752; of globes, 219; of sets of apparatus, 74; of other pieces of school apparatus, 2,517; of Historical and other lessons, in sheets, 1,048. Number of *Prize Books*, 72,818.

2. From 1855 to the end of 1875, the amount expended for maps, apparatus, and prize books (not including Public Libraries), was \$499,033. The number of maps of the *World* furnished is 4,075; of *Europe*, 5,901; of *Asia*, 4,717; of *Africa*, 4,329; of *America*, 5,141; of *British North America and Canada*, 6247; *Great Britain and Ireland*, 4,788; of *Single Hemispheres*, 3,861; of *Classical and Scriptural Maps*, 3,375; *other Maps and Charts*, 3,607; *Globes*, 3,004; *sets of apparatus*, 875; single articles of school apparatus, 21,282; *Historical and other lessons in sheets*, 273,510; *Volumes of Prize Books*, 839,455.

XIV.—TABLE O.—SUPERANNUATED OR WORN-OUT TEACHERS OF PUBLIC SCHOOLS

1. This table shows the age and service of each Public School pensioner in Ontario to the close of 1874, and the amount which he receives. The system, according to which aid is given to worn-out Public School teachers, is as follows:—in 1853, the Legislature appropriated \$2,000, which it afterwards increased to \$4,000 and then to \$6,000; on the adoption of the system of compulsory subscriptions, which increased the revenue to \$11,800 for 1873 the vote was again increased, and for 1875 was \$29,000, in aid of superannuated worn-out Public School teachers. The allowance cannot exceed \$6 annually for each year the recipient has taught School in Ontario. Each recipient must pay a subscription to the Fund of \$4 for the current year, and \$5 for each year since 1854, if he has not paid his any year; nor can any teacher share in the fund unless he pays annually at that rate, commencing at the time of his beginning to teach, or with 1854, (when the system was established) if he began to teach before that time. When a teacher omits his annual subscription, he must pay at the rate of \$5 for that year in order to be entitled to share in the fund when worn out. The Legislative Grant is now sufficient to pay each pensioner the full amount permitted by law, and it is divided among the claimants according to the number of years each one has taught.

2. It appears from the Table that 386 have been admitted to receive aid, of whom 17 have died, have not been heard from, have resumed teaching or have withdrawn from the fund before or during the year 1875, the amount of their subscriptions having been returned to them.

3. The average age of the pensioners in 1875 was 64 years; the average length of time of service in Ontario was 22 years. No time is allowed applicants except that which has been spent in teaching a Public School in Ontario; though their having taught Schools

many years in England, Ireland, Scotland, or the British Provinces, induced the Council of Public Instruction in some instances, to admit applicants to the lists, after teaching only a few years in this Province.

4. The Public School Act (sections 97 and 98), shows that this allowance can be claimed only by a teacher who has reached sixty (60) years of age, or is disabled from practising his profession.

XV.—TABLE P.—EDUCATIONAL SUMMARY.

This table shows the number of Educational Institutions of every kind, the number of students and pupils attending them, and the amount expended in their support as far as returns have been obtained. The whole number of these institutions in 1875, was 5,258— increase, 93; the whole number of students and pupils attending them was 494,065— increase, 10,204; the total amount expended for all educational purposes was \$3,823,982. Total amount available for educational purposes, \$4,212,360— increase, \$238,103.

XVI.—TABLE Q.—GENERAL STATISTICAL ABSTRACT OF THE PROGRESS OF EDUCATION IN ONTARIO, FROM 1842 TO 1875, INCLUSIVE.

This table supplies the material for comparing the number and character of Educational Institutions at different periods, the number of pupils attending them, and the sums of money provided and expended for their support.

By analyzing and comparing these statistics, a correct appreciation can be formed of what has been accomplished educationally in Ontario during the last thirty years. For example: in 1842, the number of Public Schools was only 1,721. In 1851, this had increased to 3,001; and in 1875, to 4,758; and the number of pupils attending them from 168,159 in 1851, to 474,241 in 1875. The amount paid for the support of Public Schools has been increased from \$468,644 in 1851, to \$2,993,080 in 1875 (not including balances not paid at the date of the local reports), including the amount paid for the purchase, erection, repairs of School-houses and for other purposes, of which there are no reports earlier than 1850, but which at that time amounted to only \$56,755, and \$77,336 in 1851, but which in 1875, amounted to \$1,234,980, making the aggregate actually paid for Public Schools purposes in 1875, with the balances available and not paid out at the date of the local reports, \$3,365,453.

XVII.—THE EDUCATIONAL MUSEUM.

This fourth branch of the Education Department is probably the most attractive, as it is both suggestive and instructive. The other three branches are: (1.) The department proper for the administration of the laws relative to the Public and High Schools. (2.) The Normal School for the training of skilled teachers. (3.) The Depository for the supply of maps, apparatus and prize and School books.

The Educational Museum is founded after the example of what has been done by the Imperial Government as part of the system of popular education—regarding the indirect as scarcely secondary to the direct means of forming the taste and character of the people.

The Museum consists of a collection of School apparatus for Public and High Schools, of models of agricultural and other implements, of specimens of the natural history of the

country, casts of antique and modern statues and busts, &c., selected from the principal museums in Europe, including the busts of several of the most celebrated characters in English and French history, also, copies of some of the works of the great masters in Dutch, Flemish, Spanish, and especially of the Italian Schools of painting. These objects of art are labelled for the information of those who are not familiar with the originals, but a descriptive historical catalogue of them is in course of preparation. In the evidence given before the Select Committee of the British House of Commons, it is justly stated that "the object of a National Gallery is to improve the public taste, and afford a more refined description of enjoyment to the mass of the people;" and the opinion is at the same time strongly expressed that as "people of taste going to Italy constantly bring home beautiful copies of beautiful originals," it is desirable, even in England, that those who have not the opportunity or means of travelling abroad, should be able to see, in the form of an accurate copy, some of the works of Raffiello and other great masters; an object no less desirable in Canada than in England. What has been thus far done in this branch of public instruction is in part the result of a small annual sum, which, by the liberality of the Legislature, has been placed at the disposal of the Education Department, out of the Ontario Education Grants, for the purpose of improving School architecture and appliances, and to promote art, science and literature, by the means of models, objects and publications, collected in a Museum connected with the Department.

CONCLUSION.

The foregoing Report being, for the year 1875, is compiled from the Reports and Statistical Returns filed in the office of the Education Department. During that year all these matters were under the control and supervision of the late Chief Superintendent, the Reverend Dr. Ryerson; and this Report may be considered as a further testimony to the vigour and success of his long administration of thirty-one years; recording as it does the operations of the last complete year of his educational labours, and showing a further stage in advance in our educational progress.

Dr. Ryerson for several years urged the next step for the complete development of our system, in transferring the administration of educational matters to one of your Honour's advisers, and responsible to the people through their representatives in the Legislature; and I have had the honour of being charged with this responsibility. My best efforts will be directed to secure and perpetuate the advantages which were gained for our system by the late Chief Superintendent, after many controversies and discussions; and to make effectual such means as will result in the further efficiency of the Public Schools, and the satisfactory maintenance of our High Schools, so as to fully supply every want of our Province in both elementary and secondary education.

ADAM CROOKS,

Minister.

EDUCATION DEPARTMENT, ONTARIO.

December, 1876.

PART II

STATISTICAL REPORT.

NOTE.—The increase of Receipts and Expenditure, as compared with that of the four preceding years, is unusually portion of the year 1875, and from which the country has not yet recovered.

The decrease of Trustees' School Assessment is caused by many Municipal School Assessments having been reported combined items is \$90,616 49.

All moneys reported in the Tables represent actual payments made between the 1st January and 31st December.

Tables A, B, C, D, E, include the statistics of Separate Schools. These statistics are given separately in Table F.

hools of Ontario.

ABSTRACT No. 1. GROSS ATTENDANCE OF STUDENTS, CERTIFICATES, &c. *Continued.*

THE SESSIONS OF THE TORONTO NORMAL SCHOOL.	WHO ATTENDED FORMERLY.			WHO LEFT.			WHO RECEIVED PROVINCIAL CERTIFICATES.					
	Total.	Male.	Female.	REGULARLY.			IRREGULARLY.			Total.	Male.	Female.
				Total.	Male.	Female.	Total.	Male.	Female.			
From the 1st to the 52nd Session, inclusive.....	2567	995	1572	1333	831	502	390	282	108	181	73	108
Fifty-third Session.....	49	20	29	19	15	4	12	7	5	98	47	51
Grand Total.....	2616	1015	1601	1412	846	566	402	289	113	279	120	159

NOTE. Of the whole number of admissions, a very large proportion have attended two or three Sessions—some even four and five—so as greatly to reduce the aggregate of individual attendance. And the same is true of the Provincial Certificates, of which a considerable number have lapsed by deaths and become otherwise unavailable by removals, and a still larger number have been superseded by subsequent Certificates. *2846 Students received Provincial Normal Certificates up to the termination of the forty fifth Session, and 420 received "Certificates of Standing in Class" from the Master before Provincial Certificates were issued. From the forty-sixth to the fiftieth Sessions, inclusive, the Chief Superintendent did not issue Provincial Certificates, and the Students during that period obtained their II. and III. Class Certificates from the County Boards, and the I. Class from the Council of Public Instruction. From the fifty-first Session, the Chief Superintendent again issued Provincial Certificates, and the 279 mentioned above show the total number of Students who received them since the return to the old system.

2. OTTAWA NORMAL SCHOOL.

This Institution was in Session during the last quarter of 1875, with an attendance of 37 pupils. Tables similar to those for the Toronto Normal School will be published in the Annual Report for 1876.

NOTE.—During this year, the system of having two short Normal School Sessions was abolished, and one long Session—lasting from the 15th of September to the 15th of the following July—substituted therefor. This is the reason why only one Session is reported for 1875.

TABLE N.—The High and Public Schools of Ontario.

TABLE showing the value of articles sent out from the Education Depository during the years 1851 to 1875 inclusive.

BOOKS IMPORTED INTO ONTARIO AND QUEBEC.

The following Statistical Table has been compiled from the "Trade and Navigation Returns" for the years specified, showing the gross value of books (not maps or school apparatus) imported into Ontario and Quebec.

YEAR.	Articles on which the 100 per cent. has been apportioned from the Legislative Grant.		Articles sold at catalogue prices without any appor-tionment from the Leg-islative Grant.		Total value of library, prize and school books, maps and apparatus de-spached.	YEAR.	Value of books entered at Ports in the Province of (Quebec.)		Value of books entered at Ports in the Province of Ontario.		Total value of books im-porting into the two Pro-vinces.	Proportion imported for the Education Department of Ontario.

					26509 25

In the above table, where the number is omitted, the pensioner's either dead, has resumed teaching, or has withdrawn.

During 1875, \$1220.96 were returned to subscribers withdrawing from the Fund.

The amount paid to new pensioners for the first year is affected by the amount of arrears of subscriptions they have respectively paid in.

NOTE.—Balances due but not collected, were included until 1868, but from that date Nov. 18, 19, 20, 21, 22, and 24 represent actual payments only. If we add to the Grand Total (24) the unexpended balances, we should have an available sum of \$4,212,360 for Educational purposes during 1875, and for 1874, \$3,974,256, the increase in 1875 being \$238,103.

NOTE.—The Returns in the foregoing Table, up to the year 1847, are not very complete, but since that period they have been sufficiently so to establish data by which to compare our yearly progress in Educational matters. The Returns are now pretty extensive, and embrace all Institutions of Learning, from the Public School up to the University; but hitherto the sources of information regarding this latter class of Institutions have been rather private than official, which should not be the case. The Annual Report of a Department of Public Instruction should present, in one comprehensive tabular view, the actual state and progress of all our Educational Institutions—Primary, Intermediate, and Superior. The Public Schools are now all free by law.

PART III.

APPENDICES.

1875.

APPENDICES TO THE ANNUAL REPORT
OF THE
NORMAL, MODEL,
HIGH AND PUBLIC SCHOOLS,
IN ONTARIO,
FOR THE YEAR 1875.

APPENDIX A.

REPORT AND SUGGESTIONS WITH RESPECT TO THE COLLEGIATE INSTITUTES AND HIGH SCHOOLS OF ONTARIO, FOR THE YEAR 1875, BY J. M. BUCHAN, ESQ., M. A., AND S. ARTHUR MARLING, ESQ., M. A., INSPECTORS OF HIGH SCHOOLS.

Hon. A. Crooks, Minister of Education.

SIR,—Having already made detailed reports of our inspectoral visits to the different High Schools, we have now the honour to submit a report on their general condition during the year 1875.

INDICATIONS OF PROGRESS.

It is gratifying to us to be able to direct your attention to the same indications of progress on which we had the pleasure of commenting in our Report for 1874. We feel warranted in saying that, in regard to the qualifications of the masters, the salaries paid, the buildings, their internal equipment and their surroundings, the attainments of the pupils, and the life and activity pervading the management, the condition of the High Schools in 1875 was better than in any previous year of their history. There are, of course, schools that have retrograded; but such in our opinion is the general conclusion that must be arrived at from a survey of the operations of the year. Conspicuous among the causes that have produced this improvement are the Entrance Examinations and the scheme for Payment by Results.

When the system of uniform entrance examinations was instituted in 1873, there were many fears expressed that, if the standard then set up were maintained, the High Schools would speedily be depleted. So rapidly, however, did the Public Schools, the private schools and the preparatory classes, from which the High Schools receive their pupils respond to the demand made upon them, that no serious diminution in the number of High School pupils took place. Under these circumstances we felt justified in taking another step in advance. During 1873 and 1874, a great many of the local boards provisionally admitted pupils, who, though they had made fifty per cent. of the aggregate number of marks, were yet very deficient in particular branches. We dealt with the more striking cases of this kind, in revising the results of the examinations; but as this course led to a good deal of unnecessary friction, and, as it was perfectly evident that entrants could be properly prepared in every subject, we caused it to be announced for

the guidance of the local boards, that we would not consider any one competent to enter who failed to obtain one-third of the marks in any subject. This announcement met with general approbation, and the carrying of it into effect has resulted in improving the quality without diminishing the number of entrants, the Public Schools and other schools preparing pupils for the High Schools having again rapidly responded to the demand made upon them. In consequence, the fresh material placed in the hands of the High School Masters to mould in 1875 has been better than ever before.

Though the scheme for Payment by Results was not carried into effect in 1875, yet its adoption in the early part of the year, and the knowledge that it was about to be put into operation, not only stimulated the teaching of many subjects, but caused many boards to improve their staffs of teachers, their buildings and the material appliances of education. In these directions there is still much to be done, but we are convinced that the "new scheme," when in operation, will, by directing the attention of Trustees every half year, in a very practical manner to existing defects, aid materially in producing continuous improvement.

1875—A YEAR OF TRANSITION.

In consequence of the expectation of the enforcement of the scheme for Payment by Results, and of the preparations caused by that expectation, the year 1875 was to a considerable extent a year of transition, and though full of the beginnings of what may prove to be interesting phenomena, it did not present such marked features as to render a long Report necessary. Many of the questions which for years past have served as the texts of the Annual Reports on the state of the High Schools, have been provisionally, perhaps finally, settled. If they ever crop up now, they are mere ghosts of what they were. Our predecessor, the Rev. G. P. Young, in his Report for the year 1866, discussed at length a number of subjects in which are included all the burning questions that have arisen during the last ten years. The topics treated in that Report were:

1. The tendency to increase the number of Union Schools.
2. The degradation of the Public Schools, and the injury to the High Schools, resulting from the tendency to draft in unprepared pupils.
3. The evil consequences arising from the tendency to force all the pupils in the High Schools, irrespective of sex or destiny in life, to study Latin.
4. A proposal to remove the main cause of the preceding tendencies by apportioning the Government grant, according to both educational results and attendance, instead of according to attendance merely.
5. A proposal to abolish Union Schools.
6. A proposal to increase the number of High School Inspectors.
7. A discussion of the question whether it is advisable that both sexes should attend the same High Schools.

How completely the condition of the High Schools has been altered may be inferred from the fact that all the evil tendencies complained of by Mr. Young have been checked, and all his proposals have been substantially adopted. Nearly all these changes have been carried into effect within the last three years, and in consequence many of the old topics of discussion are sinking out of sight.

THE "SUPPORT" QUESTION.

Yet, though this is the case, there are some questions that have not received their quietus. Prominent among these is the subject of High School support; though this had been repeatedly discussed since 1854, the year in which the Grammar Schools came under the control of the Chief Superintendent, and though many schemes have been proposed, no satisfactory solution has been arrived at. If any schools for secondary education anywhere deserve to be liberally supported and placed on a sound financial basis, our High Schools do. They are not the schools of a class; they are open to the whole people. While the children of professional men, wholesale merchants, and manufacturers, enjoy the benefits of the instruction which they afford, by far the greater number of the pupils that sit on their forms are the sons and daughters of farmers, retail dealers, and mechanics. In the majority of the High Schools no fees are charged; and where there are fees, they are small in amount. The High

Schools are not confined to the larger centres of population ; they are scattered broadcast over the country. Whatever may have been their defects in the past, they are now much improved. The gravest evils that now exist in them are traceable to the inadequacy of their revenues. The poorness of the buildings and accommodations, and the lack of the material appliances of education in the case of many High Schools are obviously directly traceable to this source. But there are other evils of a more serious character which arise from it. University graduates of ability are deterred from entering a profession in which the rewards are so small. A High School Head Master may deem himself fortunate, if, after years of successful teaching, he rises to a position, the emoluments of which are equal to half of those of the manager of the branch bank, or of ordinarily prosperous lawyers and doctors in the same place. Such a prospect is not attractive to an educated young man, conscious of the possession of talents, and the results which such a state of affairs, if long continued, will bring about, are so easy to foresee that it is not necessary to explain them at length.

It cannot be too strongly urged that a High School is valuable and useful, only in so far as it secures the appointment of Masters who are good scholars, as well as good teachers. It is a farce and a sham of the most injurious character, to permit a High School to exist, if the salaries which its Board of Trustees are able to offer, do not attract good men. Every High School that is kept in existence, ought to be maintained well. Many of them at the present time come far short of what they ought to be, owing to the fact that they cannot offer salaries that will secure the prominent services of any but the poorest teachers.

QUALIFICATION OF MASTERS.

Closely connected with the subject on which the preceding remarks have been made, is the question how we may best secure men suitably qualified to act as teachers in the High Schools. This is, of course, in the first place a question of money. Sufficient pecuniary inducements will secure good men. But something may be done in other ways to improve the quality of the supply. Our difficulty arises at present from the difference in the value of degrees. Not only does the degree of one University differ in value from that of another, but the degrees conferred by the same University, may not be of the same value. Some Universities give the degree of Bachelor of Arts, for any one of several courses, and it is hence quite possible, that a man may have taken his degree with flying colours, and really be a master of the subjects to which he has mainly devoted his attention, while he is at the same time very ill qualified to teach the branches which are to be taught in a High School. This difficulty is perhaps at present insuperable. But we direct attention to it, in the hope that some means may be suggested whereby it may be overcome.

Another difficulty arises from the ignorance of the principles that underlie the art of teaching, which men fresh from the University usually display. We are of the opinion that much might be done to dispel this ignorance, to promulgate correct views on teaching, and to promote the thorough discussion of unsettled points, if a lectureship on pedagogy were founded. The lectureship should not be tenable for more than a short term, by any one person, in order that the lectures may be delivered by men fresh from practical work.

A third difficulty arises from the inferior scholarship of too many of the assistant masters in the High Schools. Undoubtedly, great improvement has been made in this respect of late years, but more might still, advantageously, be done. It would be injudicious at the present time when the salaries offered for assistant masters are so small, to urge the exclusion of men holding Second-Class Certificates from the staffs of the High Schools. Yet it is undeniable that, though a second-class teacher may have qualified himself, as some, undoubtedly, have done, for the proper performance of the duties assigned to him in the school to which he belongs, the mere possession of the knowledge necessary to take such a certificate does not render him a sufficiently good scholar and does not ensure a sufficient amount of culture for an appointment on a High School staff. Now it is the case in many High Schools that the teaching of English grammar, English literature or English composition, or of all three subjects, falls to the lot of a second-class teacher. The second-class teachers are a highly meritorious body ; they are persons who have done well, considering their opportunities ; but it reflects no discredit on them to say that they are not likely to teach these subjects in the liberal way in which they ought to be taught in a High School, or to inspire while teaching them, a literary taste, and a tendency to

breadth of view which they do not themselves possess. The fact is that to teach advanced classes in English well, it is desirable that a master should know something of the ancient classical languages and literatures.

SCIENCE-TEACHING.

The question what degree of prominence the teaching of science should take in the curriculum of the High Schools is one which it is exceedingly difficult to decide. But it is undoubtedly right that, in this age of the world, in which the physical sciences have gained for themselves a more important position than they ever held before, some attention should be paid to them in our secondary schools. As chemistry is the most valuable of the physical sciences from a practical point of view, and as a knowledge of its leading principles is exceedingly useful to all who study the other physical sciences, the teaching of it appears to deserve to be fostered in these schools. But at present a damper is put on the study of chemistry in the High Schools by its non-recognition in the matriculation examination of the University of Toronto. In the early history of the University both chemistry and natural philosophy were included in the matriculation programme, but it was found necessary to omit them, because no candidates came up that knew anything about them. The situation has changed since, and we are convinced that, should the Senate of the University again include these subjects in the entrance examination, the High Schools would respond to the demand made upon them. There are objections to putting natural philosophy on the matriculation programme which do not apply in the case of chemistry. These we shall not discuss, but we shall content ourselves with saying that we are strongly of the opinion that if the Senate of the University will, when they come to the final settlement of the new curriculum which is understood to be under consideration, recognise chemistry in some way in the matriculation examination, they will confer a boon on the cause of secondary, and at the same time benefit that of superior, education. To secure this end it is not necessary, indeed, we think it undesirable, that it should be made a pass subject. It would be quite sufficient to make it an optional subject which would count in some way for honours and scholarships.

The schools which have so far paid the greatest attention to teaching physical science are Barrie, Bowmanville, Hamilton, Peterborough, St. Catharines, and Whitby. The material appliances in the first of these schools are far from adequate, but chemistry and botany are taught very well. In the practical teaching of the former subject, however, St. Catharines takes the lead. Every pupil in the chemistry class there, and it is not a small one, does an amount of work in qualitative analysis that cannot fail to render his understanding of the leading principles of the science full and accurate for a school-boy, if he pursues the study for a reasonable length of time.

CONSOLIDATION OF EXAMINATIONS.

The adoption of the scheme for payments by results has differentiated more clearly the functions of the High Schools from those of Public Schools, and has also lessened the difficulties arising from the overlapping of the High and Public School courses of study. It is much to be desired that the intermediate examination should, as far as possible, be made use of to diminish the labour which the masters are forced to undergo, in consequence of the diversity of requirements on the part of the examiners for the different professions. In the same school there may be pupils preparing for the Law Society, for the Medical Council, for the University, and for teachers' certificates. In each of these cases a different preparatory course is prescribed, and to meet the wants of candidates the master is compelled to multiply classes to such an extent as to interfere seriously with the general work of the school. It is not necessary that there should be so great a diversity between these preparatory courses, and it would, we are confident, prove a satisfactory arrangement if these various examinations were as far as possible consolidated, or rendered co-extensive with the intermediate examination.

We have the honour to be, Sir,
Your obedient servants,

J. M. BUCHAN,
S. ARTHUR MARLING.

Toronto, 30th September, 1876.

APPENDIX B.

EXTRACTS FROM REPORTS OF INSPECTORS OF PUBLIC SCHOOLS, RELATIVE TO THE STATE AND PROGRESS OF EDUCATION IN THEIR RESPECTIVE COUNTIES, &C., FOR THE YEAR 1875.

COUNTY OF RUSSELL.

Rev. Thomas Garrett.—In the year 1871, the united counties, Prescott and Russell, were divided into two parts for Inspectoral purposes, called the Eastern and Western Inspectorates. In forming the Western Division, the Council found it necessary to annex two Townships, viz.; N. & S. Plantagenet of the Co. Prescott, with the Co. of Russell, in order that the Western Inspectorate should contain fifty Schools, the minimum allowed by law. From that time to the present the number of schools has grown from fifty to sixty. The attention of Municipal Councillors and Trustee corporations, generally speaking, is manifested so largely and so disinterestedly as to merit unqualified applause.

Towards the close of last year an apparent lull seems to have set in; but it is owing to the financial depression, and consequent cheapness of farm produce. But though Trustees, as a rule, have positively resisted any effort for the increase of teachers' wages, the inertia proves to be more in seeming, than in reality, for already there are in course of erection four new School-houses for 1876.

We have fewer efficient male teachers this year, owing to the fact that a number have given up good situations and have gone to the Ottawa Normal School, in the hope, and for the purpose, of acquiring such training as may fit them for the profession, the influence of which we trust will ere long be felt and duly appreciated in this community.

A number of the present staff of teachers have been well trained in a few of our P. Schools and are likely to prove themselves equal to the work they have assumed. Every effort is made to carry out the requirements of the law and to organize the School according to the Programme and Limit Table prescribed for that purpose by the C. P. I.

I find that the more rigidly a teacher adheres to prescribed forms, the more successfully is the work of Instruction performed. At first he meets with opposition from those who fancy that *their* views of teaching are orthodox, and hence the teacher who has sufficient courage by the introduction of new machinery to break up the fallow ground, does so under difficulties which can be surmounted, and that successfully, by the performance of duty according to law.

I continue to have a large share of the Inspector's important department of duty, embraced under the head of School Accommodation as presented in the General Regulations of the C. P. I., and I believe the general public to be sufficiently taxed for the work, though the poorer sections have undoubtedly been more liberal than the richer. Not a few sections are in debt for the improvements which have been made, and therefore I am not making any special effort towards the purchase of School Libraries; but, I believe, the time is at hand and a first effort in the good work will shortly be made in S. S. No. 5, Russell, conducted by the indefatigable N. G. Ross, in the popular form of a School Exhibition, at which I give a lecture.

I consider the Model Teacher the most successful medium for the introduction of so desirable an object as the establishment of School Libraries, and therefore, if we can secure their diligent co-operation, I think we will be assured of success, having due consideration of the circumstances of any particular section financially.

Obstacles in the way to general progress have opposed themselves in a few places; but they are few, and far between, especially when we consider the perpetual counselling, planning, organizing, uniting, and discussing of the fragments of these partially settled townships. However if anything diverts the attention of Trustees from the school under their charge, or fosters the inert stagnation which bids defiance to reformation, that is an obstacle to be deplored and speedily removed.

In conclusion, I have briefly to report that from the year 1871, to the end of 1875, there have been 22 new School-houses built, 10 School-houses enlarged and repaired, and

thirty-nine Schools have been furnished with an adequate supply of maps and apparatus, in this Western District.

COUNTY OF LEEDS. NO. 1.

William R. Bigg, Esq.—The Schools under my jurisdiction continue to improve, and I now find Grammar and Geography universally taught, while the classification, so far as the fundamental branches are concerned, is gradually approximating to that of the official programme. Better qualified teachers are employed, "Permits" are things of the past, and the natural results are beginning to develop.

I am also glad to say that the School-houses, furniture and grounds are in much better condition than formerly, though some sections, like laggard scholars, seem to have an affinity for the rear ranks.

Several new School-houses have been erected during the present year, and their sites severally increased to the requisite half acre, while other sections returned last year with "insufficient school lot," have this year rectified the deficiency, as you will see on reference to my "detailed report" herewith accompanying. Among those specially deserving notice, may be mentioned U. S. S. Nos. 2 and 3 Yonge Front, and No. 28 Elizabethtown, which has built a fine stone School-house, with a $\frac{3}{4}$ acre site, at an expense of \$1,100. S. S. 17 Escott Front, and U. S. S. No. 6 Yonge and Escott Front have erected new buildings, furnished with seats and desks of modern construction imported from the west.

There now remain but 13 sections without maps, and I trust to be able to announce in my next—that every section is furnished with these requisites.

I shall make a fresh effort in 1876 to induce those sections, which have neither enlarged nor enclosed their sites, to comply with the law, but I am afraid that the majority of the sections, that have not already complied, will remain perverse, and that nothing short of withholding the Government and Municipal grants will effect the desired change, an alternative that no Inspector dares to adopt, so long as his situation is at the disposal of any Municipal Corporation. Councilmen are but human, and freely admit, that, though desirous that the several provisions of the School Act should be carried out, it would be impossible for them to be re-elected, were they to sustain the Inspectors in enforcing those clauses which seem repugnant to so many sections, hence "moral suasion," however fruitless in the past, is preferred to a more rigorous administrative course. Under these circumstances I am of the opinion, that if it is ever intended to enforce the provisions of the School Act, it can only be done through the means of Inspectors solely responsible to the Government and acting under its instructions.

The following summary exhibits the number of Schools in each Township, the number without maps, and distinguishing those, whose sites have been enclosed and enlarged to the requisite dimensions from those which have complied with the laws, and from those that have remained inert.

MEMO.—Those that have partially complied, either have the half acre, but not enclosed, or the premises are enclosed, without sufficient land.

	Number of Schools.	Complid.	Partially Complid.	Inert.	Without Maps.

With regard to the 33 questions in the "Detailed Report," it may be well to state that the bulk of the answers is that given by the teachers. I desire, however, to make a few remarks on some of the interrogatories. No. 11, the General Register, is not in use, a daily and a class register being deemed sufficient for all practical purposes. No. 16, "Sending reports to parents," and No. 25, concerning "Libraries"—these are very desirable, but the Schools where such an enlightened state of things exists are, like angels' visits, few and far between. No. 28—private room for teachers—no chance of this being answered in the affirmative during the present century. No. 31—I consider the "chief obstacles to the advancement of schools" to be inefficient teachers, coupled with more or less indifference on the part of parents, and sometimes unsuitability of the School-house, and occasionally only keeping the School open six months in the year.

I would also remark that there is no such thing as a fifth class in our country schools; a few teachers imagine they have such a thing, but an examination dispels the delusion, and shows that the simple basis on which it rests, is "reading in the Fifth Book." Occasionally one or two scholars may be found rather past the fourth class work in some subjects, and may perhaps have commenced Algebra and Euclid, but the number of classes under charge of one teacher prevents the bestowal of the time necessary to ensure even respectable proficiency; hence the class is merely insignificant in numbers and nominal in rank.

I think that the study of Roots, Prefixes, and Affixes with derivations might be advantageously substituted for some of the mythical "subjects of instruction," enumerated in the "Detailed Report," which sadly needs revision.

Great benefit would result from establishing Teachers' Institutes, and I am surprised that while the law has provided the machinery, no attempt has been made to put it into motion. I purpose during the ensuing year to meet the teachers of each township semi-annually, and conduct such an institution. By this means every teacher will be reached, whereas at the Teachers' Associations a very small proportion attend, partly on account of distance from the place assigned for meeting, the expenses necessarily involved, but more especially for the very slight returns for the capital invested, in consequence of the time spent being chiefly occupied in idle talk, so rarely does it happen that any solid instruction is imparted. As an instance,—one gentleman was to lecture on "Surds and Indices," who imagined that "any root of any number might be expressed by unity with a fractional index."

"At uno disce omnes."

Competitive examinations, though possible under a Township Board, of course will not prove successful under present arrangements, yet to read the accounts in the "local press," one would imagine that Teachers' Associations and competitive examinations are the bulwarks of our educational system.

I would recommend the abolition of "visiting days" with the exception of those spent at Teachers' Institutes. The privilege is generally abused, permission being seldom asked from the Inspector, as the teacher almost invariably requires to visit a school "near home." Is it any wonder that the inference is obvious? Furthermore any teacher that really requires to visit a school for the sake of gaining information, can readily obtain permission from the trustees, so that no injury could possibly be inflicted by withdrawing the compulsory clause.

Third-class Certificates are now getting sufficiently plentiful to warrant exacting a higher standard at future examinations, and I would suggest that not less than 60 per cent. on the aggregate, and 30 per cent. on any single subject, be the minimum for pass work. As for Second-class Certificates, I trust these will soon only emanate on the recommendation of one Central Board, composed of our best judges. At present they are overborne by their associates.

During my visits I did not deliver any lectures, having found by previous experience the impossibility of obtaining audiences at those seasons of the year. I have, therefore, resolved to try what can be effected during the ensuing winter, by giving public notice of my intention, and trust that as the farmers can then better spare the time, I shall be favoured with a larger attendance.

In conclusion I am of the opinion that with the exception of "half-acre enclosed sites," the School Act will generally be enforced in Leeds.

BROCKVILLE PUBLIC SCHOOLS.

An additional teacher has been added this summer to the staff of the Public School, rendered necessary by the increased attendance, and the Board will soon have to erect another Ward School to supply adequate accommodation, without which compulsory attendance cannot be enforced.

On my first half-yearly visit I found 918 on the Rolls with an attendance of 641, and 11 teachers, and on my second half-yearly visit 891 registered, and 641 present with 12 teachers. The system of giving prizes has been discontinued, owing to dissatisfaction with the method of awarding. The junior classes seem always to compass the programme for promotion, but difficulties arise when we come to the 4th and 5th classes, the principal stumbling block being Arithmetic. The written tests now required for the High School entrance examination effectually slaughter the 4th class candidates, and we have solely to depend on the 5th class passing a sufficient number to supply the demand, which supply will be the more adequate, in proportion as the pupils promoted to the 5th class are better qualified to enter it.

BROCKVILLE SEPARATE SCHOOL.

The Separate School still continues to have 3 teachers in one room, the accommodation is altogether inadequate, the united salaries of the three teachers amount to but \$760, and yet the educational results are far more satisfactory than could possibly be anticipated. I found the number on the rolls, on my first visit, 286 with 176 present, and on my second visit, 272 on the rolls and 164 in attendance. The teachers deserve much praise for accomplishing so much, despite the many obstacles they have to contend with. The school is indeed a monument to "the pursuit of knowledge under difficulties."

The classification of some of the classes is rather irregular, those reading together being in different classes in Arithmetic, Grammar and Geography. It is impossible to rectify this without an additional teacher and increased accommodation. Improvements are talked of, which I hope will be carried out.

GANANOQUE.

This rising village, which can become a town whenever it deems necessary, has no higher class in its Public Schools than the 4th. One additional teacher would ensure a respectable 5th class, and a better supply of pupils to the very excellent High School maintained here, under the able management of J. L. Bradbury, M. A.

The teachers turned out by this admirable training school, surpass both in numbers and attainments, those from kindred institutions, who compete for certificates, and the only 2nd class, grade A, as yet granted by the Local Board of Examiners, was obtained by a lady trained at this Academy.

"PALMAM QUI MERUIT FERAT."

On the occasion of my first visit I found 531 on the Registers with 356 in attendance, and on my second visit 537 on the Rolls with 308 present.

Gananoque has now good school accommodation.

COUNTY OF LEEDS—No. 2.

Robert Kinney, Esq., M. D.—I avail myself of the opportunity of confirming by statistics what I have already stated in my previous Reports respecting the progress we are making in educational matters.

It may be that we have heretofore expected too much from our Public Schools, and perhaps we have measured them by too high a standard, but after comparing the returns of this county for the past four years with those of other counties in Ontario, we find we are by no means behind the times as some people suppose, or wanting in educational enterprise, as others assert.

The following county statistics show the nature and importance of the work that is being done:—In 1871, the average attendance was 2,107 from the aggregate of 8,666; in 1875, the average attendance was 3,373, from an aggregate of 8,543, being an increase of over 62 per cent. on the average of 1871. In 1871, the number between the ages of seven and twelve years, not attending any School, was 262, in 1874 it was 94, showing a very marked improvement. The amount paid for teachers' salaries in 1871 was \$20,907; in 1874 it was \$32,096, showing an increase of over 50 per cent in four years. The amount paid for all school purposes in 1871, was \$29,728; in 1874 it was \$53,829, showing an increase of over 80 per cent. in four years.

In District No. 2, the improvement is still going on in a satisfactory manner, as a glance at my Return will show. In 1874 the amount paid for teachers' salaries was \$14,385; in 1875, it was \$15,259, an increase of \$874. In 1874 the average attendance was 1,497; in 1875 it was 1,556, an increase of 59. In 1874 the amount paid for all school purposes was \$24,083; in 1875 it was \$28,791, an increase of \$4,708 in one year. In 1874 the total value of school property was \$44,941; in 1875 it was \$55,244, being an increase in one year of \$10,303. I may also add that twenty-five new School Houses have been built in District No. 2, since 1871, and some of them are of superior quality. Four more are under contract at the present time, and in all probability six new School buildings will be erected in 1876.

The above facts show very conclusively that the ratepayers are alive to the importance of an efficient educational system. A very general and increasing interest is also manifested in the number of Public School scholars that seek admission to the District High School, and as a fair percentage of them succeeds in passing the examination. We have further evidence that the Public School work is being fairly done.

Notwithstanding the denunciations against the iniquity of prize-giving and the repeated assurance from various quarters that in a system of education it is not only highly improper but very unphilosophical, we still encourage competition and prize-giving, believing them to be "great promoting principles of activity," that cannot well be done without. In any profession it is not merely injudicious but it is the height of folly to throw aside an efficient means or instrument, because in unskillful hands it might be misused.

Those who oppose prize-giving on the ground of its not being philosophical, generally content themselves with the mere assertion that it is so, without showing in what particular it does violence to any principle of any system. But the objector tells us it promotes "Envy, hatred and all uncharitableness," and to prove it cites something like the following—

"But children you should never let
Such angry passions rise,
Your little hands were never made
To tear out each others eyes."

And considers that the question is forever settled.

At the competitive examination for the Townships of North Crosby, South Crosby, Bastard and Burgess, prizes were given by Messrs. W. & D. Beatty, of Delta, and Messrs. Leavitt & Southworth, of Brockville.

COUNTY OF LANARK.

H. L. Slack, Esq., M.A.—The value of school property in rural sections in the county was for 1875, \$71,779, or an average of about \$590 for each section; in the civic sections it was \$48,390, or an average of over \$9,000 to each. The expenditure under this head of upwards of \$20,000 in the year, and the aggregate and average value of the school property at present, present an exceedingly satisfactory progress, and are indicative of a liberality and patriotism on the part of the public which is highly commendable.

Of the one hundred and twenty-three School-houses thirteen are stone, three brick, fifty-eight frame, and forty-nine log.

The classification of the teachers is as follows:—1st Class Provincial, 1; 2nd Provincial, 8; 1st old County Board, 5; 3rd new County Board, 124; and Interim Certificates, 11. The most of the latter were employed in the capacity of assistant teachers and monitors, and were quite equal to the duty imposed upon them in their several posi-

tions. As the law gives the Inspector the power to license one of the pupils to act a "monitor" in Schools where an assistant is required, and as the trustees may recompense such a one for his (or her) services, it is confidently expected that this provision will be availed of by many of our larger country Schools.

The following table (I.) exhibits the principal subjects comprised in the School-room programme, the number of pupils engaged in the study of the prescribed subjects, and the number not complying with the programme. A glance at it will serve to show that there is a fair adherence to the regulations in this respect:—

TABLE I.

Exhibiting the extent to which the "Programme of Studies" is followed.

SUBJECTS.	No. of Pupils for whom prescribed.	No. actually engaged in the Study.	No. not complying with Programme.
1. Reading	8,409	8,409
2. Spelling	"	7,911	498
3. Writing	"	6,653	1,756
4. Arithmetic.....	"	6,590	1,819
5. Geography	"	5,405	3,004
6. Drawing.....	"	780	7,629
7. Music	"	1,948	6,461
8. Grammar.....	4,276	3,531	745
9. Composition	"	3,381	895
10. Canadian and English History	1,259	849	410
11. Algebra.....	114	20	94
12. Geometry	"	4	110
13. Mensuration	"	12	102
14. Book-keeping.....	"	48	66

In order to ascertain precisely the standing of pupils in the principal subjects taught in our Public Schools, and with the view of establishing a reliable basis for future comparison, I carefully examined a large number of pupils in the various Schools, and classified them under the heads of Excellent, Good, Fair, Bad, and Very Bad, in the subject of Reading, Writing, Arithmetic, Spelling, and Dictation, the result of which may be seen in Table II. which follows. The standing, especially in reading is satisfactory.

TABLE II.—SUMMARY—READING.

CLASS.	Excellent.	Good.	Fair.	Bad.	Very Bad.	Totals.

I.—TOWN OF PERTH.

The Town of Perth has at present one Central Graded School, with six teachers, and a High School with two teachers—both under the same roof—also a Roman Catholic Separate School with two teachers. The school accommodation is indifferent and by no means in keeping with the times, nor even with the incorporated villages in the county. Arrangements are, however, being made for the erection of an independent building for the High School, which will allow the whole of the present accommodation to be utilized by the Public School, an ultimatum very much to be desired. The staff of teachers employed are both efficient and zealous, and no exertions are wanting on their part to maintain the high standing of their several departments.

II.—VILLAGE OF ALMONTE.

This is the *chef lieu* of the North Riding of the County, and in enterprise in school matters is, at present, pre-eminently in the fore-ground. Two large stone buildings, in different parts of the village, erected, the one in 1869 and the other in 1875, at a total cost of about \$20,000, provide ample accommodation for both Public and High Schools, in the former of which seven teachers are employed, and in the latter two. There is also a Roman Catholic Separate School, with two teachers. The Schools are all in a very efficient state, and reflect great credit upon the liberality of the inhabitants.

III.—VILLAGE OF CARLETON PLACE.

There is in this growing village one large stone School-house erected only a few years ago, and two other rooms. The Schools are graded with the exception of one Ward School. The original design of the large Central School had in contemplation the addition of a wing to the present structure. This, it is expected, will be done before long, so that the whole of the necessary accommodation for both the High and Public Schools may be supplied under one roof. The Schools here are in a progressive state. Five teachers are employed in the Public, and two in the High Schools.

IV.—VILLAGE OF SMITH'S FALLS.

This village has also one large Central Graded School of stone and erected a few years ago, and also a Ward School in that part of the village commonly known as "Elgin." There are seven teachers in the Public and two in the High Schools. The Public School Departments labour under the disadvantage of having two teachers in each room. This is rendered necessary from the fact that the rooms are too large for one teacher. In such an arrangement the efficiency of the Schools is not a little impaired. The Schools are well graded and considerable progress is being made. A capacious play-ground surrounds the central building.

V.—VILLAGE OF LANARK.

Lanark has a Central Graded Public School with three departments. There is no High School here. The different departments of the Public Schools are accommodated in two frame buildings of respectable dimensions, and situated contiguous to each other, with ample play-grounds recently surrounded by a neat fence. The Schools are doing well.

COUNTY OF RENFREW.

Rev. E. H. Jenkyns, M. A.—During the year all the Public Schools in the County were twice visited by me in the discharge of my duties as Inspector. Having already forwarded to your Department the detailed reports, showing the state of each School in the County, I now proceed in this general summary to make some remarks on the general features of our educational system, and to discuss a few topics of importance to the educational welfare of the County.

It affords me very much pleasure in bearing testimony to the growing efficiency and success of our Public Schools. The new school law has inaugurated a period of transition in our educational progress, and the material changes which have occurred are gratifying and show decided progress. Encouraging progress has also been made in elevating the character and increasing the usefulness of our Schools. The improved tone and character everywhere manifest in our school system are to be attributed to the worthy ambition of trustees to comply with the requirements of the school law, and to the employment of a better class of teachers. As the County advances in intelligence and wealth, and our school sections become better settled, the inferior log School-houses and the "cheap teacher" system are gradually passing away. It is gratifying to be able to state that the educational progress made in 1875 compares very favourably with that of any preceding year since my connection with the Schools of this County, both in the number and character of new School-houses built, and also in the interest manifested in the Schools by Boards of trustees, teachers, and parents. The truth seems to be dawning upon the people's mind that the Public Schools will be what the pupils choose to make them, and that just in proportion as boards of trustees, the official medium through whom the people act, and the people, interest themselves, will the Schools improve. Whilst it is pleasing to record that the people generally take a lively interest in whatever may tend to improve our educational facilities, and are ready in many instances to act with commendable liberality; yet we must not forget that there are others who do not recognize the paramount importance of education, and whose policy is that of "rest and be thankful." We shall have no misgivings as to the ultimate results of our school system when people fully realize that they are the guardians of our Schools.

Including the various departments of incorporated Village Schools and Roman Catholic Separate Schools, there were 127 Schools in operation during the year. Three School Sections which were too feeble to support a School in each, were united into one Section. So that if we take these into consideration there has been an increase of two Schools during the year. This desire for union on the part of small or weak Sections may be looked upon as an evidence of the pressure brought to bear under the Consolidated School Act to increase the efficiency in Schools. Until Sections begin to feel this pressure, the agitation for small Sections and a "School-house at every man's door" had almost become chronic. People begin to reason that, if proper School-houses are to be built, and supplied with maps, seats and desks, teachers paid adequate salaries, and Schools maintained in a satisfactory state of efficiency, then they require the means to do all these things without imposing an intolerable burden upon the Sections, and this cannot be done with small Sections.

I regret to state, that, notwithstanding all our educational advantages, the improvements which have taken place in the internal arrangement of Schools, and the increasing efficiency of teachers, the attendance of pupils is far from being satisfactory. With a total on the various rolls of 5,693, and an average attendance of 3,027, we cannot readily estimate what we have yet to accomplish in this direction. To take up the School register of many of our School Sections and notice the days pupils are present or absent, would open the eyes of many a parent as to the cause of the unsatisfactory state of the School or of the reputed inefficiency of the teacher. No matter how faithful the trustees, or how efficient the teacher, the results will always be unsatisfactory without regularity of attendance. The irregular attendance which prevails also prevents the teacher from having an orderly or systematic School, properly organized classes, or to attain to steady and satisfactory progress. In my detailed reports you will notice that in some Schools, whose teachers are efficient, and where, on the whole, the pupils are regular and progressive, that the greatest obstacle to the advance of a School is attributed to the irregular attendance in three years. It is a cause of complaint that a large proportion of the pupils of Public Schools do not attain to anything like a satisfactory degree of perfection in their studies; and I fear that this will always be the case as long as pupils are irregular.

Much of this irregular attendance arises from the real or supposed necessity for keeping children at home to aid their parents in the busy season of the year. From inquiries which I have instituted I find that most of this irregular attendance might be avoided by a proper management at home, and a proper interest on the part of parents. Under our educational system the class books are so arranged, and the course of instruction is such, that no lesson

can be omitted without serious disadvantage to the pupil or injury to his class mates. Where this irregularity can be obviated, parents may rest assured that with the present competition in every walk of life, it is a neglect which some day or other will redound in their children's serious disadvantage. The man who wilfully and unnecessarily keeps his children at home defrauds them of all mental growth, and for the sake of the pitiful grains of their feeble labour makes slaves of them in a free country.

To bring about good attendance, a great deal may be accomplished by the faithful teacher. If he takes careful note of any pupil's absence, finds out the cause, or, if necessary, visits the parents, he will do a great deal to counteract irregularity. In some Sections I notice trustees have supplied their teachers with blank forms of notice to parents respecting irregularity of attendance. The plan has been eminently successful. If all trustees were to supply their teachers with these forms I have no doubt that beneficial results would follow.

When all these efforts have failed it is well to fall back upon the provisions of law. By the Consolidated School Act of 1874, trustees are required to ascertain the names of absentee children and report the same to the inspector. The provisions of the "compulsory clause" of the Act are such that trustees are required to notify personally, or by letter or otherwise, the parents or guardians of children of the neglect or violation on their part of the provisions of cap. 28, and 157 sec. of the School Law; and in case, after being so notified, the parents or guardian of such children continue to neglect or violate the provisions of said sections of this Act, it shall be the duty of trustees to impose a rate-bill on such parents or guardians, not exceeding one dollar per month for each of their children not attending School, or to make complaint of such neglect or violation to a magistrate having jurisdiction in such cases. The friends of education have long contended for the enactment of a law making attendance at School obligatory upon all pupils of School age, and the introduction of the "compulsory clause" is certainly a movement in the right direction. We are firm believers in the necessity of such a law, and in the good results which it must eventually produce. The conflict in favour of compulsory attendance has been won, and the question is now, whether the provisions of the Act will be carried out or not. Laws, unless they are faithfully administered, are simply words on paper; and whether this law is executed, depends on the capacity and character of the men who form our boards of trustees. In the discharge of such a duty they should realize their obligations to the State and to society, and as the friends of education they should see that this law is duly enforced.

The real efficiency of any system of public instruction, as well as the prosperity of all those great interests which can safely rest only on the intelligence and good moral habits of the people, must depend mainly on the teachers. If it be desired to elevate the teaching profession to its true position, it must be made a comfortable livelihood for competent persons who engage in it, and means must be provided for training young persons to enter upon the work with a full knowledge of its duties. The following statistics, taken from the results of my inspection, give an idea of the remuneration offered to teachers in this County. The highest salary paid a male teacher in a rural section is \$500; the highest salary paid a female teacher in a rural section is \$350; the highest salary paid a male teacher in an incorporated village school is \$700.

TOWNSHIPS.	AV. SALARY OF MALE TEACHERS.	DO. OF FEMALE TEACHERS.

Incorporated Village Schools.....	537 50	255 00

The foregoing Table exhibits a great improvement in the remuneration of teachers, but it is yet far from being satisfactory. If education is to advance, and our schools are to be maintained in a healthy and vigorous condition, then we must yet give greater prominence to the claims of teachers.

The great want of this County is a supply of good and efficient teachers. Notwithstanding that an additional Normal School is in operation in the City of Ottawa, and the improved efficiency of the High Schools, we are not yet in a position to secure anything like an adequate supply of qualified teachers. The status of the teaching profession is gradually improving, but the following statistics will show that it is yet far from what it ought to be. Eleven teachers hold certificates from old County Boards until annulled; six hold 2nd Class Normal School certificates; four hold 2nd class new County Board certificates; thirty-six hold 3rd class certificates, and seventy teachers are simply "licensed" to teach. The religious persuasion of teachers is divided as follows:—C. E., 20; R. C., 45; P., 38; M. 23; B., 1.

This being an exceptional year on account of monetary stringency in commercial affairs, we find some teachers who years ago had abandoned the profession, once more applying to trustees for engagements. Year after year the number of candidates who apply for 3rd class certificates at the County Board Examination is greatly on the increase, but the number who succeed in obtaining certificates falls very far below the actual requirements of the County. And it is now a well-acknowledged fact that candidates have no prospect of passing the 3rd class examination without an attendance of three years at some High School. Then again it will be some years before we shall receive a supply of trained teachers from the Ottawa Institution. I am glad, however, to find that a number of students from this County already attend that excellent institution, and will, in time I trust, return to this County to fill the vacancies in the ranks of teachers. Taking all these facts into consideration, I am reluctantly compelled to admit that, for some years to come, our main dependence for anything like an adequate supply of Third-class teachers will be on those counties where the supply is in excess of the demand. To induce teachers to come into the County I feel that a considerable improvement must take place in the remuneration offered. I do not object to the teacher, if the opportunity presents, to improve his circumstances by entering into some other business or profession, but I feel that our educational system will never be placed on a sound basis until the teaching profession is brought into healthy competition with other professions and pursuits.

In strong and wealthy sections I notice that the efficiency of the Schools has improved in a very satisfactory manner, and that they are fulfilling their mission to the satisfaction of all; whilst in poor and remote sections, where teachers of low qualifications are engaged, there is very little improvement. In what manner therefore can we hope to give a healthy stimulus to these extremities of our educational system? To this question we reply, that from the nature of the case the remedy must come from within, and not from without. There are not enough local teachers, possessing the requisite qualifications to fill them, and the salary offered is too low to induce teachers with proper qualifications to apply. A home supply cannot be produced but by thorough instruction, and by preparing teachers to enter upon the work. I have devoted considerable time to the consideration of the subject, and the way which commends itself to my judgment to correct the difficulty is, to establish Model Schools in connec-

tion with the Public Schools at the following points, viz., at Brudenell Corners, Eganville and Beachburg. The system of public instruction which would be adopted in such schools would not only give a superior English education to the more advanced pupils of Public Schools in the district, but it would also exert a powerful influence upon the teaching and character of the schools in the district. From such an educational centre I would expect life and method to be imparted to all schools within reach of its influence. Better classification, better discipline and more effectual teaching would be secured, and satisfactory results would follow as a natural consequence. Schools in a fair state of efficiency would become still better; schools of an inferior character would become improved, and schools would become really capable of performing the work for which they were designed. The difficulties under which poor and remote sections labour, can only eventually be overcome by establishing such schools. In these remote sections and townships the people anxiously desire the advantages of a higher education than can be furnished in the Public Schools of the district, conducted as they are at present, by inefficient teachers; and they take a deep and lively interest in whatever may tend to increase the facilities for such an education. They are prepared to act with enlarged liberality to advance any scheme which will improve their children's education. As an evidence of the necessity of such schools, I might point to numerous instances of pupils who attend school year after year, and yet never advance beyond the rudimentary elements of English education. They are dull and listless, and school life has become a mere matter of routine. There can be no real progress in such cases.

People may say this is all right enough, but if these poor sections already feel the burden too much, how are they to carry out such a scheme! I will endeavour to show the complete practicability of such a scheme by reference to the High Schools of the County. Arnprior, with a population of 1,714, in addition to its efficient Public Schools, supports one High School with two teachers; Pembroke with a population of 1,508, supports its High School with two teachers; and Renfrew, with a population of only 865, supports one High School and two teachers. If these incorporated villages, with their population, are able to support High Schools, why may not the municipalities of Brudenell and Sebastopol, with a population of 1,860, be able to support one Model School? Why may not the townships of Grattan and Wilberforce, with a population of 3,436? And why may not Westmeath and Ross, with a population of 4,314 be able to do the same? When once the School-houses were built, the annual expenditure for each school would not amount to more than \$400. And I would strongly urge upon the municipalities interested, the advisability of carrying out this scheme.

Then again, the Consolidated School Act of 1874 makes special provisions for establishing such schools. The law provides that every township council shall have authority to pass by-laws for the following purposes—vide School Law, cap. 28 and sec. 48—"To levy such sums as it judges expedient for procuring the site, and for the erection and support of a township Model School."

In my visits to the Schools I have directed much attention to the construction of proper School-houses, believing that material improvements in this respect are absolutely necessary to the proper workings of the School. And in every case where I have found buildings in process of erection, have suggested such improvements as I thought necessary. The following Table exhibits the material progress we have made since 1871:—

For the year.	No. of Public Schools.	No. of Public School Pupils.	Average attendance.	Teachers' Salaries.	Sum expended for sites and school houses.	Sum expended for maps apparatus, etc.	Amount expended for P. S. purposes.
1871	104	5316	1997	\$ 9934 68	\$ 1795 08	\$ 149 70	\$ 21981 68
1872	110	5938	2292	16751 42	3209 45	751 93	24322 37
1873	112	6108	2272	20539 01	7265 03	876 05	36359 20
1874	127	6755	2241	25511 37	4830 86	610 14	36554 80

During the year 19 Schools were built. They are all substantially built, and in every case are of the following dimensions: 36 x 24 feet, and 12 feet between floor and ceiling.

This is an additional evidence of the progress we are making from year to year; but I find that this rate of progress is not fast enough to keep pace with the enlightened sentiment of the day. The following townships take the lead in the improvement of their schools, apparatus, books and conveniences: Westmeath, Alice, Ross and McNab. I find, however, that great material improvements have been made in the internal arrangement of School-houses in nearly every township of the County.

I am glad to be able to report that the School accommodation provided in all Incorporated Villages is now satisfactory. Elegant new School-houses have been built at Pembroke and Renfrew. These structures are ornaments to the villages where they are located, and serve to show in an impressive manner the liberal spirit which animates the various Boards of Education in this County. I am glad that these most excellent school enterprises have been carried to completion, not only on account of the superior accommodation which they secure to the pupils of those places, but because I look upon these Incorporated Villages as educational centres which ought to exercise a wholesome influence upon the character of School-houses in the district.

I desire also to make special reference to the excellent School-houses which have been built in the following sections: Nos. 7 and 9, Ross; Nos. 1 and 2, Alice; No. 2, Brudenell; R. C. S. S. Bromley; Nos. 1 and 2, Griffith; Nos. 7 and 8, McNab, and Nos. 5 and 7, Westmeath. These School-houses afford excellent accommodation, are made of the best material, and executed in the best possible manner. They have been built with a wise forethought as to their internal arrangements and daily life within, and their external architecture expresses at once their purpose. In connection with this matter I would suggest to all trustees who intend to build, first of all to visit Nos. 7 and 9, Ross, or Nos. 1 and 2, Alice, or No. 7, McNab. These School-houses are not only models of what rural School-houses should be; but their internal arrangements, equipments, &c., reflect the greatest credit on the several sections.

I would also notice the great improvement which has occurred in the matter of seats and desks. Without proper seats and desks no School can be maintained in a state of efficiency, and the money expended in keeping a School open is to a great extent unproductive. Twenty-one School-houses have been provided during the year with suitable seats and desks. These improvements have not been accomplished without considerable opposition on the part of several ratepayers. They advance the argument that the old log School-houses, the log seats and wall desks were good enough for the pupils who attended school in their time, and they cannot see any necessity for all this expenditure on School-houses, seats, and desks, &c. The same argument might be advanced against the improved appliances of civilized life, and the man who deliberately entertains such an opinion, I would advise to seek his paradise in China.

A decided improvement is apparent on the part of teachers towards cleanliness of the School-room, and its proper ventilation. This pleasing feature, when once co-operated in by trustees, in furnishing proper School-houses, suitable desks and seats, will do much towards stimulating pupils to a greater love for school, and will give healthy incentives to regular attendance.

The tendency is very observable in most of our Schools to substitute a showy list of subjects taught, for thoroughness of instruction in the indispensable elements of education. Thus we find that in many Schools, arithmetic, grammar and geography, are completely ignored until the pupils advance as far as the 2nd, and in some instances, as far as the 3rd Book. Under the new programme pupils are required to be taught these subjects from the commencement, and in order to carry out these studies, every teacher ought to have primary classes, and instruct the pupils without the use of text-books. If the ground work is not well laid in these subjects at a very early period, the loss to the pupil will be seriously felt in after years. We are disposed to lay greater stress upon children being taught to read good English literature appreciatively, to write well, to be exact in the primary rules of arithmetic, to be correct in the employment of the mother tongue, and in writing down what they know about things, than in the possession of a smattering of numberless subjects. The lad who has been thoroughly drilled in the elements of a sound English education, if he goes out in the world in the possession of good health and good principles, will make his way in business, and will know sufficient of letters to enjoy intellectual recreation. To find pupils reading in the 4th book who cannot satisfactorily read a selection from the 2nd; to have pupils working sums

in proportion, interest, &c., while they cannot work correctly sums in the simple and compound rules; and to have pupils learning syntax, &c., who cannot parse a simple sentence, indicate a great want of thoroughness on the teacher's part, and a great want of professional knowledge. The system pursued at each half-yearly examination has been mainly directed to test the thoroughness wherewith each teacher conducts his School. And as a corrective to this tendency to a want of thoroughness, some of the most efficient teachers have introduced a written examination once a week, with good results. By such means he finds out the amount of accurate knowledge his pupils possess, and improves their habits for accurate thinking and accurate work.

It is also highly important that teachers should give greater attention to the proper classification of their pupils. In this work they sometimes encounter considerable opposition from trustees and parents. It is well, however, that all parties should understand that the teacher is not a mere machine to carry out the methods approved of by this or that party; and whilst giving all due consideration to any suggestion thrown out, they are expected to conduct their Schools according to the programme laid down by the Council of Public Instruction, and to exercise their independent judgment as to what they conceive is most conducive to the progress of the School.

Every person will admit the advantage and even the necessity of having good School libraries, and yet I regret to state that we have made little or no progress in this direction.

I would wish very much to see a Teachers' Association formed in this County, so that teachers might enjoy the pleasures of intercourse, and the information derived from mutual conference, discussions and lectures. The Association formed some years ago in this County, had to be abandoned for want of travelling facilities, but now that we have a railroad going through the centre of the County, I trust to see this useful institution revived.

In conclusion, I regret to state that I notice a growing disposition amongst pupils of our Public Schools, and especially in villages, to the use of slang words and profane language. Under our system, children of all classes, of all moral and social conditions, meet together on the same playground, and thus the children of the less refined reap all the advantages of those advanced in moral and social life. There is an advantage as well as a danger in this. To secure the one and avoid the other can only be attained by the elevation of our Schools. The true policy, therefore, is to make our Schools perfect Schools of culture and discipline, both moral and intellectual. I can see no reason why the pupils of Public Schools should not vie in refinement, courtesy, and moral culture, with the pupils of the most exclusive private school in the land.

COUNTY OF LENNOX AND ADDINGTON.

Frederick Burrows, Esq.—The total amount raised for school purposes, during the year, was \$39,149, of which \$26,404 went for teachers' salaries—an excess of \$6,869 over the amount paid teachers in 1871. Of the total amount raised, \$7,341 came from Legislative grant and invested moneys, leaving \$31,808 from direct taxation.

The whole number of pupils registered during the year was 6,639—3,461 boys and 3,178 girls—being an average of 56 to each teacher. The aggregate average attendance for first half-year was 2,716, and for the second half-year 2,511—a slight improvement on preceding year.

The pupils were classified as follows:—1,999 in First book, 1,519 in Second, 2,420 in Third, 688 in Fourth, and 13 in Fifth. All were in Reading, Spelling, Writing, Arithmetic, and Geography; 2,238 in Drawing, 1,463 in Vocal Music, 3,066 in Grammar and Composition, 143 Chemistry and Botany, 419 English and Canadian History, 83 Natural History.

Of the 117 teachers (29 males and 88 females) employed, 3 held First-class Provincial Certificates, 10 Second-class Provincial, 8 First-class Old County Board, 26 Second-class Old Board, 59 Third-class New Board, 11 Permits—the last mentioned being held chiefly by teachers in the back townships.

The highest salary paid a male teacher was \$575, and the lowest, \$216. The highest paid a female teacher was \$360, and the lowest, \$144. The average salary of male teachers was \$392, and of female teachers, \$212.

Of the School-houses, 19 were brick, 6 stone, 75 frame, and 10 log—total 110, of which 42 have been built since the enactment of the School Law of 1871.

Total number of maps, 628, globes, 95. 87 Schools have Object and Tablet Lessons. 22 School Libraries, containing 1,025 volumes, were reported. Nearly all these requisites have been furnished since my first inspection of the Schools.

In 43 Schools, prize books were distributed, thereby greatly increasing the supply of good, wholesome reading matter for the young.

The Departmental Regulations regarding the size of School site, fencing, and out-houses have, with a very few exceptions, been observed throughout the county.

I am glad to be able to call your attention to the largely increased expenditure on account of teachers' salaries, as this indicates an increasing appreciation of the important work of the teacher.

Still, we have too many trustees whose parsimony impels them to hire the cheapest teachers they can find, to the great detriment of education in their sections. It too frequently happens that the sole qualification regarded in the selection of a trustee is his ability to "keep down taxes," however much this course may interfere with the best interests of his School.

We have still to complain of the great evil of irregular attendance, which so often paralyses the best efforts of our teachers. It is no easy matter to devise an adequate remedy for this evil, which, in most instances, may be traced either to the niggardly trustees who hire the cheap and inferior teacher, whose neglect of the most obvious means of making the School-work attractive, induces carelessness and irregularity, or to those parents who deem berry-picking and other trivial employments as more important for their children than getting an education.

At the same time there are, in some cases, valid reasons for this irregular attendance. Snow blockades, bad weather, and remoteness from School, often prevent small children from attending regularly.

I believe that the best correction for this evil, in the majority of instances, is the employment of teachers whose sympathies are in their work, and who aim to make school-life pleasant and attractive, by the adoption of rational and judicious modes of teaching and discipline. There are too many who use school teaching as a mere stepping stone to something else, and who never become thoroughly interested in their work.

We need more well-trained teachers.

Our Normal Schools are of but little benefit to this county, as we have only nine teachers who have attended them.

The distance and expense, taken in connection with the present low rate of remuneration to teachers, are sufficient to deter all, except a very few, from availing themselves of the great advantages afforded by such institutions.

Our High Schools, to which we must look for our chief supply of teachers, should be utilized more for the training in the best modes of teaching and discipline of those who attend them, with the view of becoming teachers.

It seems only fair that, if High Schools do educational work for a whole county, their support should be distributed over the whole district benefited by them, and not left, as at present, a burden upon the town or village in which they may be located.

The formation of suitable High School districts should be made the imperative duty of County Councils.

Another difficulty, to which I have adverted in former reports, is the great inequality in the valuation of School Sections in the same Township, and the consequent difference in the rate of taxation for school purposes. This most inequitable feature of the present School Section System, is a fruitful source of annoyance to Township Councils, and of bickerings among rate-payers.

The Township Board System is a most effectual remedy for this difficulty, if the people could see their way to its adoption; but the surrender of the local control of each School seems to be the great objection to this system on the part of many of those who have studied the matter. It strikes me that some sort of a compromise scheme might be devised which would secure, with the retention of sectional trustees, a uniform rate of taxation on the whole property of a Township for school purposes.

With regard to the Schools of our back Townships, I have to state that, owing to the serious depression of the lumber business, upon which the majority of the settlers are dependent for a livelihood, it is with considerable difficulty that the Schools are kept open,

even with the very liberal aid given by the Department and the County Council. The County Council makes a yearly grant to them of \$200, about half the amount given by the Department.

In addition to the special grants made by the Department and County Council, the Township Council of Denbigh, Abinger, and Ashby, divided \$300 of Municipal Loan money among its Schools, for the purpose of improving the school premises in each section, and the Council of Kaladar and Anglesea gave each of its Schools \$25 for the same object.

The poor settlers heartily appreciate the kind assistance given, and indicate a most praiseworthy anxiety for the education of their children.

I am reminded, in closing these remarks, that a change has been effected in the administration of School affairs, and in this my first official report to you as head of the Education Department, I beg most respectfully to tender you my congratulations on being entrusted with the most important of our great public interests, and to wish you the most ample success in raising every portion of our educational establishment to a high state of efficiency.

With reference to your worthy predecessor, permit me to say, that the School system of this Province will ever remain a monument to his ability, energy and zeal.

COUNTY OF PRINCE EDWARD.

G. D. Platt, Esq.—In submitting my report for 1875, I am happy to be able to bear testimony to a fair degree of prosperity in the educational interests of this county. In spite of the continuance of such adverse influences as irregular attendance, and the very limited experience of so many teachers, this progress has been attained, and reflects all the greater credit upon those devoted workers in the profession who aim at success rather than pecuniary gain. Thus, while a few Schools during the year have actually retrograded in the hands of careless and unskillful managers, the great majority have, by their steady progress, given evidence of the skill and devotion of those to whom they were intrusted.

The following classification is an approximation to the standing of the Schools of the County for 1875:—

Excellent, 11; Good, 24; Fair, 38; Poor, 8; showing 1 more, Excellent, and 10 fewer, Poor Schools than in last report. The classification by Townships is as follows: Ameliasburgh—3 Excellent, 4 Good, 6 Fair, 2 Poor. Athol—1 Excellent, 2 Good, 5 Fair. Hallowell—3 Excellent, 5 Good, 5 Fair, 2 Poor. Hillier and Wellington—2 Excellent, 3 Good, 6 Fair. North Marysburgh—2 Good, 6 Fair, 1 Poor. South Marysburgh—1 Excellent, 2 Good, 4 Fair, 2 Poor. Sophiasburgh—1 Excellent, 5 Good, 6 Fair, 1 Poor.

The record of the attendance of pupils stands about the same as in 1874. The average attendance for the County is but 43 per cent. of the number enrolled. Ameliasburgh again heads the list of townships with 53 per cent.: Hillier and Wellington stand next with 45; Hallowell, 41; South Marysburgh, 40; Sophiasburgh, 39; while Athol and North Marysburgh are down to 36 per cent. The hop-yards of Hallowell and Sophiasburgh are thus outdone by other influences elsewhere. There is very great need for improvement in the matter of attendance.

There were 28 changes of teachers last year. In Ameliasburgh, 3; Athol, 1; Hallowell, 3; Hillier and Wellington, 4; North Marysburgh, 5; South Marysburgh, 7; and Sophiasburgh, 5.

Fifteen teachers had Second-class Provincial Certificates, six had First-class from County Board, while no less than sixty-three held Certificates of the Third-class. Of the fifteen Provincial Certificates, Ameliasburgh had 5; Hallowell, 4; Hillier and Sophiasburgh 2 each, and North and South Marysburgh one each.

The average salary of male teachers for the County was \$367, and of females, \$231.42. In Ameliasburgh the averages were respectively \$415 and \$228. Athol, \$338, and \$263. Hallowell, \$415 and \$256. Hillier and Wellington, \$337 and \$195. North Marysburgh, \$313 and \$204. South Marysburgh, \$325 and \$228. Sophiasburgh, \$385 and \$224.

The total amounts raised for school purposes in 1875 by trustees' tax, was \$25,091

being an average rate of 4 mills on the dollar, the total assessed value of the County (excepting Picton), amounting to \$6,288,341. For Ameliasburgh the average rate per dollar was 4 mills; Athol, 3; Hallowell, $3\frac{1}{2}$; Hillier and Wellington, $4\frac{1}{2}$; North Marysburgh, $7\frac{1}{4}$; South Marysburgh, 5; and Sophiasburgh, $3\frac{1}{2}$ mills. Three new School-houses caused the increased rate in North Marysburgh, while similar influences operated in other municipalities.

The total amount paid teachers during the year was \$24,316, of which Ameliasburgh paid \$4,606; Athol, \$2,753; Hallowell, \$5,332, and \$1,098 for buildings; Hillier and Wellington, \$4,165; North Marysburgh, \$1,611, and \$1,673 for buildings; South Marysburgh, \$2,179, and \$1,154 for buildings; Sophiasburgh, \$3,667, and \$1,935 for buildings. The grand total paid for all School purposes was \$34,769. The total paid for new buildings and repairs was \$6,151, and for maps, &c., \$194.56.

Seven new School-houses were built during the year, and five repaired. Of the new ones, Ameliasburgh has one, frame—Hallowell one, brick—North Marysburgh, three, brick—South Marysburgh, one, brick; and Sophiasburgh, one, brick. Of the repaired houses, Ameliasburgh, Athol, Hallowell, South Marysburgh and Sophiasburgh, have one each.

The School-houses of the County may now be classified as follows:—brick, 33; stone, 19; frame, 29. By Townships: Ameliasburgh—2 brick, 5 stone, 8 frame: Athol—2 brick, 3 stone, 3 frame: Hallowell—9 brick, 3 stone, 3 frame: Hillier—4 brick, 3 stone, 5 frame: North Marysburgh—6 brick, 1 stone, 2 frame: South Marysburgh—3 brick, 3 stone, 3 frame: Sophiasburgh—7 brick, 1 stone, 5 frame. Thirty new School-houses have been erected since 1870 of which 24 are brick and 6 frame. The total estimated value of school property is \$62,176.

Fifteen school sites were enlarged, and most of them enclosed during 1875. Several sites are yet inadequate, but attention is being directed to the matter and the deficiency will doubtless soon be remedied. Two or three wells were provided during the year, but the great majority of premises are still without that necessary appendage.

Seventeen Public Libraries are reported, of which Ameliasburgh has 7; Athol, 3; Hillier, 2; and North Marysburgh and Sophiasburgh, one each. The total number of volumes in them is 2,067. Fifty Sunday Schools with 2,009 scholars, and 237 teachers, are reported for the County.

The relative standing of the Schools in the several townships is pretty fairly indicated by the per centage of the pupils in the Fourth and Fifth classes, as follows: Ameliasburgh, 25 per cent.; Athol, 21; Hallowell, 30; Hillier and Wellington, 33; North Marysburgh, 19; South Marysburgh, 24; and Sophiasburgh, 19 per cent. Another indication is furnished by the number of pupils from the Public Schools of the County that passed the entrance examination to the High School during 1875. Of these the total number successful was 34; from Ameliasburgh, 7; Athol, 6; Hallowell, 9; North Marysburgh, 3; South Marysburgh, 4; and Sophiasburgh, 5.

The Agricultural Society of Ameliasburgh offered prizes to pupils in Map Drawing and Penmanship, which called forth some very creditable specimens. I hope the example may be generally followed hereafter.

I have also great pleasure in recording the fact that the highest honours in the Province of Ontario offered to candidates for Teachers' Certificates were this year taken by teachers of the County of Prince Edward:—namely, the Gold Medal to the First Class candidate making the greatest number of marks, by Mr. S. M. Dorland, of Sophiasburgh—and the Silver Medal to the best Second Class candidate, by Miss Fanny Gillespie, of Picton.

A large portion of the teachers of this County lack the special training requisite to fit them for the right discharge of their difficult duties. This is the great want of the times, and to meet it, our Provincial Normal Schools ought to be supplemented in every County by well conducted Teachers' Institutes. These are not likely to flourish without special organization, pecuniary encouragement, and compulsory attendance of the classes to be benefited.

COUNTY OF HASTINGS—NORTH.

William Mackintosh, Esq.—At the close of the year, the organized portion of North Hastings contained 74 rural school sections, and *one* incorporated village (Stirling) In

The unorganized Township of Jones there was *one* section. In all there were 76 sections, —an increase of *one*.

During February of the current year, at the urgent request of some settlers with whom I chanced to meet at Jones, I visited the Henderson or Copp settlement. It is situated between the Hastings and Opeongo Roads, and lies partly in the unorganized Township of Lyell, and partly in the unsurveyed Township of Murchison. The nearest settlement to it is that in Jones, eighteen miles distant. In consequence of my visit a school section has been formed, Trustees elected, and a School-house partially completed.

School Finances.—During the year the total amount of receipts for school purposes was \$27,225.52,—an increase of \$1,695.02 over 1874.

From Trustees' tax on ratable property there was received as follows:—

	Collected in 1875.	Increase over 1874.
Rawdon, (including Stirling).....	\$4,360 51	\$154 00
Huntingdon.....	2,183 66	52 10
Marmora and Lake.....	2,643 51	879 16
Madoc.....	4,050 56	431 13
Elzevir.....	1,126 87	a decrease
Tudor, <i>et al.</i>	720 35	119 58
Dungannon and Faraday.....	740 60	314 70
Carlow and Mayo.....	135 00	85 00
Monteagle and Herschel.....	406 37	109 57
Wicklow, <i>et al.</i>	154 40	
	\$16,521 83	\$1,449 87

Disbursements.—In payment of teachers' salaries \$16,629.70 was disbursed, an increase of \$2,245.28 over the amount expended for the same purpose in 1874.

For repairs of School-houses, fences, or grounds, the total expenditure was \$1,840.40. For the purchase of sites and the erection of School-houses, \$3,861.43 was spent.

The total amount of disbursements was \$24,941.28, an increase of \$2,677.76 over 1874.

Value of School Property.—The following tabulated statement will exhibit the astonishing increase in the value of school property since 1872,—an increase which is due to the erection of School-houses, the purchase of sites, maps and apparatus, and the enclosure of school premises:—

	Value of school property in 1875.	Value of school property in 1872.	Total.	Increase. Per cent.
Rawdon, (including Stirling).....	\$16,965	\$9,050	\$7,915	87
Huntingdon.....	4,895	3,718	1,177	31
Marmora and Lake.....	5,107	2,015	3,092	153
Madoc.....	9,744	5,454	4,290	78
Elzevir.....	4,841	4,773	68	1
Tudor, <i>et al.</i>	1,559	634	925	145
Dungannon and Faraday.....	761	205	556	271
Carlow and Mayo.....	653	290	363	125
Monteagle and Herschel.....	847	375	1,161	309
Wicklow, <i>et al.</i>	689			
The Riding.....	\$46,061	\$26,514	\$19,547	73

The increase has been even greater than 73 per cent. Since 1872 several good School-houses have been erected in Elzevir, and a large amount expended in purchasing sites, enclosing grounds, &c. By some error in Trustees' reports for 1872 or 1875, this has evidently been overlooked.

During last year the increase in the value of school property was \$7,645, an advance of about 20 per cent.

The work of urging the necessity of building new School-houses, repairing and re-furnishing such as are worth the outlay, purchasing new sites, or enlarging those already owned, is, in many cases, a most unpleasant task. Done ever so prudently and cautiously, it excites the ire and ill-will of some. However, it is a duty, and a patriotic labour, and must be performed.

In the majority of cases, however, I find Trustees and rate-payers ready and willing to make every reasonable effort to comply with the requirements of the School Law.

School-houses.—The total number of School-houses in the Riding, at the close of 1875, was 78,—8 being built of brick, 7 of stone, 39 of frame, and 24 of log.

In order to show clearly the earnest manner in which the work of school-house erection has been carried on since the passage of the School Law Amendment Act of 1871, I have compiled the following statement :—

	Brick.	Frame.	Stone.	Log.	Total.
Rawdon.....	4	3	1		8
Stirling.....	1				1
Huntingdon.....			1	1	2
Marmora and Lake.....		6		1	7
Madoc.....		7			7
Elzevir.....		2			2
Tudor, <i>et al</i>		3		3	6

During 1875, *nine* School-houses were erected, 8 frame and 1 brick. Since my appointment in 1874, *eighteen* have been built.

In addition a considerable number have undergone extensive repairs, and, in several cases, have been re-furnished with desks and seats, less antiquated than those formerly used.

The two-storied brick building completed in Stirling, for the use of the High and Public Schools, deserves special mention. Commodious, its internal arrangements admirable, and its exterior handsome, it affords evidence of intelligence, and liberality on the part of Trustees and ratepayers. Each of the four class rooms is rendered pleasant by pictures and flowers. Outhouses and fences are appropriate. The grounds have been very nicely ornamented and shaded by trees and shrubs.

Of the other villages, Bridgewater, Queensboro', and Marmora have good School-houses. In Madoc, one of the departments occupies a comfortable rented building. The School-house proper, is dilapidated, unsuitable, and anything but creditable.

The advancement that is exhibited by the foregoing statements is extremely creditable, and becomes *surprising* to me who is acquainted with the broken and infertile nature of a great part of the district.

School Grounds and outhouses.—*Nine* School premises were enclosed during the year. Since 1874, *nineteen* have been enclosed. In *eight* sections, suitable outhouses were constructed in 1875.

School population and attendance.—The total number of children between the ages of 5 and 16, resident in the riding, was, in December, 4891, of these 441 did not attend any school, a decrease of 222 for the year.

The number of pupils of all ages, who attended school was 4717, an increase of 223.

The attendance of these is represented by the following Table :—

About 15 per cent, gave the almost useless attendance of less than 20 days; about 23 per cent, attended between 20 and 50 days; about 28 per cent, attended between 50 and 100 days; about 18 per cent, between 100 and 150 days; about 13 per cent, between 150 and 200 days; and about 1 per cent, attended between 200 days and the whole year.

A comparison of the average attendance of pupils for the year with the whole number who attended during some portion of the year, will afford a still more lucid idea on this subject.

In Rawdon (including Stirling) the average attendance for the year was about 41 per cent. of the *enrolled* pupils; in Huntingdon, 41 per cent.; in Marmora and Lake, 37 per cent.; in Madoc, 36 per cent.; in Elzevir, 39 per cent.; in the remote townships, 27 per cent.; in the riding 38 per cent. In 1872 the percentage of attendance was 35.

The improvement is gratifying and cheering, but with so great an amount of irregular attendance and absenteeism as will obtain, the educational progress of the country will be much obstructed. The evil exists in every part of the Province. It will always be found, to some extent, so long as the labour of the pupil is valuable at home. Distance from the school, want of means to provide children with proper clothing for the winter season, and the inability of a number of Sections to keep their Schools open during the entire year, are also important causes. But a very considerable amount of the toil is due to the inexperience of the majority of our teachers, to the unintelligent, uninspiring and perfunctory manner in which their duties are performed, and to the amazing indifference of a large number of parents. Irregular attendance entails a loss of School Grants, a waste of the time and energies of teachers and pupils, and a consequent waste of money. Teachers are not paid to instruct 38 per cent. of their pupils, but all. Where this is not done, resources are thrown away.

Time for which Schools were open.—The improvement in this important matter, is exhibited in the following statement:—

	Average for 1875.	Increase over 1874.
Rawdon (including Stirling)	11 months, 3 days.	9 days.
Huntingdon	11 " 8 "	1 month 7 "

In every municipality but one there was an increase.

So marked an improvement was not brought about without much attention and effort on the part of trustees and others concerned.

In all my endeavours to effect this change, I have been seconded in an earnest manner by the local school authorities, with a very few exceptions. The prevailing dull times and the great scarcity of teachers led many to anticipate results of an opposite character.

Teachers' Examinations.—At the annual examination for 1875, there were *two* candidates for Second-class certificates, and forty-nine for Third-class. Of the latter, 13, or 26 per cent. were successful. At the examination for the previous year, less than 6 per cent. of the candidates were successful. Though there is yet great necessity for improvement, the change deserves notice. It is attributed, in a great measure, to the increased zeal with which many teachers applied themselves to study, and to the valuable aid and guidance afforded them by the Teachers' Institutes.

While pleased to be able to report progress in this respect, candour compels me to say that a number of our teachers manifest no earnest desire to improve their qualifications. They are apparently resting in the belief that, owing to the scarcity of teachers, they will receive "permits." Without remarking upon the folly of relying upon so slender a support, I am forced to ask, Is a teacher whose ambition soars no higher than a "permit," who has so little spirit as to be content to continue to teach without proper qualifications, and merely on suffrance, the right person to mould the plastic mind of youth?

Better far to close a few Schools for a time than to continue them under such ruinous influences.

By section 112, sub-sec. 26 of the Consolidated School Law of 1874, and the regulations that have been issued under its authority, it is made the duty of Inspectors, in such districts as North Hastings, to hold, at some point in the remote townships, an examination for Special Teachers' Certificates. In compliance with this requirement, an examination for such certificates was held at L'Amable, in Dungannon, and Faraday, on December 21st and 22nd, 1875.

Fully alive to the great difficulties with which trustees in the new districts have to contend in their struggle to provide education for the youth of their sections, and strongly impressed with the folly of attempting to *exact even an ordinary standard of qualification*, and with the disastrous consequences that would accrue from such a course, I took advantage of the latitude allowed by the law, and made the examination very elementary in its character. Notwithstanding this, but a few were successful.

The procuring of teachers for remote Schools is a most difficult task to all concerned. The scarcity of teachers in the front townships makes the difficulty still greater. However, in spite of all this, the Schools in the new townships were in operation, during 1875 for a longer period than in any previous year.

Qualifications, &c., of Teachers.—Eighty Teachers were employed during the year. Their qualifications were as follows:—

Provincial Second-class, 4; Third-class, 36; Old County Board First-class, 4; *terim* and Special Certificates for remote districts, 36.

Salaries.—The highest salary paid to any male teacher, during the year, was \$515 the lowest, \$192. The average salary paid to male teachers was \$302,15; to female teachers, \$235,19.

Since my first Report there has been an increase in the average salary paid to male teachers of \$11,52.

During the year the average salary paid to female teachers increased \$18,56.

Educated, conscientious, enthusiastic, and *really* successful teachers are inadequately remunerated yet.

Poor teachers are *dear* at any salary, however low.

Maps and Apparatus.—Since March, 1874, *sixty-eight* School-houses, out of a total 75, have been supplied with a sufficient quantity of maps, tablet reading lessons, and numeral frames. In the whole district, comprising 24 townships, in which Schools are located, there were, at the end of the year, no more than *three* School-houses unsupplied with these important aids to instruction.

Township Boards of Trustees.—In my Report for 1874, I gave detailed statistics exhibiting the inequality of the assessed valuations of school sections in the various townships, and the consequently unequal distribution of the burden of School taxation. In the Township of Elzevir, owing to physical causes, this evil exists to a great degree. As a remedy, an attempt was made, in 1875, to establish a Township Board of Trustees for the municipality. Meetings were called in several sections, but the change was defeated by S.S. No. 2, the total assessment of which is little more than \$5,000! No comment in such suicidal folly is needed.

Teachers' Institutes.—Two Institutes have met regularly during the year at Madoc and Stirling. We have, in this way, a meeting of teachers every *three* weeks. A great amount of good has been the result of these Associations. To those teachers who have been regular in attendance, and who have endeavoured by careful attention, and by noting down suggestions and explanations, to profit as much as possible by the proceedings, the benefit has been very marked.

In connection with the Madoc Institute, a library, composed entirely of works on education and cognate subjects, has been established.

As I have already given, in my special Report, full details in regard to the internal working and status of the Schools, it is unnecessary for me now to do so.

I have much pleasure in testifying to the increasing zeal of many of our teachers, and to the readiness and intelligence with which many have responded to every suggestion in regard to improvement.

COUNTY OF HASTINGS—SOUTH.

John Johnston, Esq.—The number of Schools under my jurisdiction is 81. Twenty in Sidney, 3 in Trenton, 18 in Thurlow, 23 in Tyendinaga, 1 in Mill Point, and 19 in Hungerford. Thirteen assistant teachers are employed, making the number of teachers in the Public Schools, not including Belleville, 94. Of the 94 teachers employed in 1875, 1 had a First-class Provincial Certificate, 15, Second-class Provincial, 74, Third-class, and 4 had Special Certificates. Sixty-eight (68) teachers have held their positions for several years, viz.: 8 of the Second-class, and 60 of the Third-class.

The average salary paid male teachers	\$407 50
“ “ “ female “	277 50
The highest salary paid male “	575 00
The lowest “ “ “	300 00
The highest “ “ female “	450 00

	Highest salary,	Lowest salary,	Average salary,
<i>In Sidney:—</i>			
Male teachers.....	\$500 00	\$300 00	\$350 00
Female “			\$300 00
<i>In Thurlow:—</i>			
Male teachers.....	\$500 00	\$300 00	\$400 00
Female “			\$360 00
<i>In Tyendinaga:—</i>			
Male teachers.....	\$500 00	\$300 00	\$420 00
Female “			\$260 00
<i>In Trenton:—</i>			
Male teachers.....	\$500 00		
Female “	\$450 00		\$200 00
<i>In Mill Point:—</i>			
Male teachers.....	\$550 00		
Female “			\$300 00

The amount of money received from tax on property by trustees was, \$24,320,68½, and the total amount received from all sources amounted to \$43,786,37. The amount paid teachers, was \$25,470,06. Before 1875, many of the School-houses had been built, several had been repaired, and all the grounds had been fenced, yet in 1875, the amount paid for building, &c., amounted to \$7,412,25, and \$150,61 were expended by trustees for libraries, making the whole amount expended \$38,393 32.

The number of children between the ages of 5 and 16, as sent in on trustees' supplementary reports was, for Sidney, 1,362; Thurlow, 1,160; Tyendinaga, 1,347; Hungerford, 1,347; Mill Point, 297, and for Trenton, 575, making in all, 6,028 children in South Hastings, which, should they all attend School, would give an average of 64 for each teacher.

The total value of School-house and sites was estimated at \$83,407. Of this amount, Sidney including Trenton, has \$25,416; Thurlow, \$21,369; Tyendinaga including Mill Point, \$26,269, and Hungerford, \$10,226.

The average time the Schools were kept open was 11 months and 15 days.

Of the 81 School-houses 33 are brick, 10 stone, 35 frame, and 3 are built of hewn logs.

Thirty-six (36) new School-houses have been built since 1871, a great many have been repaired, newly seated, and made as good as new. The Schools have been for some time well supplied with maps, tablets, blackboards, object lesson cards, &c.

Six (6) new School-houses will be built this year, 1 splendid brick School-house in S. S. No. 13 Hungerford, 1 brick, in S. S. No. 22 Tyendinaga, and 1 of the same material in S. S. No. 5, Sidney, and the others frame, making 42 new School-houses built in South Hastings, since the introduction of the new School Law, in 1871.

Mill Point.—In 1875 a splendid brick School-house was erected in the Village of Mill Point, at a cost of about \$5,000. It is a fine-looking building, well seated, and quite well

furnished with maps, black-boards, tablets, etc., and built on a splendid site of more than an acre; the ground is well-fenced, and there are good outbuildings and a well. They have now three (3) teachers in the School, and much credit is due to Mr. Aylesworth and the trustees for the efficiency of the School.

Frankford.—In this village, the trustees, seeing the necessity of increased accommodation, built up the walls of their School-house one storey, so that now they have two splendid rooms, one for the junior department, and the upper room for the senior pupils.

Trenton.—In this prosperous village there are three (3) School-houses, with seven (7) teachers. One of these is a separate School, with two teachers, and they will very soon have a new School-house. The other Schools of Trenton have done well of late, and I never found them in such a high state of efficiency as they were in at my last visit. The trustees now take great interest in their Schools, and have secured a very efficient staff of teachers who are earnest and energetic, and are doing their work well. They have one very fine brick building, erected at a cost of \$8,400.

Town of Belleville.—In the Town of Belleville there are five good brick School-houses, with eighteen teachers. The Union School is a very fine building, with seven class-rooms and a large assembly room, the upper part being used for the High School. The School is thoroughly graded, and the teaching is of the most thorough character. The head teachers of two of the Schools prepare the pupils in the subjects of the fourth class, and for entrance into the High School. The lady teachers are earnest and energetic, and do their work well. The other Schools are all graded, and the teachers are teaching according to the improved method.

The Schools are well supplied with maps, globes, tablets, and object-lesson cards. The trustees during the past few years have spent a good deal of money in making repairs, in erecting proper outbuildings, and in supplying the Schools with all necessary apparatus.

The trustees will employ only the best teachers. They pay them well, and in consequence the progress made by the pupils, and the thorough teaching, have caused the trustees and people to appreciate their Schools very much. The trustees give every encouragement to scholars and teachers by frequently visiting the Schools and attending the public examinations.

There are six male teachers whose salaries range from \$750 to \$650, with the exception of one assistant who gets \$300. There are twelve lady teachers, and the highest salary paid is \$450, and the lowest \$300.

One of the head-teachers has a First-class Provincial Certificate, Grade A, three have Second-class Provincial Certificates, and two have Third-class. Four of the female teachers have Normal Certificates, and one of the four has a high grade of First-class from the High School. The others have Third-class under the new law.

I feel very much gratified with the progress made by the Schools during the past few years, and too much credit cannot be given to the trustees for doing all in their power to make them thoroughly efficient.

Religious Instruction.—The Schools are opened by reading a portion of Scripture and by prayer, and the Ten Commandments are taught in nearly all of them.

Libraries.—A good many libraries have been got up to the present time, and it is expected that a library will be in each section by the end of the year. The books sent from the Department are of the right kind, and are thought a good deal of by both parents and children.

One of the compulsory clauses of the School Law that has not, as yet, been rigidly enforced, is that a well must be dug in each School-house ground. A few Schools have wells, but not many. This matter will have to be urged upon trustees now, and it is hoped that this fall each School-house will have a well.

Irregular attendance is a great drawback to Schools, but trustees are generally doing all they can to induce scholars to come regularly, by taking a correct census at the end of the year, and notifying those whose children do not attend regularly the four months at least. Teachers have done much to secure more regular attendance by teaching well and thoroughly, by making the school a pleasant place, and by having at least three (3) public examinations during the year, for when people attend these honest examinations, and see that their children have been well taught, and that they know what they have gone over, they take a great interest in the Schools and induce others to attend and to visit them.

Teachers have been advised in all cases to visit parents and ask their support, and when this has been done by earnest teachers it has done much good.

Everything has been done during the past five years to make the Schools thoroughly efficient. Our Institute, which meets the third Saturday in every month, has done a good work, and has been the means of enabling our teachers to teach according to the improved method. Many of our best teachers have taken subjects, and have done all in their power to help the young and inexperienced. It has been very well attended, and very much appreciated by the earnest and energetic teachers. Professors Bell and Dawson have assisted us very much during the year; but as many of the teachers of Hungerford and Tyendinaga could not attend on account of the distance, I have held Institutes at Melrose and Thomasburg. The holding of these Institutes has done much in raising the standard of teaching in those townships. I have spent a good deal of time in showing the young and inexperienced the best method of teaching and conducting their Schools, but it has been time well and profitably spent. The teachers teach much better, as they carry out in their Schools the methods advocated.

It was very discouraging to me for a year or two at first, but now, when I look back and see the great advancement the majority, at least, of our Schools in South Hastings has made during the past three years, the uniformity in teaching all the school subjects, and the thorough teaching that is being done, I feel that I have been rewarded for the time spent in getting our teachers to teach with energy, and to conduct their schools in the most approved manner, for the teacher makes the school—as the teacher so will the school be, and the better he understands all about teaching, the better will he teach, and so all are benefited, both scholars and parents.

I am sorry that some teachers are so careless and indifferent about attending and improving themselves, for unless teachers take an interest in their profession, and do everything possible to make themselves good teachers, they cannot expect to be appreciated by trustees and people, particularly now when all know the value of good teaching. Trustees are always willing to pay a good teacher fair remuneration, provided the school is well taught. They are always ready to pay good salaries if teachers will only teach with a determination to make the scholars thorough, and show that they are alive to the importance of doing good work. The people of South Hastings are thoroughly alive to the importance of good Schools. They use good teachers well, and pay them good salaries. Teachers have four days in each year to visit Schools, and they have been advised to take them, and spend the time in the good schools recommended. The good Schools in each township have done much to improve the profession of teaching in South Hastings. These Schools have sent out good teachers, as they see every day how all the school subjects should be taught, and they carry out in their own Schools the methods of teaching used by the teacher of the School. We had from these rural Schools no less than 26 young men and women who obtained certificates last July, and are now teaching and doing well. They not only got certificates, but many of them stood at the head of the list, showing quite a contrast to what took place after 1871, when nearly all the teachers failed at more than one examination, and had to get Permits; but during the past three years many scholars from the Public Schools have got Third-class Certificates, and they make the best teachers we can get.

We have a good Teachers' Library, containing more than 150 volumes, and it is much appreciated by the teachers.

The granting of Permits gives a great deal of annoyance sometimes to the Inspector. Candidates who fail at the examination expect that they have nothing to do but ask for a Permit, and it must be given. When it was thought advisable to grant special Certificates it was done with caution, and only for special Schools, and they are never given unless on the written request of the Trustees. When scholars from the Public Schools can get good Third-class Certificates, and stand at the head of the list, it ought to be a shame for a teacher having taught some years to ask for a Permit.

Over two hundred visits were made to Schools last year, not including Belleville, many lectures given, and everything was done to raise the standard of education in each section; and I have to thank the people of South Hastings for the kindness shown me, and for the increased interest they have taken in the welfare of the Public Schools; and I hope that by increased energy on my part, if possible, and on the part of the teachers, a

good deal will be done to increase the efficiency of the Schools of both South Hastings and Belleville during 1876.

COUNTY OF DURHAM.

John J. Tilley, Esq.—Good work has been done in our Schools during the year. The programme is, with slight exceptions, carefully observed, and regularity and system in the classification of pupils and in work done, are the results. All the Schools were kept open the whole year, and only one special Certificate, for six months, was granted. It affords me much pleasure to be able to say that arithmetic is taught in a very intelligent manner. Teachers do not think of confining their work to a text-book, but are developing independent thought and self-reliance. The examination questions for admission to High Schools are eagerly sought after by teachers, and in fixing a certain standard for their pupils they exercise considerable influence upon our Public Schools. Grammar and composition in the lower classes are invariably taught together by blackboard exercises—text-books being seldom used below the fourth class. Pupils are thus taught by direct application the practical use of what they learn. I am satisfied with the work done in these subjects. The results in spelling are also quite satisfactory. All classes from the Second Reader upwards are taught by dictation. Junior classes are also required to write a portion of their reading lessons each day, by which the spelling is much improved, and a freedom in writing acquired. All our teachers give much attention to the definitions of words. Reading is well taught in a few Schools, fairly in some, and poorly in many. Too many teachers have not learned that *hearing* reading is not *teaching* it, and that to have good reading something more is necessary besides pronouncing an occasional word and saying “next.” A report that does not complain of irregular attendance can scarcely be considered orthodox. I fear many teachers do not realize how much the regularity or irregularity of attendance lies within their own control. I usually find the best teachers complain the least of this wide-spread evil. To teach those pupils that are sent, or may come to school, may fulfil the letter of the law; but the teacher whose interest in the welfare of his pupils is not strong enough to cause him, if need be, to go out through his section and do a little missionary work, is not fulfilling the spirit. The attendance is very much regulated by the influence the teacher exerts both in and out of school. When I visit a School taught by an energetic teacher, with a thorough system of marking and reporting to parents, I usually find the irregularity much reduced. Heretofore the clause relating to compulsory attendance has had but little effect; but the supplementary report issued by the Department this year, which requires trustees to give the names of all children between seven and twelve years of age that have not attended four months in the year, has brought the matter very forcibly under the notice of trustees; and from my intercourse with many, I have no doubt this subject will receive more attention next year than it has ever received before. The year has witnessed the usual influx of inexperienced Third-class teachers, who greatly outnumber all others. While the lowest grade of certificate is as easily obtained as it is at present, large numbers of young persons will obtain it, not through any particular effort on their part or desire to teach, but through their ordinary work in High Schools, or Superior Public Schools, having been induced to attend the examination in many cases for the credit of the School. When licensed, they are ambitious to teach, but experience proves that at least two out of three will not be found teaching after their three years of probation have expired. The consequence is that many of our Schools are but experimenting rooms for an almost perpetual apprenticeship. I believe the time has come when every person licensed to take charge of a School should be able to teach, to some extent, all the subjects in the programme. The reason why so many Third-class teachers fail to enter the Second class, and so many Schools are consequently obliged to change teachers, is, that having received no insight into the extra subjects for Second-class Certificates, being removed from assistance, and thinking the difficulties greater than they really are, they believe themselves unable to pass over the gulf. If no more Third-class Certificates were granted, and a lower grade made in the Second class, for which, say one-third of the marks shall be obtained, it would, in my opinion, be a great step in advance. To prevent any undue scarcity of teachers, the Third-class Certificates now in existence could be made valid for some definite time. Competitive examinations were held in five townships during the year, and, con-

sidering that these were our first, the attendance was good and the results satisfactory. Prizes of the value of nearly \$400 were distributed. I believe these examinations have done a great deal of good in infusing new life into teachers and pupils, and by developing a healthy spirit of emulation. I look for increased interest in those to be held in 1876. I think it would be well if something corresponding to the competitive examinations that have been held in a few counties were established on some uniform basis for the Province—an examination in connection with our Public Schools that shall bear some relation to the “intermediate” for High Schools. A uniform programme for all schools has undoubtedly done much to regulate the work, but bringing the schools into direct competition with one another by uniform written competitive examinations, would be a mighty lever to *raise* the work. Our teachers’ associations are in a flourishing condition, and a professional library in connection with the one for East Durham was established last June. Many of our teachers are working hard, striving to take a higher stand in their profession, and at the last examination we were enabled to grant ten Second-class Certificates—double the number ever given before at one time. Yet nearly three times as many were given in the Third class. 112 teachers were employed during the year, of whom 29 had attended the Normal School.

Certificates held are as follows:—

Provincial—1st Class, 5; 2nd Class, 38. New Co. Board—3rd Class, 65; Old Co. Board—1st Class, 1; 2nd Class, 3.

The average salaries paid in the different Townships and in the County, were:—

	Darlington.	Clarke.	Hope.	Cartwright.	Manvers.	Cavan.	S. Monaghan.
Males.....	\$402	\$391	\$397	\$332	\$417	\$400	\$390
Females.....	229	246	260	None.	280	264	327

For the County—Males, \$390; Females, 268.

It is worthy of honourable mention that Manvers, the poorest township in the County, stands first in salaries to male teachers, and second to females.

Highest salary paid to any male teacher, \$550 (S. S. No. 11, Cavan); to any female, \$460 (S. S. No. 1, South Monaghan).

While in many cases the salaries are much too small, there is reason to feel encouraged when we compare the present salaries with those of former years. I have not the figures by me, but I have no doubt a majority of our Schools would show an increase of twenty-five per cent. in four years, and some would go beyond this. It is worthy of note that the present depression of business has not affected teachers’ salaries.

School Accommodation.—Nearly all the old School-houses of former years have been replaced by new ones since the introduction of the law of 1871. There remain but seven structures that should give place to others without delay. Three sections at least will build next year, and two will provide accommodation for an assistant teacher. Six rooms were re-seated with improved desks on iron stands, nineteen play-grounds were enlarged and fenced, and ten were fenced. There remain twelve to be fenced, and eleven to be enlarged. Before forwarding cheques for municipal grants, I wrote to every section that had not complied with the law, and have received assurance in writing in all cases, except four, that the grounds will be enlarged and fenced in the spring. I think, therefore, it may safely be concluded that before the end of another year every section in the County will have complied with the regulations relating to play-grounds. For providing fencing and supplying play-grounds, \$2,500 were expended during the year.

There are 101 School-houses in the county, Brick 58; Stone 1; Concrete 1; Frame 39; Log 2.

Libraries.—But little was done during the year in supplying libraries. There are 39 in the County, divided as follows:—

Darlington, 3,228 volumes; Clarke, 9,848 volumes; Hope, 8,408 volumes; Cartwright, 3,234 volumes; Manvers, 6,285 volumes; Cavan, 6,361 volumes; South Monaghan 4,250 volumes.

School Requirements.—All our Schools are furnished with blackboards and maps. Globes are found in 65 Schools, tablet object lessons in 80, and 35 report apparatus used, though in many cases I know the supply is quite limited. I am happy to say the supply

of maps is very creditable indeed. The whole number reported is 828, which gives an average of over 8 to every School in the County. For maps and prizes the sum of \$402.21, was expended during the year. The total value of School Property in the County is as follows:—

	School-house & site.	Furniture.	Apparatus.	Libraries.	Total.
Darlington.....	\$17,560	\$1,937	\$551	\$166	\$20,214
Clarke with Newcastle.	21,120	1,613	654	484	23,871
Hope ...	12,673	1,304	384	159	14,520
Cartwright.....	6,979	555	279	175	7,988
Manvers.....	9,040	1,115	410	122	10,690
Cavan.....	11,550	1,115	394	170	13,229
South Monaghan	4,220	344	114	80	4,758

TOWN OF PORT HOPE.

The High and Public Schools were separated three years ago. Previous to the separation the Schools consisted of a Central school, which was also a Union School, under the supervision of a head master and three primaries, or Ward Schools, which were in a great measure distinct Schools, and were not graded with the Union School. At that time the work did not go beyond the fourth class, or, so far as to enable pupils to pass the examination required for admission to High Schools. After the separation, all the Schools were re-organized and graded, from the lowest division in the primaries to the highest in the central, and placed under the direction of the head master. The pupils, though classified nominally according to the programme, were considerably below the prescribed standard, and for the first year and a half the promotions were few, and were made only when required to relieve the lower divisions. During this time but few pupils went up for promotion to the High Schools. The trustees were determined to bring the schools up to the standard, and to furnish facilities for supplying a full Public School course. New life was infused into the work, a deeper interest was taken, and trustees, teachers, and people worked together to build up an efficient first-class School. Their efforts have been eminently successful. Before the separation ten teachers were employed. At present the number is sixteen, and more are required. The work has risen from the fourth class to an advanced fourth and fifth and a sixth class. The grading is now considerably higher than ever before, as for example, the work now done by the fourth class boys is the same as that done two and a half years ago in the division two grades higher. Some pupils have taken teachers' certificates, and at the half yearly examinations for admission to High Schools, the candidates are very successful. At the last examination the average made in arithmetic by the pupils from the fourth class was over 66 per cent., and by those from the fifth class 62 per cent. Promotions are made twice a year, and are determined in all classes above the first, by written examinations. The hours of teaching were recently reduced to 4½ hours—from 9.30 a.m. to 12, and from 1.30 to 3.30 p.m., without recess.

Attendance.—The number of names registered during 1875 was 1,347; boys 661, girls 676; under five years of age, two; between five and ten, 765; between 10 and 16 years, 557, and over 16 years 23. Of the pupils attending, 82 attended less than 20 days; 180 between 20 and 50 days; 285 between 50 and 100 days; 321 between 100 and 150 days; and 479 between 150 days and the whole year. The daily average attendance for the first half year was 778, and for the second 775, which gives a percentage of 57.6 for the year, or in other words, 58 pupils out of every 100 on the register attended every day in the year. A better idea of the attendance is obtained when I say that the average monthly attendance was 80 per cent. of the monthly registered numbers. In the Central School, commencing with the third class, the average rarely falls below 90 per cent. This is certainly very satisfactory, but as much cannot be said of the primaries, for the great majority of the children in these Schools being young, the attendance is less regular. When a child has been absent one day, the rule is to send a note to the parent, asking him to send the child back, or give a reason for his absence, and each teacher is expected to employ the time from 3.30 till 4 P.M. in looking after any cases of continued absence.

Compulsory Attendance.

While Port Hope compares very favourably with other towns in regard to the number of children of school age not attending any School, yet there are cases in which the clauses of the Compulsory School Act, if rigidly carried out, would do much good in not allowing the culpable negligence of parents to deprive their children of the inestimable boon of, at least, the rudiments of a Public School Education, and in requiring that absence beyond a certain time, when not satisfactorily accounted for, shall deprive the pupil of the right to attend until application be made to the proper authorities for permission to return.

Average attendance per class—I place before you, in tabular form, the average length of time that pupils remain in each class. The ordinary length of time allotted to each class in the Central School is one year—the first half in the junior division and the second in the senior, except in the junior room in which the pupils entered in the first book are expected to remain until they have completed the work for promotion to the II. class, in order that the grading may be complete. In the primaries, one year in the junior rooms and one and a half in the senior rooms has been the usual time. I do not give the figures for the West Primary or for the junior room in the Central School, on account of the loss of an old register in each, but the average for the corresponding classes in the other primaries will give a sufficiently accurate idea of the attendance in these divisions. In the VI. class the pupils remain as long as they wish. Almost all in this class have passed the entrance examination to the High School, some, six months and some, one year ago. In the II. class, Central School, many of the pupils entered in the first book, and remained until they had completed the first half of the 3rd book. This will not occur again as in future all pupils must be ready to enter the 3rd book before being permitted to enter this division.

SCHOOL	CLASS.	Average attendance of pupils who left or were promoted during year 1875.	Average attendance of pupils remaining in Class, 21st Dec., 1875.	Greatest number of days attended by any pupil in Class, 21st Dec., 1875.	Least number of days spent in Class by any pupil regularly promoted to, and from, that Class.
Central	6th	115½ days.	170 days.	196	79
	5th	84½	160 $\frac{8}{11}$	270	69
	4th Advanced.	125 $\frac{10}{18}$	100 $\frac{6}{12}$	265	41
	4th Boys	143 $\frac{1}{8}$	127 $\frac{25}{88}$	324	77
	4th Girls	86½	125 $\frac{6}{19}$	195	72
	3rd Boys	181 $\frac{5}{19}$	168 $\frac{17}{88}$	336	79
	3rd Girls	128 $\frac{25}{40}$	108 $\frac{8}{88}$	289	64
	2nd "	238 $\frac{15}{88}$	193 $\frac{25}{7}$	392	20
Central	2nd	130	161 $\frac{65}{71}$	424	53
Primary	1st	116 $\frac{25}{74}$	202 $\frac{49}{138}$	608	41
West	2nd	425 $\frac{11}{19}$	264 $\frac{8}{88}$	719	83
Primary	1st	361½	165 $\frac{67}{94}$	711	64

Ages.—The average ages of pupils in the several classes in the Central School were senior first 6 $\frac{3}{7}$ years; second 10 $\frac{4}{71}$; third boys 11 $\frac{19}{22}$; third girls 11 $\frac{45}{99}$; fourth boys 13 $\frac{4}{44}$; fourth girls 12 $\frac{27}{99}$; fourth advanced 13; fifth 14; sixth 15 $\frac{1}{8}$.

Classes.—The numbers in the different classes were part I, 281; part II, 171; second book 289; II. class 241; III. class 128; IV. 112; IV. advanced 50; V. 35 and VI. 40. In June last 21 pupils tried the entrance examination to the High School and all succeeded. In December 28 tried and 25 passed. Of these all who went from the VI. class were found ready to enter the second form of High School work.

Teachers.—Sixteen teachers are employed and of these 15 have regular classes; the time of the other is taken up in teaching, writing, book-keeping and drawing. There was, taking total numbers registered during the year, an average of 90 pupils to each teacher, and taking the average attendance for the year 51 pupils to each class. In the Primaries especially the over crowding is most felt. When we consider what the trustees have done in three years to increase their School accommodation and staff of teachers, we must certainly award them a great deal of credit, but additional accommodation must be provided before long.

Expenditure.—The expenditure for teachers' salaries was \$5,835, and the total expenditure \$8,367.04. The cost per pupil estimated on the number on the roll and amount paid teachers, was \$4.33, on the average attendance and amount paid teachers, \$7.50. Whole number and total expenditure \$6.21. Average attendance and total expenditure \$10 76.

Library.—When the Schools were separated, the library was divided and 350 volumes were given to the Public Schools. This number has not been increased as yet, but it is expected that an addition will soon be made to it, in order that the library may keep pace with the constant growth of the School. The books are eagerly sought after by the pupils, and the influence for good, with the love of reading, engendered and fostered by these books, can scarcely be estimated. The Schools are under the efficient management of Mr. D. J. Goggin, Head-Master, and a very competent staff of assistants. Excellent discipline is maintained throughout, the rooms are comfortable and well kept, and altogether the Schools are in a healthy, progressive condition, and are a credit to the town.

COUNTY OF HALIBURTON.

Rev. Frederick Burt.—In August last, I had the honour of making a twelve-month's report to the Warden and Councillors of the County, in Council assembled, which they were pleased to receive with warmth of satisfaction, and through the Warden, complimented me upon both my work and the report thereon. The County Council have given me their support in carrying out the work of the Education Department, although through the great demands for public improvements in the form of roads, bridges, buildings, and offices, upon the revenue of our youthful County, they have been unable to grant me a trial of any of the suggestions contained in my report, looking, of course, education-wards. For the purposes of education, the amount expended by the County Council was \$1,230 in 1875, and about \$1,000 in 1874, showing a small increase which probably cannot be any farther augmented in 1876, for the sole cause, that, our County is but starting in life, and had to incur debts in commencing that start. In this connection let me mention the great value of the Poor School Fund to the various School Sections of the County—how helpful is the aid from that Fund—how encouraging to the anxious trustees—how opportune to the teacher—yes, pleasing to the benevolent Inspector, and then that glorious end always to be kept in mind—how it forwards the education of the children of each and every Section! School Sections will exist in this country for some time, that must grapple with poverty, sparseness of population, removals, poor crops, heavy County rates, high School rates, and many other hinderances to comfort and progress, both intellectual and corporal, incident to pioneer life in rough townships. I also take as a proof of my last statement, that two-thirds of the School-houses of the County are either bordered on three sides out of four, or are within a stone's-throw of the standing forest. I therefore record with gratitude the liberal grants of the Education Office to the Schools of Haliburton County, and assure the Department of the thanks of the several Boards of Trustees for the same liberality; and thus several Schools were kept open *nine* instead of *six* months, and in two cases, a whole year. This feature it would be well to remember and insist upon in the future.

School-Houses.—In January last, Minden Village people had the pleasure of seeing

their children enter upon the occupation of a very good School-house. It is built on rising ground, and has a good play-ground and other marks of civilization, that the Department is endeavouring to furnish the rising generation with, so that morality may not suffer by the congregating of numbers of different sexes. This School-house cost \$1,600.

Haliburton Village can also boast of a good School-house, fenced, and provided with proper accommodations within and without. It is of recent date.

In the Township of Dysart are to be found the best rural School-houses, frame structures, but some of these are not furnished with the necessary accommodations without. Stanhope has only one neat frame house, but this stands in a field, unfenced, save by the common field fence. Minden township has two very neat little frame School-houses, probably the only ones of recent erection, so that if frame structures are to be taken as proof of improvement, we must wait until the log houses have become untenable. But in new and remote Sections in all our townships the people are grateful for even the rude log School-house, serving as it does for Church and School. In Lutterworth and Anson three Sections are impatient for School privileges, and these are upon the newly opened Cameron road. On the Monck road, as it runs athwart the Township of Glamorgan two localities in mid forest are struggling into life, and in one of these a very fair cottage has been rented rather than delay educational blessings. The School-house hard by is in process of construction. On a temporary road, but close by a future road-site, in another direction, a School was opened on the 1st of February, 1876, where the people have struggled for nearly four years against bush-fires and other obstacles incident to new townships, so that the old year may lay claim to this item of progress, for all was ready ere it closed, for operation. The Inspector happened to be in the locality the first day of School, and it was so exhilarating to see the children, books in hand, encased in a variety of home-made garments, and the well-known luncheon-bag exhibiting as great a variety, but all clustering round the temporary lodging of the teacher at quite an early hour to accompany him to School—it seemed an epoch in their lives!

In Cardiff are two struggling Sections in operation, and one just coming into working order. In Monmouth, is a locality that is 8 miles distant from the School-house in Cardiff but the New Year will remedy this seeming hardship, it is hoped.

The remote Township of Harcourt has a School, but it is so isolated, that not more land is located, and the School better attended, *dullness* must rule. Probably a year or so may tell upon this Section. The School-house is neat, fairly furnished, in a clean locality, but there is no busy hum of human voices that denotes mental expansion in the teacher's workshop as being accomplished. The homes of the scholars are quite distant from the School both East and West, which is a wonderful hinderance, and exerts a telling power in new townships, for it fosters fears in the minds of mothers, and of course is a direct obstruction so often in the rainy and thawing seasons, and well nigh ruins the work of a *six-months* School.

In connection with these remarks upon School-houses, it must not be omitted in the annual record, that there has been a marked improvement in Sections, having only a lone School-house, in the out-houses erected, both for the demands of common decency and tidiness. The bare fact of having to answer the formal question, No. 122, carries quite an influence with it, as does the Annual Return generally.

School Teachers.—In this small County, where wealth is the exception, where are only two small Villages, where the County Town is but a mere village of fifty houses (though its people are really alive to, and transact quite an amount of business), the rural Sections predominate, and they, with scarce an exception, are beset with common difficulties in the form of distance of homes from the School, long walks for teachers to and from School, indifferent boarding places, small salaries and high rates at the same time, and six-month Schools—all these militate against the improvement of our staff of teachers. Then, in addition to these is another great obstacle, our little County cannot educate its own teachers, its people cannot afford to send their youths to a Training College, for they can not even keep them at the Public Schools as long as is proper and just. Indeed it will be quite a *fight* to obtain for the very children of 7 to 12 years the boon of *four months* Schooling which the Education Department has secured for them as a right, as Canadian

The twenty-four teachers of the past year may be classed as 5 Good, 13 Fair, Moderate; and comprised 7 males and 17 females. With regard to their license to teach

they stood thus : Old County Board 5, New County Board 8, Provincial Second Class 2, and Special and Permits 9.

Allow me to quote from my report to the County Council to show the great need of help to impart the *Art of Teaching* : "Want of education and training in the Art of Teaching in the persons of our teachers, is a mighty foe to right progress ; this may be partially remedied if our County Council could see the way clear to attach two or three Scholarships to the two leading Schools of the County, viz. : Minden Village, and Haliburton. Let these Scholarships be given to four or six young persons of the full age of sixteen years, who will bind themselves to teach in the County for three or four years, thus these prospective teachers could attend School six or nine months to great advantage, be fitted to pass the Board of Examiners, and the County be furnished with better teachers, and the 'Permit' teachers wholly set aside."

Another plan would be—Send three persons to Toronto Normal School, per year, for two years, with the same stipulation, and thus the same end would be gained, but not so quickly.

There is no hope for the rising generation until a training for Third-class teachers is provided. The Third-class teacher is a necessity, and will be, in this County for years to come, from the very nature of the localities in which our Schools are situate. *Will the Department devise some means to compass this clamorous difficulty and need?*

The Programme.—The printed programme of the Department is affixed to the walls of most Schools, and I can record that as a rule the teachers do their utmost to carry it out ; but irregular attendance, change of teachers, and other obstacles often render the observance a task.

"Object Lessons" have not improved since 1871, when I retired from office through the New Law, appointing Inspectors in lieu of the former Superintendents. I feel that this pleasing kind of education cannot be fully fallen in with, or enjoyed, by our teachers till they are better taught and trained themselves.

"Composition" the sister lesson or mode to the last named, is tried in all Schools, and quite a marked progress can be reported. The Schools stand thus—Excellent 1, Good 28, Middling 14 classes.

"Grammar" is not well taught, except in 4 Schools. "Reading" as a matter of course, stands nearer the mark fixed. "Writing" is not so good as Reading, it may be termed as in the "Programme" *readily* but not *well*. I found 7 classes up to "*excellent*," 38 *good*, 39 *middling*, and 1 *bad*. In "Geography," through the lack of proper education of the teacher, there is a great want. Too much use of and reliance on the text-books exist, and too little use of the beautiful Maps, for hanging upon the walls, provided for our Schools, at so cheap a rate by the Department. A great amount of diffidence in our teachers in the use of large Maps, which is hurtful to the pupils, must be dissipated ere Geography be taught aright. Some teachers actually keep rolled up, from lesson to lesson, these noble Maps that ought to be resorted to in Reading lessons, and ever and anon by the pupil as he pleases, that the contour of each chief feature may be fixed in the mind.

The next Annual Reports will test the new provisions for compulsory attendance, for quite a stir amongst trustees has already exhibited itself, and after next 1st September, defaulting parents may be considered contumacious.

I have been able to make the required number of visits, and more, to all the Schools, except in two cases, where the teacher was absent without the proper leave in the one—and the School abruptly closed in another case, in the midst of a term ! Many occasions for informal addresses occurred at visits, at quarterly examinations, at public meetings of ratepayers.

May another year witness increased zeal on the part of trustees, teachers, and parents, in nursing the *nine hundred* precious children of our young County, so that the noble efforts of the Education Office may meet a fit response.

COUNTY OF ONTARIO.

James McBrien, Esq.—It pleases me to be able to state the work of improvement is gradually progressing.

I have a greater number of efficient schools now than in 1874. Parrotage, blind and

feble, is fast passing into the dark shades of oblivion and extinction. The intellectual system is winning its widening way to universal sovereignty. The intelligence of the pupils is made to pass through the judgment into the memory; hence their acquisitions are substantial and enduring. The fine gold may grow dim, but it is ever easily burnished.

The methods of instruction are such, in general, as to ensure the attention of the whole class, instead of a few as formerly; therefore, the invaluable habit of concentrating the mind to reason connectedly is formed, and the giant evil of inattention is abolished. Aberration of mind is a natural consequence of the fall of man from the glory and perfection of God, and clearly indicates the necessity of education for man. Hence, the great work of the intellectual educator is to destroy this fly-about disposition.

Certificates.—There are 144 certified teachers in this county: six first-class Pro.; thirty-two second-class Pro.; thirteen Old County Board; eighty-seven third-class New County Board; and six interim certificates.

The number of third-class teachers is rapidly increasing. After the examination in July, there was a rushing, sweeping freshet of them. I feel that the highest interests of Public School education are likely to be submerged, unless a higher standard is raised to roll back the torrent.

Change of Teachers.—The frequent change of teachers is a formidable evil. It is said that the natives of certain islands in the South Sea pull up their grain to look at the roots, to see if it is growing. Even so, before the teacher has time to develop and mature his principles, he is often removed. If the tree has been planted long enough and bears no fruit, cut it down or dig it up.

Entrance Examination to the Schools.—The questions got up by the Education Department have a talismanic influence. Candidates trained according to the rote system—that is to say not trained at all, cannot succeed with these questions. Therefore teachers are driven more and more to the intellectual system. This is a boon of momentous importance to all concerned; to the Head Master, as it saves him from a vast amount of drudgery; to the pupil himself, because as he is prepared to do his work with the understanding and consequent pleasure; hence he is attracted onward and upward from one degree of excellence to another, until he is constrained to exclaim Excelsior! Excelsior!

COUNTY OF YORK, NORTH.

David Fotheringham, Esq.—To make the past and present condition of the Schools as clear as possible, the following statistics are thrown into Tabulated form:

	1871.	1875
The population of the Division (5—16).....	8,321	7,970
The average attendance	3,120	3,400
The percentage attendance	37 $\frac{1}{4}$	42 $\frac{3}{4}$
School Districts or Corporations	71	77
School-houses, brick	14	21
“ frame	53	56
“ log.....	4	1
“ total	71	78
“ Adequate	31	67
“ Accommodation	6,468	10,241
“ and site—value.....	\$71,000	\$104,000
“ built brick.....	————	7
“ “ frame.....	————	30
“ enlarged.....	————	11
“ Building and sites.....	————	\$50,000
“ Sites adequate.....	31	72
Teachers employed.....	79	93
“ salary—average males.....	\$361 33	\$463
“ “ “ females.....	\$243 25	\$252
Certificates, Provincial	20	27

Teachers Certificates, Old Country Board.....	42	15
“ “ New “	21	47
“ “ Temporary	2	4
Public School Libraries (1872).....	36	32
“ “ vols.....	6,622	6,003
“ “ “ used.....	3,183	1,646
Schools examined—record good.....	7	33
“ “ fair.....	27	34
“ “ poor.....	40	9
Pupils present and examined—1st visit.....	3,258	3,516
“ “ 2nd visit.....	2,768	2,951

From this comparative statement it is evident that the Act of 1871, has done a good work. School accommodation has been nearly doubled in quantity, and greatly improved in quality. And, it is to be noted that while the absolute increase of houses is only 7, 37 have been erected—all of a class superior to those they have replaced; also, that \$50,000 have been expended in the improvement of houses and sites, so that the estimated value has risen from \$71,000 to \$104,000. This liberal expenditure on houses did not interfere with liberality in the improvement of sites, wells, sheds, maps, &c. Nearly all the Schools are now supplied with these necessaries.

And in addition the remuneration of teachers has been making creditable improvement. The average, three years ago, to male teachers was \$40 less than now, and to female teachers, about \$9 less. This increase in salary, so reasonable in itself, is bearing fruits in improved methods of teaching, and also in the class of certificates. In proof of this it is seen that the number of Schools securing a *good* record has increased by 400 per cent., and those getting a *poor* record are not one-fourth of the number in that class, of three years ago—this too, when the examinations have been purposely more rigid.

In further proof of the efficiency of the teachers now employed, as of the advantages of improved accommodation, the average attendance of pupils has arisen from 37 $\frac{1}{4}$ per cent. to 42 $\frac{3}{4}$ per cent. of the School population.

Only in the Department of Public Schools Libraries has there been an apparent retrograde movement. This is to be explained at least in part by the fact, that trustees having responded on the whole so liberally to the requirements of the new law, in regard to accommodation and apparatus, it was felt to be reasonable that they should not be forced to keep up or increase the efficiency of their libraries till their special and heavy outlay should be lightened.

On the whole, it is evident that gratifying progress has been made during the four years just closed—progress, in the quantity and in the quality of accommodation, of School-house furniture and appliances; progress in appreciation, remuneration and efficiency of teachers; progress in regularity and work among those attending school; and progress in liberality and activity among trustees and parents.

On the other hand, progress is greatly needed in regularity of pupils, efficiency of teachers and management of Schools.

The Schools are suffering incalculable loss from three evils, the greatest of which is irregularity; next to irregularity in pupils, is inefficiency in teachers, from lack of training and experience; following that comes inefficiency in the management of Schools.

So general and so serious is the irregularity of children who profess to be in attendance, that the efforts of the most energetic and thorough Teacher are all but paralyzed. Imagine a child attending two days, and absent three days a week, making progress; yet that is about the average attendance in this section of the county, and if I mistake not, in this Province. Out of 9,021 entered on our registers, 320 (!) attended nearly full time; 1,580 were absent from 20 to 70 days; nearly 2,000 were absent from 70 to 120 days; 2,300 from 120 to 170 days; nearly 2,000 more, from 170 to 200 days; and over 800 over 200 days; while over 300 did not enter at all. The ordinary expenditure on Schools is \$50,000 per annum. It is within reason to say that half that amount is wasted, through this great evil.

While teachers deserve great credit for struggling heroically against this fearful odds, and for having secured creditable improvement in the record of their Schools, it is a great loss to the county that nearly half those in charge of its education are young persons without training or experience, following, of course, their best judgment, and the best examples in

their recollection, but after all, undertaking the moulding of intellect and character while their own have been the sport of circumstances which usually give them no special fitness for so vastly responsible an undertaking. And this evil is aggravated by the annual change made of Teachers in about 40 per cent. of the Schools.

To the credit of trustees it may be truthfully said, the past four years have been characterized by decided increase of liberality and exertion on behalf of the schools, and that in the face of decided opposition of persons either not appreciating education, or over economical in regard to its support. Yet, in too many instances, the efficiency of a school is lost sight of in securing an economical one. Too often a good teacher is allowed to leave because another can be employed for a less salary. Too often uncomfortable desks and seats, old and unreliable maps, have to do duty to prevent outlay on new ones, modern and more suitable. Too often, to save a few dollars to a section worth, it may be, \$100,000. The floors will be washed once or twice a year, and the sweeping and dusting put into the hands of one apparently quite ignorant of the end of these operations. Quite too often, in regard to frequency, the visits of trustees are like those of angels, but the reverse in regard to utility as with truth, they have to confess that their early opportunities did not give them the ability to judge of the merit of the work done. Too often, parents are so engrossed with ordinary responsibilities that their extraordinary one of encouraging and making sure a thorough education to every child, is entirely or almost entirely delegated to some young man or woman to whom they never spoke, and of whom they know comparatively nothing. And, too often, Inspectors have to go through a treadmill course to overtake the mere routine duties of a district, the size of which was decided by the maximum the law allowed to one man, rather than by the reasonable limits of efficiency in the discharge of his profession. Too often, the thorough-going teacher, trustee or Inspector is subjected to treatment the reverse of strengthening to his sense of justice in, and of obligation to, those he serves.

To remove the serious evils now complained of, there should in the first place be provided ample, accessible, comfortable, and attractive accommodation. To secure this, arbitrary division into sections should be abolished; taxation should be equalized, and houses placed in every centre of population. Competent teachers, fitted by a regular training for their work, as doctors, watchmakers and others are for theirs, must be insisted upon; and they must be made to feel that as long as they fairly earn position and promotion, these are sure.

Parents need to be instructed in their obligations to children and society; and children should be protected in their right to an education.

No doubt the carrying out of these improvements will involve many and important considerations and a multitude of details to which here it would be out of place to refer. It may be mentioned, however, that temporary expedients have been resorted to in this part of York, and with some measure of success, to alleviate the evil complained of:—

The duty and advantage of providing suitable accommodation were presented and reiterated for two years before any compulsion was resorted to; and only in exceptional cases was this necessary.

Teachers were advised and assisted to use professional works and to meet regularly in convention for interchange of thought and self-improvement; so that a teachers' association holding successful quarterly meetings, with a library of professional works, are rapidly developing a laudable emulation to understand and practise the principles and methods of education.

A careful record of the results of every school inspection made for four years has been preserved, and the faithful and successful teacher has been assisted again and again to secure a better position by a certificate based upon that record.

COUNTY OF YORK, SOUTH.

June: H. Lyson, Esq.—After my second visit in 1875, the standing of the Schools was as follows:—

32	Schools of the Highest Grade (No. 1 A).
35	“ “ Second “ (No. 1).
8	“ “ Third “ (No. 2).
2	R.C. Separate Schools, Second Grade (No. 1).
2	“ “ Third “ (No. 2).

One R. C. Separate School, in the Township of Etobicoke, was discontinued during the past year, and the pupils have attended one of the Public Schools; and it is to be hoped that on account of the superior advantages of the Public Schools above those of the defunct School, no effort will be made to revive it.

The following Tables show the standing of each of the Schools in South York :—

PUBLIC SCHOOLS OF THE *First Class* (No. 1 A).

	10	

During the past year, *No. 17*, York; *No. 5*, Markham; *No. 4*, Union M. and Vaughan; *No. 8*, Etobicoke; and *No. 7*, Scarborough, rose from the *Second Class* to the *First*; *No. 20*, York; *No. 18*, Markham; and *Nos. 4* and *10*, Etobicoke, from the *Third Class* to the *Second*; and *No. 10*, York, rose from the *Third* to the *First*. *Six* Schools rose to the highest grade, and *four* Schools to the second.

On the other hand several Schools retrograded during the past year:—*No. 7*, Markham, from the *First Class* to the *Third*; *Nos. 3* and *15*, York, and *No. 2*, Scarborough, from the *First Class* to the *Second*; and *Nos. 16* and *19*, York, from the *Second Class* to the *Third*.

In the case of S. S. *No. 7*, Markham, and *No. 2*, Scarborough, the cause of the declension in the standing of the schools was unquestionably the employment of inexperienced teachers with *Third-class Certificates*, succeeding able and experienced men, holding *Provincial Certificates*.

In both instances no *ordinary* teacher, holding a *Third-class Certificate*, could by any possibility teach the more advanced pupils in those sections, and, as a natural consequence, the attendance fell off very much at both Schools, besides the declension in standing from the *First class* to the *Third* in the one, and to the *second* in the other. When the Trustees of some S. Sections, for the sake of saving the paltry sum of from \$50 to \$100 in the salary

of a teacher, employ a person not qualified to teach all the scholars in a S. Section all the branches of a Public School course, would not the ratepayers of such scholars have a good cause of action against such trustees? And further, would not such parents be justified in refusing to pay school rates on the ground of the trustees not employing a properly qualified teacher?

The above questions are proposed, not for the purpose of producing litigation, but for the strengthening of my efforts in endeavouring to prevent a course of action very detrimental to the success of our Public Schools.

There is one thing certain, that if this course is often repeated, a very strong argument against the continuance of S. Section Trustees, and in favour of a Township Board, will be undoubtedly furnished. The Inspector for South York has remonstrated, again and again, against such a course, and sometimes without avail, remonstrance being powerless when narrow-minded selfishness or indifference holds the sway; and he would respectfully recommend a regulation to be passed by the proper authority, forbidding the employment of a teacher holding a Third-class Certificate, by any Board of Public School Trustees, in any School where there is a fifth class.

School Accommodation.

York.—Two brick School-houses enlarged and improved, and one of them furnished with the most improved desks, &c.

Markham.—One brick School-house partially rebuilt during the year.

Scarborough.—No change in this township. One new School-house to be built during this year, when the school accommodation will be amply sufficient.

Etobicoke.—One new School-house erected during 1875, and another one is to be built during the coming season.

Taughan.—A new brick School-house was built. School accommodation is ample and excellent.

Yorkville.—The School-house is very substantial; no gimeraeks or superfluities,—just what a School-house ought to be. Another site in the northern part of the village is about to be secured, and a School-house to be built containing two junior departments, for the accommodation of the junior pupils residing in that part of the village.

Average Attendance.

The average daily attendance of the Township of York, (exclusive of the Village of Yorkville), for the first half of 1875, was 1,112; of Markham (exclusive of the Village of Markham), 951; Scarborough, 586; and of Etobicoke, 315.

The number of pupils between the ages of 7 and 12 years, who did not attend school for 4 months, as required by law, was, in York about 400; in Markham 320; in Scarborough 177; and in Etobicoke 135.

The Government grant for pupils, was, in York, \$1.16 $\frac{73}{100}$; in Markham \$1.06 $\frac{94}{100}$; in Scarborough \$1.16 $\frac{20}{100}$; and in Etobicoke \$1.35 $\frac{5}{100}$.

Assistant Teachers.

As intimated in my last report, several assistant teachers were employed during the whole year in sections, where, during the previous year, they had been only employed during a part of the year. In some other large Schools an assistant was employed during the winter months, with marked advantage in efficiency, where no assistant had ever been employed before. Trustees are beginning to find out from experience and observation, that it is of the utmost importance, when practicable, to place the junior sections under the charge of an assistant, so that the master may have ample time to attend to the more advanced, especially to those whose opportunities of education must of necessity, on account of their age, soon come to an end.

Change of Teachers.

Twenty-four of the S. Sections in S. York have commenced operations for 1876 with a new teacher, a much greater number of changes than usual in this division of the County—in some instances no doubt with advantage, in others with loss, it is to be feared, at least for a time.

Compliance with School Laws and Regulations.

Upon the whole the co-operation of Trustees in general to the carrying out of the School Law is quite cordial, and to them the meed of praise is justly due, and is hereby gladly acknowledged.

It was my intention to call your attention to some of the regulations, or rather to an explanation of a most important requirement, affecting trustees to a very serious extent, but, as this report is somewhat lengthy, I must defer it to a future opportunity.

COUNTY OF SIMCOE, NORTH.

James C. Morgan, Esq., M.A.—I believe that although so little absolutely has been done in the cause of education, there has perhaps been a more real improvement than at any previous time. An exception to this improvement has been in the matter of attendance; the law concerning compulsory education is a dead letter, nor can I persuade the Trustees to take any measures to have it brought into working order. Besides this general laxity, however, the past year has been marked by the presence of epidemics throughout North Simcoe, many Schools having been absolutely closed for some weeks, and a still greater number completely emptied. This has of course had a very bad influence on the Inspector of Schools,—I have however employed the time thus lost in directing the teacher, as to his or her work.

The improvements observable in the Schools are threefold:—

1. In buildings.
2. In teachers and teaching.
3. In a faithful observance of the requirements of the law.

1. Almost all buildings erected during the past year have been of a very good order. In the poorer Sections they have of course been log and frame, but even here they have been comparatively well finished. I have endeavoured to delay the erection of some buildings in order to obtain good ones when they were built, and I enclose plans of two lately erected, namely: in S. S. No. 3 Sunnidale, at Brentwood, and in S. S. 20 Nottawasaga, at the Batteaux, which would be a credit to any section. Fine brick buildings have also been erected in S. S. 1, Tiny, Penetanguishene, 1 Vespra, &c., and several more have been promised during this year: and during the past year only two makeshifts have been gone through with. In the matter of outbuildings also, very great improvements have been inaugurated, scarcely any Schools are without necessary outhouses, many have erected comfortable woodsheds, and not a few have put up fences. In all cases however, I have not urged the fencing of land where the site was not sufficient, and where the land was still rough. Wells are not generally needed throughout the country, only twenty-one Schools being without a well or water very near.

2. The character of teachers is improving; though much more slowly than could be wished. I believe it would be better were the examinations for third-class teachers much simpler, and the minimum requisite for a certificate raised to 75 or 80 per cent. Perhaps in no direction has the improvement been so manifest as in the employment of assistant teachers. I do not believe that properly qualified teachers can, at present, be employed in our Schools, but I have examined the elder scholars in the Schools and given to the one chosen by the Trustees, a temporary certificate which has met the needs of the Section for the time, and has also prepared the way for the employment of properly qualified teachers. The great trouble with teachers is, that they continually change about from School to School an evil that necessarily attends the present system, and which will exist until Township Boards be established.

3. (a) Scarcely any School is devoid of the maps requisite to teach the programme as far as Class III.; many are thoroughly furnished, having apparatus, object lessons &c., as well.

(b) Several more Schools have fallen in with the requirements of the programme and Limit Table. This is, however, one of the principal evils that your Inspectors have to contend against. Parents cry out about their children being kept back, and Trustees echo the cry, so that, in too many cases the unlucky teacher is compelled either to leave the School or yield to the popular clamour, and put into the 5th book a pupil who cannot write down 10,956, and whose mind is very uncertain as to whether an ocean is land or water. As a means of remedying this evil, I have found fault with the teacher somewhat sharply, and

have refrained from examining any of the higher subjects, such as history, &c., unless the class was doing the whole of the work required of it. Nay, even where this was the case, I have avoided examining, as I particularly wish to have the junior classes and the lower subjects, thoroughly taught, in order to form a substantial foundation on which a real success may be built up in years to come. For this reason I encourage the keeping back of the children as much as possible.

The evils are the same that have always stood in the way of our school system, and for which there is but one cure, *i. e.*, the establishment of Township Boards. I am happy to say that the Township of Morrison has already done so, an example which I hope to see followed soon by every Township in North Simcoe. I have laboured hard for three years past to persuade the County Council to take some action on the subject, but have never yet succeeded. Each year, however, I have won over some of its most violent opponents, whose opposition was caused by their not understanding the system, and its friends have become more numerous and more enthusiastic. I obtained, however, this year, a Committee to consider the question, and, at their invitation, addressed them on the subject with a most gratifying result. Not only did the Committee prepare a report, recommending most highly the system; but this report passed the County Council, after some discussion and explanation, by a unanimous vote. At the same time I received a request to embody my views on the question, in pamphlet form, which the Council will print for free distribution. We are thus fairly on the way to the establishment of Township Boards, a consummation devoutly to be wished." I also recommended to them a plan of paying by results, which met with their warm commendation. I believe this can be worked in Public Schools with only additional trouble to the Inspectors.

The plan is to pay the teacher according to the standing of the highest class which passes the Inspector's Examination, provided always that the lower classes pass *fair* examinations in *their* subjects. Thus, a School in which the highest class was II., according to programme, with a minimum of five pupils, would pay its teacher a salary of \$300 or \$350. With the highest class III., a salary of \$350 or \$400, with the highest class IV., a salary of \$400 or \$450, all gradations being made by the number of pupils in the highest class. A direct incentive to increased work would therefore be held out to all teachers, and worthless ones would very soon leave the township. I hope within two or three years to be able to report Township Boards in fully half my Townships.

Before closing, I must bear witness to a fact that struck me most pleasantly in travelling through the French Schools, in the vicinity of Penetanguishene. The cause I cannot pretend to explain—the result is there, that the attendance is nearly double (in proportion) what it is in other sections, and the trustees seem to take a far more than ordinary interest in the welfare of their Schools.

RESOLUTION, COMMITTEE ON EDUCATION.

Your Committee beg to report, that they have taken into consideration the Report of the County Inspector for the North Riding, and rejoice to find that the cause of Education is progressing most favourably under his able supervision, and recommend the publication in the minutes, of his comprehensive statistical Report, and would strongly urge this Council to request Mr. Morgan to embody his views in relation to the formation of Township School Boards in the form of a circular, to be addressed to each Reeve and Deputy-Reeve in the County, as your Committee are now fully convinced that the adoption of Township Boards would tend materially to promote education, to equalize the costs thereof, and to remove a great many sources of contention.

Your Committee would further recommend, that in view of the large extent of country necessary to travel over, and the growing necessity for more frequent examinations, the appointment of an additional Inspector, whose duty will be to supervise the Schools in that portion of the Districts of Muskoka and Parry Sound, being in this County.

Your Committee cannot close this Report without bearing testimony to the very efficient and satisfactory manner in which the Inspector of Schools for North Simcoe, has performed the varied duties devolving upon him.

All of which is respectfully submitted.

(Signed)

J. HAND,

Chairman.

COUNTY OF SIMCOE, SOUTH.

Rev. William McKee, B. A.—I wish to explain that I do not design to discuss any questions connected with Schools, but merely to state facts and conclusions; and these I shall group under certain distinct heads.

1.—*Number of Schools and of School Sections.*

In the several municipalities, the number of Public Schools is as follows, namely:—In West Gwillimbury, 15; Tecumseth, 15; Adjala, 10; Mono, 12; Innisfil, 15; Essa, 12; Tossorontio, 4; Mulmur, 11; Village of Bradford, 1; Village of Alliston, 1.

As thus specified, the total number of Schools, is 96. The number of additional departments of Schools, is 8, and the Schools, each of which has one such department, are Angus, Painswick, Victoria (Innisfil), Clarksville, Cookstown, and Alliston. The Bradford Public School has two additional Departments. The whole number of School Sections is 112—counting *separately* the different Sections or parts of which each Union School Section is composed.

2.—*Receipts and Expenditure of School Moneys.*

RECEIPTS.

1. The amount apportioned by the Legislative grant was \$4,483 $\frac{90}{100}$.
2. The amount from County Grant was \$4,439 $\frac{95}{100}$.
3. The amount received from Trustees School Assessment was \$39,156 $\frac{69}{100}$.
4. The amount received from Clergy Reserve Fund, and all other sources was \$2,054 $\frac{33}{100}$.
5. The total receipts for all School purposes for the year 1875, amounted to \$53,698 $\frac{28}{100}$, including a balance of \$3,564 $\frac{01}{100}$ from the preceding year.

EXPENDITURE.

1. The amount paid by trustees for salaries for teachers was \$33,776 $\frac{64}{100}$.
2. For rent and repairs of School-houses, fences or grounds, \$3,571 $\frac{10}{100}$.
3. For sites and building of School-houses, \$6,764 $\frac{84}{100}$.
4. For maps, prize books, collection fees, fuel and other expenses, \$4,900 $\frac{03}{100}$.
5. Total expenditure for all School purposes, \$49,012 $\frac{61}{100}$.
6. The balance of moneys not paid at the end of the year, when the returns were sent in was \$4,685 $\frac{67}{100}$.

3.—*School Population—Pupils attending School—Average Attendance.*

1. The number of resident children between the ages of five and sixteen years was 9,099.
2. The number of pupils been the ages of five and sixteen years, attending the schools, was 8,549. The number of pupils of other ages attending School was 695. The total number of pupils attending School was 9,244. The average attendance of pupils, 6,655.
3. The number of boys attending school was 4,870. The number of girls attending school was 4,374.
4. The ages of the pupils are: 34 under five years of age; 4,620 between five and ten; 4,049 between eleven and sixteen; 541 between seventeen and twenty-one.
5. The number of children between the ages of seven and twelve years reported as not attending any school, is 203. The attention of Trustees and teachers is directed to this fact in the hope that by their united exertions, such a humiliating item as this will soon cease to appear in the School Reports.

4.—*Teachers, their Number, Certificates, Salaries, &c.*

1. In the 96 schools in operation, the number of teachers employed was 104, of whom 69 are male teachers, and 35 are female teachers.

2. Religious persuasions of teachers are as follows:—Church of England, 29; Roman Catholic, 10; Presbyterian, 27; Methodist, 36; Quaker, 1; Baptist, 1.

3. *Teachers Certificates*.—Total number of teachers holding certificates of qualification was 98. 1st Class Provincial Certificates 1; 2nd Class Provincial Certificates 28; New County Board 3rd Class Certificates 69; Permits or Interim Certificates 6.

4. *Annual Salaries of Teachers*.—The highest salary paid to a male teacher in the Riding, viz.: in Ivy School Section, was \$600, the lowest \$200. The average salary of male teachers was \$385, of female teachers \$263, (being an average increase, compared with the previous year, of 6 per cent.).

5.—*School Houses, Titles, &c.*

1. Of the School-houses, five were of brick, 3 of stone, 79 frame, 9 log.

2. *Titles to School Sites*.—Freehold 90, rented 6.

3. The number of new School-houses built within the year was four, frame. The number of School Sections in which the School-houses were repaired or enlarged, or the School premises increased or improved, was eight.

6.—*School Accommodation and Equipment.*

It is true that with respect to the providing of these much has been accomplished during the last four years; yet I have to report that a good deal is still required to be done. In several of the wealthiest School Sections the accommodation is insufficient, the furniture and equipment poor and defective, and the condition of the school premises very discreditable. These are serious disadvantages, and it is greatly to be regretted that the trustees have so far done nothing towards their removal, and have continued to exhibit so much apathy and negligence as to the providing of what is really necessary to put their School-houses and School premises in a proper and efficient state.

“The law declares that it is the duty of Trustees to provide adequate accommodation for all the children of school age within their section,” and the special regulations prescribed under the authority of the statute, show what these accommodations should include. Trustees, therefore, should consider, and bear in mind, the special obligations which devolve upon them in connection with this important matter, and should, without delay, take the necessary step for having the requirements of the law fulfilled in every case, when its provision respecting school accommodation has not been already complied with.

7.—*The Evils of Irregular Attendance.*

Of all the obstacles to the advancement of the Schools, the greatest is irregular attendance. The evil consequences of it it would be difficult to exaggerate.

It is indeed a formidable enemy. Not only is it injurious to the progress and proficiency of the pupils—it is really fatal to education. A sound or successful education cannot possibly be acquired by pupils who are irregular in attending School. These considerations parents should bear in mind, and should likewise be earnest in contriving and using means for the purpose of preventing or curing the evils complained of. More particularly they should not allow any unimportant reason, much less any trivial excuse, to have the effect of keeping their children away from the School. And teachers should consider, or remember, that they themselves also can do a great deal towards the remedying the evils of irregular attendance. And one of the very best means which can be employed by them for this purpose consists in *making the Schools popular*. The remark of Dr. Frazer, Bishop of Manchester (a very eminent authority on educational questions), is worthy of remembrance—namely, “That he had never known empty Schools or careless scholars where the teachers were competent or efficient.” It is an unquestionable fact that both parents and children naturally become indifferent where the discipline is inferior, and the instruction is of a worthless character. On the other hand, a good, cheerful, popular school exerts a kind of attractive influence on the children; and it is certain that the regularity of the attendance greatly depends on the character of the teacher and of the School.

8. *Standing of the Schools—Proficiency of the Pupils.*

The results of the last inspection proved that the Schools are in good working order, and that Public School education is in a healthy and moderately prosperous condition.

Respectable progress has been made by the pupils during the year. Higher and more intelligent results were exhibited more generally than at any former period.

A very marked improvement has taken place in the methods of instruction, as well as in respect to the classification of pupils, and the whole business of School organization. I found proofs of good discipline in all the Schools without exception. A growing, and very creditable amount of proficiency was shown in regard to all the subjects of study taken up by the several classes. The advancement was very perceptible in reading, arithmetic, and grammar; but especially in the reading. On the whole I feel justified in stating that the Schools are doing their work with a fair degree of efficiency and success, and that there are many hopeful and encouraging features in the aspect of educational affairs as presented in the course of my inspection for the current year.

COUNTY OF HALTON.

Robert Little, Esq.—1. The inspectorate of Halton comprises four townships—Esquesing, Nassagaweya, Trafalgar, and Nelson—and two towns—Milton and Oakville.

The value of property assessed for Public School purposes, during 1875, amounted to \$6,105,815, or more by \$200,441 than in 1874. The assessments were as follows:—Nelson (including the incorporated Village of Burlington), \$1,486,881; Trafalgar, \$1,500,664; Esquesing (including the incorporated Villages of Acton and Georgetwn), \$1,806,696; Nassagaweya, \$620,594; Oakville, 328,660; Milton, \$362,320.

The following Table shows that the value of property assessed for school purposes has steadily increased during the past five years:—

1871.	1872.	1873.	1874.	1875.
\$4,859,508.	\$5,070,530.	\$5,954,902.	\$5,905,374.	\$6,105,815.

2. The total receipts from all sources amounted to \$50,439 09, and the total expenditure to \$46,190 84½.

The disbursements were as follows:—(a) Teachers' salaries, \$27,805 08 (increase, \$1,331 53; (b) Rent and repairs of School-houses, fences or grounds, \$2,219 12½; (c) Invested in the purchase of School sites, and building School-houses, \$10,067 14; (d) Libraries, maps, apparatus, and prizes, \$414 99; (e) Collectors' fees, fuel, and incidental expenses, \$5,684 51.

The expenditure for School-houses and sites, and teachers' salaries, since 1871, may be thus tabled:—

	1871.	1872.	1873.	1874.	1875.
School-houses and sites. } \$4,259 26½	\$13,154 21	\$18,563 99½	\$13,749 24	\$10,067 14	
Teachers' salaries. } 18,256 31	23,826 36	24,641 51	26,473 55	27,805 08	

The total amount spent for School-houses and sites during the last five years (\$59,794) is about 10½ per cent. of the average value of the property assessed for School purpose during the same period.

The sum paid for teachers' salaries in 1875, is fully 52 per cent. more than in 1871. This increase is due to two causes,—better salaries are paid, and additional teachers are employed. The highest salary paid to a male teacher was \$600, viz., in Georgetown. In Acton the salary is \$550, with a residence. The lowest salary paid to a male teacher, and the only instance, was \$200. The average salary of male teachers by townships (including the incorporated villages), was \$416.92; and of female teachers, \$271.08.

As a rule, the teachers' salaries are promptly paid at the close of the year; the small sum of \$190.38, due by four sections, being the total amount of indebtedness under this head last year. The chief improvement now required, is to have the salaries promptly paid, not at the close of the year, but in quarterly instalments.

3. The estimated value of School property in the County is \$116,585 (increase of \$5,895), or more than one fifty-second part of the value of the property assessed for Public School purposes, and averaging \$2,045 for each civic and rural section.

It is to be regretted that Trustees do not more accurately estimate the value of their property. In examining the Annual Reports, I observed that a School-house and site valued a year ago at \$6,000, is now valued at \$5,500, although during the year the site was enclosed with a good substantial fence, and excellent outbuildings were erected. I have suggested to Trustees to insert in their minute-books an inventory of their School property, showing value of School-house, site, furniture, library, maps, etc., and to add from year to year the increased value of their property resulting from addition to School-house, enlargement of site, etc. If this were done, such discrepancies as the one noted could not occur.

The total number of School Divisions and Sections in the County (a union section being counted as one), is 57. There are five School Divisions, and fifty-two Rural Sections. There are fifty-nine School sites, there being two in the Burlington Division, and two in S. S. No. 5 Esquesing. All the School sites are adequate, that is at least half-an-acre in extent. The largest School site in the County, that is 11 S. S. Esquesing, is an acre and three-quarters in extent. There are seventeen acre sites, thirty-one half-acre sites, and two sites between half-an-acre and an acre in extent. Very little has yet been done towards ornamenting the school grounds with shade trees.

Fifty-six of the fifty-nine sites are enclosed, two are partly enclosed, and one is unenclosed. In 1871, only 20 sites were enclosed. On fifty of the sites there are wells, on four there are springs, and on five there is neither a well nor a spring. There is only one School in the county for which the Trustees have failed to provide outside conveniences for the pupils. In 1871, thirty-seven Schools were in want of suitable outdoor accommodation.

5. The whole number of Public School-houses is 59. Of these, 23 are brick, 12 stone, 6 concrete, and 18 frame. Three new School-houses were built during the year, a brick School-house for two departments in No. 2 Trafalgar, and two frame houses, one in the western part of No. 5 Esquesing, and one in No. 17 Trafalgar. In addition to these, four School-houses were enlarged for second departments, viz.: Nos. 1 and 2 in Nassagaweya, No. 9 Nelson, and No. 9 Esquesing. Twenty-three new School-houses have been built since 1871, viz.: 2 in Nassagaweya, 6 in Nelson, 7 in Trafalgar, and 8 in Esquesing; and eight have been enlarged, viz.: in Acton, Milton, and Oakville, in Nos. 7 and 9 Esquesing, in Nos. 1 and 2 Nassagaweya, and in No. 9 Nelson. In three Schools, there are four departments in each; in two, three in each; and in seventeen sections accommodation has been provided for two teachers in each. Including all departments, the number of Schools in operation during the year was 83, being an increase of five over the previous year.

6. The total number of pupils enrolled last year amounted to 6,163. Of these 5,722 were between the ages of 5 and 16 years. The number of children between the ages of 7 and 12 years not attending any school, 126 (decrease, 108). The number of pupils between these ages that did not attend four months, as required by law, 810. As all the Boards of Trustees have certified that they would comply with the compulsory clauses of the School Act, a very large diminution in these numbers may be expected in next year's report. The attendance of the 6,153 enrolled pupils was as follows:—less than 20 days, 9 per cent.; between 20 and 50 days, 21 per cent.; between 51 and 100 days, 27 per cent.; between 101 and 150 days, 23 per cent.; between 151 and 200 days, 18 per cent.; between 200 days and the whole year, 2 per cent. The daily average attendance for the first half-year was 2,757.86; for the second half-year, 2,476.21; for the year, 2,617.04, or about 41 per cent. of the number enrolled—a decrease of $2\frac{1}{2}$ per cent. The daily average for the first half-year gives 48.38 pupils for each of the 57 civic and rural sections, and for the second half-year, 43.44 pupils. The daily average attendance for the year is, in Oakville, 65 per cent. of the number enrolled; in Milton, 49 per cent.; in Nelson, including Burlington, 45 per cent.; in Esquesing, including Acton and Georgetown, 40 per cent.; in Trafalgar, 38 per cent.; and in Nassagaweya, 37 per cent.

From the above statements it will be seen that the attendance is very irregular. The complaint on this subject has been so frequently made, that it is regarded with the indifference to which we listen to an oft-told tale. And yet irregular attendance is impairing the efficiency of our Schools in the discipline, teaching and training of our pupils more than any other cause. This evil has spread to such an extent, that in many Schools I have found

whole classes absent at my half-yearly visits. I shall give two examples. In September, I visited a school in which 78 pupils were enrolled. Twenty-four were absent out of forty enrolled in the first class, twenty-five were absent out of twenty-six enrolled in the second class, and the whole of the third class, twelve in number, was absent. In another School visited in October, I found the names of 79 pupils on the register. Out of thirty-five enrolled in the first class, twenty-four were absent; out of eighteen enrolled in the second class, ten were absent; and the third and fourth classes were unrepresented, although twelve pupils were enrolled in the former, and fourteen in the latter. In order that this great hindrance to the prosperity of our Schools might be removed to some extent, I brought the regulation in regard to "punctual attendance" under the notice of the trustees in connection with my reports to them on the condition of their Schools.

7. The number of Public School Libraries in the County is 29; number of volumes, 1,197; number of volumes taken out during the year, 3,645. The estimated value of Libraries, \$3,138. The largest and most valuable Public School Library is at Acton. It contains 1,100 volumes, valued at \$1,000. The Trustees and people have adopted the true method of keeping alive the interest in the Library, viz., a yearly addition of books commensurate with the wants of the readers. The second really good School Library is at Oakville. There are also two very fair Libraries in Nos. 1 and 5 Esquesing. Burlington made a promising beginning two or three years ago, but has done nothing since to maintain and foster the interest in its Library. Most of the other Libraries are only such in name. In regard to the establishment of a Section Library an erroneous idea seems to be prevalent. It seems to be considered that after two or three dozen books have been purchased nothing further requires to be done. This is a grave mistake. An addition, large or small, according to the number of readers in the Section, should be made every year. In this way, in the course of a few years, a valuable Library can be secured, which will prove a source of perennial pleasure and profit, not only to the pupils, but to the ratepayers of the Section. I hope, now that the "building season" is nearly over, Trustees will display the same zeal and liberality in providing and enlarging Libraries that they have shown in providing accommodation, furniture, and maps.

COUNTY OF WENTWORTH.

J. H. Smith, Esq.—During the past year, satisfactory progress has been made in our Public Schools, as you will see by reference to the "Inspector's Detailed Reports" of each School. The Statistical Reports show that considerable advancement has been made in regard to teachers' salaries, adequate accommodation, and attendance of pupils. There are however, a few isolated instances in which the Schools have not advanced as they should have done, owing in no small degree to the want of *real* interest on the part of trustees in the prosperity of the School.

Sections.—The County of Wentworth is divided into 72 Public School Sections, and one for the R. C. Separate School. Of these, 13 are Union Sections, *i. e.*, formed from parts of two or more Townships. In these Sections 88 teachers are employed. In Sections 4, 5, and 7, Beverly; 1 and 5, East Flamboro'; 4, 7, 9, and 10 West Flamboro'; and in 3 Saltfleet, two teachers are employed; in No. 5, Ancaster, three; and No. 3, East Flamboro', four; in the remaining Sections one teacher is employed, with the exception of two Schools in which paid monitors are employed during the winter season.

Accommodation.—During the past five years, the total amount expended in providing adequate school accommodation, as required by the School Act of 1871, was \$63,950, or, in round numbers, \$64,000. Twenty-four new School-houses have been built, and twenty-seven improved, *i. e.*, either re-seated, sites enlarged and fenced, additional rooms built, or other improvements made that involved an outlay of not less than fifty dollars. Of the new School-houses built, 18 were brick, 5 stone, and one frame; and of those that were improved, 5 had additional rooms built to them. Of the 73 School-houses now in the County, 34 are brick, 9 stone, and 20 frame. Of the School-sites, 24 contain an acre or more, 37 from half an acre to an acre, and 12 less than half an acre. In a number of Sections, I am happy to report that the School-grounds have been planted with shade trees; but I regret that in a majority of cases this has not yet been done. I would therefore earnestly direct the attention of trustees and teachers to the necessity of ornamenting the School-grounds with shade trees, shrubbery,

and neatly laid out flower plots. These in time will add materially to the comfort of pupils, and render the Schools more attractive, and become objects of interest to the entire Section.

Receipts.—The total amount received from all sources for Public School purposes for 1875 was, \$57,528.85. Of this, the sum of \$8,227.47 was received from the Legislative and Municipal Grants, \$35,445.99 from trustees' rate on taxable property, and \$13,855.39 from other sources.

Expenditure.—The amount paid for teachers' salaries was \$30,956.08; for building School-houses and purchasing sites \$14,592.94—this includes payments made on School-houses that were built previous to 1875, but payments of which extended over a term of years;—for incidental expenses, as collecting taxes, fuel, &c., &c., \$7,939.12; making a total expenditure for all School purposes of \$53,492.14, and leaving a balance of \$4,036.71 in the hands of the various Boards of Trustees. The average rate of taxation, including building new School-houses, purchasing sites, &c., was $3\frac{3}{8}$ mills on the dollar.

Teachers, their Qualifications and Salaries.—Of the 88 teachers employed, 49 are male, and 39 female. Of these, 72 have charge of a Public School, 1 of a R. C. Separate School, and 15 are assistants. The average salary of male teachers having charge of a Public School is \$426.00, of females \$283.00, of assistants \$192.00. There were 5 teachers holding First-class Provincial Certificates, 26 Second-class Provincial, 17 First-class County Board, under the Old Act, 38 Third-class County Board, under the New Act, and 2 Interim Certificates. The average increase of the salary of male teachers since 1871 was \$60, or nearly 27 per cent. of what it then was; of females, \$34, or nearly 15 per cent. The highest salary paid to a male teacher was \$525, the lowest \$300; to females having charge of a School, \$400, the lowest, \$200; to assistants, \$225, the lowest, \$120.

The following Table shows the qualifications and average salaries of the Head Teachers and Assistants in each of the Townships in this County:—

1875.	HEAD TEACHERS—MALE								HEAD TEACHERS—FEMALE.								ASSISTANTS—FEMALE.				
	First Class Provincial.		Second Class Provincial.		First Class (Old) County.		Third Class (New) County.		First Class Provincial.		Second Class Provincial.		First Class (Old) County.		Third Class (New) County.		Second Class Provincial.		Third Class (New) County.

Saltfleet			2	\$ 455			2	\$ 338					1	\$ 400							
Total for County...	2	\$ 475	22	\$ 440	11	\$ 455	14	\$ 374	3	\$ 375	3	\$ 330	6	\$ 342	11	\$ 283	1	\$ 225	14	\$ 192	

Change of Teachers.—In 1871 and 1872, 82 teachers were employed, 83 in 1873, and 88 in 1874 and 1875. The number of changes made was as follows:—7 during 1871; 31 at the beginning of 1872, with 8 during the year; 32 at the beginning of 1873, with 7 during the year; 28 at the beginning of 1874, with 4 during the year; 37 at the beginning of 1875, with 6 during the year; and 42 at the beginning of 1876; making a total of 202 changes during five years, or an average of 40 changes each year. In 9 schools the same teachers have taught from 1871 to 1875 inclusive, and of these, 8 are among our best Schools; whereas on the other hand, the Schools in which the greatest number of changes have taken place are among those that have made the least satisfactory progress.

Attendance of Pupils.—The total number of pupils registered during the year was 7,447; of these 7,023 were between the ages of 5 and 16, and 424 of other ages. The number attending less than 50 days was 2,126, or over 28 per cent. of the registered number; between 50 and 150 days, 3,628, or nearly 49 per cent.; between 150 days and the whole year, 1,693, or 23 per cent. nearly. The average attendance for the first half year was 3,373, or over 45 per cent.; for the second half year, 2,982, or a little over 40 per cent., giving an average of

early 43 per cent. for the whole year. The average time that the Schools were kept open was 11 months and 28 days, including Sundays, legal holidays and vacations.

The following Table gives a comparative statement of the receipts, expenditure, teachers, their qualifications and salaries, the number of registered pupils, and their average attendance or the past five years. From this it will be seen that the attendance is nearly four per cent. better than it was in 1871. The average attendance was 39 per cent. of the registered pupils or 1871, 38 per cent. for 1872, 38 per cent. for 1873, 41 per cent. for 1874, and nearly 43 per cent. for 1875.

COMPARATIVE STATEMENT.

	Total Receipts.		Total Expenditure.		1st Provincial.	2nd Provincial.	1st County (Old).	3rd County (New).	Permits.	Male Teachers.	Average Salary.	Female Teachers.	Average Salary.	Registered Pupils.	Average Attendance.

CLASS RECORDS.

Through the liberality of the County Council, a satisfactory Class Record has been provided for each Section, the object of which is to show the classification of the School, the length of time that the pupils remain in the various classes, and the promotions made. It also shows the dates of the Inspector's visits, the pupils present in each class, and the aggregate attendance of pupils for each half year.

COUNTY OF BRANT.

M. J. Kelly, Esq., M. D.—It affords me pleasure to state that the Schools of the County have, on the whole, made satisfactory progress during the year. While there has been improvement in every Township, the evidences of it have been greatest in the Township of Brantford, where school accommodation and libraries have been largely increased in the interval. Both Trustees and patrons have generally manifested a laudable interest in the welfare of the Schools, and where this has not been the case, the cause is always traceable to the employment of inefficient and inexperienced teachers. A school system may be nearly perfect in its general outlines; the course of study prescribed may be all that is desirable; the inspection may be careful and conscientious, and the pupils subjected to rigid examinations half yearly, and yet unless the details of the ordinary School work be intelligently wrought out under the daily supervision of men and women, apt to teach, of the requisite firmness combined with gentleness of character, and possessed of the adequate knowledge, success becomes impossible. Hence, the importance of Trustees being extremely careful in the selection of those to whom they entrust the mental and moral discipline of the young. This fact was well illustrated during the year, in the case of a teacher who pleased the Trustees and parents, and was liked by the children, but who, at the mid-summer examination for certificate, evinced an almost absolute ignorance of nearly all the branches in the Public School programme. Sham has its place even in our school rooms. The Teacher's Institute established about four years ago is still in successful operation, and is generally well attended.

Schools and School Sections.—The number of School Sections in this County (considering each separate department as a Section) is 81. The number of Schools, 68. All the Schools were open during the year 1875, except number 23, Burford, which was closed the last six months while a new School-house was being erected.

School Finances.—The assessed value of the property of the County is reported at

\$7,988,377, distributed as follows:—Oakland, \$349,322; Onondaga, \$489,533; Burford, \$1,952,551; Brantford, \$2,932,075; South Dumfries, \$2,264,896. The amount of money apportioned to the Public Schools from the Government Grant was \$2,789, from Municipal Grant, \$2,800. The balance in the hands of the Trustees at the end of the year was \$4,435.74½. The amount reported as received from Municipal Grant, \$2,778.93; from Government Grant, \$2,744.69; from Trustees School Tax on property, \$20,914.13; from Clergy Reserve Fund and other sources, \$15,488.89; Total Receipts \$45,982.07½. The expenditure was as follows:—Salaries, \$22,791.12, being \$1,850.53 more than during the preceding year; amount paid for rent and repairs, \$2,240.89½; excess \$180.55½ over amount paid the preceding year. For buildings and sites, \$11,055.43, excess \$3,827.89. Paid for libraries, maps and apparatus, \$580.19, excess \$109.22. For fuel &c. \$4,888,69½. Total expenditure, \$41,546.33, as against \$36,374.14 for 1874.

In accordance with the popular vote of the ratepayers, the Municipal Council of Brantford Township passed a by-law appropriating the interest of the surplus allotted to that Township to the support of the Public Schools. The amount of the surplus was \$67,290.50, and the interest on this was \$5,660.50. The last sum was divided in October among the Schools on the basis of the teachers' salaries, and was paid out before the end of December. The result was, that in some School Sections in Brantford Township, no tax was levied for support of Schools last year. In Onondaga a portion of the surplus allotted to that Township has been devoted to the erection of a Township Hall; in South Dumfries a portion to the construction of roads and bridges, but in the Townships of Oakland and Burford, it has been resolved to invest the surplus for the benefit of Schools. During the recent Session of the Provincial Parliament, the Act affecting the disposal of the surplus was so amended as to permit Municipal Councils to order the division of the interest on the basis of their own choice, which will probably be the same as that adopted in the apportionment of the Legislative and Municipal Grants. As an encouragement to higher education, the County Council, about two years ago, established a Scholarship in connection with the University of Toronto, open for competition among pupils of the High and Public Schools of the County, and tenable for one year. The Scholarship (\$100), has, since its foundation, been taken twice, and both times, by farmers' sons—on the first occasion, in September, 1874, by James Hamilton of Onandaga, a pupil of the Brantford High School; and on the second, in September of last year, by Addison Cole of Brantford Township, a pupil of the same School.

Teachers and Teachers' Certificates.—The number of Teachers employed in the Rural Schools of the County during 1875 was seventy-four. Of these, five held First-class Provincial Certificates, eighteen Second-class Provincial Certificates, ten Old County Board Certificates of the First class, and forty one New County Board Third-class Certificates. Nineteen of the Teachers had attended a Normal School. At the examination for certificates, in July last, 77 candidates presented themselves—49 for Third-class Certificates, 27 for Second-class Certificates, and 1 for a First-class Certificate. Of the whole number, 22 obtained Third-class Certificates, and 6 Second-class, Grade "B." The First-class candidate retired after one day's trial.

Teachers' Salaries.—There has been a considerable increase in the salaries of Teachers, both in town and country, since 1874. The annexed Table exhibits the highest, and the average salaries in the several townships, and in the whole county, for the year:

Salaries as follows.	Oakland.	Onondaga.	South Dumfries.	Burford.	Brantford.
Highest Salary, Male, 1874.....	\$450 00	\$400 00	\$500 00	\$466 00	\$500 00
" " Female ".....	282 00	350 00	250 00	350 00	300 00
Average " Male ".....	378 00	384 66	424 50	391 18	438 12
" " Female ".....	282 00	278 00	213 75	248 57	260 16
Highest " Male, 1875.....	450 00	475 00	550 00	466 00	600 00
" " Female ".....	350 00	400 00	300 00	300 00	400 00
Average " Male ".....	450 00	492 50	427 70	408 10	461 00
" " Female ".....	258 00	337 50	205 00	258 00	259 00

Average salaries for the whole county (male) \$340.06; (female) \$263.50. During the present year three Teachers (gentlemen), in the Township of Brantford, are in receipt of \$600 per annum each, viz.:—At Mount Pleasant, Cainsville, and Langford.

School Population, Classification, and Studies.—The whole number of pupils enrolled during the year was 5,160, as against 5,038 for 1874. Of these, 2,811 were boys; 2,349 girls; 8 were under five years of age; 2,468 between five and ten years; 2,300 between eleven and sixteen years; and 384 between 7 and 21 years. 518 attended school less than 20 days in the year; 1,042 less than 50 days; 1,329 less than 100 days; 1,190 less than 150 days; 865 less than 200 days; and 216 the whole year. 104 children between seven and twelve years did not attend any school during the year. No legal steps have been taken, so far as I know, to enforce attendance. The pupils were classified as follows:—1st Class, 2,239; 2nd and 3rd Classes, 541; 4th and 5th Classes, 1,275; and in the 6th Class, 105.

STUDIES.	No. in Arithmetic.	No. in Geography.	Number in Grammar.	No. in Composition.	No. in Botany and Chemistry.	Number in Modern History.	Number in Ancient History.	Number in Human Physiology.	Number in English Literature.	Number in Natural Philosophy.	No. in Algebra.	No. in Geometry.	No. in Mensuration.
1874.....	3972	5038	3014	1892	162	1949	122	358	72	72	251	52	228
1875.....	4388	5160	2934	2197	272	2435	106	500	71	41	306	121	236
Excess.....	416	122	305	110	486	142	55	69	8
Deficit.....	80	6	1	31

From the above it will be seen that while there has been a slight falling off in the number studying four, there has been a gratifying increase in the number studying nine out of the thirteen most important subjects in the Public School programme.

School Property, &c.—The following Table may serve to show what improvement has been effected during the year in the matter of School property:

MUNICIPALITIES.	HOUSES.		MATERIAL.				SITES.			SCHOOL LIBRARIES.			ESTIMATED VALUE OF SCHOOL PROPERTY.								
	Adequate.	Inadequate.	Built 1875.	Stone.	Brick.	Concrete.	Log.	Adequate.	Inadequate.	Freehold.	Leased.	Inclosed.	No. of Libraries.	No. of Vols.	No. of Maps.	Of Libraries.	Of Maps.	Of School desks.	Of Houses, &c.	Total.	
Oakland.....	3	1	2	3	33	33	10	101	270	5020	5401	
Onondaga.....	12	3	576	53	340	150	355	4975	5820	
South Dumfries.....	10	1	3	10	257	146	149	415	1762	26393	18719

Burford.....	18	4	2	3	18	1	667	195	436	503	2219	18810	21968	
Total.....	48	13	1	4	26	29	3	1	49	12	58	3	57	21	2700	634	81778	2264	7014	74573	885629

In School Section No. 7, South Dumfries, a new brick School-house (very much needed) has been erected at a cost, building and site together, of more than \$2,300. There is one class-room with seats for 72 pupils, a small private room for the teacher and a cupola and bell. The site is an excellent one, enclosed by a good picket fence, but an unaccountable mistake has been made by placing the house in a corner instead of in the middle of the lot. In Brantford Township, in School Section No. 12, the Trustees have built one of the most convenient, elegant and commodious structures for school purposes

in the whole County. The house is of brick, with stone basement floored with plank. The pupils enter the basement, off which are two rooms for caps, cloaks, &c., the remaining space serving for a waiting-room. The school is reached by two stairways, one for boys, the other for the girls, which lead into lobbies in the first instance, from which doors open into the class-room. The furniture here is of the very best description. There are seats and desks for 72 pupils. The ceiling is lofty, there is abundant light, and ventilation has been carefully attended to, excellent flues for the purpose having been provided. The teacher has a private room which serves also for a library. This is carpeted and suitably furnished. An excellent assortment of maps and charts of Physiology, Zoology, &c., has been provided by the Trustees; also a library of 224 volumes, a globe, a clock, and a large bell in the cupola. A number of young maples have been recently planted in the school plot, and the Trustees have purchased evergreen trees for a similar purpose. The cost of the building, exclusive of the site, was \$2,258. The Trustees and people of this Section deserve great credit for the enterprise and taste they have exhibited. Two frame School houses have been erected in the Township of Burford during the year, one in School Section No. 20, the other in No. 23. Several new School-houses will be built in 1876—in Onondaga Village, a brick building with two class rooms, estimated cost over \$3,000; in Nos. 8 and 16, Brantford, two brick structures similar in style to that at Tranquility, and both in course of construction; and in No. 2, South Dumfries, a brick School-house (on the Government road), at the contract price of \$2,025. If School Section No. 27, in the last Township had a new School-house, all the buildings in South Dumfries would then be adequate. In the matter of school accommodation I had very little trouble since I commenced my duties as Inspector. Happily the Trustees and people of this county are generally as reasonable as they are intelligent and enterprising, so that from the first day of my official connection with them, I have never had sufficient grounds for serious complaint; and in all my efforts, I am glad to say, I have invariably had the cordial co-operation of the members of the County Council.

School Libraries, Museum, &c.—The establishment of School Libraries has always engaged my earnest attention, as I consider them most important, I might indeed, say, indispensable adjuncts of our system of Elementary Education. If, as Lord Bacon declares, "Reading makes a full man," the necessity of books to read becomes apparent. Among young teachers the great lack is general culture. To gain the requisite knowledge to enable them to pass the examination for certificates, occupies some years of their time, so that, after the legal qualification has been obtained, their information needs to be supplemented before they are properly equipped to discharge efficiently and well their important and responsible duties. The best agencies to supply this want are School Libraries, which not only aid the teacher and enlarge the views of the pupils, but diffuse intelligence among the people generally. In Onondaga the Old Township Library was divided, some years ago, among the Public Schools, since which time no additions had been made to the books until the Trustees of No. 6 supplemented their library in the early part of 1875. The following schools in Brantford Township now possess libraries:—Nos. 5, 7, 8, 9, 10, 12, 13, 16, 17, and 20; in South Dumfries, Nos. 6 and 10 have, since the end of 1875, been furnished with small libraries. In the matter of School Museums, a little, but not too much, has been done. Considerable attention has been paid, during the year, to tree planting, and the ornamentation of school grounds.

Miscellaneous.—Only two Private Schools have been reported in the county, one in Onondaga Village, and one in Burford, with a total of 61 enrolled pupils. Number of Sunday Schools, 55; number of Sunday School scholars, 2,924; number of teachers, 349; number of Sunday School libraries, 40; number of vols. therein, 6,010. In 45 of the Schools only is the *Journal of Education* received regularly.

TOWN OF BRANTFORD.

The Public Schools of the Town have made satisfactory progress during the year. The discipline and order have been, as a rule, excellent.

Financial Exhibit.—Amount of money received from all sources during the year, \$13,214.99. Total amount paid out, \$12,916.08. Balance on hand, \$298.91. Received from Municipal Grant, \$10,500; from Government Grant, \$1,038; from Clergy Reserve

und, Non-resident Fees, &c., 1,027.45. Amount paid in salaries, \$7,025.13; for building, &c., \$2,229.85; for library, maps, &c., \$100.25; for fuel, &c., \$3,262.46. The assessed value of the property in this town is set down at \$3,000,130.

Salaries.—The highest salary paid male teacher, \$1,000; lowest, \$550; average, \$16.66. Highest salary paid female teacher, \$450; average, \$245.60. The lowest salary now paid to any teacher in the Public Schools of the Town is \$200 per annum.

Certificates.—Two of the teachers hold First-class Provincial Certificates—eight second-class Certificates—and fourteen Third-class New County Board Certificates.

Number of Children of School Age—(exclusive of those belonging to Separate Schools) resident in the Municipality, 2,420—Number of these enrolled in Public Schools, 1,925—showing that a large number of children of school age in Brantford must be either receiving instruction in private or remote Schools, or suffered to run idly about the streets. Number of other ages enrolled 30, making in all 1,955. Boys, 986; Girls, 969—16 were non-resident. The attendance was generally regular. For the first half year the aggregate attendance was 122,980; average, do. 1,048. For second half year, 105,274; and average 1,052.

Classification &c.—Number of pupils in the first-class, 1,017; second-class, 305; in third-class, 309; in fourth-class, 151; in fifth-class, 130; in sixth-class, 43. In addition to the more essential subjects of study in the Public School programme, 324 pupils were engaged in learning Chemistry and Botany; 311, Canadian History; 311, English History; 13, General History; 181, Natural History; 130, Human Philosophy; 45, English Literature; 181, Christian Morals; 161, Natural Philosophy; 179, Algebra; 64, Geometry; 179, Mensuration; 5, Book-keeping; 335, Drill or Gymnastics.

School Accommodation.—The wing added to the North Ward School-house has furnished all the necessary accommodation for the children in that Town. A somewhat similar addition is to be made to the East Ward School-house during the ensuing summer. It will probably be found necessary soon to complete the interior of the east wing of the Central School. Considerable attention has been paid to fencing and grounds during the year, the appearance of those of the Central School being particularly attractive. Besides the Public Schools, and a few Private Schools, Brantford can now boast two Institutions for the higher education of youth, which are I believe, unexcelled in efficiency of management and thoroughness of teaching by any similar Institutions in Ontario. These are, the Brantford Collegiate Institute, under the able supervision of its Rector, James Mills, Esq., M.A., and the Brantford Young Ladies' College, under the experienced Principalship of the Rev. A. F. Kemp, LL.D. By these excellent Institutions the fame of Brantford as an educational centre, and with the best facilities for instruction, has been much extended throughout the Dominion during the last two years. The number of pupils attending the Collegiate Institute varies from 160 to 200, of whom more than 50 are from a distance. The Ladies College has an attendance of about 100 young ladies, 58 of whom were (last term) boarders. The rest are day scholars. The income is in the vicinity of \$20,000 per annum, and the amount paid in salaries, \$4,550.

Libraries.—The Town is fairly supplied with libraries. In the Mechanics' Institute Library there are 2,376 volumes of very choice books. The number of volumes taken out during the year by members is reported by the Librarian at 8,654.

Paris has a similar library, with 2,000 volumes, and in addition to the library, a convenient and excellent reading room which is well patronized. Both these Institutes are inspected by me half yearly, and an annual report, detailing the result, is sent to the Government.

The library of the Public Schools of Brantford contains 670 volumes, and is open to the pupils every Friday afternoon.

The number of Sunday School Libraries in the town is nineteen, with 6,000 volumes in all. I think I may assure your Honourable Council, that both in Town and County, the education of the young in the County of Brant is receiving that careful attention which such an important interest demands. I cannot conclude this report without returning my sincere thanks to those gentlemen who have volunteered their services on many occasions, in aid of the establishment of libraries in the rural Schools of this County.

COUNTY OF LINCOLN.

J. B. Somerset, Esq.—The increase in the expenditure for school purposes each year since 1871, to which attention was directed in my last Report, still continues, and its effects begin to be apparent in increased interest shown by the public generally, in the Schools, the efficiency of the teachers, and other kindred matters. The increase for teachers' salaries alone, from \$16,625.55 in 1871, to \$24,384.43 in 1875, has had the effect of arresting, in a great measure, the exodus of our best teachers to other better paying localities; while the rates paid at present in some of our large Schools, have attracted from a distance, teachers of a class formerly impossible to retain.

Teachers.—There were, last year, but 7 teachers in the County who had ever attended the Normal School, and 17 holding Provincial Certificates, leaving 49 third-class teachers; but, of these latter, a considerable number hold Certificates for the second period of three years, and have consequently the benefit of extended experience, though unable to pass the examination for a Provincial Certificate.

It is to be regretted that changes of teachers yet continue to be frequent in many Schools, the Trustees being difficult to convince that there is no true economy in a transaction that effects a change of school management for the sake of a few dollars per month.

The fact that five Schools in the County changed their teachers three times last year, and eleven Schools twice, is sufficient evidence that the evil exists to a serious extent. In my detailed Reports on the state of the classes in such Schools, there is uniformly a glaring lack of progress made apparent that should convince the strongest advocate of this false system of economy. In order that Trustees might have an opportunity of becoming more fully acquainted with the real state of their Schools and the causes that stimulate or retard progress, I distributed among them, after my last visit in 1875, 300 copies of a Report, a sample of which is herewith enclosed, in which are stated the attendance of pupils, the teacher's qualification and length of service, and the percentage of correct answers given by the pupils in each of the subjects of reading, writing, spelling, geography, grammar and arithmetic.

Pupils.—The Tables of the attendance of pupils continue to present, in a very strong light, one of the most unsatisfactory features of our educational system.

It may, at first glance, be satisfactory to observe that the number of children who give no attendance whatever at school, is comparatively insignificant; but a further examination into various periods of attendance given, will convince the close observer of the utter failure of a considerable proportion of our school population to profit by the advantages offered by free Schools.

In this county, last year, 627 pupils attended school less than 20 days, and 1765 less than 50 days. The number of pupils who attended over 100 in a school year of 220 days, was 2,296, or less than one-half of the number enrolled. The average attendance of pupils was 2,198 or about 40 per cent. of the whole number, and in only one township (Clinton), did it reach 49 per cent., while in Grantham it was as low as 32 per cent.

School Premises.—The state of the School-houses and playgrounds throughout the county is generally satisfactory, all being now equipped as the law provides in the important requisites of size, furnishing, ventilation, &c. Of these, some, however, are barely sufficient, while others are very complete and comfortable; but the number of the former diminishes yearly as the people become convinced of the desirability of the School-house being comfortable and attractive.

Apparatus, Prizes, &c.—There has been a steady yearly outlay for maps and other school apparatus since 1871. No school is now without a reasonably good supply, and many are completely equipped. Prizes are frequently distributed and not reported, as the determination to obtain them is often made only at the last moment.

I regret that it is extremely difficult to arouse any enthusiasm about a school library, those in existence being collections of old books stowed away and seldom called for, and frequently unknown to the teacher as being in existence. Sabbath-school libraries and the cheapness of children's literature, have, to a great extent, supplanted the school library in usefulness.

Subjects of Study.—In regard to the number of studies prescribed by the programme, after faithful efforts to have them take up as it directs, I am constrained to assert its unsuitableness to rural Schools, however well adapted it may be to graded schools, or even to any school with a full attendance of pupils, taught by a person well versed in every subject prescribed. The majority of pupils in our rural Schools, sufficiently advanced in the ordinary branches to take up the other subjects of the programme, attend School but a portion of the year, and the greater number of teachers are of the third-class, and never passed an examination in these subjects themselves. It cannot be surprising, therefore, that the unavoidable result of an effort to adhere strictly to the systematic teaching of every subject prescribed, has been a comparative failure in the more essential branches, without a compensating degree of success in the higher. The examination of the classes has, in consequence, been mainly in the ordinary English branches, in which teachers are thus encouraged more especially to strive for excellence; but incidental teaching in other subjects, by means of object lessons, &c., is not neglected.

The following is a summary of the standing of the classes in each township, as set forth in the reports before referred to.

	Percentage of correct answers.						Name of Schools above average standing
	Rdg.	Spellg.	Wrtg.	Geo.	Gram.	Arith.	
Niagar.....	64	65	52	47	36	39	Nos. 3, 4, 8.

Caistor.....	60	56	41	34	25	32	Nos. 5, 6, 7.

GRANTHAM.

The following brief tabular statement has been very carefully compiled from the result of the regular inspectoral visits to each school this year and the examination of its classes in the more essential branches of study.

The information conveyed by the first five columns has a very direct connection with that contained in those following, and in justice to the teachers, should receive joint attention with it, as indicating and accounting for the low standing or unsatisfactory progress reported in some schools.

Every year's experience points more unmistakably to IRREGULARITY OF ATTENDANCE as one of the greatest hindrances to effectual progress in our Schools. Trustees can accomplish much in abating this evil by looking sharply after those who neglect to comply with the law in sending their children to School, and in this, public opinion also, will sustain them. A few prizes, given at the close of each term, for the best attendance in each class, would be followed by surprising results in many Schools, and would repay their cost in the increase of the Government grant.

The numbers given to indicate the standing in each School in the various subjects, are estimated as the average result of both visits. The highest standing possible is indicated by 100. The methods of teaching pursued show a very general improvement over last year throughout the county: the special attention of teachers, however, is asked to two points in School management that are too often neglected, viz.: 1, Personal supervision of the WRITING CLASS during their exercise, the lack of which is the cause of so much wretched scribbling; and 2, Watchfulness over the conduct and language of pupils in the play-ground, and over the state of the premises generally—a very important part of the teacher's duties.

N.B.—The numbers given below indicate the percentage of correct answers.

COUNTY OF OXFORD.

William Carlyle, Esq.—During 1875, 5 more new School-houses were erected, 4 brick and 1 frame. 1 arranged for two departments. They are all very superior buildings. These do not constitute all that were needed; but from various causes, some sections made the old house last another year. In some cases to press matters is to destroy all interest taken by the ratepayers in their Schools. The worst class of buildings have all disappeared, and the class next in order will soon follow them.

A survey of the year's work detects marked progress. The Schools were graded, as is my custom, according to their management and accommodation. The following Table indicates the grading for 1872 and 1875.

1872,	Excellent Schools	1.	good,	22.	fair,	40.	poor,	28.	very poor,	17
1875,	"	15,	"	40.	"	42.	"	10.	"	0
60										

Of the 15 excellent, 11 reached this grade during the year. The "very poor," have vanished entirely, and the "poor" have fallen to 10. This result is gratifying and equally astonishing, when the character of the attendance is known, in the face of which the improvement in scholarship has been accomplished. From trustees' returns used the last half-year, I learn that of 8,956 pupils actually at School, only 3,984 was the daily average attendance. Daily, throughout the year, nearly 60 per cent. of the scholars were absent, 730 did not attend more than 20 days; 1,602, more than 50; 2,857, more than 100; 2,028, more than 150; 1,726, more than 200; and, only 512 were at School 200 days during the year.

Of what is termed "school age"—5 to 16—462 were not at School at all. And of the 4,630 in the County of the ages 7 to 12, to which the compulsory measure applies, 715 attended less than four months, and 122 not at all, making 837 children, whose parents and guardians did not comply with the requirements of the Act. With reference to the four months attendance, as the time was counted by days however far apart they may have been, it is evident the schooling was of no value.

The Supplementary Returns have directed attention to the matter, and a better attendance may be secured hereafter. Irregular attendance is the bane of our Schools; how to cure the evil does not seem very clear. Teachers, in some sections, by their personal influence mitigate it greatly, by attracting pupils to the School, engaging their attention in their work, and in this way eliciting the interest of negligent parents as well. On the parents, however, rests the responsibility, and if neither the teacher's persuasion, nor his own regard for his children arouses him to a discharge of his duty, compulsion must be resorted to in order to secure to the children a privilege the parent has no right to deprive them of.

Teachers' salaries in many sections have improved, reaching in rural sections \$600 per annum for male, and \$500 for female teachers. This most desirable advance has been reached chiefly through two means. First.—Trustees who have furnished good accommodation, are anxious to secure the services of thoroughly efficient masters, and in place of advertising their Schools and selecting masters by testimonials, hold out inducements to masters of the county of established reputation to take their Schools. This tends to keep in the county successful teachers, and stimulates others to renewed diligence and greater energy. Secondly.—While the Board of Examiners have been painstaking and just in their selection of papers, and have given candidates all they were entitled to, they have not on the other hand, through leniency or any other cause, passed into the profession young men and women, giving good evidence of their unfitness for it. This, in connection with the policy I have pursued of endorsing no certificates, and granting no permits, while there was a supply of teachers holding certificates valid in the county, has saved our Schools from falling into the hands of the inexperienced and the incompetent, and from the under-bidding for Schools, which a plethora of teachers gives rise to, and which drives competent men and women from school to school, until discouraged and disgusted they relinquish the profession entirely.

TOWN OF TILSONBURGH.

In presenting some general remarks on the condition of the Tilsonburgh Public School, I beg to state that the Senior Department has been for two years under very superior management; and although a change occurred during the past year in the Principalship, a most successful and experienced master having been secured, the interruption, it is hoped, will be slight. The scholarship of this department has reached a very creditable degree of excellency.

In the lower departments, also, changes have taken place. Probably the most serious drawback the School labours under is, the restriction of the Principal's authority too closely to his own classes, and leaving the other classes very much as isolated and independent schools. This system of management, however, is recognized by the School Board as pernicious, and it will be, if it is not already, rescinded.

The number of registered pupils amounted during the year to 533. The average attendance, however, is only 236. This in itself will greatly retard the progress of the School.

The Town is of recent incorporation, but very good accommodation is provided for the School. The ratepayers are interested in its welfare, and the members of the School Board attentive and energetic in their oversight.

TOWN OF WOODSTOCK.

In reference to the Woodstock Public Schools, I beg to state that they have been under my jurisdiction only a part of the year.

On my first inspection I found the scholarship of the pupils most deplorable. I attributed their backwardness mainly to one cause, viz., the practice that had prevailed of removing scholars from room to room whenever the crowded state of any department seemingly caused such a step necessary. Promotions were mere removals, without any reference to scholarship, no standard for entering any department, none for leaving it. So that it was quite possible to find pupils elevated by removals to the senior department, whose scholarship did not entitle them to a position anywhere above the second class.

The School Board sanctioned a proposal to have a thorough examination of all the pupils, that they might be classified according to attainments, after being allowed several weeks for a review of rudiments. This examination took place after the midsummer holidays, and the pupils were, as a rule, kept at rudimentary work until the end of the year. The result was somewhat satisfactory; in some departments quite satisfactory, but in others, owing to wretched discipline and general bad management, no improvement was perceptible. However, another examination followed after the close of the year. A regular system of promotions has been instituted, specific work has been assigned each class, and a specified time allotted for its accomplishment. Hereafter, where a failure occurs, the source of the failure will be apparent.

There are two Schools for the town, each with its own master, and having six departments. In each building is an additional class-room, where a monitor was employed to teach a portion of the junior first class, in order to relieve the pressure in the other rooms until promotions would take place. The accommodation is insufficient, of which the School Board is aware, and the matter of enlargement or removal is now pressing itself upon the attention of its members.

The teaching staff comprised, in each School, six legally qualified teachers and an occasional monitor. Hitherto very little, if any, attention has been given to the qualifications of these monitors,—an irregularity that has been corrected.

On the occasion of an inspection, the following Table was compiled, showing the roll number, number present, and sitting accommodation in each School:—

<i>East End School.</i>				<i>West End School.</i>			
Highest Dept.	Roll No.	Present.	Seated for.	Roll No.	Present.	Seated for.	
1	80	54	72	87	69	72	
2	70	56	60	71	44	72	
3	62	38	60	56	36	70	
4	70	56	72	73	53	70	
5	62	56	70	69	47	60	
6	81	40	55	81	48	60	
Total.....	425	290	369	473	297	404	

A beginning has been made of what, it is hoped, will prove a remedy for some of the defects of these Schools,—a matter greatly needed for their own reputation, as well as the welfare, if not the existence, of the High School.

COUNTY OF WELLINGTON, NORTH.

A. D. Fordyce, Esq.—I would call to your recollection the unprecedentedly severe weather a year ago, and the almost impassable state of the roads; added to this my own confinement from sickness towards the spring, and my being thrown back when I had commenced to go round by over-exertion. These, taken all together, prevented my regular *winter* visit being finished till about the second week in *July*; and also caused it to be of the briefest possible description, and the result by no means satisfactory to me. I fell likewise, owing to a desire to economize the limited time I had, into an error which affects the reports of both visits, in

Detailed Report. I had made an abstract of prepared questions, and in doing so overlooked several, so that there are blanks. I found myself without material to supply when I came to transcribe the Report. The neglect in providing in all cases General Registers likewise came in the way, as an obstacle to getting at the classification as it should be, and consequently to particulars of the real numbers being available for reporting to you. I must say that I did not feel encouraged by the classification in a number of the Schools, but the circumstances rendered teachers more excusable than would otherwise have been the case, as very often the Schools were reduced greatly in number from one cause or other, and the scholars were present there after long absence. I am increasingly of opinion that for some localities attendance is all the worse for the vacation being restricted as it is; my opinion being that there, at any rate, it would be better if four weeks might be taken consecutively, any time between 15th July and 1st October (under certain conditions, to prevent possibility of an Inspector finding closed doors).

I trust in respect of various apparent defects in Reports sent in, and failure to give the regulations the effect they might have, from such circumstances as have been noticed, I may be able in next Report to render an account more satisfactory to the Department, of the state of the Schools in some important respects.

I would also allude to my having been led, while on my official visit, about the middle of October, to send to a local paper some brief notes of the Schools in Minto. This again was the means of similar notices being sought of schools in other townships; and providing these, although I have reason to know some benefit resulted, necessarily, to some extent, delayed Reports to the Department. However, there is the counterbalancing advantage that I can send you a copy of these "Notes," which will obviate need of special remarks in Detailed Reports, and in two instances will show that, although I believe generally well taken, some remarks were regarded as misplaced. I cannot altogether see that I was wrong, and should regret it if anything was.

I find the aggregate attendance for the year 1875 in the Rural Schools, is considerably short of that of the previous year, there being 7,870 names on Daily Register in place of 9,667. Various considerations might lead to a satisfactory explanation, however.

Two new School-houses have been erected; a brick building in section 4, Arthur; a frame one in section 4, West Garafraxa; besides another frame School-house in section 13, Minto, where in November, 1874, the new School-house was unaccountably destroyed by fire.

New School-houses I expect to be erected this year in sections 15 and 16, Peel; and 11, Arthur, and in addition, probably, several newly established sections, viz:—1, Arthur; 18 and 19, Maryborough; and 4 and 11, Peel and Shelbourne, Union (Melancthon and Amaranth), though, in which township and county the latter may lie, is I believe yet undecided.

Patent desks have been introduced into several Schools, and in several of these I trust may be the speedy forerunners of better buildings. I have not mentioned as new School-houses, though really so, additional rooms erected in Alma (7 Peel), and Drayton.

Of the 84 Rural Schools reported in Statistical Returns, 24 appear still to have less than the minimum legal quantity of ground, 57 having the half-acre, and 7 over that, or from three-fifths to one acre, and in the case of 36, the ground is only partially enclosed. As I have intimated elsewhere, uncertain continuance of site frequently has been a barrier to my insisting on some things; and where it has been done, several cases have occurred, where after all, the site has not been long of being changed, and improvements comparatively lost.

In 19 of these real sections, no well has yet been provided. In the case of half-a-dozen of these, there may be no real grievance in consequence, but in most of the rest, I suspect it is otherwise. In 7 Schools there are at present no out-houses; 4 of these are in comparatively retired situations. In Amaranth the want in the case of two of the others, I am sure will be supplied in Spring, and of course all had repeated intimation of what is reasonably expected. I think that some of the maps are of a very poor description, the result of age, and perhaps of carelessness in some cases. There are only two rural sections where none whatever are reported; one of these is a new section, but has now taken steps to procure them, and some other articles of like nature. The other section, 6 Arthur, had a set when there was a far less suitable place to display, preserve, and make use of them.

Beneficial as Public Libraries, judiciously selected, might be in rural sections, there are yet only 13 which have provided them; one of these, is section 7, Luther, which got one

established this season. Six are in West Garrafraxa, where they are not new, and would be more valued I think, if periodical additions were made. Three sections in Minto, and three in Peel, have also libraries. Perhaps if I had found it practicable to deliver lectures, an opportunity might have been found to urge the matter profitably on the attention of intelligent people, who would have seconded such attempts. I am not without hope yet to manage this, the duty of lecturing having I confess been, from what seemed unavoidable considerations, a dead letter latterly in my case.

I find that in all the rural sections, with the exception of seven, prayer is used either at opening or closing School, or in both. In two of these, the question, I think, has been overlooked; in other two I might not be very far wrong in surmising that indifference on the teacher's part accounts for the omission; in the remaining three, the teachers profess to belong to the religious denomination known as Brethren, and it is possible that certain scruples on their part occasion inattention to the recommendation.

The number of Sunday Schools reported as open in rural sections is pretty much the same as last year—72 Schools, with an attendance of 3,281 scholars and 405 teachers. Some Schools, however, may not be reported where the practice is to close early in winter.

There are 28 teachers who report not getting the *Journal* to read. Where the fault lies in any or all of these, I have no means of knowing. I do know, however, that every now and then I have the enquiry put to me by School Trustees, "Why don't *we* get the *Journal*?" I can only reply that sections not receiving or acknowledging receipt regularly are duly reported at the close of each year.

I find a great desire among School Trustees, not simply for the Consolidated Law, but for the "Trustees Manual," such as all Schools used to receive, and which, indeed, if they would only regard as essential to do so, they could not do better than make up for the want of by getting in every School a copy of "Lectures on School Law." In some cases, ignorance on the part of School Trustees is a considerable hindrance where reports are in question. With exceptional and very gratifying instances of anxious desire to do what ever is really needed for the good of the School, the unwise appointments that are sometimes made, are exceedingly embarrassing. Some "cases" every Inspector, I imagine, could record with gratitude. In comparatively few cases have I had to put my own interpretation on defective financial statements. In two it was unavoidable—Section 4 Minto, and R. C. S. School in Section 6 Arthur. The value of assessed property in sections where I did not get it from the Trustees, I did from the Township Clerks, only, when I do so I am apt to find a discrepancy, probably arising from the personal property being included or not, as the case may be. In only one instance had I to fall back on last year's Report for value of assessed property. This was in Section 1, Amaranth. The Trustees' correction reached me since I sent off Statistical Report, and I find the amount given to be \$20,000 more than a year since—which you will please note. I have, also, felt a difficulty in reports from incorporated villages in the question, "What is the value of assessed property in the municipality?" I have the feeling that the intention is to ascertain the value of assessed property of rate payers of the Village School, and supposing that there is a part of township attached for School purposes, the value of assessed property in the village municipality would not be what was wanted. There is such union in the cases of Clifford, Harriston, Arthur and Drayton. Where the question is answered without explanation, I would conclude it gave the value of assessed property solely in the village part of the School Division, and after all I may be wrong in thinking that anything else is wanted.

Recurring to the subject of School attendance, I may be excused for transcribing an intimation appearing in the Report of Annual School Meeting in a remote section to this effect:—"In the opinion of this meeting, the long vacation should not commence earlier than the first of August."

I would also refer to the Supplementary School Returns, which are supposed to give, in addition to the number of children in each School Section between seven and twelve years of age who have not attended any School at least four months in the year, the number between the ages of five and twenty-one, five and sixteen, and seven and twelve, ascertained from actual census having been taken by the Trustees, as directed in recent provisions of the School Law. While I hope such census has been taken in the majority of cases, I feel exceedingly doubtful, if not absolutely sure, that in some cases it has not been done; and when doubt, amounting to certainty in one or two cases, existed on the point, I hesitated to insert it, on

account of local change of boundaries during the year and for other reasons. This being so, I felt perplexed by intimation in the *Journal* that such census might form basis of apportionment of next year's grant to the Schools. All the Supplementary Returns, with one exception, have been received. Next year I trust that an actual census will be taken in every case.

TOWN OF GUELPH.

1. *Teachers and Salaries.*

Rev. Robert Torrance.—There has been a constant staff of seventeen teachers employed by the Board during the year, except in the month of January, when there were only sixteen, but the total number at different times was twenty-four, seven of whom, either through their becoming disqualified by the expiring of their certificates, or other causes, removed from the situations and were succeeded by others. Of these, five were males and the rest females. Of the seventeen in the service of the Board at the end of the year, one held a First-class Provincial Certificate; three, Second-class; four, First-class old County Board, and nine Third-class new County Board. Of those who retired, and whose certificates had expired, one had an extension of time granted, in accordance with authority from the Chief Superintendent of Education; three had permits till the meeting of the County Board of examiners in July; and three had Provisional certificates. At the close of the year all the teachers were duly qualified.

Two of the male teachers received six hundred dollars each of salary, and one four hundred and twenty-five. One of the female teachers received five hundred dollars, one three hundred and fifty, one three hundred, two received two hundred and fifty each, two, two hundred and twenty-five each, and seven, one hundred and seventy-five each. The average of male teachers' salaries was five hundred and forty-one dollars, sixty-six cents, and of female, two hundred and thirty-seven dollars, fifty cents.

2. *School Population and Attendance.*

In the absence of a census of school population for the year embraced in this report, it may be safely assumed that the number of children of school age in the Municipality, and who should attend our Public Schools is 1,600. The total number of pupils enrolled on the daily registers was 1,540, ten of whom were about sixteen years of age, thus leaving about 70 who were not in attendance at any school, although some, or all of them, may have been receiving education at home. Of those enrolled, 756 were boys, and 784 were girls. No pupils under the age fixed by the law were allowed to attend. Eight hundred and eighty-five were between the ages of five and ten inclusive; six hundred and forty-five were between eleven and sixteen inclusive; and ten were between seventeen and twenty-one.

One hundred and forty-nine pupils attended school less than twenty days during the year; two hundred and ninety-nine, between twenty and fifty days; four hundred and seventy-six between fifty-one and a hundred days; three hundred and fourteen between one hundred and one hundred and fifty days, two hundred and seventy-eight between one hundred and fifty-one and two hundred days; and twenty-four between two hundred days and the whole year of two hundred and twelve teaching days. Of the last, three attended Miss McNaughton's class; four, Miss Holmwood's; one, Mr. Anderson's; four, Miss Maddock's; two Mr. McLeay's; two, Miss Auld's; three, Miss Jennie E. Smith's; three, Miss Julia Smith's, and two, Miss Short's.

The greatest number of pupils was enrolled in the class taught by Miss Short, being one hundred and fifty-three; the next greatest, one hundred and forty, was in Miss Wilkin's; the next, one hundred and twenty nine, in Miss Ridd's; the next, one hundred and twenty-three, in Miss Wilkinson's; the next, one hundred and eleven, in Mr. Anderson's; the next, one hundred and five, in Miss Maddock's; the next, ninety-nine, in Miss Julia Smith's; the next, ninety-three, in Miss McKeown's; the next, eighty-seven, in Mr. Walker's; the next, eighty-three, in Miss Jennie E. Smith's; the next, seventy-seven, in Miss Ainslie's; the next, sixty-nine, in Miss Holmwood's; the next, sixty-six, in Miss Auld's; the next, fifty-nine, in

Miss Addison's; the next, fifty-four, in Miss Walker's; and the next, forty-six each, in Miss McNaughton's and Mr. McLeay's.

The total aggregate attendance for the first half-year was 83,951, giving an average of 705 $\frac{5}{11}$, and for the second half year, 65,227, giving an average of 701 $\frac{3}{8}$.

3. Studies.

In the first part of the First Reading Book, there were 365 pupils, and 116 in the second part. In the Second Book there were 246, making an aggregate of 727, somewhat less than one-half of all the registered pupils, in the subjects of the First-class. In Second-class subjects there were 336, taught by Misses McKeowu, Auld, and Julia M. Smith, and Mr. Anderson. In Third-class subjects, taught by Misses McNaughton, Jennie E. Smith, and Mr. Anderson, who has Third-class as well as Second-class pupils, there were 162. In Fourth-class subjects, taught by Miss Holmwood and Mr. Walker, there were 156. In Fifth-class subjects, taught by Miss Addison and Mr. McLeay, there were 105. And in Sixth-class subjects, taught by Miss Walker, there were 54.

All were in reading; 1,494 were in Spelling; 1,449 in Writing, the same number in Arithmetic; 305 were in Geography as prescribed for the First-class, 498 as prescribed for the Second and Third-class, and 315 as prescribed for the Fourth, Fifth and Sixth Classes. The total number in Geography is thus 1,118. In Linear Drawing there were 931; in Vocal Music, 1,254; in Grammar, 813; of whom 585 were in the Second and Third Classes, and 228 in the Fourth, Fifth and Sixth Classes; 605 were in Composition; 182 in Chemistry and Botany; 174 in Canadian History; 261 in English History; 54 in General History; 69 in Natural History; 89 in Human Physiology; 54 in English Literature; 143 in Natural Philosophy; 159 in Algebra; 100 in Chemistry; 159 in Mensuration; the same number in Book-keeping; and 200 in Gymnastics and Drill. There were none in the subjects of Christian Morals, prescribed for Fourth-class pupils, and Civil Government, prescribed for Fifth and Sixth-class pupils, nor in Domestic Economy, prescribed for Girls in the Fifth and Sixth Classes.

4. Religious Exercises.

All the Schools are opened and closed with prayer. The Ten Commandments are repeated once a week in all but two. In most of them the Scriptures are read once a day. No religious instruction is given by clergymen.

5. Maps and Apparatus.

In all the Schools there were sixty-one maps, nineteen of these, maps of the world, four of the Dominion of Canada, eight of Ontario, twenty-three of the continents, and thirteen of other places.

There were twenty-two black-boards, five of the Schools having two each. There is a terrestrial globe in each of two Schools, and there is school apparatus in only one.

6. Examinations.

Examinations were held in each room at the end of each quarter, and simultaneous examinations were conducted, of which due notice was given to the public, on the last teaching-day of the year. At these there was but a small attendance of parents and others, with the exception of the senior girls' School, at which there were a few Trustees, and a large number of strangers.

7. Reports and Honour Cards.

Weekly reports were regularly sent home with the pupils, and honour cards were awarded to those considered deserving of them; the conditions of receiving the last being that the pupil has not been absent, nor late, nor got a mark for demerit, or imperfect recitation during the week. The cards are printed with a black space for entering the number obtained by the scholar since the beginning of the year.

8. *Visits.*

The total number of visits to all the Public Schools of the town during the year was 377. Of these, 189 were made by the Inspector, on an average of eleven to each School; fourteen by clergymen; three by Municipal Councillors and Magistrates; four by the Judge, thirty by Trustees, and 137 by other persons.

9. *Income and Expenditure.*

The total income for the year was \$7,957.55, comprising a balance on hand at the beginning of \$19.44; Legislative grant, \$824, being \$17 more than for the preceding year, and \$7,114.11 Municipal assessment.

The expenditure has been \$7,889.33, made up as follows:—Paid teachers, \$5,131.24; Secretary and Inspector, \$300; caretakers, \$566.54; rent, \$525; wood, \$657.90; School furniture, \$135.15; purchase of lots, \$229.45; and for other purposes, including stationery, postages, printing, repairs, &c., \$331.05, leaving a balance of \$68.22 in favour of the Board.

The estimated value of assessed property in the municipality for 1875 was \$1,920,360, so that the School assessment amounted to rather less than four mills in the dollar, or one mill less than in 1873 or 1874. The number of pupils enrolled being 1,540, the average cost of each on the total expenditure has been \$5.12, and upon the salaries paid teachers, \$3.33.

10. *Promotions.*

Some time ago the Inspector promoted from one class to another at each of his quarterly examinations, but as the entrance examinations to the High Schools are now limited to two in each year, the Board, in 1874, determined that the promotion examinations in the Public Schools should also be fixed at two. Last year, however, being the first one that the change came into effect, he promoted, at the examination in March, as previously reported to the Board and sanctioned by them, those he judged qualified. There were, therefore, three promotion examinations, instead of two, during the year, with the following results:—

In March, out of a class of 26 at Miss Bruce's, six were promoted, or about 25 per cent.; three out of a class of 23, at Miss H. Maddock's, or about 13 per cent.; none out of a class of 28 at Miss Julia M. Smith's; eight out of a class of 24 at Miss McLagan's, or 33 per cent.; none out of a class of 13 at Miss McNaughton's; three out of a class of 22 at Mr. Walker's, or about 14 per cent.; none out of an advanced class of six at Mrs. Grant's; none out of the third class at Mr. Anderson's, consisting of 18; six out of a class of nine at Miss E. H. Maddock's, or about 66 per cent.; none out of a class of 29 at Miss Holmwood's; two out of a class of 17 at Miss Auld's, being about 12 per cent.; eight out of a class of 12 at Miss Barelay's, or about 66 per cent.; four out of a class of 15 at Miss Wilkinson's, or more than 26 per cent.; four out of a class of 20 at Miss McKeown's, or at the rate of 20 per cent.; and none out of a class of 25 at Miss Addison's. The total number examined for promotion on this occasion was 287; the total number promoted was 44, or a little more than 14 per cent.

In June following, the examinations were again conducted with a view to promotion, and we now give the results:—

At Miss Barelay's, 10 were promoted out of a class of 17, or very nearly 59 per cent.; at Miss Wilkinson's, 5 out of a class of 8, or more than 62 per cent.; at Miss McKeown's, none out of a class of 22; at Mr. Anderson's, 2 out of a class of 18,—all Third-class pupils, or about 11 per cent.—and 8 from Second to Third-class; at Miss E. H. Maddock's, 13 out of a class of 16, or upwards of 70 per cent.; at Miss Hattie Bruce's, 15 out of a class of 17, or 88 per cent.; at Miss Hattie Maddock's, 14 out of a class of 20, or 70 per cent.; at Miss Julia M. Smith's, 8 out of a class of 19, or 42 per cent.; at Miss Auld's, 13 out of a class of 14, or nearly 87 per cent.; at Miss McLagan's, 13 out of a class of 23, or more than 56 per cent.; at Miss McNaughton's, 13 out of a class of 26, or 50 per cent.; at Mr. Walker's, 8 out of a class of 25, or about 32 per cent.; at Miss Holmwood's, 12 out of a class of 36, or about 33 per cent.; at Mrs. Grant's, 4 out of a class of 13, or nearly 33 per cent.; at Miss Addison's, 5 out of a class of 27, or between 18 and

19 per cent. Total number examined, 301, of whom 134, or at the rate of $44\frac{1}{2}$ per cent. were promoted.

In December last another promotion examination was held, and the following are the results:—

At Miss Wilkie's School, who succeeded Miss Barclay, 13 were promoted out of a class of 19, or 68 per cent. ; at Miss Wilkinson's, 18 out of a class of the same number, or 100 per cent. ; at Miss McKeown's, 12 out of a class of 19, or 63 per cent. ; at Miss Short's, 14 out of a class of 17, or 82 per cent. ; at Miss Maddock's, 17 out of a class of 30, or 57 per cent. ; at Miss Julia M. Smyth's, 14 out of a class of 23, or 61 per cent. ; at Miss Jessie E. Smith's, 25 out of a class of 29, or 86 per cent. ; at Miss McNaughton's, 15 out of a class of 23, or 65 per cent. ; at Miss Holmwood's, none out of 27 ; at Mr. Walker's, 3 out of a class of 39, or under 8 per cent. ; at Miss Ainslie's (who succeeded Mrs. Grant), 11 out of a class of 12, or 91 per cent. ; at Miss Auld's, 13 out of a class of 20, or 54 per cent. ; at Miss Ridd's (who succeeded Miss E. H. Maddock), 16 out of 17, or 94 per cent. ; At Mr. Anderson's, 10 out of 16 from the Second to the Third class, or 62 per cent., and 10 out of 13, from the Third to the Fourth class, or at the rate of 77 per cent. ; and at Miss Addison's, 11 out of a class of 26, or 43 per cent. The total number of pupils examined was 342, and of those 208 were promoted, being an average of 60 per cent.

The Inspector has prepared, in a tabulated form, a list of the promotions thus given, and marked it as Appendix I to this Report.

11. Monthly Attendance.

The Inspector has regularly submitted to the Board a Report of the monthly attendance at each School, embracing the following particulars: *First*, the number of pupils enrolled for the month; *second*, the number of boys, and, *third*, the number of girls; *fourth*, aggregate attendance of the boys; *fifth*, aggregate attendance of the girls; *sixth* and *seventh*, average of each; *eighth*, the total aggregate attendance of boys and girls, and, *ninth*, total average attendance, with the sum of each column, and a comparison of each, with the returns for the corresponding months of the previous years.

Appendix 2 contains Tables setting forth these figures for the four last years, omitting the columns occupied with the aggregate and average attendance of boys and girls, and giving simply the general aggregates and averages. The Table shows also the increase and decrease for the corresponding months of previous years.

Referring now to these figures, he finds that the largest attendance, last year, was in the month of May, when 1,129 names were entered on the Registers, and the smallest, in the month of January, when 887 were enrolled. In February, when an additional teacher was added to the staff, there was an increase of 86 on the attendance in January; in March there was a decrease, but in April an increase of 177 over January, and so the numbers vary. Yet, in August, when the attendance is generally small, most probably in consequence of its being a broken month, there was an increase of 92, and in December, the next month of smallest attendance, there was an increase of 105 on the first month of the year. In each of the months there was an increase in the number enrolled till August inclusive. Beginning with September, there has been a considerable decrease, compared with the corresponding months of the previous year. This cannot be accounted for by distance to travel, nor from alleged uncomfortableness of the rooms.

12. Compulsory Attendance.

One provision of the School law now in force is "that every child from the age of seven to twelve years inclusive, shall have the right to attend some School, or be otherwise educated for four months in every year; and any parent or guardian who does not provide that every child, between the ages aforesaid, under his care, shall attend some School, or be otherwise educated, as thus of right declares, shall be subject to certain penalties."

The Annual Report of the Board, as required to be filled up and transmitted to the Education Department, does not enable us to ascertain how many children, between the

ages specified, have been attending School for the prescribed period. As, again, no School census has been taken for the year, the only other source from which such information could be acquired, has not been provided, if even it could be depended on, for experience leads us to think that, in some instances, parents or guardians could not state with exactness the time their children or wards were attending School. Another element to be considered here is the number attending private schools, for which we possess no reliable data. After all allowances made for the last, and for cases in which it may be presumed education is given at home, it is to be feared that the section of the School Act we have quoted is not complied with in Guelph. We learn from the Registers that 149 scholars have attended less than 20 days; 299 less than 51 days, and if we take one half of the entire number returned as attending between 51 and 100 days, as attending less than "four months," say 80 days, we have 686 children whose education, as enjoined by Statute, is neglected. This state of matters should not be allowed to continue. Against this there are strong public, as well as private, reasons. And the responsibility has been thrown upon School Corporations to see that the provision of the Public School Law does not remain a dead letter. We are persuaded that parents and guardians cannot plead justification for neglecting the education of those under their charge. Our Schools are free. They are conveniently situated. The course of instruction pursued in them is the one that has been appointed by men of high scholastic attainments and experience. An educated people are generally a moral people, for the majority of our criminals is drawn from the ranks of the ignorant. For these and other reasons, School Boards should faithfully execute the trust committed to them, and fulfil the obligation imposed upon them by Parliamentary enactment.

13. *Comparative Financial Statement.*

The Inspector has prepared and subjoined, as Appendix III., a comparative statement of income beginning with the year 1857, when he was appointed Secretary of the Board. The first column is occupied with the years in succession, closing with 1875. The second shows the amounts received as fees from the High and Public School pupils down to 1871, when the Act was passed making all the Public Schools free. Column third, gives the grants by the County Council to the High School. Column fourth, Legislative Grants to High Schools. Column fifth, as to Public Schools. Column sixth shows the sum of these grants. Column seventh shows the amount raised by Town Assessment for the Public Schools. Column eight, for the High School. Column ninth gives the total raised each year by Town Assessment for the High and Public Schools.

By adding the columns, we find that from 1857 till an early date in 1871, the sum of \$15,871.41½ had been raised in fees; and the County Grants to the High School amounted to \$3,925 in twelve years, namely: 1861-2 and 1866 to 1875, inclusive. Government grant to High School from 1875, \$13,433; Town Assessment for that Institute for the same period, omitting 1862, when none was made, \$10,618.27½. Legislative grant to Public Schools, for the nineteen years, beginning with 1857, \$8,969; raised by Town Assessment for the same, \$71,850.03. The total sum received as Legislative Grant for both High and Public Schools, was \$22,402, and from Town Assessment, \$82,468.30½. The total receipts for School purposes, making no mention of the Central School Building, which is still only in progress, but which promises when finished to be one of the finest buildings of the kind in Ontario, from Fees, County, Government, and Town, mount up to \$124,666.72.

14. *Admission Examinations.*

Two admission examinations to the High School have been held during the year, according to the regulations prescribed by the Council of Public Instruction, one in June and the other in December. At the former, eight boys and one girl came forward as candidates for the classical course, and two boys and nineteen girls for the English. Only two of those in the former, and eight in the latter passed in all the subjects, or an average of 33 per cent.

At the examination in December, there were thirty-five candidates, no distinction being made between the courses at the High School. Of that number twenty-four were boys and eleven girls. Thirteen of the boys were successful, an average of nearly twenty per cent., and nine of the girls, an average of nearly eighty-two per cent. Thus twenty-two of the thirty-four

applicants passed, average about sixty-three per cent. In all, then, the promotions to the High School for the year were thirty-two.

The Inspector has not mentioned in his report the inadequacy and unsuitableness of the School accommodation during the last year, because he knows the Board are applying themselves to supply this want, and hopes to see the new building completed and opened before the end of the year on which we have now entered. A new starting point will then occur in the educational progress of Guelph. May it be an auspicious and happy one.

COUNTY OF GREY, SOUTH.

William Ferguson, Esq.—We are gradually superseding the old buildings with their inconveniences, by substantial, and in most cases, commodious and neat brick, stone, or good frame buildings, constructed more in accordance with modern improvements. We have now 9 brick, 20 stone, and 38 frame School-houses; being an increase of 3 brick, 3 stone, and 4 frame premises during the year.

There are on the General Registers, between the ages of 5 and 16 years, 9,138 children, and of other ages, 516; being a total enrolment of 9,654 pupils; but there are 400 reported between the ages of 7 and 12 years as not attending School at all.

Many of these are prevented by distance, poverty, bad roads, and in some cases no roads at all, and others by less excusable causes. Were section limits abolished, and the Schools thus be left free to all, the attendance would be more general and regular; but until such change is effected, the full benefits of our excellent School system cannot be obtained.

But while we have 9,654 enrolled, as against 9,089 of the year before, we regret that the unusually heavy snow-storms of last winter, measles, etc. during the spring and summer months, and the excessive rains of last fall, have reduced the attendance below that of the year before.

In the 99 Schools there are reported seats and desks for 6,282 pupils only. This inconvenience is less felt from the fact that, to a great extent, one set of pupils attend in winter, and another in summer. But new School premises will still further increase the proportion of accommodation to the School population.

The expenditure by School Trustees amounted to \$49,255, compared with \$42,372 of the year before. The total School Taxes levied was \$30,601.37. The total paid as salaries to teachers, was \$28,130.23; and for buildings and sites, \$11,698.72.

The standing of the Teachers in this Riding are as follows:—

Provincial Second-class, 7; Old County Board, First-class, 8; Old County Board, Second class, 1; New County Board, Third-class, 86. Total, 102.

Of these, 43 are Presbyterian, 35 are Methodist, 11 are Episcopalian, 9 are Roman Catholic, 2 Congregational, 1 records himself as Christian, and 1, as Protestant.

The highest salary paid is \$500, to the master of the School at Hanover, an enterprising, unincorporated village, in the Township of Bentinck; the lowest salary is \$190, paid to the teacher of a Separate School.

The average salary paid to male teachers is \$333.65; to female teachers, \$258.57; both in advance of last year.

Two teachers' residences have been erected in the Township of Egremont, and more are to be erected next year.

There are reported, 9 Public School, and 32 Sunday School Libraries, the former contains 650 vols., and the latter 5,194 vols., all of which appear to have been generally well read.

The estimated value of School-houses and sites is \$61,761; desks and furniture, \$6,560; maps and apparatus, \$2,645; library and text books, \$399, making a total of \$71,365.00.

The average length of time the Schools were kept open during the year was 11 months.

Besides the above, there were maintained in the Riding, 91 Sunday Schools, with 4,360 scholars, and 484 teachers.

We have directed attention to the revised programme, which is now more generally observed, the principal exceptions being chemistry, natural history and Christian morals, in the fourth class; object lessons in the junior classes, and music and drawing generally.

One great cause for these omissions is *irregular attendance* of the pupils, preventing that consecutive attention to the special subjects of study, essential to their intelligent appreciation.

During the lengthened periods of absence from School, the faintly comprehended ideas acquired, lose their intensity, and discouraged with the small results obtained, the pupils acquire a distaste for the subjects of which they understand so little.

Another cause of these exceptions is the want of *trained teachers*. Among the many intelligent and hard-working teachers in the Riding, only three are reported as having attended the Normal School at Toronto.

Many display both tact and energy in the management of their Schools, yet their efficiency would have been greatly increased, had they enjoyed the advantages of a regular course of training, or of having received their instructions from teachers who had been so trained. Under these convictions, quite a number have temporarily retired at the close of the year, for the purpose of attending for a time some superior schools, the better to qualify themselves for the successful prosecution of the duties of their chosen profession.

In justice to the large number of successful candidates at the last County examination, I have declined to give any *provisional* examinations as long as certificated parties were at all available.

In conclusion, I may just add that, in view of both past successes and existing defects, we are urged to renewed exertions in promoting the increased improvement of our Schools, and the more complete educational development of our School population.

TOWN OF DURHAM.

The Town of Durham has, at considerable cost, erected a two-storey brick School-house, of very respectable dimensions, where all the circumstances will be more favourable, both for instruction and discipline, than under the previous arrangement. The new premises were opened shortly before the close of the year.

The staff is composed of a master,—who holds a First-class Provincial Certificate,—and two assistants, one holding a First-class County Certificate, the other a new Third-class ditto, under whose management there was good progress made, notwithstanding the serious drawbacks associated with the old premises.

The introduction of improved patent desks, with the hinged seat, would not only be more in keeping with the new premises, but would also greatly promote the comfort, health, and self-respect of the pupils.

The Town of Durham also possesses a Mechanics' Institute Library of some 500 volumes, which is largely patronized, and considerably enlarged from year to year.

COUNTY OF MIDDLESEX, EAST.

John Dearness, Esq—I have the honour to submit herewith my annual report on the Public Schools of the Eastern Inspectoral Division of the County of Middlesex, for the year ending 31st Dec., 1875, during which year I visited every School in the division (with one exception) twice, and several three times. At each visit, I record the name and standing, according to examination, of every child, which record, on being compared with the report of the previous visit, enables me to judge correctly of the progress of the Schools, as a whole, as well as of the individual pupils. The result of these comparisons shows fair progress in a large percentage of the Schools; in some excellent, in spite of three great drawbacks, which are so general as to deserve special mention and consideration:—

1. Irregularity of attendance.
2. Frequent changing of teachers.
3. The large proportion of untrained and inexperienced teachers.

In answer to the question, "What are the chief obstacles to the advancement of the School?" teachers, whether rural or town, almost invariably answer—"Irregular attendance," and certainly, under the existing conditions and customs, there is no greater obstacle. It disorganizes the classes, and discourages both teacher and pupils. It should be regarded as important that the child of from seven to twelve years of age, if not in some way incapacitated, should be in his place to receive instruction, as that the teacher should be present to impart it. The law compels a man, even having no children, to help in providing the means of furnishing the children of the section with an education; consequently (to be consistent), it should also enforce attendance of the children. In recognition of this fact, the compulsory education measure was embodied in the School Act of 1871 and 1874. It was carried out in several School Sections of the Division in 1875, and is likely to be enforced generally this year. Perhaps imposing a small rate bill for each unnecessary day's absence of children from eight to eleven years of age, might have the effect of insuring more regular attendance.

Frequent changing of teachers is admitted on all hands to be a great evil. However, cases do exist where a change is beneficial to both school and teacher. A teacher with undiminished zeal and fidelity should do one quarter more work, the second year he is in a school, than he did the first. If such be the case, you will agree with me that frequent changing of teachers is a great obstacle to the progress of education in this division, where it is known that not less than eighty-three per cent. of the schools had a change of teachers since my appointment about twenty months ago, and in this particular I am willing to wish, but have no reason to believe, we are worse of than other counties. Trustees are considerably to blame, but probably not more than the present system of granting third-class certificates.

To the great necessity of training or experience I referred at some length in my last annual report, and since that time have seen reason only to confirm the opinions therein expressed. It is astonishing that popular opinion does not become more rapidly educated to the urgent need of professional training for those who aspire to the exceedingly important and critical position of teachers of youth. For 1875, only 13.5 per cent. are reported as Normal School teachers. One of the best trainers is experience, but it has the disadvantage that it comes late—too late in fact, when we consider that, notwithstanding that there were three teachers of over thirty years' experience, one nearly twenty-five, and three others over fifteen, yet the average length of experience in the division (male and female) was only 4.75 years. Hence, the average teacher has hardly more than served his apprenticeship. How much more good might he have done if he had had his training at the beginning instead of at the conclusion of his labours! In rural sections, the average male teacher's experience was 5.8 years; females, 3.45. Our school system cannot become entirely successful until some means are adopted of ascertaining of every candidate for certificate how he can teach, as well as what he has learnt. It is a growing opinion that persons are allowed to take charge of a school at too early an age (males, 18; females, 16). It is the highest privilege and duty of a teacher to study, mould and improve the character of those entrusted to him. This cannot be as well done by one whose own character is not matured.

The following tabulated statistics compare favourably with those of last year:—

	Expenditure for School purposes.	Rate on Equal Co's Assessment per \$
Biddulph.....	\$ 5,561 61	\$0 0044
Delaware.....	2,975 90	.0039
Dorchester, N.....	6,959 39	.0044
London.....	14,701 64	.0034
Nissouri, W.....	6,921 52	.0043
Westminster.....	8,622 53	.0027
London East.....	6,436 64	.013
Lucan.....	2,424 56	.024
Petersville.....	878 83	.007

For building, Lucan paid \$1,157.75, and London East \$3,300.00, hence their higher rates.

Teachers in the various townships average:—

	Male Teachers.	Female Teachers.	Ave. Male.	Ave. Female.	Highest Salary Paid
Biddulph.....	6	5	\$380	\$262	\$480
Delaware.....	3	3	412	270	475
Dorchester, N.....	9	5	415	278	500
London.....	21	6	390	248	480
Nissouri, W.....	4	8	358	295	380
Westminster.....	7	13	390	290	500

London East paid two masters \$600 each; Lucan and Petersville, \$500.

The average male teacher's salary in the whole division is over \$400; females, about \$270. In Dorchester N., one lady teacher was engaged at \$500 per annum.

There is an increase over the preceding year of nearly 150 in the number of pupils enrolled. There is also a proportionate increase in the average attendance, notwithstanding that the winter of 1875 was so unfavourable to attendance, owing to its unusual severity and the deepness of the snow.

	No. enrolled.	Average.	Percentage reg. attendance.
Biddulph.....	986	429	44
Delaware.....	491	227	46
Dorchester N.....	1,336	509	38
London.....	2,153	953	44
Nissouri W.....	933	470	50
Westminster.....	1,738	765	44
London East.....	962	349	36
Lucan.....	277	150	54
Petersville.....	321	144	44

Total number enrolled, 9,297, of which there are 421 more boys than girls.

School Accommodation.

In the division, including village and separate Schools, there are 97 School-houses, 63 brick, 28 frame, and 6 log. The total estimated value of School property is \$131,477.00. During 1875, several of the Schools were improved by being furnished with new desks, and the black-board accommodation increased. Several sites were enlarged, fences built, and necessary conveniences provided. Excellent School-houses built in S. S. No. 13, (London Township), S. S. No. 2, Nissouri E., and in London East, the Anderson School, which was opened with great *celat* about 1st Oct. The two latter were furnished in the most modern and approved manner.

Section Assessments.

I desire again to draw attention to the disparity between School rates paid in different sections. It may be to some an unpleasant subject of consideration, nevertheless justice demands the direction of attention to it. During 1875 the two most heavily burdened sections were relieved; one a section of 1,300 acres of ordinary farm land was broken up and apportioned to adjoining sections; the other, No. 12, Biddulph, which was paying between three and four times as high a rate as the adjoining sections west, several of the children of which were being educated in No. 12, was formed into a union section. The following Table speaks for itself:—

	Lowest assessment of any Section.	Highest.
Biddulph.....	\$37,370	\$60,390
Delaware.....	31,870	51,150
Dorchester N.	35,300	112,525
London	71,469	236,000
Nissouri W.	39,320	52,255
Westminster	64,430	256,325

The assessments vary so much in different townships that this table does not afford comparison between sections in different townships, but only different sections in the same townships. Nissouri W. and Delaware are the most equally divided. In the former, there are only three sections that are not assessed between \$40,000 and \$50,000.

Our Teachers' Association exerts great influence for good, the results of its work are quite marked in many of the Schools, particularly in those taught by the more energetic and enthusiastic portion of the young teachers. During the year we had three well-attended and exceedingly useful meetings, held in this handsome chamber, for the use of which we are indebted to the kindness of this Council. At these meetings, questions on modes of teaching, organizing and governing Schools were discussed, the older teachers cheerfully giving the results of their long experience. Our membership, I am glad to say, is not confined to the county, nor even to the profession. All teachers in the division are *ex-officio* members, and any other persons of good character may become members, whether living in the county or city. Among the most useful members we number some of the city teachers. This building has been too small for our last two meetings, and as the next is likely to be much larger than either, at our request the City Council has kindly granted the use of the City Hall, in which place the Hon. Adam Crooks, Minister of Education, and others will address a public meeting on Friday evening, 9th June, and to which the Warden and members are cordially invited.

Perhaps I may refer at greater length in some future report to the subject of morals and manners. Suffice it to say, at present, that about 80 per cent. of the teachers open and close their Schools with reading a portion of Scripture and prayer. Several, in accordance with a hint dropped at the Association, open with reading and prayer in the morning, and close the day's exercises with singing and prayer.

In conclusion, I desire to bear testimony to the harmony and good feeling so generally evinced, and to the ready assistance and co-operation I have almost invariably received from teachers, trustees and people, in carrying out proposed school reforms.

COUNTY OF KENT.

Edmund B. Harrison, Esq.—The trustees had on hand at the commencement of the year 1875, a balance of \$7,878.86, and received during the year the following sums:—Government Grant, \$1,887.15; Municipal Grant, \$4,822.56; School Tax, \$43,018.41; and from all other sources, \$9,589.94½; making a total of \$70,196.92½.

The trustees expended for teachers' salaries, \$39,516.99; repairs, &c., of School-houses, \$3,025.05½; purchase of School-sites and building School-houses, \$14,619.40; Libraries, Maps, and Apparatus, \$127.73; Incidental expenses, \$5,408.54½; making a total expenditure of \$62,997.72.

The balance on hand on December 31st, was \$7,199.20½. The total amount of debts due by the trustees for building, was \$14,043.75; for all other debts, \$1,133.74.

The cost per annum for each pupil estimated on the number of pupils of all ages on the daily registers of the Public and Separate Schools, and the total expenditure was about \$5.82; in 1874, \$5.60. The cost per pupil, estimated on the average attendance, and the total expenditure, was \$7.70; in 1874, it was \$7.50; and in 1873, it was \$7.75.

The cost per pupil, estimated on the number of pupils of all ages on the daily Registers, and the amount paid to teachers, was \$3.65; in 1874, it was \$3.08. The cost per pupil, estimated on the average attendance, and the amount paid to teachers, was \$4.83; in 1874, it was \$5.13.

The number of pupils of all ages enrolled on the daily registers, was 10,820, of whom 10,139 were between the ages of 5 and 16.

About 11 per cent. attended less than 20 days; about 22 per cent. less than 50 days; 29 per cent. less than 100 days; 22 per cent. less than 150 days; 14 per cent. less than 200 days; and about 2 per cent. over 200 days.

Including the Town of Bothwell, there were 127 teachers employed on the 31st day of Dec., or the close of the year. Two of these held 1st Class Provincial Certificates; twenty-one, 2nd Class Provincial Certificates; one, a 1st Class Old County Board Certificate; one, a 2nd Class County Board Certificate; ninety-five, 3rd Class new County Board Certificates, and seven, Interim Certificates.

The highest salary paid to a male teacher, not including the Town of Bothwell, was at the rate of \$660 per annum, and the average was \$388.97, being an increase of \$27.24. The average salary paid to a female teacher was \$264.32, being a decrease of \$7.91.

I do not think it would be advisable at the present time (notwithstanding the advice of the press), to refuse the renewal of Third-class Certificates to deserving teachers. To act otherwise, now, would be the means of obliging Trustees to reject many who have some experience, and are doing fair work, and to employ those who have little or no experience. Neither would it be judicious to create a Grade C for the 2nd Class, as the present Grade B is sufficiently low for a Provincial Certificate. The County Boards have it in their power, after giving due notice, to increase the standard, by making the examinations more stringent, which will be done very soon.

What is required at the present time, in my opinion, is not a greater number of subjects, but a more thorough knowledge of the present subjects, and a greater aptitude in imparting them. If the value of the pupil teacher system were better understood, it would be soon adopted in this country, and our future teachers would have the means of being better trained.

Unless the remuneration given to teachers is more in accordance with what is given in other professions, it will be useless to expect that teachers will remain in a profession which offers smaller remuneration than other professions for the exercise of every "nerve and sinew of mental power," and the "use of the peculiar talents of nearly every other honourable profession."

The compulsory clause having been enforced during the past year in a few sections, will gradually extend to other sections.

During the past year several new and commodious School-houses have been erected. The school accommodation is now sufficient for about 72 per cent. of the resident population between the ages of 5 and 16 years.

The increased value of property in any place, amply repays the necessary expense and trouble incurred in planting shade trees; but in a country like this it is necessary for the comfort of the pupils, and an important factor in their education, to have the play-grounds planted at least with suitable shade trees. This has been done in a few instances, but it should be done in so many instances as to render it a matter of impossibility to find a single play-ground without its shade trees.

TOWN OF CHATHAM.

Rev. A. McColl.—I have to state in general, that the progress which the Public Schools have made is marked, and such as gives ground for much promise for the future. †

It is not only necessary that a system of education be good, but that it should be in-

telligently conducted, and vigorously worked. To attain this result, the public mind must be so educated as that those influences will be guarded against, and weakened, if not wholly prevented, which, even under a free Government, interfere with its working, and render it less successful than otherwise it would be. This is also a matter of time. Where too much is expected, there must be disappointment. When a piece of machinery is complicated, a slight defect may entail a very serious loss; but when it bears the marks of wisdom and sagacity, there are elements called into exercise which tend to correct or remove the evil, or at least, diminish it; and submission to a lesser evil, and only temporary, is less difficult when it is seen that it cannot be immediately removed without inflicting a greater inconvenience. Where there is vitality there is growth, and time is necessary to develop its energies and produce its appropriate benefits.

Chatham has not escaped the fluctuations to which other towns, as well as cities, are liable. Commercial depression, while it affects every other walk of industry and department of activity, exempts not Schools from the natural results.

As the Separate School (R. U.), has attained to an unwonted degree of efficiency, from its capacities for accommodation and otherwise, there is, to a larger extent than formerly, a withdrawal from the Public Schools of a class which was found scattered through them all. The Princess St. School (Colored), was exposed to some disadvantage during the past year, in consequence of the protracted illness of Miss Harvey, who was at last constrained to resign her position as teacher. Miss Tillman, who succeeded her, unexpectedly abandoned her charge, and removed to a foreign country.

The Board sustained, in the death of Mr. Alex. Park, the loss of an efficient and promising teacher.

There have been admitted into the High School, Chatham, during the year 1875, six pupils from the Public Schools of this town. There was no addition made to the library during the past year; there was, however, a certain sum put in the estimates for the present year.

The examinations are quarterly, and occupy, each, about two weeks.

COUNTY OF ESSEX. No. 1.

Theodule Girardot, Esq.—I have the honour to submit to your consideration the following Report of the Public and Separate Schools of Division No. 1, Essex, for the year 1875.

Three new School-houses were built this year, one in S. S. No. 1, Anderson. This section is composed of coloured people, for the most part poor, and who have made great sacrifices to put their School on a good footing. One in No. 1, Sandwich West. This section is one of the most important in the Township, in regard to School population; the old School-house not being according to law, the Trustees felt that their School was behind those of the neighbouring School Sections in regard to School accommodation. Being also anxious to comply with the law, they made up their minds to build a good School-house. They were supported by a respectable number of ratepayers; but I am sorry to say, that they met a strong opposition from some others. Notwithstanding, they succeeded in building one of the best Schools in the Township. To the credit of the section, it is my duty to state, that the money necessary to build the said School, was all raised in the same year, and that the great majority of the ratepayers are now satisfied with what has been done.

The third new School house is a handsome brick building. It was built through the energy of the Rev. Father Fitzpatrick, by the supporters of the R. C. S. S. of No. 4, Maidstone.

Two new S. S. very much needed, have been formed in Tilbury West; the Trustees of those sections are now building good School-houses, which will be ready early in spring. I have already mentioned in my former reports, that this Township holds one of the first ranks in regard to education, among the Townships of Essex. I think it is my duty to add, that the Trustees of School Section No. 5, have repaired and put their School in a state which leaves nothing to be desired, and that the Township Council have appropriated \$655.00 for Municipal School Grant, when they were only required to appropriate \$353.00. Their grant last year was also nearly double the Government grant. Another new School Section has also been formed in the Township of Maidstone. The zealous Trustees of this new School Section are putting up a substantial School-house which will soon be ready to receive

the pupils of the section. The Trustees of School Section Nos. 1, 3, and 5, of the same Township, have built additional rooms for assistant teachers* which were very much needed in those populous sections.

I am happy to say, that after 1876 there will not be two School-houses in North Essex, which will not be according to regulations. The increase in the average attendance has been, during the first six months of 1875, 112, and during the last six months, 58 over the same attendance during 1874.

The increase of 1874 over the previous year was larger than that of 1875; but this can be accounted for if we consider that the many and heavy crops we had, caused the farmers to keep their children at home to work. However, I regret to say that there is a great neglect amongst some of them to send their children to School; some do not send them at all, others keep them at home for a trifle. When I consider that we have a school population in the rural districts of North Essex of 5,864, and that only 3,998 are recorded on the School registers as having attended School, more or less, and that about 250 between seven and twelve did not attend School at all, or went less than 80 days, I cannot help saying that, notwithstanding all that has been done, we have yet much to do in regard to education.

I have done all I could to induce the School Trustees to put in force the compulsory clause, but it has been in vain. The majority of them are well disposed, but they do not seem to like to act on the subject. Several promised to do their duty this year; I hope they will fulfil their good intentions, for I think that those parents who deprive their children of the welfare of education are their greatest enemies.

The Teachers' Institutes that I have held for the second time at Belle River and at Sandwich, have done a great deal of good. All the teachers of my inspectorate, with but a few exceptions, have attended these Institutes, where the best methods of teaching the different branches required by the programme were ably discussed. The teachers took a great interest in these discussions. I have no doubt that our Schools will derive much benefit from the uniformity of method of teaching, which will necessarily follow from these Conventions.

Our teachers are so well-disposed, that it is a pleasure for me to continue the holding of these Institutes every year. Most of the teachers of North Essex have 3rd class certificates, only a small number have 2nd and 1st class. The number of qualified teachers not being sufficient to fill all our Schools, I had to give a few interim certificates, in order to fill vacancies. I have much pleasure in stating, that, as a general rule, our 3rd class teachers are doing well; many of them manage their Schools in a manner which leaves nothing to be desired. It is true, that a few stick too much to the old routines, but I am happy to state that this said class of teachers is decreasing every year, for the reason that they receive encouragement neither from the School Trustees, nor from the Inspector. As it is nearly impossible for the 3rd class teachers to obtain a higher grade without attending the Normal School, and our county being so far from Toronto, I could only induce a few to attend it. Otherwise, the lady teachers generally get married after a few years teaching, so they do not think it worth while to go to Toronto. Consequently we will have to be contented with 3rd class teachers for years to come. I am also pleased to state that, although times are very hard, the salaries of the teachers have remained unchanged.

Sandwich Town.—The Schools in the Town of Sandwich continue to be conducted in a very creditable manner. The Board of School Trustees are always well-disposed, and have erected in the course of the year, a good School-house, for the use of the coloured people; they have also erected two good sheds for the use of School No. 1 and No. 2. I believe that the Town of Sandwich has nothing to envy in regard to education, to any other municipality of its size.

R. C. Sep. S. of Amherstburgh.—This School is continuing to progress. In regard to the management of the junior department of boys and the two departments of the girls, by the good Sisters of J. M. J., I cannot but repeat what I have said in my previous reports. The R. C. of Amherstburg are really lucky to have such ladies to take care of their school. The Senior Male Department has progressed remarkably well under the care of M. Irénée Girard, the head teacher. Through the zeal of the Rev. Dean Laurent, who spares nothing to encourage education, a splendid school-house, 80 by 30, has been erected in the course of the year, for the use of the male departments. The building is

quite an ornament to the town, and cost between four and five thousand dollars. The school trustees, the supporters of the school, the St. John the Baptist and Temperance Societies have nobly supported their worthy pastor in his undertaking. Although they had, as a separate school, to struggle with many difficulties, only a small balance remains due on the building.

In conclusion, I cannot refrain from expressing the great satisfaction I have always experienced from the cordial co-operation of the teachers, trustees, and all other friends of education, in endeavouring to advance the educational interest in North Essex.

CITY OF KINGSTON.

Professor N. F. Dupuis, M.D.—Condition of Library.—The library is sufficiently large for the accommodation of the city. It is well kept and extensively used. The books are gradually replaced or augmented by new ones purchased from time to time, some \$40 or \$50 being set apart yearly for that purpose.

School Accommodation.—This question as asked in each report is scarcely applicable to cities, since it is not the accommodation furnished by each individual School building which we have to take into account, but the accommodation furnished by the whole.

In this sense I think there is accommodation at present, but there is certainly not much to spare. Should the accommodation at any time become insufficient, I have no doubt that the Board of Trustees would immediately see that an additional amount was furnished.

Obstacles to the Advancement of the School.—I am not aware that there are any particular obstacles to the advancement of the Schools, except occasional truancy and parental indifference. But on the other hand I think that the people generally are quite satisfied, and in many cases highly pleased, with the progress which the Schools have made during my term of Inspectorship.

During the whole period of my Inspectorship I promoted the children from class to class, and, as occasion might require, from School to School, by personal examinations held half-yearly for that purpose. These were different from the general examinations, and dealt with the higher grades in the classes only.

During the year 1875 I promoted in this way about 450 pupils.

On the evening preceeding the opening of the summer holidays, I arranged a school exhibition in the City Hall, at which all the promoted children were present, and in the exercises of which they all took part. The exercises consisted of reading, recitations, educational exercises and singing, and were received in the most enthusiastic manner by the audience. I believe that exhibitions of that character please both parents and children, and tend very strongly to increase the popularity of the schools.

At the close of 1874 I tendered my resignation, but the School Board refused to accept it, and I consented to act for another year. At the close of 1875, however, finding that I could not attend to school work and my professional duties at the same time, I again tendered my resignation and insisted upon its being accepted. The Board then accepted my resignation, and appointed Mr. W. G. Kidd as my successor.

And thus, after a service of four years, in which I believe I have conscientiously done my duty, and have endeavoured (and have to a satisfactory extent succeeded in my endeavours) to raise the schools to a position above that in which I found them, my connection with them ends.

APPENDIX C.

MINUTES OF THE COUNCIL OF PUBLIC INSTRUCTION.

During the year 1875, the following gentlemen were elected Members of the Council of Public Instruction:—Professor Daniel Wilson, LL.D., by the High School Masters, *re-elected*, and David Mills, Esq., M.P.P., by the Public School Inspectors, *vice* Samuel Casey Wood, Esq., M.P.P., retired.

MEETING, 2ND FEBRUARY.

No. 383.]

COUNCIL ROOM, EDUCATION OFFICE, February 2nd, 1875.

The Council met, pursuant to notice, at three o'clock p.m., the Very Reverend H. J. Grasett, B.D., in the chair.

Present.—The Chairman.

The Chief Superintendent of Education.

The Reverend J. Jennings, D.D.

His Grace the Most Reverend J. J. Lynch, D.D.

Hammel M. Deroche, Esquire, M.A., M.P.P.

James Maclellan, Esquire, M.A., Q.C., M.P.

The Reverend J. Ambery, M.A.

The Reverend S. S. Nelles, D.D.

The Reverend A. Carman, D.D.

Daniel Wilson, Esquire, LL.D.

Samuel C. Wood, Esquire, M.P.P.

Goldwin Smith, Esquire, M.A.

1. The following communications were laid before the Council :—

2089. From the Very Rev. Principal Snodgrass, Kingston, on his absence.

14548. From Mr. Charles Camidge, of Niagara, referring to previous correspondence.

14431. From the Inspector of Public Schools, Toronto, on the introduction of books on Drawing.

14911. From Messrs. James Adam & Co., Toronto, submitting an Historical Chart.

15454. From Mr. John Lovell, Montreal, on the revision of the General Geography.

108. From the Rev. Professor Young, in answer to a communication respecting the revision of the English Grammars.

211. From Miss Kate Hagarty, Toronto, respecting her appointment in the Model School.

15523. From Messrs. J. Campbell & Son, Toronto, respecting the revision of their Geography.

829. From the same, submitting a number of Text Books for approval.

1796. From the same, with specimens of binding for First Book, for approval.

625. From Mr. John Lovell, applying for permission to print the authorized Readers and Spelling Book.

283. From the same, on the Elementary Arithmetic and History of Canada.

1850. From the same, on the revision of Geographies.

1950. From the Rev. J. W. Shearer, submitting his "Combination Speller," and testimonials.

2009. From Messrs. Adam, Stevenson & Co., submitting books for approval.

1122. From the High School Inspectors, respecting an allowance for travelling expenses.

1861. From the Principal of the Normal School, on the course of study.

Also, applications from nine teachers for pensions.

2. The report (2018) of the Committee on Regulations and Text Books was read, and on motion of the Chairman (Professor Wilson), seconded by the Chief Superintendent, was adopted, the rule requiring a day's notice being suspended.

3. The Chief Superintendent gave the following notices of motion :—

1. That the Books for free High and Public School Libraries, and for Prizes in the High and Public Schools shall be supplied by the Education Department to Municipal and School Corporations at cost.

2. That Mr. John Lovell be permitted to print the series of five Readers and the Spelling Book or Companion to the Readers, upon the same conditions as other publishers.

3. That the application of the Inspectors of High Schools be recommended to the favourable consideration of the Lieutenant-Governor in Council; and that a sum of not less than two hundred dollars be granted to each of the Inspectors for travelling expenses.

4. Dr. Wilson gave the following Notice of Motion :—

“That a special Committee be named by the Council to take into consideration the working of the Book Depository, in reference to the supply of the best class of books for prizes and School libraries ; and also in reference to the general interests of the Province with regard to the free circulation of literature through the ordinary trade channels, with power to call for all requisite information from the officers of the Education Department.

5. Prof. Smith gave the following Notices of Motion :—

1. That the Council desire that the School Books sanctioned by them should be per- vaded, wherever morality is concerned, by the sentiment of a Christian community ; but they do not consider themselves authorized, or deem it within the line of their duty, to circulate any statements or religious doctrine or anything in the nature of theological dis- cussion. That this be an instruction to the Text Book Committee.

2. That the Committee on Text Books be authorized, when any change of Text Books shall have been approved by the Council, to give notice through the *Journal of Education* of the proposed change.

6. Mr. MacLennan gave the following Notice of Motion :—

That the names and prices of books submitted by booksellers or others to the Council, and approved, be published in the next number of the *Journal of Education*, with the dates at which the same books were received at the Department, and laid before the Council for examination.

7. *Ordered*, That with respect to the communication of Mr. Camidge, the Council, having regard to what has already been done in the matter therein referred to, do not deem it necessary to take further action.

8. *Ordered*, That a communication be sent to Mr. Shearer, thanking him for his letter and the book that he has submitted ; but that he be informed that the Council do not regard it as within the line of their duty to examine and pronounce an opinion upon any inventions of the kind.

9. *Ordered*, That the specimens of binding submitted by Messrs. Campbell for the first book be not approved, the Council preferring the style formerly sanctioned.

10. The other letters on Text Books were referred to the Committee.

11. The following applications for pensions from the Superannuation Fund were con- sidered and approved.

709. Mr. Timothy D. Coglon, of Kingston, 29 years' service.

15325. Mrs. Elizabeth Greerson, of Port Hope, 27 years' service.

14749. Mr. Levi T. Hyde, of Haldimand, 17 years' service. Conditional on an annual medical certificate being produced.

15467. Mr. Michael McAuliffe, of Maidstone, 23 years' service.

14356. Mrs. Isabella McQueen, of Winnipeg, 16 years' service.

830. Mr. Jacob Tyndall, of Ottawa, 20 years' service.

11736. Mr. Chas. F. Russell, of Napanee, 19 years' service. Conditional on an annual medical certificate being produced.

14543. Mr. Robert H. Wickman, of Camden East, 33 years' service.

1909. Mr. William Watson, of Weston, 24 years' service.

12. It was then resolved that the rule requiring a day's notice be suspended, and that the Council do now proceed with the consideration of the motions of which notice was given this day.

And the first four motions having been considered, it was

13. *Ordered*, That a special Committee be named by the Council to take into considera- tion the working of the Book Depository in reference to the supply of the best class of books for prizes and school libraries, and also in reference to the general interests of the Province with regard to the free circulation of literature through the ordinary trade channels ; with power to call for all requisite information from officers of the Education Department ; and pending such investigation, that the Department continue to act on the principle hitherto in use, with regard to prices of books.

That such Committee consist of the Chief Superintendent, Mr. Goldwin Smith, Professor Ambery, Mr. Deroche, Mr. Wood, Mr. MacLennan, and the mover, Professor Wilson.

14. *Ordered*. That Mr. John Lovell be permitted to print the series of five Readers, and the Spelling Book or Companion to the Readers, upon the same conditions as other publishers.

15. *Ordered*, That the application of the Inspectors of High Schools be recommended to the favourable consideration of the Lieutenant-Governor in Council; and that a sum of not less than two hundred dollars be granted to each of the Inspectors for travelling expenses.

16. *Adjourned* to Wednesday, 3rd February, at three o'clock p.m.

(Certified), ALEX. MARLING, (Signed), H. J. GRASETT,
Clerk of the Council. Chairman.

MEETING, 3RD FEBRUARY.

No. 384. COUNCIL ROOM, EDUCATION OFFICE, 3rd February, 1875.

The Council met, pursuant to adjournment, at three o'clock p.m., the Very Rev. H. J. Grasett, B.D., in the chair.

Present.—The Chairman.

The Chief Superintendent of Education.
The Reverend J. Jennings, D.D.
James Maclellan, Esquire, Q.C.
The Reverend S. S. Nelles, D.D.
The Reverend A. Carman, D.D.
Daniel Wilson, Esquire, LL.D.
Samuel C. Wood, Esquire, M.P.P.
Goldwin Smith, Esquire, M.A.

1. The minutes of the preceding meeting were read and approved.
2. The following communications were laid before the Council :—

284. Being the Report of the Central Committee of Examiners, naming the successful competitors for the medals for 1874.

15111. From the Principal, on an appointment in the Model School.

2090. From the Rev. J. W. Shearer, respecting his proposed lecture.

3. The Rule requiring notice having been suspended, it was

Ordered, That the medals granted by the Council to the candidates for Public School Teachers' Certificates, who passed the best examinations in 1874, be awarded as follows :—

The Gold Medal	Mr. Isaac James Birchard.
“ First Silver Medal.....	Mr. Archibald Smirl.
“ Second do	Mr. Joseph Standish Carson.
“ First Bronze Medal.....	Mr. Morris Johnson Fletcher.
“ Second do	Mr. Edwin D. Parlow.

4. *Ordered*, That the appointment of Miss Kate Hagarty as third assistant teacher, in the Girls' Model School, temporarily made by the Chief Superintendent, be confirmed.

5. The British History and the Outlines of General History, with the manuscript revision thereof by the Committee, were laid before the Council and approved.

6. The Report (2,106), of the Committee on the Course of Study in the Normal School was read and adopted.

7. The motions of which notice had been given by Professor Smith having been considered, it was

Ordered, That the Council desire that the School Books sanctioned by them should be pervaded, wherever morality is concerned, by the principles and sentiments of a Christian community, but they do not consider themselves authorized, or deem it within the line of their duty, to sanction any statements of religious dogma of a sectarian character, or anything in the nature of theological discussion. That this be an instruction to the Text Book Committee.

8. *Ordered*, That the Text Book Committee be authorized, when any change of Text Books shall have been approved by the Council, to give notice through the *Journal of Education*, of the proposed change.

9. The rule requiring a day's notice having been again suspended, the following notice of Professor Smith was adopted.

Ordered, That the following notice be inserted in the *Journal of Education* :

"The Council of Public Instruction desire to make it known to authors and publishers, that they have at present before them no History of Canada which appears to meet the requirements of Schools ; and that they would gladly take into consideration the claims of any new work on the subject, which might be submitted to them with a view to its adoption as a Text Book.

10. The minutes were read and approved.

11. *Adjourned*.

(Certified),

ALEX. MARLING,
Clerk of the Council.

(Signed),

H. J. GRASETT,
Chairman.

MEETING, 4TH MAY.

No. 385.]

COUNCIL ROOM, EDUCATION OFFICE, May 4th, 1875.

The Council met, pursuant to notice, at three o'clock p.m., the Very Reverend H. J. Grasett, B.D., in the chair.

Present.—The Chairman,

The Chief Superintendent of Education,
The Honourable William McMaster,
The Right Reverend T. B. Fuller, D.D.,
James MacLennan, Esquire, Q.C.,
The Very Reverend William Snodgrass, D.D.,
The Reverend John Ambery, M.A.,
The Reverend S. S. Nelles, D.D.,
Daniel Wilson, Esquire, LL.D.,
Samuel C. Wood, Esquire, M.P.P.,
Goldwin Smith, Esquire, M.A.

1. The following communications were laid before the Council :—

- 2583 From the Treasurer of the Law Society, acknowledging receipt of letter.
- 3312 From Mr. W. Warwick, on the publication of certain Text Books.
- 6951 From Messrs. J. Campbell & Son, for permission to print certain books.
- 2781 From Mr. B. M. Brisbin, B.A., for a certificate of eligibility as Head Master.
- 13168 4168 From Mr. J. B. Hamilton, M.A., to the same effect.
- 6118 From Mr. R. Unsworth, B.A., to the same effect.
- 6851 From Mr. John R. Ross, M.A., to the same effect.
- 4107 From the Honourable the Treasurer of the Province, replying to letter respecting the salaries of High School Inspectors.
- 5595 From Rev. W. H. Withrow, for information as to the Canadian History.
- 5471 From Mr. C. P. Simpson, submitting his Geographic Charts.
- 8412 From the same, on a system of Phonography.
- 2660 From the Agent of Adam's Historical Chart.
- 5796 From Messrs. Copp, Clark & Co., submitting certain books.
- 3666 From the Education Department, London, on the subject of English Grammar Text Books.
- 6119 From the High School Inspectors, being a scheme for the payment of the High School Grant.
- 3368 From the High School Board, Drummondville, recommending amendments to the Regulations.

- 4265 From the High School Board, Goderich, recommending amendments to the Regulations.
 5616 6928 From Mr. W. Badger, on a proposed Arithmetic.
 4031 From Professor Roberts, on the Agricultural Text Book.
 3715, 4715, 5620 From Mr. J. Jepson, on the Tonic Sol Fa System, and report thereon.
 3668 From the Science and Art Department, London, on Drawing Books.
 5184 From the Toronto Teachers' Association, on the Text Books on Geography.

2. Reports of the following Committees were presented :—

(6508) On Regulations and Text Books.

(7042) Special Committee on Supply of Library and Prize Books.

3. The Rule requiring notice of motion was suspended.

Ordered, That Messrs. Campbell be informed that they will be allowed to publish the Arithmetical Text Books, but that the subject of English Grammar was under the consideration of the Committee.

5. *Ordered*, That the Chief Superintendent be empowered on behalf of the Council to grant certificates to candidates for Head Masterships in High Schools, who have complied with the Regulation already adopted.

6. *Ordered*, That application for an allowance for the travelling expenses of the High School Inspectors be again made to the Government.

7. *Ordered*, That the Public School Board, Toronto, be informed that the time fixed for the High School Entrance examinations was adopted on the recommendation of the High School Inspectors, after full consideration, as the time most convenient generally for the purpose throughout the Province, and the Council do not feel it expedient to change it.

8. *Ordered*, That on the recommendation of the Chief Superintendent, the following pensions to superannuated Teachers be granted :—

(3617) Wm. Bradley, of Fonthill,	28 years' service.
(4661) John Bruce, Markham,	27 do
(6970) Benj. Burkholder, Waterloo S.,	28 do
(3796)* Asahel B. Clark, Aurora,	17 do
(6256)* James C. Clark, Mountain,	26 do
(3308) Thomas Foley, Louth,	40 do
(4662) Robt. Graham, Goulbourne,	25 do
(5463) Henry Greer, Gower S.,	26 do
(4232) James Irvine, Morris,	31 do
(5034) Wm. Hy. Janson, Bastard,	28½ do
(6571) John S. Kingston, Seneca,	10 do
(5592) A. B. C. McConnell, Gwillimbury,	9 do
(2287)* John McMahon, Eramosa,	17 do
(5326)* Peter F. Neilson, Ernestown,	16 do
(6583) Wm. John Ridley, Mountain,	20 do
(5175)* Samson Roberts, Whitby,	28 do
(6117) Wm. Reid Rodway, Simcoe,	16 do
(5823) Edward Rothwell, Goderich,	40 do
(4763) Solomon P. Smith, Harvey,	35 do
(5865) James Spence, Streetsville,	17½ do
(2011) Daniel Sullivan, Peterboro'.	22½ do

9. On the motion of Professor Wilson, seconded by the Chief Superintendent, the Report of the Committee on Regulations and Text Books was adopted, also

The following Resolutions to carry the recommendations of the Report into effect :

a Ordered,—That the list of books recommended by the Committee on Regulations and Text Books to be added to the list of approved text books, be added thereto, and that those recommended to be struck off the list be so dealt with.

* The persons whose names are marked thus (*) must furnish an annual medical certificate of continued disability.

To be added.

- Lessons in Elementary Physics, by Balfour Stewart, LL.D.
 Physics, by Balfour Stewart, LL.D. (Science Primers.)
 Elementary Mechanics, including Statics and Dynamics, by J. B. Cherriman, M.A.
 Elementary Statics, by J. Hamblin Smith, M.A.
 Elementary Hydrostatics, by J. Hamblin Smith, M.A.
 Outlines of Natural History, by H. Alleyne Nicholson.
 Physiology (Science Primers), by M. Foster, M.A., M.D.
 Lessons in Elementary Physiology, by Professor Huxley, F.R.S.
 Physical Geography, by Archd. Geikie, LL.D. (Science Primers.)
 Geology, by Archd. Geikie, LL.D. do.
 Introductory Text Book of Physical Geography, by David Page, F.R.S.E., (for High Schools).
 Chemistry, by H. E. Roscoe, (Science Primers).
 History of English Literature, by Wm. Spalding, A.M.
 Craik's English Language and Literature.
 Freeman's European History.
- In the Department of Classics the following books are recommended:—
- Latin*.—Dr. Wm. Smith's Series, I, II, III, IV, and his smaller Grammar of the Latin language.
 Arnold's First and Second Latin Books; the English editions, or revised and corrected by J. A. Speneer.
 Harkness' Introductory Latin Book.
 do Latin Reader.
 do Latin Grammar.
 Bryce's Series of Reading Books.
 J. Esmond Riddle's Latin Dictionary.
- Greek*.—Dr. William Smith's *Initia Græca*.
 Curtius' Smaller Grammar.
 Farrar's Greek Syntax.
 Greek Lexicon, Liddell & Scott, smaller and larger editions.

Ancient History, Geography, and Antiquities.

- Schmitz's Ancient History (retained at present).
 Pillan's First Steps in Classical Geography.
 Dr. W. Smith's Smaller Classical Dictionary of Biography, Mythology and Geography.
 Dr. W. Smith's Dictionary of Greek and Roman Antiquities.

Drawing.

Mr. Vere Foster's two series of Drawing Books; but the Council desire to invite the attention of teachers to the great benefits recognized as resulting from teaching children at an early stage to draw from the objects themselves, instead of from drawings.

The following are struck off the list of approved Text Books:

- Peck's Ganot's Natural Philosophy.
 Davidson's Animal Kingdom.
 Collier's History of English Literature.
- b. Ordered*, That the plan recommended by the Inspectors, for the distribution of the moneys, by results, to High Schools be adopted, and ordered to be carried out.
- c. Ordered*, That the Regulations prepared and submitted by the Chief Superintendent for granting certificates to teachers in new and remote Townships, be adopted.
- d. Ordered*, That the revised scheme of entrance Examinations for the Normal School, and the revised course of study, as reported, be adopted.
- e. Ordered*, That the Examinations for the Normal School Pupils proceed for the present year at the usual time; but that any of the Normal School Students who desire to compete

for the Provincial or other medals must do so at the Midsummer Competition, along with all other candidates. Also, that in future the examination of Normal School Students and of Teachers generally, take place at the same time and on the same papers.

f. Ordered, That the Government be requested to take the requisite steps for carrying out the principle already sanctioned by the Council, that Second Class certificates should only be granted on an examination by the Central Committee, by taking the requisite steps for making this law; and also that it be enacted that the Summer vacation shall be from the 1st, instead of the 15th, of July to the 15th of August, for the Public Schools.

g. Ordered, That the Principals of the Normal Schools be empowered, after consultation with their colleagues, to remove from the Roll the names of any students who show incapacity for the teaching profession; or who have been reported by the teachers of the Model School as unlikely to receive even the lowest mark upon a Normal School certificate.

h. Ordered, That lists of subjects of study, and the revised Limit Table be printed and pasted inside the Text Book boards [on the plan suggested by the Inspector of Halton.]

10. Ordered, That the Chief Superintendent be requested to convey to the Inspectors of High Schools the acknowledgments of the Council for the care and labour bestowed by them in preparing the scheme for applying the principle of payment by results, to Collegiate Institutes and High Schools.

11. Ordered, That the attention of the Committee on Regulations and Text Books be directed to the Text Books used in Roman Catholic Separate Schools.

12. Adjourned to Tuesday, May 18th, at three o'clock.*

(Signed)

H. J. GRASSETT,
Chairman.

MEETING, 19TH MAY.

No. 386.

COUNCIL ROOM, EDUCATION OFFICE, 19th May, 1875.

The Council met, pursuant to notice, at three o'clock p.m., the Very Reverend H. J. Grasset, B.D., in the chair.

Present.—The Chairman.

The Chief Superintendent of Education.

The Rev. J. Jennings, D.D.

His Grace the Most Reverend J. J. Lynch, D.D.

The Honourable W. McMaster.

Hammell M. Deroche, Esquire, M.P.P.

James Maclellan, Esquire, M.A., Q.C.

The Very Reverend W. Snodgrass, D.D.

The Reverend J. Ambery, M.A.

The Reverend S. S. Nelles, D.D., LL.D.

The Reverend Bishop Carman, D.D.

Daniel Wilson, Esquire, LL.D.

Goldwin Smith, Esquire, M.A.

1. The minutes of the preceding meeting were read and approved.

2. The following communications were laid before the Council:—

7063. From the Registrar of University College, Toronto, reporting the resignation of the Rev. Dr. McCaul, as the representative of the College in the Council of Public Instruction, and the appointment of Professor Cherriman in his place.

7406. 7602. From the High School Inspectors, on the outline of Programme.

7487. From Mr. S. C. Wood, on his absence.

7636. From the Head Master of the High School, Markham, on mode of apportioning the grant.

* In consequence of the funeral of His Excellency the late Lieutenant-Governor on the 18th, the meeting was postponed to the 19th May.

7622. From Mr. W. Warwick, on the privilege allowed to publishers to print the Readers.
7623. From the same, applying for permission to publish certain Text Books.
7584. From Messrs. Copp, Clark & Co., on publishing the authorized Arithmetics, and the regulations affecting the same.
7583. From the same, applying for permission to print certain Text Books.
7587. From Mr. C. Camidge, referring to previous correspondence.
7403. From the Hon. Provincial Treasurer, acknowledging receipt of letter.
7398. From Messrs. J. Campbell & Son, on permission granted certain publishers to print the Readers.
7667. From the Hon. the Attorney-General, respecting the Ottawa Normal School.
- Also, several applications from candidates for positions in the Normal School.
3. The letters from Messrs. Warwick, Campbell & Son, and Copp, Clark & Co. were referred to a Committee, to report thereon at the next meeting, such Committee to consist of Messrs. MacLennan, McMaster and Deroche.
4. The letter of the Head Master of Markham High School was referred to the Committee on Regulations and Text Books.
5. Reports from the following Committees were laid before the Council :—
- On Regulations and Text Books.
On Library and Prize Books.
6. The Rule respecting a day's notice of motion was suspended.
7. *Ordered*, That the Report of the Committee on Regulations and Text Books be received.
8. *Ordered*, That the Report of the Committee on Library and Prize Books be adopted.
9. *Ordered*, That the School Trustees be instructed not to give any pupil, as a prize, any religious work not previously approved of by the parent or guardian of the pupil.
10. *Ordered*, That the Rules of the Normal School, now recommended by the Committee on Regulations, be enacted.

(*Printed elsewhere.*)

11. *Ordered*, That Dr. Morris's English Grammar (Primer) be added to the list of approved Text Books.

12. *Ordered*, That the Council having laid down a principle which precludes the introduction into the Text Books used in Public Schools of religious dogma, opposed to the tenets of any Christian denomination, and having removed from those Text Books everything which had been pointed out to them by the Roman Catholic Archbishop of this Province, as offensive to the feelings of Roman Catholics, think it right also to state what they conceive to be their duty with regard to the Text Books to be used in the Separate Schools. With respect to these books, the Council do not consider themselves responsible for any statements of religious doctrine, or for any expression of religious feeling, nor will they interfere with anything to which these terms may be fairly applied; but they consider themselves responsible for the historical veracity of the books, and for their consistency with civil duty, and the concord which ought to prevail, and which it is one object of a system of public education to promote, among all classes of Her Majesty's subjects.

13. *Ordered*, That the amendments and additions to the regulations for granting certificates in remote townships, now recommended by the Committee, be approved. The regulations will accordingly be as follows :—

(*Printed elsewhere.*)

14. *Ordered*, That the same gentlemen who acted as scrutineers last year, to examine and report upon the ballots for the election of members to this Council, be appointed and requested to perform the same duties this year, for the election of representatives respectively by Inspectors of Public Schools, and the Head Masters and Teachers of Collegiate Institutes and of High Schools.

15. *Ordered*, That the notice to be given under section 27, sub-section 9, of the High School Act, relating to the election of members of this Council, shall be by advertisement, to be published forthwith, for two successive issues, in the *Journal of Education*, and also three times a week, for two weeks, in each of the following Toronto daily newspapers, namely:—The *Toronto Globe*, *Mail*, *Leader*, and *Liberal*.

16. *Ordered*, That applications be received until 1st July next, from candidates for Masterships in the Normal School at Ottawa, which is to be opened in September of the current year. The applications, with testimonials, must be addressed to the Chief Superintendent of Education, Toronto.

17. *Ordered*, That when this Council adjourns, it adjourns to meet the first Wednesday in July.

Adjourned.

(Signed) H. J. GRASSETT,
Chairman.

Certified,
ALEX. MARLING,
Clerk of the Council.

PAYMENT BY RESULTS.

THE SUGGESTIONS OF THE HIGH SCHOOL INSPECTORS,

(Considered and approved by the Council of Public Instruction, May 4th, 1875.)

For applying the principle of "Payment by Results," to Collegiate Institutes and High Schools, under the authority of the following Section of the High School Act:—

"66. The High School Grant shall be exclusively applied in aid of High Schools and Collegiate Institutes conducted according to law, and shall be apportioned to each High School and Collegiate Institute, upon the basis, as compared with other High Schools and Collegiate Institutes, of the length of time each such High School or Collegiate Institute is kept open, of the daily average attendance of pupils at such High School or Collegiate Institute, and of their proficiency in the various branches of study named in the programme of studies and general regulations prescribed according to law for High Schools and Collegiate Institutes."

TORONTO, 10th April, 1875.

SIR,—Having carefully considered the resolutions of the Council of Public Instruction communicated to us in your letter of 8th February,* we have the honour to lay before you the results of our deliberations on the important questions submitted for our consideration.

1. THE PRINCIPLE OF PAYMENT ACCORDING TO RESULTS.

After a thorough discussion of the various methods that have been proposed to give effect to the law on this point, we venture to submit a scheme which, combining the advantages of several of those hitherto suggested, will, we are convinced, prove at once prac-

* *Extract from a Report of a Committee, adopted by the Council of Public Instruction, 2nd February, 1875.*
1. That with respect to the recommendation of the High School Inspectors, as to the payment of the grant to the Schools on the *Results*, it is desired that the opinion of the Inspectors may be obtained as to whether the following plan would not be practicable, viz.:—to pay the schools at a much smaller rate per pupil in the lower classes. The Committee suggest that this may be preferable to dividing the *Schools* into classes, according to their merits, and paying the whole of the schools of one class at a uniform rate per pupil, and the schools of a higher class at a higher rate.

2. The Committee, having considered the recommendation of the Inspectors as to the number of masters required in the larger High Schools, in which they desire a considerable increase in the number of teachers, resolved to ask the Inspectors whether any modification of their views has occurred, or whether they still regard that large increase as essential to the welfare of the Schools, particularly if the alterations are made in the Programme, as desired.

3. The Inspectors are also to be asked for special recommendations as to the alterations required in the Programme, which they report as wanting in simplicity and elasticity.

ticable and effective. We propose that the Legislative Grant for High Schools be distributed as follows :—

I. A part in the payment of a fixed allowance to each School as at present, in order that the smaller Schools may be assured of a certain degree of stability.

II. A part on the basis of average attendance ; that each School receive, per unit of average attendance, a sum equal to what is paid per average unit of attendance to the Public Schools.

III. A part on the results of *Inspection*—that the sum (say) of ten thousand dollars be distributed among the Schools according to their efficiency as determined by the Report of the High School Inspectors.

IV. A part on the results of a uniform written examination in the subjects of the Second Form work as at present prescribed.

There is already a Primary, or Entrance examination ; the one now proposed assumes that pupils have completed at least half the High School curriculum ; it may, accordingly, be conveniently termed the “ Intermediate ” examination.

As this solution of a most important problem has not hitherto been placed before you in its entirety, we shall make a few observations on each of these heads, in order to present the essential features of the scheme in as clear a light as possible.

I. It is proposed that the present fixed allowance of \$400 to each School be continued. We have already recommended the closing of a few Schools that are never likely to do High School work ; but with these exceptions, it seems desirable that the remaining Schools should be assured of a certain degree of stability. Accordingly, the plan we submit—

(1.) No existing School is threatened with extinction, nor is the position of any School even weakened. On the contrary,

(2.) Not only are the existing interests of the smaller Schools carefully protected, but the position of such Schools may be largely improved, since it is plain that, in addition to the present minimum allowance,

(a) Every school must receive something from that portion of the Legislative Grant which it is proposed to distribute on the basis of average attendance.

(b) Every School that does its work *well*, whether that work pertain to the lower or to the higher Forms, will receive an additional sum from that of the Grant which it is proposed to distribute on the results of *Inspection*.

(c) Every High School, worthy of the name, will be able to do some *bona fide* High School work, and according to the amount of such work honestly done, it will receive an additional allowance from that part of the Grant which it is proposed to distribute on the results of the “ Intermediate ” examination.

II. It is proposed to distribute a part of the Grant on the basis of *average attendance*.

Each High School should receive a grant per unit of average attendance equal to the grant per unit of average to the Public Schools.

At present the annual grant per unit to the Public Schools is about *one dollar* ; to the High Schools about *sixteen dollars*. As a consequence, the Public Schools are injuriously depleted of their “ advanced ” pupils to increase the numbers in the High Schools ; and thus, in some instances, the latter are found crowded with pupils who require only an ordinary Public School education, and who do not remain sufficiently long in the High Schools to receive any of the “ higher education ” which is the proper function of these schools to furnish. This evil has been markedly exhibited in London, St. Catharines, and Hamilton : we may add that the evil is on the increase. It is evident that, in self-protection, other important places must speedily follow the same pernicious course ; and thus the Public Schools in the principal centres of population will be immeasurably injured, while the High Schools must suffer a serious degradation, vainly attempting at once to discharge the high trust committed specially to them, and to usurp the proper functions of the Public School.

We are strongly of opinion, that if the plan we propose be adopted, it will, at least to a very great extent, prove a remedy for the serious evils flowing from the present system, inasmuch as

(1.) The strong temptation unduly to deplete the Public Schools, in order to swell the number in the High Schools, and thereby secure a larger apportionment from the Legislative Grant, will be very greatly weakened, if not wholly removed; for

(a.) Since a pupil in the High School will be worth no more to the municipality than he will be in the Public School, School authorities will not, as now, be anxious to remove from the Public Schools, those pupils who require only a Public School education, and who cannot remain long enough in the High School to pass the "Intermediate" examination, which alone can result in pecuniary advantage; besides,

(b.) If such pupils be drafted in large numbers into any High School, there necessarily follows a degradation, which must seriously diminish its chances of securing a handsome dividend from that portion of the Grant which will depend on the results of inspection.

III. It is proposed to distribute a part of the grant on the results of inspection.

The sum of (say) *ten thousand dollars*, should be distributed amongst the Schools according to their efficiency, as determined by the Report of the Inspectors.

On this we remark—

(1.) Thorough inspection is admitted to be absolutely essential; but it does not accomplish its important purposes, unless it bestows on efficiency a pecuniary reward, and visits inefficiency with a pecuniary penalty. Teachers and School authorities should understand that substantial advantages depend on the results of the personal examination of the Schools by the Inspectors. This principle is recognized in the English, Irish and Scottish systems of inspection; its practical application in Ontario, will, we are persuaded, be attended with most satisfactory results.

(2.) This part of the plan is the necessary supplement of the two written examinations, viz: the "Primary" or Entrance Examination, already established, and the "Intermediate" examination, which it is proposed to establish. Written examinations are important, perhaps necessary, in a thoroughly effective system of inspection; but they are not *sufficient*; and we are confident that, unless other important elements which cannot be determined by written examinations, be taken into account in some such manner as we propose, the value of inspection as a means of securing increased efficiency, will be very greatly impaired. We think this part of the plan is essential to the entire scheme. For

(a) It will greatly counteract that tendency to mere "cramming," which is fostered to a greater or less degree by written examinations.

(b) It will take into account certain elements in school efficiency, as indicated (in 3) below, which are of paramount importance, but which find no recognition in the comparatively inadequate test of written examinations.

(c) It will take into account the character of the work done between the limits fixed by the Entrance examination and the Intermediate examination, and thus bestow reward for faithful work done in the *lower forms*.

(d) It will take into account the higher work *i. e.* the work done beyond the limit fixed by the "Intermediate" examination, and thus supplement the written examination in determining the scholarship in the higher forms of any school.

(3.) In classifying the Schools (a classification which may or may not be made public) with a view to the distribution of the part of the Grant which it is proposed to apportion on the results of inspection, account ought to be taken of the following:—

(a) School accommodation, condition of School premises, general educational appliances, (maps, apparatus, &c).

(b) Number of masters employed, as compared with the number of pupils and classes, qualifications of masters, character of the teaching, &c.

(c) The character of the work done between the two limits already mentioned; so that any School which, owing to the operation of special causes, may prepare but few pupils to pass the "Intermediate," will nevertheless be rewarded for the thorough work which it may do below this higher limit.

(d) The quantity and quality of the work which may be done beyond the higher limit, *i. e.*, by those pupils who shall continue their studies in the higher course prescribed for those who pass the Intermediate examination.

(e) Government, discipline, general *morale*.

IV. It is proposed that a part of the Grant shall be distributed on the results of an "Intermediate" examination of the nature following:—

(1.) This examination should be instituted at a point about midway between the beginning and the end of the High School course, for promotion from the lower to the upper forms. It should, on the whole, be equal, in point of difficulty, to that which candidates for second class certificates now undergo. Pupils that pass this examination would form what may be called the UPPER SCHOOL; while those that have not passed it would form what may be called the LOWER SCHOOL, in any High School or Collegiate Institute.

(2.) Candidates for promotion from the Lower School to the Upper School should be examined in English Grammar and Etymology, Reading, Dictation, Composition, Writing, Arithmetic, Euclid, Algebra, English and Canadian History, Geography, and in ONE of the following branches, or *groups*:—

- (a) Latin.
- (b) French.
- (c) German.
- (d) Chemistry, Botany, and Drawing.
- (e) Natural Philosophy, Physiology, and Book-keeping.

In order that Masters may not be compelled to teach the six subjects in (d) and (e) concurrently, papers in these *groups* should be set for the examinations alternately, *i. e.*, papers should be set in group (d) at the examination for the *first* half of each year, and papers in group (e) at the examination for the *second* half.

(3.) That part of the grant which is proposed to distribute on the results of this "Intermediate" examination, should be apportioned on the basis of the average daily attendance of the pupils in the *Upper Schools*, it being understood that, in every case, pupils passing the "Intermediate," are to be regarded as having been admitted to the Upper School at the beginning of the half year in which they pass such examination.

(4.) It will be necessary to remodel the Programme, and to appoint examiners to assist the Inspectors in reading the answers at the "Intermediate" examination.

We have now placed the essential features of the scheme before you; but it may not be inappropriate to add a few explanations ou—

- (1) The "*Intermediate*" examination;
- (2) The *necessity of assistant examiners*;
- (3) The proposed change in the Programme; and
- (4) An illustration of the working of the plan.

(1.) The *Intermediate* examination should be held in June and December of each year, at the time fixed for the entrance examination.

The questions should be prepared by the High School Inspectors (or by the Central Committee), and sent under seal to the Public School Inspectors. The Public School Inspectors or their substitutes who (should in no case have any connection with the Schools to be examined) should alone be responsible for the proper conduct of the examinations. The answers of candidates should be sent to Toronto, to be read and valued by the High School Inspectors, or by sub-examiners acting under their supervision. [The Inspectors recommended that "any pupil that passes the University Matriculation Examination should be considered as having passed the Intermediate." This clause was not concurred in by the Council.]

(2.) The High School Inspectors would require assistance in reading the answers of candidates at the *Intermediate*. We could prepare the questions, but we could not, unassisted, read and value the answers. About *fourteen* papers would have to be prepared—of which each candidate would be required to answer about *ten*. There would probably be 800 candidates at the first examination, and therefore *eight thousand* papers to be read and examined. It is clear, therefore, that sub-examiners to assist the Inspectors are a *sine quo non*. These might be appointed by the Council of Public Instruction, on the recommendation of the Inspectors, and paid by the Department. For the first examination *six* sub-examiners would be required, and the expense would be about *three hundred dollars*. In order somewhat to lighten the labour of examination, it is proposed to make certain branches *test* subjects. It

would, accordingly, be expedient to reject, without further examination, any candidate who should fail to make *forty per cent.* in any one of the following subjects:—English Grammar, Dictation, History, Geography, Arithmetic, Algebra, Euclid; these subjects would therefore be read *first*.

(3.) A change in the Programme, or more properly, a re-arrangement of the subjects of the Programme, is necessarily involved.

Instead of the fixed amount of work at present prescribed for each form, we suggest that the Council should prescribe the subjects of study and the amount to be done in each subject in the Lower School, and in the Upper School respectively, leaving it to the local authorities to decide (subject to the approval of the High School Inspectors), according to the varying circumstances of the Schools, the order in which the subjects should be taken up, the amount of work to be done in a given time, and the number of classes to be carried on at once. We have no doubt that these changes in the Programme would be a very great improvement on the existing arrangement. It has been found that the formal distinction between the English and the Classical Course cannot in practice be maintained; that the sharp division into four forms cannot be effected; and that too many subjects and too many classes have to be carried on concurrently.

The plan we propose leaves a good deal (but in our opinion not too much), to the discretion of the masters, as regards the subjects to be taken up, and the classes to be carried on during any term.

While sacrificing nothing important, it will remove, we venture to hope, the evils resulting from an impracticable classification, and a too extensive curriculum. We submit herewith an outline of the new arrangement of the Programme, which, if generally approved by the Council, we should wish fully to elaborate for publication.

(4.) Illustrations of the working of distribution on proposed *combined* plan:—

(a) The High School Grant is (say) \$72,000; this would be distributed as follows:

I. 106 Schools receive a minimum of \$400 each.....	\$42,000
II. <i>One dollar</i> per unit of average attendance (about 5,000).....	5,000
III. Sum to be apportioned on report of the Inspectors	10,000
IV. Balance to be distributed on results of intermediate examination.....	14,000
	\$72,000

The apportionments I and II present no difficulty whatever. The apportionment in III would be determined by the rank obtained by the School. And apportionment IV would simply require the average attendance of pupils in the Upper School to be kept separate in the half-yearly report. Thus the *distribution* of the Grant, on the proposed plan, would entail on the Department little or no increase of labour.

(b.) Let us take the case of a School having an average attendance of *forty*, and regarded by the Inspectors as one of the *second* class. Assume that, for the whole Province, the average attendance of pupils in the Upper Schools would be 240, and the School in question would have an average attendance of *eight* in the Upper School—then the probable apportionment would be:—

I. Minimum grant	\$400
II. <i>One dollar</i> per unit of <i>total</i> average attendance.....	40
III. Awarded according to rank of the School	180
IV. Average attendance (8) in Upper School.....	240
	\$860

(c) Take the case of a well equipped Collegiate Institute with an average attendance of seventy, and ranked in the *first* class. Assume the average attendance in the Upper School to be *twenty*. Then the probable result would be made:—

I. Minimum grant.....	\$400
II. One dollar per unit of total average.....	70
III. Awarded on account of rank.....	300
IV. Average attendance in Upper School.....	600
	Total.....
	\$1,370

(d) Take the case of one of the lowest class Schools, having none in the Upper School. Assume its *total* average attendance to be twenty. Then the probable result would be:—

I. Minimum	\$400
II. Total average attendance	20
III. On rank of School.....	50
IV. Average attendance in Upper School.....	00
	Total.....
	\$470

The School might be so inefficient that nothing could be allowed on III.; its apportionment would then be \$420.

In Conclusion: The principle difficulty in the way of the practical working of the proposed scheme is, the labour attending the intermediate examination. This can be surmounted by the appointment of sub-examiners, at an expense quite insignificant when compared with the desirable objects to be attained.

After repeated and careful consideration of the subject, and after consulting with some of the best masters in the Province, we state with confidence our opinion that the proposed solution of a difficult and important problem will, if fairly carried out, be attended with most satisfactory results.

It will give effect to the principle of payment by results without injuriously affecting the position of the smaller schools; by lessening the importance of mere numbers, it will improve the High Schools, and prevent the degradation of the Public Schools; it will stimulate the masters by a direct pecuniary inducement, not as heretofore to *prepare* pupils for *entrance*, but to PERFORM WELL THE WORK PROPERLY PERTAINING TO HIGH SCHOOLS; it will show the country what Schools are really doing High School work, and what nominally High Schools are doing only Public School work, and will thus ultimately force the latter class to become what they profess to be, or give way to more efficient *Public Schools*; it will, we think, give a more powerful impetus to the progress of the High Schools than anything else that has yet been devised; and thus, by increasing the efficiency of the High Schools, it will exert no small influence for good on the entire educational system of the country.

Upon the other points to which our attention has been called by the Resolutions, but little need be said after the preceding statement.

With regard to the recommendation made in our Report for 1873, "as to the number of teachers to be employed in the larger High Schools," and Collegiate Institutes, we are of opinion that, should the suggestions made in this letter be adopted, the present tendency to swell the numbers in the High Schools will be, in a great measure, arrested, and that, therefore, it will not be necessary to take immediate action in the matter.

But if the present system is to continue, we adhere to the opinions expressed in the recommendation to which reference is made.

As to "specific recommendations regarding the alterations required in the Programme," we have already given them in the preceding pages, and respectfully refer you also to the *outline* of the proposed Programme herewith submitted.

(Signed)

J. A. McLELLAN.
J. M. BUCHAN.
S. ARTHUR MARLING.

High School Inspectors.

NORMAL SCHOOL, TORONTO.

GENERAL REGULATIONS AND COURSE OF STUDY.

(Adopted by the Council of Public Instruction.)

I. The sole object of this School is to prepare students for the profession of Teacher; and to this end, students have, in addition to the lectures, the advantage of practice in the Model School under the direct supervision of the Principal and Masters of the Normal School, and the teachers of the various Divisions.

II. In future there shall be but one Session annually.

The Session shall commence on the 15th September, and close on 15th July, with vacation from the third Wednesday in December to the second Tuesday in January; and from the Wednesday before, to the Tuesday after Easter, inclusive.

[If the day of opening fall on Sunday, the Session shall begin on Monday.]

III. The School shall consist of two Divisions. The work of the Second Division shall be entirely with a view to Second Class Certificates, while the First Division shall be prepared for First Class Certificates.

1. The Second Division shall be divided into two sections. The Junior Section shall comprise students who, having passed the entrance examination, are preparing for Second Class Certificates grade B. The Senior Section shall comprise (1) students who are preparing for Second Class Certificates, grade A, having already passed through the Junior Section and obtained Grade B Certificates; (2) those who have obtained grade B, granted by County Boards, and passed a special examination in Arithmetic, Algebra, and Natural Philosophy within certain limits; (3) lastly, those who have passed the entire entrance examination for this Section.

2. The First Division shall contain (1) the students who have passed through the Second Division and obtained Second Class Certificates, grade A; and (2) those who hold Second Class grade A certificates granted by County Boards, provided they can pass an examination (within specified limits) in Natural Philosophy, Algebra, and Euclid.

IV. Applicants for admission to the Normal School, if females, must be seventeen years of age; if males, eighteen years.

V. Applications for admission accompanied with certificate of moral character, dated within three months of its presentation, signed by a clergyman or member of the religious persuasion with which the applicant is connected, must be made at the Department of Education, on the 15th day of September of each year. No application shall be received, if made after the 16th September, but if the 15th September falls on Sunday, applications will be received on the 16th and 17th.

VI. Candidates must pass the prescribed entrance examination, sign a declaration of their intention to devote themselves to the profession of School-teaching, and state that their object in coming to the Normal School is to qualify themselves better for the important duties of that profession.

VII. There shall be examinations in the different subjects of study at stated intervals during the Session, and any student failing at these examinations, may be placed in a lower section or division.

VIII. Immediately before the close of the Session, there shall be a special examination of those students who have failed at previous examinations, or have lost, through illness or otherwise, any particular examination.

IX. The Principal may, after consultation with his colleagues, remove from the roll the name of any student who shows, by general demeanour, by lack of scholarship, or by his record in the Model School, that he has no aptitude for the profession of a teacher.

X. Upon these conditions, candidates shall be admitted to the advantages of the Institution without any charge, either for tuition or the use of the Library.*

XI. The teachers in training must lodge and board in the city, in such houses and under regulations approved of by the Council of Public Instruction,†

* The books which may be required to use in the School are supplied at a reduced rate.

† The cost of board ranges from \$2 to \$3 per wee.

XII. It is expected that the students will, by their demeanour in the class-rooms and in the waiting-rooms, as well as elsewhere, show that they are alive to the important work that lies before them.

PRACTICE IN MODEL SCHOOL.

The classes detailed for practice in the Model School, visit the school and teach for a definite period under the direct supervision of the Divisional Teachers, who are the critics of work done. The leader is responsible for the distribution among the members of the class, of the lessons that have been assigned by the teachers of the respective divisions of the Model School. Each sub-division of the class is assigned to a particular division, and thus each section and each division passes through the hands of the teacher-in-training. From time to time a general criticism is made by the Principal before the whole school, and a special criticism with the individual students. These criticisms are quite distinct from those referred to above, which are made at the time or immediately after the recitation.

I.—ENTRANCE EXAMINATION FOR SECOND DIVISION.

SUBJECTS.	The applicant must—
SPELLING	Spell correctly. The written examination papers will be read with special regard to spelling.
WRITING	Write legibly and neatly.
ETYMOLOGY.....	Know the <i>Prefixes</i> and <i>Affixes</i> , and the more important Greek and Latin <i>Root Words</i> .
GRAMMAR	Know the elements and be able to parse with application of Rules any prose sentence. Be able to analyze any ordinary prose passage from the Readers. Applicants for <i>Senior Section</i> will be expected to analyze Poetry and discuss Grammatical Constructions.
COMPOSITION.....	Write an ordinary business letter, or Composition on some simple subject assigned.
GEOGRAPHY	Know the definitions, the outlines of the physical geography of AMERICA and EUROPE; the outlines of political geography generally—that of CANADA, of AMERICA, and of EUROPE more particularly.
HISTORY	Know the outlines of <i>Ancient</i> and <i>Modern</i> , and the introductory part of History of CANADA.
ARITHMETIC.....	Be acquainted with Notation, Numeration, Simple and Compound rules, G. C. M., L. C. M., Fractions and Proportion. Applicants for <i>Senior Section</i> will be examined to the end of STOCKS.
MENSURATION	(<i>Senior Section</i>)—Be familiar with the mensuration of the Square, Rectangle and Triangle.
ALGEBRA	Be acquainted with the Simple Rules. The examination for the <i>Senior Section</i> will also include <i>Factoring, Simple Equations H. C. M. and L. C. M.</i>
NATURAL PHILOSOPHY	(For <i>Senior Section</i>)—The Parallelogram of Forces; the Triangle of Forces; Resolution of Forces; Principle of Moments and Centre of Gravity.
EUCLID	(For <i>Senior Section</i>)—Book I.

II.—COURSE OF STUDY IN JUNIOR SECTION OF SECOND DIVISION.

SUBJECTS.	
READING	In Fifth Book.
SPELLING	Oral and to dictation.

SUBJECT.	
WRITING.....	Under supervision of Writing-master.
ETYMOLOGY.....	General.
GRAMMAR.....	Book work and analysis of some Standard poetical work.
COMPOSITION.....	Writing official and business letters and general composition.
GEOGRAPHY.....	Mathematical and Political.
ARITHMETIC.....	To Stocks inclusive, together with Mental Arithmetic.
MENSURATION.....	Square, rectangle, triangle and circle.
ALGEBRA.....	To Simple Equations inclusive.
NATURAL PHILOSOPHY.....	The properties of matter. Elements of Statics.
PHYSIOLOGY.....	Bones, Muscles, Digestions, Circulation and Respiration.
EUCLID.....	Book I., with Deductions. Book II.
EDUCATION.....	Attendance at lectures, with practice in Model School.
DRAWING.....	Elementary and from objects.
MUSIC.....	Practice in Vocal Music.
SCHOOL-LAW.....	With reference to Public School Teachers.
BOOK-KEEPING.....	By double entry.
CHEMISTRY.....	1. NON-METALLIC BODIES, viz.: Oxygen, Hydrogen, Nitrogen, Carbon, Carbonic Acid, Water, Atmosphere, Chlorine, Sulphur, Phosphorus, Silicon. 2. COMBINING PROPORTIONS, &C. 3. COMBUSTION, &C.
BOTANY.....	Elementary. Gray's "How Plants Grow," Part I.

III.—COURSE OF STUDY IN SENIOR SECTION OF SECOND DIVISION.

SUBJECTS.	
READING.....	In Fifth Book.
SPELLING.....	As in Junior Section.
WRITING.....	Under supervision of Writing-master.
ETYMOLOGY.....	General.
GRAMMAR.....	Advanced with special reference to Analysis.
COMPOSITION.....	On any prescribed subject.
GEOGRAPHY.....	Political and Physical.
ARITHMETIC.....	From Interest to end of text-book, with practice in Mental Arithmetic.
MENSURATION.....	Of surfaces, cubes, parallelepipeds and spheres.
ALGEBRA.....	From Simple Equations to Surds, inclusive.
NATURAL PHILOSOPHY.....	Statics (reviewed), Hydrostatics and Pneumatics.
PHYSIOLOGY.....	Nervous System, Sensory Organs.
EUCLID.....	Book II., with problems on Book I. and II. Book III.
EDUCATION.....	Attendance at lectures, with practice in Model School.
DRAWING.....	Advanced, including construction of Maps.
MUSIC.....	Practice in vocal, with instruction in theory.
SCHOOL-LAW.....	With reference to Public School Trustees.
BOOK-KEEPING.....	By double entry.
CHEMISTRY.....	Junior Section subjects reviewed and extended. The more important metals.
CHEMICAL PHYSICS.....	Heat—Sources, Effects. Liquefaction, Latent Heat, &c.
NATURAL HISTORY.....	General view of Animal Kingdom. Mammalia.
BOTANY.....	Same as in Junior Section.

IV.—SPECIAL SUBJECTS FOR ENTRANCE TO FIRST DIVISION.

SUBJECTS.	
ALGEBRA.....	A thorough examination in this subject as prescribed for Course of Study in Senior Section of Second Division.
NATURAL PHILOSOPHY.....	Statics, Hydrostatics, and Pneumatics.
EUCLID.....	Book III.

V.—COURSE OF STUDY IN FIRST DIVISION.

SUBJECTS.

READING.....	Sixth Book—prose and verse.
SPELLING.....	To dictation.
WRITING.....	Under supervision of Writing-master, with special reference to the teaching of it.
ETYMOLOGY.....	More fully pursued in Second Division.
GRAMMAR.....	Advanced, with special reference to History, Analysis, Figures and Comparative Grammar.
COMPOSITION.....	On prescribed subjects.
ENG. LITERATURE.....	Sketch of the Literature of special Eras, with critical examination of one or more works, prose and poetry.
GEOGRAPHY.....	Physical, Mathematical and Astronomical. Outlines of Geology.
EDUCATION.....	Attendance at lectures, with practice in Model School.
SCHOOL-LAW.....	With reference to Municipal Councils and Public School Inspectors.
DRAWING.....	Perspective and outline in books and on blackboard.
ARITHMETIC.....	Advanced.
ALGEBRA.....	Quadratics, Indeterminate Equations, Progression, Variations, &c., &c.
EUCLID.....	Books IV., VI., with definitions of V. and problems.
TRIGONOMETRY.....	So far as to enable students to solve Triangles and express their area in terms of their sides.
NATURAL PHILOSOPHY.....	Statics and Dynamics, treated mathematically. Hydrostatics and Pneumatics.
CHEMICAL PHYSICS.....	Heat, Light and Electricity.
CHEMISTRY.....	General principles of Chemical Philosophy Chemistry of Metalloids. Chemistry applied to agriculture and the arts.
PHYSIOLOGY.....	General view of the subject.
NATURAL HISTORY.....	General view of the Animal Kingdom, character of the principal orders, classes and genera.
BOTANY.....	Systematic Botany as given in Second Part of Gray's "How Plants Grow." Flowering plants of Canada.

TEACHERS' CERTIFICATES IN NEW TOWNSHIPS.

REGULATIONS under which Public School Inspectors may grant "Special Certificates of Qualification from time to time, to Teachers in new and remote townships, as provided in the 20th clause of 112th section of the Consolidated School Act (37 Vic. ch. 28)."

I. *Inspectors' Special Certificate—3rd Class.*

(1.) The examination of Candidates for special certificates may, at the discretion of the Inspector, be held yearly, or oftener, in new and remote townships, and when practicable, at some central point or points in such townships.

(2.) The subjects of examination for such special certificates shall be those prescribed for Third-class certificates. The questions shall be prepared by the Inspector, and may be written or printed at his discretion.

(3.) No candidate shall be eligible for examination who does not present to the Inspector a certificate of good moral character satisfactory to him, and signed by some minister or magistrate. The certificate must bear date within, at least, three months of the time of examination.

(4.) No certificate issued under these regulations shall be granted for a longer period than one year; but it may be renewed at the discretion of the Inspector, for periods not exceeding two years.

Note.—Certificates to Assistant Teachers and Monitors may be granted under the regulations already prescribed.

II. COUNTY AND PROVINCIAL CERTIFICATES.

Candidates for third class County, and second-class Provincial certificates, in new and remote townships, may be examined for such certificates under the following regulations:—

I. The examination shall be held at the same time as the County examination.

(1.) The Chief Superintendent, at his discretion, or upon the report and recommendation of an Inspector, may appoint some fit and proper person or persons, in new and remote townships, to hold an examination of such candidates for second and third-class certificates as may be reported eligible for such certificates by an Inspector.

(2.) The Chief Superintendent shall transmit under seal to the Examiner or Examiners thus appointed by him, in such way as he shall deem best, the examination papers prescribed for the July examination of Teachers.

(3.) It shall be the duty of the Examiner or Examiners thus appointed to observe the following regulations:—

Duties of Examiner.—The Presiding Examiner shall receive and be responsible for the safe keeping, unopened, of the examination papers until the day of the Examination. He shall also at the close of the examination of candidates for certificates, seal up separately, and transmit without delay, to the Inspector, the answers received from each candidate, together with all certificates of character, ability and experience in teaching, which such candidates may have presented to him. The Inspector shall see that the written answers received from the candidates for second and third-class certificates and all reports thereon, as approved by the County Board of which he is a member, together with the list of certificates issued by it, are also, as soon as possible after the close of the examinations, transmitted to the Education Department.

NOTE.—In case the new and remote townships concerned are not attached for any purpose to a county municipality having a Board of Examiners, the Inspector having jurisdiction, shall examine the answers and other papers transmitted to him by the presiding Examiner, and shall send a full report thereof (together with the answers and papers) to the Chief Superintendent for his confirmation.

(4.) *Declaration of Examiners.*—The Presiding Examiner shall transmit to the Chief Superintendent, on the first day of the examination, a copy of the following declaration, signed by himself and the other Examiners:—

“I solemnly declare that I will perform my duty of examiner without fear, favour, affection or partiality towards any candidate, and that I will not knowingly allow to any candidate any advantage which is not equally allowed to all.”

(5.) *Proceedings at Examinations.*—The Examiner shall preside at the opening of the examination; and, at nine o'clock on the morning of the first day, in the presence of such of his colleagues as may be there, and of the candidates, he shall break the seal of the package of examination papers received for that examination, from the Education Department. He shall also break open the seal of each additional packet of examination papers as required, in the presence of a co-examiner and of the candidates. He shall further see that at least one examiner is present during the whole time of the examination, in each room occupied by the candidates. He shall, if desirable, appoint one or more of his co-examiners to preside at the examination in any of the subjects named in the programme.

(6.) *Viva voce, and Special Examinations in certain subjects.*—The Examiner or Examiners shall subject the candidates to *viva voce* examinations in reading, of the result of which a record shall be made. He shall also have authority to obtain the services of special examiners in vocal music and linear drawing, in case members of the board are not familiar with these subjects. The report of the Examiners on these subjects shall be in writing

addressed to the Inspector. The payment for such services shall be certified by the Inspector to the county treasurer, or, where no county municipal organization exists, to the Education Department for payment.

(7.) *Examination to be on paper—Drawing—Music.*—The examination, except in reading, shall be conducted wholly on paper. A written examination in the *principles* of linear drawing and vocal music will be required of all candidates for second-class certificates. The further special examination of such candidates in linear drawing on the black-board, and practice of vocal music, is at the discretion of Examiner or Examiners, who, in case of its omission shall report the reasons to the Inspector.

(8.) *Information for Chief Superintendent.*—The presiding Examiner shall furnish to the Chief Superintendent through the Inspector, full returns and other information in all matters relating to the results of the examinations.

(9.) *Directions as to the Papers of Candidates.*—The Candidates, in preparing their answers, will write only on one page of each sheet. They will also write their names on one page of each sheet, and having arranged their papers in the order of the questions will fold them once across and write on the outside sheet their names, and the class of certificate for which they are competing. After the papers are once handed in, the Examiner will not allow any alteration thereof, and he is responsible for the subsequent safe-keeping of the same, until he has transmitted them, with all surplus Examination Papers, to the Inspector.

(10.) *Punctuality in Proceedings.*—The presiding Examiner must be punctual to the moment in distributing the papers, and in directing the candidates to sign their papers at the close of the allotted time. No writing, other than the signature, should be permitted after the order to sign is given. The candidates are required to be in their allotted places in the room before the hour appointed for the commencement of the examination. If a candidate be not present till after the commencement of the examinations, he cannot be allowed any additional time on account of such absence.

(11.) *Penalty for Copying—Evidence.*—In the event of a candidate copying from another, or allowing another to copy from him, or taking into the room any books, notes, or anything from which he might derive assistance in the examination, it shall be the duty of the presiding Examiner, if he obtain clear evidence of the fact at the time of its occurrence, to cause such candidate at once to leave the room; neither shall such candidate be permitted to enter during the remaining part of the examination, and his name shall be struck off the list. If, however, the evidence of such case be not clear at the time, or be obtained after the conclusion of the examination, the Examiner shall report the case to the Inspector, who shall reject the candidate if he deems the evidence conclusive.

NOTE.—All second-class certificates granted under these regulations shall be issued by the Chief Superintendent; third class-certificates shall bear the signature of the Inspector having jurisdiction.

MEETING, 7TH JULY.

No. 387.

COUNCIL ROOM, EDUCATION OFFICE, 7th July, 1875.

The Council met, pursuant to notice, at three o'clock p.m., the Very Reverend H. J. Grasett, B.D., in the Chair.

Present—The Chairman.

The Chief Superintendent of Education.

The Rev. J. Jennings, D.D.

The Honourable William McMaster.

The Right Rev. T. B. Fuller, D.D.

William McCabe, Esq., LL.B.

James MacLennan, Esquire, Q.C.

The Rev. J. Ambery, M.A.

The Rev. S. S. Nelles, D.D.

The Rev. Bishop Carman, D.D.

The Rev. J. Tabaret.

Daniel Wilson Esquire, LL.D.

Goldwin Smith, Esquire, M.A.

1. The minutes of the preceding meeting were read and approved.
 2. The following communications were laid before the Council :—
 8454. From Mr. S. C. Wood, resigning his seat at the Council.
 8519. From the Very Reverend Dr. Snodgrass, on his absence, and on an appointment in the Normal School, Ottawa.
 7912. From Mr. H. MacDougall, accepting appointment as Examiner in Drawing.
 8804. From Mr. H. Beaumont Small, Ottawa, on the requirements for admission to High Schools.
 7833. From Messrs. Adam Miller & Co., requesting permission to publish authorized books.
 9090. From Messrs. MacMillan & Co., London, on the copyright in the Arithmetic.
 9086. From Mr. Jno. Jepson, Montreal, further reference to his system of teaching music.
 9187. From the Inspector County Dundas, respecting the length of vacations.
 8612. From the Secretary of the Law Society, on the curriculum of study.
 8674. From Mr. W. M. Taackabury, Montreal, submitting his atlas.
 9310. From the Principal of the Normal School, respecting the vacation in the Model Schools.
 9661. From the Inspector, City of Hamilton, on a proposition respecting the course of study.
 9752. From the Chairman of the Central Committee of Examiners, on the results of the recent Normal School Examination.
 9790. From the Examiners in Music, on the same subject.
 - 9436, 9528. From the Principal and Masters of the Normal School, respecting the competition in the Girls' Model School for the Silver Medal.
 9771. From Mr. W. B. Hamilton, on the same subject.
 9830. From the Rev. W. R. Clark, B.A., applying for a Head Master's Certificate.
- Also a number of applications for Masterships in the Normal School at Ottawa.; where upon it was
3. *Ordered*, That a Committee of the whole on the subject of the appointments do meet at 10 o'clock a.m., to-morrow.
 4. The Report of the Committee on the Depository was then read.
 5. Professor Wilson gave notice that at the proper time he would move that the Report of the Depository Committee, with the documents appended thereto, be received and printed for the consideration of the Council.
 6. The Chief Superintendent gave notice that on the motion for the reception of the Report of the Committee on the Depository, he would move that it be referred back to the Committee, with instructions to have printed the minutes of its own proceedings, together with the correspondence between the Chairman and Chief Superintendent and Clerk of the Committee in relation to its proceedings, including the letter of the Chief Superintendent dated the 29th May, 1875.
 7. The Report of the Committee on copyright was read, and on motion of Mr. MacLennan, it was
 8. *Ordered*, That the Rule requiring notice be suspended, and that the Report be adopted, and that the parties be communicated with, in accordance with the Report.
 9. The Chief Superintendent gave notice of a motion on the letters respecting the silver medal in the Girls' Model School.
 10. *Ordered*, That the letter of Mr. Small be referred to the High School Inspectors.
 11. *Ordered*, That the letter of Messrs. McMillan be referred to Messrs. MacLennan, Chief Superintendent, McMaster and Deroche.
 12. *Ordered*, That Mr. Jepson's letter, and that of the Musical Examiners, be referred to the Rev. Professor Ambery.
 13. Adjourned to three o'clock next day.

(Signed)

H. J. GRASETT,
Chairman.

MEETING, 8TH JULY.

No. 388.

COUNCIL ROOM, EDUCATION OFFICE, 8th July, 1875.

The Council met, pursuant to adjournment, at three o'clock, p.m., the Very Rev. H. J. Grasett, B.D., in the chair.

Present.—The Chairman.

The Chief Superintendent of Education.

The Rev. J. Jennings, D.D.

His Grace The Most Rev. J. J. Lynch, D.D.

The Honourable W. McMaster.

The Right Rev. T. B. Fuller, D.D.

William McCabe, Esquire, LL.B.

John MacLennan, Esquire, Q.C.

The Rev. J. Ambery, M.A.

The Rev. S. S. Nelles, D.D.

The Rev. Bishop Carman, D.D.

The Rev. J. Tabaret.

Daniel Wilson, Esquire, LL.D.

Goldwin Smith, Esquire, M.A.

1. The minutes of preceding meeting were read and approved.

2. The following communications were laid before the Council :—

From the Rev. J. Douglass, Cobourg, respecting one of the applicants for appointment from Mr. H. McKay, on an appointment.

10003. From Mr. R. A. Robertson, B.A., applying for a head master's certificate.

From Messrs. J. Campbell & Son, submitting a History of Canada.

3. Professor Smith gave a notice of motion respecting the Depository.

4. Professor Wilson moved, seconded by Professor Smith, that the Report of the Depository Committee, with the documents appended thereto, be received and printed for the consideration of the Council.

5. Moved in amendment by the Bishop of Niagara, seconded by the Rev. Dr. Nelles, that this Council conceive, on further consideration, that the appointment of a Committee on the question of having a Depository in connection with this Department is *ultra vires*, and consequently that the Council cannot accept the report submitted by the said Committee; regrets that the Council should have given the gentlemen of the Committee so much trouble, under the circumstances of the case, revokes said order, and discharges the Committee, with thanks to them and the officers of the Department for the attention given to the subject.

The amendment having been put, the vote was taken as follows :—

YEAS.

NAYS.

The Chief Superintendent.

The Rev. Dr. Jennings.

The Archbishop of Toronto.

The Hon. W. McMaster.

The Bishop of Niagara.

The Rev. Dr. Nelles.

The Rev. Bishop Carman.

The Rev. J. Tabaret.

Professor Smith.—*Nine.*

Mr. McCabe.

Mr. MacLennan.

Rev. Professor Ambery.

Professor Wilson.—*Four.*

Amendment carried.

On motion of Professor Goldwin Smith, it was then

Ordered, That the Depository, through which the Government, in place of the book-sellers, supplies books for school libraries and prizes, being an exceptional institution, beyond the ordinary province of government, and one by which the trade with which it

interferes feels itself aggrieved ; it is desirable, in the opinion of the Council of Public Instruction, that the Government should, from time to time, specially inquire into it, in order to satisfy themselves and assure the public that the reasons for its establishment are still in force, that it fulfils the purpose for which it was intended, that it does not unnecessarily interfere with the regular course of trade, and that its management, financial and general, is unexceptionable.

That the chairman be requested to communicate the above resolution to the Honourable the Attorney-General.

8. At six o'clock, p.m., the Council adjourned to eight o'clock.

9. At eight o'clock the Council resumed.

10. A telegram from the Principal of the Normal School was read on the subject of the Silver Medal granted by His Excellency, for the Girls' Model School.

11. The rule requiring notice was again suspended, and it was

Ordered, That, Mr. Sheard having declined to act as scrutineer, Mr. John Macdonald, M.P., be requested to act in that capacity ; and if he finds it impracticable to accept the duty, that the Rev. Septimus Jones, M.A., be desired to be scrutineer.

12. *Ordered*, That the letters of Mr. Tackabury and Messrs. A. Miller & Co., be referred to the Text-Book Committee.

13. *Ordered*—That the Chief Superintendent be requested to reply to the Inspector of the County of Dundas, conveying the opinion of the Council on the subject to which his letter alludes.

14. *Ordered*—That in view of the large amount of labour devolving upon Mr. Alexander Marling, as clerk of the Council and its committees, and the very faithful and efficient manner in which he has discharged these various duties, this Council respectfully and earnestly recommends the Government to make an allowance to Mr. Marling of a sum not less than at the rate of two hundred dollars per annum, including the current year.

15. The Council proceeded with the appointment of Masters in the Normal School at Ottawa, and it was

Ordered—That Mr. William R. Riddell, B. A., Mathematical Master in the Cobourg Collegiate Institute, be appointed Mathematical Master.

That Mr. John Gibson, B. A., Professor of Classics and Lecturer in Natural History and Geology, in Albert College, Belleville, be appointed Science Master.

That Mr. John A. McCabe, Master of the English Department in the Provincial Normal School, Truro, Nova Scotia, be appointed English Master.

That Mr. McCabe, English Master, be appointed Principal.

That the salaries be the same as those now attached to the corresponding positions in the Normal School at Toronto.

16. *Adjourned* to ten o'clock to-morrow.

(Signed) H. J. GRASSETT,
Chairman.

MEETING, 9TH JULY.

No. 389.

COUNCIL ROOM, EDUCATION OFFICE, 9th July, 1875.

The Council met, pursuant to adjournment, at ten o'clock, a.m., the Very Rev. H. J. Grasett, B.D., in the chair.

Present—The Chairman.

His Grace The Most Rev. J. J. Lynch, D.D.

The Honourable W. McMaster.

William McCabe, Esquire, LL.B.

The Rev. J. Ambery, M.A.

The Rev. S. S. Nelles, D.D.

The Rev. Bishop Carman, D.D.

Daniel Wilson, Esquire, LL.D.

1. The Minutes of the preceding meeting were read and approved.
2. The Rule requiring notice having been suspended, it was
Ordered—That the General Regulations and Course of Study in force in the Normal School at Toronto, shall apply to the contemplated Normal School at Ottawa, under such instructions as the Chief Superintendent may find it necessary, from time to time, to give.
3. *Ordered*, That Mr. E. B. Cope be appointed clerk of the Normal School at Ottawa, with a salary of \$800 per annum.
4. *Ordered*, That the letter of the Inspector of Hamilton be referred to the Committee on Regulations and Text Books.
5. *Ordered*, That Certificates of eligibility as Head Masters of High Schools be granted to Messrs. Clark and Robertson.
6. *Ordered*, That the appointment to the Principalship and Masterships of the proposed Normal School at Ottawa be understood, according to the usage in the Toronto Normal and Model Schools, to be for six months on trial, from the opening of the School, the salaries to commence 1st July.
7. The minutes were read and approved.
8. *Adjourned*.

(Signed) H. J. GRASETT,
Chairman.

Certified,
ALEX. MARLING,
Clerk of the Council.

INTERIM COMMITTEE MEETING, 11TH SEPTEMBER.

No. 390.

COUNCIL ROOM, EDUCATION OFFICE, 11th September, 1875.

The Committee met, pursuant to notice, at ten o'clock, a.m., Professor Goldwin Smith, M.A., in the Chair.

Present—The Chairman *pro tempore*.
The Deputy Superintendent of Education.
The Reverend J. Ambery, M.A.
Daniel Wilson, Esquire, LL.D.

1. The Report (12,190) of the Central Committee on the examination for First Class Certificates having been read, it was

2. *Ordered*, That on the recommendation of the Central Committee of Examiners, First Class Certificates of qualification be granted as follows, and that the Provincial Medals for 1875 be awarded to the persons undermentioned :—

GRADE A.

Solomon M. Dorland	Gold Medal.
William O'Connor	First Silver Medal.
David McArdle.....	Second Silver Medal.
William Edward Sprague.....	First Bronze Medal.
Joseph Martin	Second Bronze Medal.

GRADE B.

Charles Andrew Barnes,	Archibald Lee,
James Bruce,	Samuel McAllister,
John Wesley Cook,	James McKenzie,
William Anderson Duncan,	James McLurg.
William Blackley Harvey.	

GRADE C.

Cassius Campbell,
William Clark,
John Cushnie,

Alexander Petrie,
Albert R. Pyne,
Neil Robertson.

Ordered, That Mr. Harvey's Certificate be issued in the usual form, but with permission to appeal to the Council if he thinks himself entitled to a fresh examination.

Ordered, That Mr. Martin's Certificate is granted subject to the production of satisfactory evidence of the required term of service in the profession.

The minutes were read and confirmed.

Adjourned.

(Certified) (Signed) GOLDWIN SMITH,
ALEX. MARLING, *Chairman pro tempore*,
Clerk of the Council.

MEETING, 2ND NOVEMBER.

No. 391. COUNCIL ROOM, EDUCATION OFFICE, 2nd November, 1875.

The Council met, pursuant to notice, at three o'clock, p.m., and His Grace the Most Rev. J. J. Lynch, D.D., as senior member of the Council, was appointed to take the Chair.

Present.—The Chairman *pro tempore*.

The Chief Superintendent of Education.

The Right Rev. T. B. Fuller, D.D.

The Rev. S. S. Nelles, D.D.

The Rev. Bishop Carman, D.D.

Goldwin Smith, Esq., M.A.

David Mills, Esq., LL.B., M.P.

Daniel Wilson, Esq., LL.D.

Ramsay Wright, Esq., M.A.

1. The Council adjourned to half-past seven, p.m., when the following resolution was adopted:—

2. *Resolved*. That in view of the fact that four vacancies in the Council have not been filled, it is inexpedient to proceed to business, and that the Council do now adjourn.

3. *Adjourned*.

(Signed) + J. J. LYNCH, *Archbishop of Toronto*,
(Certified) *Chairman pro tempore*.
ALEX. MARLING,
Clerk of the Council.

INTERIM COMMITTEE MEETING, 13TH NOVEMBER.

No. 392. COUNCIL ROOM, EDUCATION OFFICE, 13th November, 1875.

The Committee met, pursuant to notice, at ten o'clock, a.m., His Grace the Most Rev. J. J. Lynch, D.D., in the Chair.

Present.—The Chairman *pro tempore*.

The Deputy Superintendent of Education.

Ramsay Wright, Esq., M.A.

1. The following communications were laid before the Committee:—

13723. From the Registrar of University College, Toronto, reporting the election of Professor Ramsay Wright, M.A., as a member of the Council of Public Instruction, in place of Professor Cherriman, resigned.

11362. From the Scrutineers, reporting the election of Professor Daniel Wilson, L.L.D., by the High School Masters, and of David Mills, Esq., M.P., by the Public School Inspectors.
11318. From the same, applying for payment for their services at the election.
12887. From Mr. Joseph Martin, Ottawa, with reply to the same by the Chief Superintendent.
12548. From the Central Committee of Examiners, recommending certain candidates for Second-class Grade A certificates, and the candidates' application.
12152. From the Secretary of the Examiners, County of Elgin, on Mr. Woodworth's certificate.
12720. From the Examiners, County of Norfolk, on the teaching of Reading, and Examinations thereon.
12927. From the Chairman of the Central Committee, reporting on the above.
13189. From the same, with a recommendation on examinations in History for First-class candidates—"That selected portions of the works of eminent historians, in which important periods are treated in detail, should be prescribed, and that candidates should be expected to master these thoroughly."
14274. From the Inspector of East Victoria, on Public School Teachers' Examinations in Writing.
- 12247, 13904. From the High School Inspectors, on the Interim Examination and revised Programme.
11243. From the Examiners, County of Carleton, on increasing the stringency of the Examinations for Third-class certificates in certain subjects.
11242. From the Examiners, County of Huron, on the same subject.
- Also letters from the Governor-General's Secretary to the Principal of the Normal School and Masters of the Model School, on the subject of the medals presented by His Excellency.

2. *Ordered*, That the reply sent to Mr. Joseph Martin's application be approved.

3. *Ordered*, That the recommendation of the Inspector of East Victoria, be referred to the Central Committee for their opinion.

4. *Ordered*, That, with respect to the recommendation of the County Boards of Carleton and Huron, the local examiners are already authorized under the regulations to increase the stringency of the examinations but that due notice of their intention to require a certain minimum number of marks in certain subjects, should be given.

5. *Ordered*, That the recommendation of the Central Committee on the examination in the subject of History, for First-class certificates, be approved, an examination in the Elements of General History having been already passed by the candidates at the competition for Second-class certificates; the new scheme to come into operation in 1877. The Committee to be requested to recommend to the Council the authors and the portions of their works on which it is proposed that the candidates shall be examined.

Ordered, That the following candidates for First-class certificates at the July examination, recommended by the Central Committee for Second-class Grade A., be awarded such certificates accordingly:—

William Carroll.

James A. Duncan.

Miles Ferguson.

William John Hallett.

Samuel Hicks.

William Johnson.

Nicholas Kellett.

Rev. Hugh Lamont

Alexander McTavish.

Henry Richardson.

Templeton C. Robinson.

George Sharman.

James Slater.

James Wilson.

Esther E. Montgomery.

7. *Ordered*, That the recommendation of the Central Committee on the resolution adopted by the Examiners for the County of Norfolk, on the teachings and examinations in the subject of Reading, be approved, and communicated to the Principals of the Normal Schools, and be also published in the *Journal of Education* for the information of examiners generally.

8. *Ordered*, That with reference to a previous communication from Mr. W. B. Hamilton,

Toronto, as it appears from the letters of the Governor-General's Secretary, that the Medals granted by His Excellency were to be awarded "according to the wishes of the Principal or Masters," the Council find that the matter is left by His Excellency in the hands of those gentlemen.

9. *Ordered*, That the revised High School Programme, recommended by the High School Inspectors, having been fully considered, be now approved and adopted, as follows:—

REVISED PROGRAMME FOR HIGH SCHOOLS.

N.B.—Instead of a fixed amount of work for each Form, the Council prescribes the subjects of study, and the amount to be done in each subject in the Lower School and in the Upper School respectively; leaving it to the local authorities to decide (subject to the approval of the High School Inspectors) according to the varying circumstances of the Schools, the order in which the subjects shall be taken up, the amount of work to be done in a given time, and the number of classes to be carried on at once.

LOWER SCHOOL.

GROUP A.—*English Language*.—Review of Elementary Work; Orthography, Etymology and Syntax; Derivation of Words; Analysis of Sentences; Rendering of Poetry into Prose; Critical Reading of portions of the Works of Authors of the Eighteenth and Nineteenth Centuries, to be prescribed from time to time by the Council of Public Instruction; * Composition—the Framing of Sentences; Familiar and Business Letters; Abstracts of Readings or Lectures; Themes;—generally, the Formation of a good English Style; Reading, Dictation, and Elocution, including the learning by heart and recitation of selected passages from Standard Authors.

GROUP B.—*Mathematics*.—(a) Arithmetic, Simple and Compound Rules; Vulgar and Decimal Fractions; Proportion; Percentage, in its various applications; Square Root.

(b) Algebra—Elementary Rules; Factoring; Greatest Common Measure; Least Common Multiple; Square Root; Fractions; Surds; Simple Equations of one, two, and three unknown quantities; Easy Quadratics.

(c) Geometry—Euclid, Books I. and II., with easy exercises; Application of Geometry to the Mensuration of Surfaces.

(d) Natural Philosophy—Composition and Resolution of Forces; Principle of Moments, Centre of Gravity; Mechanical Powers, Ratio of the Power to the Weight in each; Pressure of Liquids; Specific Gravity and Modes of Determining it; the Barometer, Syphon, Common Pump, Forcing Pump and Air Pump.

GROUP C.—*Modern Languages*.—(a) *French*: The Accidence and Principal Rules of Syntax; Exercises; Introductory and Advanced French Reader; Retranslation of easy passages into French; Rudiments of Conversation.

(b) *German*: The Accidence and the Principal Rules of Syntax; Exercises; Adler's Reader, 1st, 2nd and 3rd Parts; Retranslation of easy passages into German; Rudiments of Conversation.

GROUP D.—*Ancient Languages*.—(a) *Latin*: The Accidence and the Principal Rules of Syntax and Prosody; Exercises; Cæsar, *De Bello Gallico*, Book I.; and Virgil, *Æneid*, Book II., vv. 1-300; Learning by heart selected portions of Virgil; Retranslation into Latin of easy passages from Cæsar.

(b) Greek—Optional.

GROUP E.—*Physical Sciences*.—Chemistry; A course of experiments to illustrate the nature of Fire, Air, Water, and such solid substances as Limestone, Coal, and Blue Vitriol; Hydrogen, Oxygen, Nitrogen, Carbon, Chlorine, Sulphur, Phosphorus, and their more important Compounds; Combining Proportions by weight and by volume; Symbols and Nomenclature.

* For 1876, Gray's "Elegy" and Sir Walter Scott's "Lady of the Lake" have been prescribed. Candidates will be expected to show that they have read the whole of the latter poem, but the questions will be based mainly on Cantos V. and VI.

GROUP F.—*History and Geography*.—(a) Leading events of English and Canadian History, also of Roman History to the death of Nero.

(b) A fair course of Elementary Geography, Mathematical, Physical, and Political.

GROUP G.—*Book-keeping, Writing, Drawing, and Music*.—(a) Single and Double Entry; Commercial forms and usages; Banking, Custom House, and General Business Transactions.

(b) Practice in Writing.

(c) Linear and Free-hand Drawing.

(d) Elements of Music.

☞ An option is permitted between (i.) Latin; (ii.) French; (iii.) German, and (iv.) Natural Philosophy, Chemistry, and Book-keeping.

UPPER SCHOOL.

GROUP A.—*English Language*.—Critical Reading of portions of the works of Authors of the Sixteenth and Seventeenth Centuries to be prescribed from time to time by the Council of Public Instruction; * Composition, Reading, and Elocution; the subject generally, as far as required for Senior Matriculation with Honours in the University.

GROUP B.—*Mathematics*.—Arithmetic: The Theory of the Subject; Application of Arithmetic to complicated business transactions, such as Loans, Mortgages and the like.

(b) Algebra: Quadratic Equations, Proportion, Progression, Permutations and Combinations, Binomial Theorem, etc., as far as required for Senior Matriculation with Honours.

(c) Geometry: Euclid, Books I, II, III, IV, Definitions of Book V, Book VI, with exercises.

(d) Trigonometry, as far as required for Senior Matriculation with Honours.

(e) Natural Philosophy, Dynamics, Hydrostatics, and Pneumatics.

GROUP C.—*Modern Languages*.—(a) French: Grammar and Exercises; Voltaire, Charles XII, Books VI, VII, and VIII; Corneille, Horace, Acts I and II; De Stael, L'Allemagne, 1^{re} Partie; Voltaire, Alzire; Alfred de Vigny, Cinq-Mars; Translation from English into French; Conversation.

(b) German: Grammar and Exercises; Schiller, Das Lied von der Glocke, and Neffe als Onkel; Translation from English into German; Conversation.

GROUP D.—*Ancient Languages*.—(a) Latin: Grammar; Cicero, for the Manilian Law; Virgil, Æneid, Book II; Livy, Book II, Chaps. I to XV inclusive; Horace, Odes, Book I; Ovid, Heroides, I and XIII; Translation from English into Latin Prose, etc., as far as is required for Senior Matriculation with Honours.

(b) Greek: Grammar; Lucian, Charon and Life; Homer, Iliad, Book I; Xenophon, Anabasis, Book I, Chaps. VII, VIII, IX, X; Homer, Odyssey, Book IX, etc. as far as required for Senior Matriculation with Honours.

GROUP E.—*Physical Science*.—(a) Chemistry: Heat—its sources; Expansion; Thermometers—relations between different scales in common use; Difference between Temperature and Quantity of Heat; Specific and Latent Heat; Calorimeters; Liquefaction; Ebullition; Evaporation; Conduction; Convection; Radiation. The Chief Physical and Chemical Characters, the Preparation, and the characteristic Tests of Oxygen, Hydrogen, Carbon, Nitrogen, Chlorine, Bromine, Iodine, Fluorine, Sulphur, Phosphorus, and Silicon.

Carbonic Acid, Carbonic Oxide, Oxides and Acids of Nitrogen, Ammonia, Olefiant Gas, Marsh Gas, Sulphurous and Sulphuric Acids, Sulphuretted Hydrogen, Hydrochloric Acid, Phosphoric Acids, Sulphuretted Hydrogen, Silica.

Combining proportions by weight and by volume; General Nature of Acids, Bases and Salts, Symbols and Nomenclature.

The Atmosphere—its constitution, effects of Animal and Vegetable Life upon its composition; Combustion; Structure and Properties of Flame; Nature and Composition of ordinary Fuel.

Water—Chemical Peculiarities of Natural Waters, such as Rain Water, River Water Spring Water, Sea Water.

* For 1876 Shakespeare's Tragedy of "Macbeth," and Milton's "Il Penseroso," have been prescribed.

(b) Botany: An introductory course of Vegetable Anatomy and Physiology, illustrated by the examination of at least one plant in each of the Crowfoot, Cress, Pea, Rose, Parsley, Sunflower, Mint, Nettle, Willow, Arum, Orchis, Lily, and Grass families; Systematic Botany; Flowering Plants of Canada.

(c) Physiology: General view of the Structure and Functions of the Human Body; the Vascular System and the Circulation; the Blood and the Lymph; Respiration; the Function of Alimentation; Motion and Locomotion; Touch, Taste, Smell, Hearing, and Sight; the Nervous System.

GROUP F.—*History and Geography.*—(a) History: The special study of the Tudor and Stuart Periods; Roman, to the death of Nero; Grecian, to the death of Alexander.

(b) Geography—Ancient and Modern.

Masters will be at liberty to take up and continue in the Upper School any subject from the Lower School that they may think fit.

Every pupil must take Group A, Arithmetic, Algebra as far as Progression, History, and two other subjects from those included in Groups C, D, and E. In cases of doubt the Master shall decide. But candidates preparing for any examination shall be required to take only the subjects prescribed for such examination.

10. *Ordered*, That the Government be recommended to allow \$5 a day for each of the scrutineers while occupied in receiving the votes for members of the Council of Public Instruction.

11. The following applications for pensions from the Teachers' Superannuation Fund were approved:—

Alexander Best	Buxton,	for 15 years' service.
Nathan Bicknell	Camden East,	" 13½ "
Alexander Canning	Cookstown,	" 14 "
Jane S. Chadwick	Clifton,	" 18½ "
Margaret Cozens	Cornwall,	" 15 "
William Earngey	Gorrie,	" 16 "
James Hodgson	Yorkville,	" 18 "
William Johnston	Dixon's Corners,	" 18 "
James Joyce	Clayton,	" 13 "
Elizabeth Murray	Ottawa,	" 24 "
John McAdam	Clandeboyne,	" 30 "
John McIntyre	Paisley,	" 14 "
James Owens	Pandash,	" 23 "
John Paul	Weston,	" 14 "

13. The following applications were considered and deferred:—

Dorothea Flavelle	Peterboro'
W. H. Meredith	Toronto.
John Thomson, A.B.	Fergus.
John Anderson	Kinloss.

13. The following applications were considered and declined:—

David M. Benson	Ameliasburgh.
Daniel Wright	Craigleith.
John Sinclair	Wyandott.
R. Eward	Kingston.

14. *Ordered*, That in the case of Mr. Kingston, the Council can only allow for the time he taught in Schools under the authority of the Public School Law.

15. *Ordered*, That the protest in the matter of T. McQueen's pension be referred to the County Inspector for his report.

16. The Minutes were read and confirmed.

17. *Adjourned*.

(Signed)

† J. J. LYNCH.

Chairman pro tempore.

(Certified) ALEX. MARLING,
Clerk of the Council.

Candidates for Second Class Certificates who obtained Third Class Certificates.

MALE.

Bain, William L.
Bourne, Thomas.
Boyd, Isaac.
Brydon, Robert.
Glass, Matthew J.
Green, Thomas S.

Houston, David W.
Irwin, William.
Johnston, Robert W.
McCracken, Thomas.
McKay, William.
Pascoe, Richard.
Rae, James.

Robinson, John.
Robinson, F. Harvey.
Robinson, E. Bravender.
Sowerby, John.
Symons, William H.
Young, James Alfred.

FEMALE.

Abbott, Elizabeth A.
Baker, Emma.
Baldwin, Jennie A.
Baxter, Sophia.
Carlyle, Thomasina.
Cathcart, Caroline.
Church, Eliza Jane.
Chunie, Kate.
Comfort, Etoile.
Currie, Hannah.
Duncan, Barbara.

Foulds, Elizabeth.
Geitatz, Lizzie.
Gray, Annie.
Harrison, Annie.
Holmes, Selina Emmeline.
Jarvis, Eliza Jane.
Meldrum, Anna P.
Miller, Emma V.
Mitchell, Maggie.
McCordie, Alma.
McCredie, Emily.
McDowell, Bella.

McKellar, Nancy.
McLean, Mary E.
McLellan, Hattie.
McPhail, Sarah Ann.
Shea, Bridget.
Sileo, Fanny.
Sims, Florence.
Spence, Maggie.
Van Camp, Lauretta A.
Wilkinson, Sarah.
Windrum, Maggie.

THIRD CLASS.

MALE.

Areher, David.

Chapman, Edwin A.

Hambly, Louis Elwood.

FEMALE.

Donaldson, Elizabeth.
McGregor, Mary.

Orr, Maggie.

O'Reilly, Mary Ann.
Westland, Bertha F.

III. By the County and City Boards of Examiners.

MALE.

SECOND CLASS.

A.

Atkin, Welbern Elgin.
Bannerman, William Grey.
Black, Hugh Wellington.
Brents, Ira D. York.
Carleton, William H Simcoe.
Carswell, Thomas B. Lanark.
Caverhill, Arthur Middlesex.
Cook, Edgar M. Lennox & Addington
Cushnie, John Grey.
Darrach, John Middlesex.
Davis, Flavel Wentworth.
Edgar, Thomas A. Hamilton.
Gale, John H. Hamilton.
Gorham, Thomas A Simcoe.
Green, Thomas S. Ontario.
Haight, Franklin York.
Huff, Samuel Simcoe.
Hutt, Erasmus R. Lincoln.
Jacques, Alfred York.
Leonard, William H Ontario.
Malcolm, John Mc. N Peel.
Marshall, Donald York.
Morgan, James W. Bruce.
Morton, William C. Wentworth.
McKay, Donald Ontario.
McLain, George Hamilton.
McMillan, Alexander Middlesex.
Palmer, Levi Elgin.
Patterson, Alexander Lincoln.
Powell, Francis Carleton.
Robinson, Edward Ontario.
Robinson, Thomas H. York.
Sandbury, Robert Middlesex.
Richard, Richard Ontario.
Slater, Joseph Ontario.
Smyth, Elijah J. York.
Sowerby, John Ontario.
Squair, John Durham.
Stafford, Henry E. Elgin.
Strang, Peter Huron.
